A letter from the Director, Office of Legislative Affairs, Department of the Navy, transmitting notice of the intention of the Department of the Navy to donate a surplus UH–34D helicopter to the MIL–AERO Historical Library and Museum Association, Newport, Minn., pursuant to 10 U.S.C. 7545; to the Committee on Armed Services.

718. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–227, to provide policies relating to the provisions of day care services by the Department of Human Resources, pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

719. A letter from the Chairman, Council of the District of Columbia, transmitting a copy of Council Act No. 1–228, to provide certain exhaust emission standards and equipment requirement for motor vehicles operated in the District of Columbia, pursuant to section 602(c) of Public Law 93–198; to the Committee on the District of Columbia.

720. A letter from the Administrator, Law Enforcement Assistance Administration, Department of Justice, transmitting the second analysis and evaluation of Federal juvenile delinquency programs, pursuant to section 204(b)(5) of the Juvenile Justice and Delinquency Prevention Act of 1974; to the Committee on Education and Labor.

721. A letter from the Governor of the Canal Zone and President, Panama Canal Company, transmitting a report on the disposal of foreign excess property during calendar year 1976 by the Panama Canal Company and Canal Zone Government, pursuant to section 404(d) of the Federal Property and Administrative Services Act of 1949; to the Committee on Government Operations.

722. A letter from the Comptroller, International Boundary and Water Commission, United States and Mexico, transmitting the annual report on the agency's activities under the Freedom of Information Act during calendar year 1976, pursuant to 5 U.S.C. 552(d); to the Committee on Government Operations.

723. A letter from the Deputy Assistant Secretary of Defense (Administration), transmitting notice of two proposed new records systems for the Department of the Air Force, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

724. A letter from the Administrator of General Services, transmitting notice of a proposed new records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

725. A letter from the Administrator, National Credit Union Administration, transmitting notice of several proposed records systems for the agency, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

726. A letter from the Secretary of the Interior, transmitting a National Park Service study of the Sawtooth National Recreation Area, Idaho, pursuant to section 14 of Public Law 92–400; to the Committee on Interior and Insular Affairs.

727. A letter from the Secretary of the Interior, transmitting a plan for a coal exploration program, pursuant to section 8A(g) of the Mineral Lands Leasing Act, as amended (90 Stat. 1089); to the Committee on Interior and Insular Affairs.

728. A letter from the Acting Assistant Secretary of the Interior, transmitting the financial statements of the Colorado River storage project and participating projects for fiscal year 1976, pursuant to section 6 of the Colorado River Storage Project Act of 1956; to the Committee on Interior and Insular Affairs.

729. A letter from the Acting Assistant Secretary of the Interior, transmitting a copy of an application by the Hidalgo County Water Control and Improvement District No. 1, Edinburg, Tex., for a loan under the Small Reclamation Projects Act, as amended, pursuant to section 4(c) of the act; to the Committee on Interior and Insular Affairs.

730. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of the intention of the Department of State to consent to transfers among the Governments of Belgium, Denmark, the Federal Republic of Germany, Italy, the Netherlands, and Norway, of certain defense articles and services furnished to those Governments under the Foreign Military Sales Act for the "cooperative support stage" of the NATO Seasparrow surface missile system project, pursuant to subsections 3 (a) and (d) of the Arms Export Control Act; to the Committee on International Relations.

731. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting a report on political contributions made by Evan Dobelle, Chief of Protocol-designate with the rank of Ambassador during his tenure, and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

732. A letter from the Acting General Counsel, U.S. Arms Control and Disarmament Agency, transmitting a report on political contributions made by Paul C. Warnke, Director-designate of the Arms Control and Disarmament Agency with the rank of Ambassador, and his family, pursuant to section 6 of Public Law 93–126; to the Committee on International Relations.

733. A letter from the Administrator, Federal Energy Administration, transmitting the agency's second annual report, pursuant to section 15(c) of the Federal Energy Administration Act of 1974; to the Committee on Interstate and Foreign Commerce.

734. A letter from the Administrator, Federal Energy Administration, transmitting a

report covering the months of September and October 1976 on changes in the aggregate market shares of motor gasoline retailers, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act; to the Committee on Interstate and Foreign Commerce.

735. A letter from the Administrator, Federal Energy Administration, transmitting a report covering the month of October 1976 on changes in the refiner sales distribution and the retail market shares of selected refined petroleum products, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Allocation Act of 1973; to the Committee on Interstate and Foreign Commerce.

736. A letter from the Chairman, Securities and Exchange Commission, transmitting the 42d annual report of the Commission, covering fiscal year 1976, pursuant to section 23(b) of the Securities Exchange Act of 1934, as amended section 23 of the Public Utility Holding Company Act of 1934; section 46(a) of the Investment Company Act of 1940; section 216 of the Investment Advisers Act of 1940; section 3 of the act of June 29, 1949, amending the Bretton Woods Agreement Act; section 11(b) of the Inter-American Development Bank Act; and section 11(b) of the Asian Development Bank Act (H. Doc. No. 95–21); to the Committee on Interstate and Foreign Commerce and ordered to be printed with illustrations.

737. A letter from the Chairman, National Market Advisory Board, transmitting a report on the possible need for modifications of the scheme of self-regulation provided for in the Securities Exchange Act of 1934, as amended, so as to adapt it to a national market system, pursuant to section 11A(d)(3)(B) of the act, as amended (89 Stat. 117); to the Committee on Interstate and Foreign Commerce.

738. A letter from the Secretary, Securities and Exchange Commission, transmitting the Commission staff's report on bank-sponsored securities services, pursuant to section 11A(e) of the Securities Exchange Act of 1934, as amended (89 Stat. 117); to the Committee on Interstate and Foreign Commerce.

739. A letter from the President, National Railroad Passenger Corporation, transmitting the Corporation's annual report for fiscal year 1976, pursuant to section 308(b) of the Rail Passenger Service Act, as amended; to the Committee on Interstate and Foreign Commerce.

740. A letter from the Vice President, U.S. Railway Association, transmitting a draft of proposed legislation to authorize additional appropriations to the Association for administrative expenses during fiscal year 1978; to the Committee on Interstate and Foreign Commerce.

741. A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting copies of orders entered in cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of certain aliens, together with a list of the persons involved, pursuant to section 212(d)(6) of the act (66 Stat. 182); to the Committee on the Judiciary.

742. A letter from the Deputy Director, Administrative Office of the U.S. Courts, transmitting a draft of proposed legislation to provide for the appointment of additional judgeships for the U.S. district courts and courts of appeals, and for other purposes; to the Committee on the Judiciary.

743. A letter from the President, Legal Services Corporation, transmitting the Corporation's first annual report, covering the period October 14, 1975, through September 30, 1976, pursuant to section 1008(c) of the Economic Opportunity Act of 1964, as amended (88 Stat. 386); to the Committee on the Judiciary.

744. A letter from the secretary-treasurer, Congressional Medal of Honor Society, U.S.A., transmitting the financial report of the organization for calendar year 1976, pursuant to section 3 of Public Law 88–504; to the Committee on the Judiciary.

745. A letter from the Assistant Attorney General for Administration, transmitting a report on positions in the Department of Justice in grades GS–16, GS–17, and GS–18 during calendar year 1976, pursuant to 5 U.S.C. 5114(a); to the Committee on Post Office and Civil Service.

746. A letter from the Acting Assistant Secretary of the Army (Civil Works), transmitting a letter from the Chief of Engineers submitting a report on the Merrimack River Basin, N.H. and Mass., requested by resolutions of the Senate and House Commitees on Public Works adopted April 9, 1964, February 9, 1961, August 11, 1949, and September 29, 1949, and in response to section 8 of the River and Harbor Act of 1938; to the Committee on Public Works and Transportation.

747. A letter from the Acting Administrator, U.S. Environmental Protection Agency, transmitting a report on the 1976 survey of the costs of construction of publicly owned wastewater treatment facilities needed to carry out the provisions of the Federal Water Pollution Control Act, pursuant to sections 205(a) and 516(b) of the act; to the Committee on Public Works and Transportation.

748. A letter from the Chairman, Architectural and Transportation Barriers Compliance Board, transmitting a report on transportation needs of handicapped individuals, pursuant to section 502(g) of Public Law 93–112; jointly, to the Committees on Education and Labor and Public Works and Transportation.

749. A letter from the Comptroller General of the United States, transmitting a report on the conservation operations program and the Great Plains conservation program administered by the Soil Conservation Service, and the agricultural conservation program administered by the Agricultural Stabilization and Conservation Service (CED–77–30, February 14, 1977); jointly, to the Committees on Government Operations and Agriculture.

750. A letter from the Comptroller General of the United States, transmitting a report on the modifications and planned use of the Army's perimeter acquisition radar (PSAD–77–19, February 10, 1977); jointly, to the Committees on Government Operations and Armed Services.

751. A letter from the Comptroller General of the United States, transmitting a report on the status of the Navy's Harpoon missile system program (PSAD–72–21, February 10, 1977); jointly, to the Committees on Government Operations and Armed Services.

752. A letter from the Comptroller General of the United States, transmitting a report on the CH–53E helicopter program (PSAD–77–33, February 10, 1977); jointly, to the Committees on Government Operations and Armed Services.

753. A letter from the Comptroller General of the United States, transmitting a report on the status of the Air Force's B–1 aircraft program (PSAD–77–35, February 16, 1977); jointly, to the Committee on Government Operations and Armed Services.

754. A letter from the Comptroller General of the United States, transmitting a report on the status of the Air Force's over-the-horizon backscatter radar program (PSAD–77–39, February 10, 1977); jointly, to the Committees on Government Operations and Armed Services.

755. A letter from the Comptroller General of the United States, transmitting a report on the examination of financial statements of the student loan insurance fund for fiscal year 1975 (FOD–76–23, February 10, 1977), pursuant to section 106 of the Government Corporation Control Act, as amended (H. Doc. No. 95–76); jointly, to the Committees on Government Operations and Education and Labor, and ordered to be printed.

756. A letter from the Comptroller General of the United States, transmitting a report on implementation of the 55-mile-per-hour national speed limit law (CED–77–27, February 14, 1977); jointly, to the Committees on Government Operations and Public Works and Transportation.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*Pursuant to the order of the House on February 9, 1977, the following reports were filed on February 11, 1977*]

By Mr. EDGAR (for himself, Mr. BADILLO, Mr. BEDELL, Mr. BINGHAM, Mr. BROWN of California, Mr. CORNELL, Mr. DOWNEY, Mr. EILBERG, Mr. FISHER, Mr. FLOOD, Mr. JEFFORDS, Mr. KOSTMAYER, Mr. MCHUGH, Mr. MARKS, Mr. MIKVA, Mr. MOORHEAD of Pennsylvania, Mr. MURPHY of Pennsylvania, Mr. MICHAEL O. MYERS, Mr. NIX, Mr. OTTINGER, Mr. REUSS, Mr. RICHMOND, Mr. SCHULZE, Mr. WALGREN, and Mr. YATRON):

H.R. 3503. A bill to provide for certain additions to the Tinicum National Environmental Center; to the Committee on Merchant Marine and Fisheries.

By Mr. EDWARDS of California (for himself and Mr. DRINAN):

H.R. 3504. A bill to amend title VII of the Civil Rights Act of 1964 and title VIII of the Act commonly called the Civil Rights Act of 1962 to revise the procedures for the enforcement of equal employment opportunity and fair housing, and for other purposes; jointly, to the Committees on Education and Labor, and the Judiciary.

By Mr. EDWARDS of Oklahoma:

H.R. 3505. A bill to provide that the salaries of the Members of Congress shall be subject to reduction if a level of inflation determined by the Congress to be acceptable is exceeded, and to repeal provisions of law allowing cost-of-living adjustments for such salaries; to the Committee on Post Office and Civil Service.

By Mr. EVANS of Delaware:

H.R. 3506. A bill to permit the review of regulatory rules and regulations by the Congress; to the Committee on Government Operations.

H.R. 3507. A bill to extend the Emergency Unemployment Compensation program for an additional 6 months; to the Committee on Ways and Means.

H.R. 3508. A bill to amend title II of the Social Security Act to increase the increment in old-age benefits payable to individuals who delay their retirement beyond age 65; to the Committee on Ways and Means.

By Mr. HAMMERSCHMIDT:

H.R. 3509. A bill to amend the Federal Civil Defense Act of 1950 to allow Federal civil defense funds to be used by local civil defense agencies for natural disaster relief, and for other purposes; to the Committee on Armed Services.

H.R. 3510. A bill to amend title 38 of the United States Code to establish, for purposes of paying dependency and indemnity compensation, a presumption of death from service-connected disability in the case of certain blinded veterans; to the Committee on Veterans' Affairs.

H.R. 3511. A bill to amend title 38 of the United States Code to provide that progressive muscular atrophy developing a 10 per centum or more degree of disability within 7 years after separation from active service during a period of war shall be presumed to be service connected; to the Committee on Veterans' Affairs.

By Mr. HOWARD:

H.R. 3512. A bill to establish a congressional award program for the purpose of recognizing excellence and leadership among young people; to the Committee on Education and Labor.

H.R. 3513. A bill to amend the Federal Water Pollution Control Act to provide for a study of the effects of sewage sludge in certain waters, to provide that disposal sites for certain sewage sludge shall be moved, and for other purposes; to the Committee on Public Works and Transportation.

H.R. 3514. A bill to amend section 7(b)(2) of the Small Business Act to authorize the Small Business Administration to make loans with respect to disasters resulting from oil spills, fish kills, and certain sewage or sludge deposits; to the Committee on Small Business.

By Mr. KASTENMEIER (for himself and Mr. BALDUS):

H.R. 3515. A bill to amend the Clayton Act to provide for additional regulation of certain anticompetitive developments in the agricultural industry; to the Committee on the Judiciary.

By Mr. LONG of Maryland:

H.R. 3516. A bill to discourage the use of leg-hold or steel jaw traps on animals in the United States; to the Committee on Interstate and Foreign Commerce.

H.R. 3517. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. MIKVA:

H.R. 3518. A bill to reform the appointment process by which Commissioners of Federal regulatory agencies are selected, to establish a bipartisan nominating board composed of distinguished individuals which will recommend to the President persons well qualified to be appointed as regulatory agency Commissioners, and for other purposes; jointly, to the Committees on Interstate and Foreign Commerce, Public Works and Transportation, Agriculture, Banking, Finance, and Urban Affairs, Merchant Marine and Fisheries, Interior and Insular Affairs.

By Mr. MINISH (for himself and Mr. REUSS):

H.R. 3519. A bill to provide national standards of protection for purchasers of dwelling units in condominium or planned unit developments, and for tenants of rental housing being converted to dwelling units in condominium developments; to the Committee on Banking, Finance, and Urban Affairs.

By Mr. MITCHELL of Maryland (for himself, Ms. COLLINS of Illinois, Mr. STOKES, Mr. VANDER JAGT, Mr. TREEN, Mr. RICHMOND, Mr. WON PAT, Mrs. CHISHOLM, Mr. WEISS, Mr. KOCH, Mr. MURPHY of New York, Mr. GILMAN, Mr. JOHN L. BURTON, Mr. BROWN of California, Mrs. BURKE of California, and Mr. OTTINGER):

H.R. 3520. A bill to amend the Public Health Service Act to provide for the control of vitiligo; to the Committee on Interstate and Foreign Commerce.

By Mr. MITCHELL of New York:

H.R. 3521. A bill to amend title 38 of the United States Code relating to the recognition of representatives of the Polish Legion of American Veterans as claims agents for claims arising under laws administered by the Veterans' Administration; to the Committee on Veterans' Affairs.

H.R. 3522. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to deduct certain expenses paid by him for special education furnished to a child of other minor dependent who is physically or mentally handicapped; to the Committee on Ways and Means.

H.R. 3523. A bill to amend title II of the Social Security Act to provide for the computation of benefits thereunder on the basis of the worker's 3 years of highest earnings; to the Committee on Ways and Means.

By Mr. MONTGOMERY (for himself and Mr. CEDERBERG):

H.R. 3524. A bill to amend chapter 49 of title 10, United States Code, to prohibit union organization in the Armed Forces, and for other purposes; to the Committee on Armed Services.

By Mr. MOTTL:

H.R. 3525. A bill to terminate the existence of certain Federal regulatory agencies after a specified period of time, and for other purposes; to the Committee on Government Operations.

H.R. 3526. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. OBERSTAR:

H.R. 3527. A bill to amend title 38 of the United States Code in order to exclude as annual income, in the administration of certain pension programs under chapter 15 of such title, portions of payments received by persons, under retirement, annuity, endowment, or similar plans if such portions are attributable to dependents of such persons, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 3528. A bill to amend section 43 of the Internal Revenue Code of 1954 to allow a handicapped person who maintains a household to be eligible for the earned income credit provided under such section; to the Committee on Ways and Means.

H.R. 3529. A bill to provide tax incentives to encourage physicians, dentists, and optometrists to practice in physician shortage areas; to the Committee on Ways and Means.

H.R. 3530. A bill to amend title II of the Social Security Act to provide for an increase in benefits computed under the special minimum formula to coincide with the 1975 and 1976 cost-of-living increases in benefits computed under the regular formula; to the Committee on Ways and Means.

H.R. 3531. A bill to amend the Social Security Act to provide for inclusion of the services of licensed registered nurses under medicare and medicaid; jointly, to the Committees on Ways and Means, and Interstate and Foreign Commerce.

By Mr. PRICE (for himself and Mr. BOB WILSON) (by request):

H.R. 3532. A bill to amend chapter 639 of title 10, United States Code, to enable the Secretary of the Navy to change the name of a publication of the Naval Observatory providing data for navigators and astronomers; to the Committee on Armed Services.

By Mr. REGULA (for himself, Mr. BADHAM, Mr. BEDELL, Mr. BROWN of Michigan, Mr. BURGENER, Mr. BURKE of Florida, Mr. COLLINS of Texas, Mr. CRANE, Mr. DUNCAN of Tennessee, Mr. DUNCAN of Oregon, Mr. GRADISON, Mr. LEACH, Mr. LOTT, Mr. LUJAN, Mr. MOORHEAD of California, Mr. MURPHY of Illinois, Mr. PURSELL, Mr. SEBELIUS, Mr. SEIBERLING, Mr. SCHULZE, and Mr. TREEN):

H.R. 3533. A bill to amend the Congressional Budget Act of 1974 to establish in the Congress a zero-base budgeting process, with full congressional review of each Federal program at least once every 6 years; to the Committee on Rules.

By Mr. RHODES (for himself, Mr. BUTLER, Mr. DUNCAN of Tennessee, Mr. MITCHELL of New York, Mr. QUIE, Mrs. HOLT, Mrs. SMITH of Nebraska, Mr. FREY, Mr. TREEN, Mrs. FENWICK, Mr. CORCORAN, Mr. DE LA GARZA, Mr. EDWARDS of Alabama, Mr. PRESSLER, Mr. BOB WILSON, Mr. LENT, Mr. EDWARDS of Oklahoma, Mr. ERLENBORN, Mr. EVANS of Delaware, Mr. KEMP, Mr. PURSELL, Mr. BURKE of Florida, Mr. ROUSSELOT, Mr. STEERS, and Mr. GILMAN):

H.R. 3534. A bill to establish a Commission on the Reorganization of the Executive Branch of the Government, to extend the authority of the Reorganization Act of 1949, to authorize the reorganization of executive departments under such act under certain circumstances, and for other purposes; to the Committee on Government Operations.

By Mr. RHODES (for himself, Mr. KETCHUM, Mr. STUMP, Mr. WHITEHURST, Mr. ERTEL, Mr. LENT, Mr. HOWARD, Mr. DUNCAN of Tennessee, Mr. HYDE, Mr. NIX, Mr. BEVILL, Mr. ROBINSON, Mr. CEDERBERG, Mr. SIMON, Mr. ALEXANDER, Mr. DOWNEY, Mr. YOUNG of Florida, Mrs. FENWICK, Mr. MITCHELL of New York, Mr. PURSELL, Mr. BURKE of Florida, Mr. STEERS, Mr. RYAN, Mr. MARTIN, and Mr. STOCKMAN):

H.R. 3535. A bill to incorporate the United States Submarine Veterans of World War II; to the Committee on the Judiciary.

By Mr. RHODES (for himself, Mr. JEFFORDS, Ms. MIKULSKI, Mr. MCKINNEY, Mr. MURPHY of New York, Mr. ZEFERETTI, Mr. GOODLING, Mr. BLANCHARD, Mr. GOLDWATER, Mr. STEIGER, Mr. BAUCUS, Mr. MYERS of Indiana, Mr. BUCHANAN, Mr. MANN, Mr. JENRETTE, and Mr. TRAXLER):

H.R. 3536. A bill to incorporate the United States Submarine Veterans of World War II; to the Committee on the Judiciary.

By Mr. RISENHOOVER:

H.R. 3537. A bill to provide that Members of Congress shall be excluded from the provisions of any law which affects the annual or quadrennial rates of pay of Federal employees; to the Committee on Post Office and Civil Service.

By Mr. ROGERS (for himself, Mr. PREYER, Mr. SCHEUER, Mr. WAXMAN, Mr. FLORIO, Mr. OTTINGER, Mr. MARKEY, Mr. WALGREN, Mr. CARTER, and Mr. MADIGAN):

H.R. 3538. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for health planning and related programs; to the Committee on Interstate and Foreign Commerce.

By Mr. ROGERS (for himself, Mr. SATTERFIELD, Mr. PREYER, Mr. SCHEUER, Mr. WAXMAN, Mr. FLORIO, Mr. OTTINGER, Mr. MARKEY, Mr. WALGREN, Mr. CARTER, and Mr. MADIGAN):

H.R. 3539. A bill to amend the Public Health Service Act to authorize appropriations for fiscal year 1978 for biomedical research programs; to the Committee on Interstate and Foreign Commerce.

By Mr. ROSENTHAL (for himself, Ms. HOLTZMAN, and Mr. KOCH):

H.R. 3540. A bill to amend the Export Administration Act of 1969 in order to extend the authorities of that act and improve the administration of export controls under that act, to strengthen the antiboycott provisions of that act, and to provide for stricter controls over exports of nuclear material and technology, and for other purposes; to the Committee on International Relations.

By Mr. SIKES:

H.R. 3541. A bill to insure that recipients of veterans' pension and compensation will not have the amount of such pension or compensation reduced, or entitlement thereto discontinued, because of increases in monthly social security benefits; to the Committee on Veterans' Affairs.

By Mr. SOLARZ:

H.R. 3542. A bill to require recipients of Federal aid to higher education to provide senior citizens with access, on a space-available basis, to already scheduled courses and programs; to the Committee on Education and Labor.

By Mr. SOLARZ (for himself, Mr. ROSENTHAL, Mrs. CHISHOLM, Mr. STOKES, Mr. MITCHELL of Maryland, Mrs. COLLINS of Illinois, and Mr. ZEFERETTI):

H.R. 3543. A bill to amend titles IV, XI, and XIX of the Social Security Act to increase the Federal matching rate for purposes of reimbursement to States under the programs of aid to needy families with children and medical assistance, and to require that the entire non-Federal share of such aid and assistance be paid from State (rather than local) funds; jointly, to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mrs. SPELLMAN:

H.R. 3544. A bill to amend section 207 of title 18, United States Code, in order to prohibit former Federal employees who participated in a contract formulation from being employed, for a period of 2 years, by anyone who has a direct interest in the contract; to the Committee on the Judiciary.

H.R. 3545. A bill to amend subchapter III of chapter 83 of title 5, United States Code, to provide that employees who retire after 5 years of service, in certain instances, may be eligible to retain their life and health insurance benefits, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 3546. A bill to amend the Internal Revenue Code of 1954 to deny electric and gas public utilities a deduction for amounts paid or incurred by such utilities to advertise or promote the sale or use of electricity or gas, and for other purposes; to the Committee on Ways and Means.

H.R. 3547. A bill to amend the Internal Revenue Code of 1954 to deny the deduction of any expenditure of any oil company for advertising not directly related to the sale of products or services; to the Committee on Ways and Means.

H.R. 3548. A bill to amend the Internal Revenue Code of 1954 to deny the business deduction for amounts paid or incurred for lobbying before Congress or other legislative bodies; to the Committee on Ways and Means.

By Mr. STUDDS (for himself, Mr. HOWARD, Mr. KOSTMAYER, Mr. HEFTEL, Mr. EDWARDS of California, Mr. NOLAN, Mr. CORRADA, Mr. HANNAFORD, Mr. CHARLES H. WILSON of California, Mr. BONKER, Mr. PEPPER, Mr. MEEDS, Mr. BONIOR, Mr. PATTISON of New York, Mr. TUCKER, Mr. CORMAN, Mr. BADILLO, Mr. KOCH, Mr. WAXMAN, Mr. BLANCHARD, Mr. CHARLES WILSON of Texas, Mr. RANGEL, Mr. CONTE, Mr. BEDELL, and Mr. CARR):

H.R. 3549. A bill to establish a comprehensive legal regime governing liability and compensation for removal costs and other damages caused by oil pollution, and for other purposes; jointly, to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

By Mr. STUDDS (for himself, Mr. HOWARD, Mr. SCHEUER, Mr. MINETA, and Mr. HOLLENBECK):

H.R. 3550. A bill to establish a comprehensive legal regime governing liability and compensation for removal costs and other damages caused by oil pollution, and for other purposes; jointly to the Committees on Merchant Marine and Fisheries and Public Works and Transportation.

By Mr. THORNTON (for himself, Mr. BROWN of California, Mr. JOHN L. BURTON, Mr. BADILLO, Mr. BEDELL, Mr. BURGENER, Mr. CORMAN, Mr. DELLUMS, Mr. DORNAN, Mr. EDWARDS of California, Mr. EMERY, Mr. FLIPPO, Mr. FUQUA, Mr. GLICKMAN, Mr. HARRIS, Mr. HOLLENBECK, Mr. JENRETTE, Mr. KRUEGER, Mr. LAGOMARSINO, Mr. MCCORMACK, Mr. MILFORD, Mr. ROE, Mr. SCHEUER, Mr. STARK, and Mr. TUCKER):

H.R. 3551. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Science and Technology.

By Mr. THORNTON (for himself, Mr. BROWN of California, Mr. WAXMAN, Mr. CHARLES H. WILSON of California, and Mr. WIRTH):

H.R. 3552. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Science and Technology.

By Mr. VANIK:

H.R. 3553. A bill to amend the Internal Revenue Code of 1954 to provide tax counseling for the elderly, and for other purposes; to the Committee on Ways and Means.

By Mr. WHITTEN:

H.R. 3554. A bill to protect the national security; protect the economic well-being of the American people including the Nation's present supplies and undeveloped sources of energy, fuel, food, and fiber from damage due to arbitrary and unsound regulation, order or decision issued by any executive department, agency, or commission, and for other purposes; to the Committee on the Judiciary.

By Mr. BLANCHARD (for himself, Mr. MINETA, Mr. LUKEN, Mr. SNYDER, Mr. VENTO, Mr. SARASIN, and Mr. MARKS):

H.R. 3555. A bill to require authorizations of new budget authority for Government programs at least every 5 years, to establish a procedure for zero-base review of Government programs every 5 years, and for other purposes; to the Committee on Rules.

By Mr. BRODHEAD:

A bill to amend the Social Security Act to consolidate within a single comprehensive national welfare program all of the existing Federal public assistance and welfare programs, with all residents of the United States being guaranteed an adequate minimum income; jointly to the Committees on Agriculure, Interstate and Foreign Commerce, and Ways and Means.

By Mr. TEAGUE (by request):

H.R. 3606. A bill to authorize the Secretary of Transportation to enter into a contract or contracts for experimental aeronautical satellite communications services without regard to the provisions of 31 (U.S.C. 665(a) or 41 U.S.C. 11; to the Committee on Public Works and Transportation.

H.R. 3607. A bill to authorize appropriations for activities of the National Science Foundation, and for other purposes; to the Committee on Science and Technology.

By Mr. WHALEN (for himself, Mr. COLLINS of Texas, Mr. KILDEE, Mrs. LLOYD of Tennessee, and Mr. STEIGER):

H.R. 3608. A bill to provide that any increase in the rate of pay for Members of Congress proposed during any Congress shall not take effect earlier than the beginning of the next Congress; to the Committee on Post Office and Civil Service.

By Mr. WIRTH (for himself, Mr. BONIOR, Mr. BRODHEAD, Mr. DELLUMS, Mr. DOWNEY, Mr. EDWARDS of California, Mr. EDWARDS of Oklahoma, Mr. FISH, Mr. GEPHARDT, Mr. HARKIN, Mr. JENRETTE, Mr. KOSTMAYER, Mr. LEACH, Mr. MCHUGH, Ms. MIKULSKI, Mr. MOAKLEY, Mr. MOORHEAD of Pennsylvania, Mr. PANETTA, Mr. PEASE, Mr. RICHMOND, Mr. ROYBAL, Mrs. SPELLMAN, Mr. STARK, Mr. TUCKER, and Mr. WEAVER):

H.R. 3609. A bill to prohibit the use of Federal funds for certain activities designed to support or defeat any legislation or legislative issue on the ballot in any State; to the Committee on the Judiciary.

By Mr. WIRTH (for himself, Mr. BAUCUS, Mr. CARR, Mr. CORNWELL, and Mr. MINETA):

H.R. 3610. A bill to prohibit the use of Federal funds for certain activities designed to support or defeat any legislation or legislative issue on the ballot in any State; to the Committee on the Judiciary.

By Mr. ANDERSON of California (for himself, Mr. PRICE, Mr. CORRADA, Mr. SOLARZ, Mr. YATRON, Mr. GONZALEZ, Mr. TONRY, Mr. MICHAEL O. MYERS, Mr. ALLEN, Mr. JENRETTE, Mr. DORNAN, Mr. PANETTA, Mr. D'AMOURS, Mr. MIKVA, and Mr. GILMAN):

H.J. Res. 257. Joint resolution to provide for the designation of a week as "National Lupus Week"; to the Committee on Post Office and Civil Service.

By Mr. LOTT:

H.J. Res. 258. Joint resolution to restore posthumously full rights of citizenship to Jefferson F. Davis; to the Committee on the Judiciary.

By Mr. RHODES (for himself, Mr. DERWINSKI, Mr. GILMAN, Mr. STANTON, Mr. WALSH, Mr. CORCORAN, Mr. HARSHA, Mr. LAGOMARSINO, Mr. BURGENER, Mr. GRADISON, Mr. SPENCE, Mrs. SMITH of Nebraska, Mr. CARTER, Mr. KELLY, Mr. WHITEHURST, Mr. VANDER JAGT, Mr. STEERS, Mr. GRASSLEY, Mr. MARTIN, Mr. SNYDER, Mr. EVANS of Delaware, and Mr. BROWN of Ohio):

H.J. Res. 259. Joint resolution to designate the week commencing with the third Monday in February of each year as "National Patriotism Week"; to the Committee on Post Office and Civil Service.

By Mr. RUSSO (for himself, Mr. FARY, Mr. KINDESS, Mr. CORRADA, Mrs. HOLT, Mr. HYDE, Mr. MAZZOLI, Mr. CAVANAUGH, and Mr. EDWARDS of Oklahoma):

H.J. Res. 260. Joint resolution proposing an amendment to the Constitution of the United States for the protection of unborn children and other persons; to the Committee on the Judiciary.

By Mrs. SPELLMAN:

H.J. Res. 261. Joint resolution to designate the third week in April each year as "National Private Property Week"; to the Committee on Post Office and Civil Service.

Mr. EDWARDS of California:

H. Con. Res. 117. Concurrent resolution to provide for the printing of additional copies of certain hearings of the Subcommittee on Civil and Constitutional Rights of the Committee on the Judiciary; to the Committee on House Administration.

By Mr. HAMILTON (for himself, Mr. OBEY, Mr. D'AMOURS, Mr. MEEDS, Mr. PRICE, Mr. WRIGHT, Mr. BRADEMAS, Mr. FOLEY, Mr. ROSTENKOWSKI, Mr. FLYNT, Mr. RODINO, Mr. THOMPSON, Mr. UDALL, Mr. BOLLING, Mr. FLOWERS, Mr. KASTENMEIER, Mr. PREYER, Mr. PHILLIP BURTON, and Mrs. FENWICK):

H. Res. 287. Resolution to amend the Rules of the House of Representatives, and for other purposes; divided and referred as follows: Title I, section 301, and titles IV, V, VI and VII referred to the Committee on Rules for a period ending not later than February 25, 1977; Title II and section 303 referred to the Committee on Standards of Official Conduct for a period ending not later than February 23, 1977; and section 302 referred to the Committee on House Administration for a period ending not later than February 23, 1977.

By Mr. BRINKLEY:

H. Res. 288. Resolution disapproving the recommendations of the President with respect to the rates of pay of Federal officials transmitted to the Congress for the fiscal year ending September 30, 1978; to the Committee on Post Office and Civil Service.

By Mr. DUNCAN of Tennessee:

H. Res. 289. Resolution expressing the sense of the House of Representatives that the major television networks should take such steps as may be necessary to use line 21 of the television vertical blanking interval to provide captioning of programs for hearing impaired individuals; to the Committee on Interstate and Foreign Commerce.

By Mr. GRASSLEY (for himself, Mr. BEARD of Tennessee, Mr. MILLER of Ohio, Mr. D'AMOURS, Mr. MOORHEAD of California, Mrs. LLOYD of Tennessee, and Mr. BRINKLEY):

H. Res. 290. Resolution disapproving the recommendations of the President with respect to the rates of pay of Federal officials transmitted to the Congress for the fiscal year ending September 30, 1978; to the Committee on Post Office and Civil Service.

By Mr. GRASSLEY (for himself and Mr. ROUSSELOT):

H. Res. 291. Resolution providing for the consideration of the resolution (H. Res. 115) to disapprove the recommendations of the President with respect to rates of pay of Federal officials; to the Committee on Rules.

By Mr. HAMMERSCHMIDT:

H. Res. 292. Resolution disapproving the recommendations of the President with respect to the rates of pay of Federal officials transmitted to the Congress for the fiscal year ending September 30, 1978; to the Committee on Post Office and Civil Service.

By Mrs. LLOYD of Tennessee (for herself, Mr. PIKE, Mr. RUNNELS, Mr. BROWN of California, Mr. DOWNEY, and Mr. LUJAN):

H. Res. 293. Resolution disapproving the proposed deferral of budget authority for the Energy Research and Development Administration to conduct a biomedical and environmental research program (deferral number D 77-52); to the Committee on Appropriations.

By Mr. RHODES:

H. Res. 294. Resolution authorizing the printing of a compilation of tributes by Members of the House in the Halls of Congress to commemorate the years of service of the Honorable Gerald R. Ford; to the Committee on House Administration.

By Mr. RHODES (for himself, Mr. BUTLER, Mr. MILLER of Ohio, Mr. LOTT, Mrs. SMITH of Nebraska, Mr. WALSH, Mr. EMERY, Mr. MCKINNEY, Mr. WINN, Mr. QUIE, Mr. WHITEHURST, and Mr. BURGENER):

H. Res. 295. Resolution to create a Select Committee on Energy; to the Committee on Rules.

By Mr. RHODES (for himself, Mr. BROOMFIELD, Mr. GRADISON, Mr. HANSEN, Mr. PURSELL, Mr. YOUNG of Florida, Mr. KEMP, Mr. STANTON, Mr. THONE, Mr. DICKINSON, Mr. BUTLER, Mr. COHEN, Mr. WON PAT, Mr. BURGENER, Mr. O'BRIEN, Mr. JEFFORDS, Mr. VANDER JAGT, Mr. EDGAR, Mr. WHITEHURST, Mr. GOODLING, Mr. WINN, Mr. FREY, Mr. QUIE, Mr. SCHULZE, and Mr. KETCHUM):

H. Res. 296. Resolution to create a select committee to audit accounts of committees, Members, and officers of the House of Representatives; to the Committee on Rules.

By Mr. TEAGUE:

H. Res. 297. Resolution to provide for the expenses of investigations and studies to be conducted by the Committee on Science and Technology; to the Committee on House Administration.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

12. By the SPEAKER: A memorial of the Legislature of the State of Nevada, relative to U.S. Forest Service purchase of lands at Lake Tahoe; to the Committee on Agriculture.

13. Also, memorial of the Legislature of the State of Idaho, withdrawing its ratification of the proposed amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

14. Also, memorial of the Legislature of the State of New York, requesting an investigation of the natural gas industry; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN:

H.R. 3611. A bill for the relief Aryeh Makleff; to the Committee on the Judiciary.

H.R. 3612. A bill for the relief of Doctor Jesus Fernandez Tirao and his wife Benylin-Lynda Obiena Tirao; to the Committee on the Judiciary.

H.R. 3613. A bill for the relief of Irma Victoria Bolarte Alvarado; to the Committee on the Judiciary.

By Mr. AUCOIN:

H.R. 3614. A bill for the relief of Chester C. Clark, Mary L. Clark, and Dorothy J. Wilbur; to the Committee on the Judiciary.

By Mr. PHILLIP BURTON:

H.R. 3615. A bill for the relief of Augustin Robleto-Caldera; to the Committee on the Judiciary.

H.R. 3616. A bill for the relief of Ralph Lafi Alisa Toelupe; to the Committee on the Judiciary.

H.R. 3617. A bill for the relief of Kai Hung Pun, also known as Wah Poon; to the Committee on the Judiciary.

By Mr. CORMAN:

H.R. 3618. A bill for the relief of Martha Castro Fitz Maurice; to the Committee on the Judiciary.

H.R. 3619. A bill for the relief of Mrs. Rita Chelnek; to the Committee on the Judiciary.

By Mr. DANIELSON:

H.R. 3620. A bill for the relief of John A. Townsley; to the Committee on the Judiciary.

H.R. 3621. A bill for the relief of Joseph J. Andrews; to the Committee on the Judiciary.

H.R. 3622. A bill for the relief of Mr. and Mrs. Aaron Wayne Ogburn; to the Committee on the Judiciary.

By Mr. DUNCAN of Tennessee:

H.R. 3623. A bill for the relief of Raymond L. Wells; to the Committee on the Judiciary.

By Mr. ECKHARDT:

H.R. 3624. A bill for the relief of Lau Yiu Luen; to the Committee on the Judiciary.

By Mr. LEGGETT:

H.R. 3625. A bill for the relief of Kwi Bok Kim; to the Committee on the Judiciary.

By Mr. LOTT:

H.R. 3626. A bill for the relief of Frances Alethea E. Smith; to the Committee on the Judiciary.

By Mr. MITCHELL of New York:

H.R. 3627. A bill for the relief of Victor Asibra-Minta, his wife Grace Asibra-Minta, and their son William K. Asibra-Minta; to the Committee on the Judiciary.

By Mr. OBERSTAR:

H.R. 3628. A bill for the relief of Herman R. Klun and Helen Klun; to the Committee on the Judiciary.

By Mr. PEPPER:

H.R. 3629. A bill for the relief of United Broadcasting Co. of Florida, Inc.; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

45. Mr. STEIGER presented a petition of Karen Le Clair, Two Rivers, Wis., and others, relative to the proposed salary increases for Members of Congress and other Federal officials; to the Committee on Post Office and Civil Service.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H. CON. RES. 110

By Mr. REUSS:

At page 1, line 5, strike "348,500,000,000" and insert "$350,200,000,000"

At page 1, line 7, strike $10,600,000,000" and insert "$8,900,000,000"

At page 1, line 13, strike "$70,315,000,000" and insert "$68,615,000,000"

At page 1, line 14, strike "$720,500,000,000" and insert "$718,800,000,000"

EXTENSIONS OF REMARKS

FIFTY-NINTH ANNIVERSARY OF THE REESTABLISHMENT OF THE INDEPENDENCE OF LITHUANIA

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. SARASIN. Mr. Speaker, today marks the 59th anniversary of the reestablishment of the independence of Lithuania. Lithuanians around the world, including the very sizable Lithuanian-American community, commemorate this day with a mixture of joy and sorrow—joy because of the 22 years Lithuania enjoyed its freedom and sorrow because for the last quarter century a once free nation has bravely endured Soviet domination. Lithuanians have always found it hard to accept that their country was being occupied by the Russians, and to this day they have resisted their dominance.

With the signing of the Helsinki agreement, one might fear that these brave people might give up hope. But they have not, and they are persisting with determination in seeing that their civil and human rights are observed. We here in America must also be vigilant that the human rights provisions of the Helsinki agreement be observed.

In particular, the Soviet Government has harassed and taken repressive measures against the Lithuanin Catholic Church. Untold members of Lithuanian dissidents have been arrested and imprisoned for publishing or distributing "The Chronicle of the Lithuanian Catholic Church." This unofficial publication covers religious life in the Lithuanian Catholic communities and documents the prosecution of church members, court proceedings against them, statements in defense of religious freedom officially guaranteed by the Soviet Constitution, and similar matters.

At the present time, the West is learning about the courage and bravery of Nijole Sadunaite who was arrested in Lithuania in August 1974, because a partially typed copy of the Chronicle was found during a police search of her house. A year later she was tried and convicted for this offense and sentenced to 3 years hard labor and 3 years of exile. Nijole has been doing hard labor for a year in a prison camp known as the Mordovian Complex. Besides the hard labor, her health has suffered from a meager diet.

I have joined Representative DONALD FRASER and Representative NEWTON STEERS in signing a letter that was recently sent to Secretary Leonid Brezhnev requesting that the case of Nijole Sadunaite violates several human rights guaranteed her under international agreements, most notably her freedom of expression as guaranteed in article 19 of the Universal Declaration of Human Rights, and her religious freedom as set forth in article 7 of the Helsinki agreement.

It is the courage of Lithuanian dissidents such as Nijole Sadunaite which brings worldwide attention to the plight of peoples still living under Soviet domination, and who still dare to risk their lives in order to fight for their freedom. She serves as an example to the rest of the world to the continuing need to speak out against the Soviet Government whenever they choose to ignore the claims for freedom from oppression by the millions of people who live unwillingly under Soviet rule.

At this time, in our commemoration of Lithuanian independence, we must remember those in prisons like Miss Sadunaite, and hope that by our positive actions we can help to ease the burdens of those who suffer like her.

A MAN FOR AMERICA—PRESENTLY A BOY SCOUT FROM TEXAS

HON. SAM B. HALL, JR.

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. HALL. Mr. Speaker, it was my privilege this morning to meet a young man from Texas with whose views and opinions I am very much in accord. In fact, I find his speech which took second place in the public speaking contest of the Boy Scouts of America a work of inspiration—for two reasons—because of its exemplary content and because it set me thinking—with young men like this there is great hope for future Americans. The name of this fine young orator is Lee Zachary Maxey and I set forth here a brief statement of his background:

The 1976 Boys' State Governor of Texas, Lee Zachary is president of Phyllis Wheatley High School's Post 9718. He is an honor student, student council president, and an award-winning ROTC commander. He joined Scouting/USA as a Cub Scout in 1966 and also has been a Scout Youth minister and church choir member, he has belonged to the Singing Boys of Houston choral group, was elected a senator at Boys' and Girls' Nation this summer in Washington, and finds time for basketball. He plans a career in the ministry.

His award-winning speech follows:

SPIRIT OF '76—AMERICA'S HORIZONS

(By Lee Zachary Maxey)

A few centuries ago, a young man by the name of Christopher Columbus approached King Ferdinand and Queen Isabella of Spain and as an old but untrue story goes, *"Tried to prove that the world was round."* That story also states that the *"majority populous"* stuck to the opinion that: "The earth was as flat as a pancake." People thought that they (Nina, Pinta, Santa Maria) would fall off the edge of the world, because they also thought that the world ended at the horizon.

According to the story the great experiment ended, but in triumph. Columbus did three things. (1) He proved that the world was round. (2) Proved that the world did not end at the horizon. (3) Discovered America.

Over 200 years another great experiment began. The experiment was successful. This experiment started July 4, 1777. Reached its first horizon July 4, 1876, and reached its second horizon July 4, 1976. But the question arises: "What is the name of this great experiment, The United States of America and we are celebrating the crossing of the second horizon of this great experiment. The celebration's name *The American Bicentennial.*

To be honest, many people are tired of the word bicentennial. Bicentennial this and bicentennial that. Some establishments with bicentennial themes are:

Early American Fried Chicken
Ben Franklin's Kite Shope
Spirit of '76 Burgers
Martha Washington's Pastries
Revolutionary Fish & Chips
Nathan Hale Pancake Palace

Beneath all the commercialism, the Bicentennial is a time of recollection. Remembering great men who have done their part to make America great.

For example, Abraham Lincoln, in one of the most underrated discourses he made, gave us the perfect definition of a democracy, "A government of the people by the people and for the people, and a nation of this caliber shall not perish from this earth." He was also an *anti-slavery proponent,* saying in one of the debates between him and Stephen Douglas, "A House Divided Against Itself Cannot Stand."

Many influential black Americans have said that Blacks have nothing to celebrate during the American Bicentennial. But according to Rev. Mr. Benjamin Hooks, member of the F.C.C., we have some thing to celebrate—*Survival*—and that America has produced black Americans who have made their footprints in American history such as:

Dr. George W. Carver—600 by-products from a peanut. "He knew what a peanut was before Jimmy Carter's granddaddy knew how to plant one."

Dr. William H. Williams—first man to surgically repair a heart.

Dr. Charles Drew—discovered that blood could be drawn from a man, stored, and injected into another man.

I read once that America was built on the back of the immigrant. The last two lines of "Give me your tired your poor" so on the Statue of Liberty says:

"Send these tempest tossed to me"
"I lift my lamp beside the golden door."

The Statue of Liberty lifted her lamp to:

Albert Einstein, from Germany—Theory of relativity

Irving Berlin, from Germany—God Bless America and White Christmas

Knute Rockne, from Norway—Coach at Notre Dame

The Bicentennial is also a period of remembering that we are a government that is a constitutional republic which definitely believes that "No man is above the law."

Remembering that—Just about everybody has had a voice in government for over 200 years.

Remembering that—We are guaranteed certain inalienable rights.

Remembering that—Through Divine Providence we have been able to help others who could not do for themselves.

Remembering that—We can serve God, how we want to, where we want to, and when we want to. Guaranteed by Constitution.

But what does it mean to me? The Bicenntennial is a:

Time of Awakening
Time of Renewal
Time of Subjection to God's will
Time for everyone to walk down the meandering street of brotherhood as sisters and brothers.

In conclusion—Let us let the Bicentennial remain in each of our hearts. Let us let it stand as a bulwark to future generations. To let them know that we are still:

"One nation under God, indivisible, with liberty and justice for all."

LITHUANIAN INDEPENDENCE DAY

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. FORSYTHE. Mr. Speaker, on February 16, we celebrate the 59th anniversary of the reestablishment of independent Lithuania and the 726th anniversary of the founding of the Lithuanian state.

A democratic state was established in Lithuania on February 16, 1918. However, the events of World War II quickly cut short the enjoyment of these hard-won freedoms. Lithuania had her independence only 22 years when, in 1940, the Soviet Union invaded and occupied her land. With the fall of Germany, Lithuania did not regain her independence but was retaken by the Soviet Union in 1944.

Today, Lithuania is recognized by the Soviet Union as part of the U.S.S.R. The Soviets report that the Lithuanian people are happy with their status as a Soviet satellite state. However, for more than three decades, the Lithuanian people have endured religious persecution, political repression, and complete denial of their basic human rights. The proud people of Lithuania have made it clear that as long as her lands are occupied, the Lithuanian struggle for human dignity and freedom shall continue.

Even though many Lithuanians emigrated to other lands, including the United States, they never relinquished their quest for Lithuania's freedom. One of the strongest beliefs in the United States is that human rights should be respected. We as Americans, living in a free country, admire Lithuania for her long, hard struggle for national independence. We also appreciate her rich contribution to our own varied cultural background.

Lithuanians have not suffered in silence. The Western World has seen and heard of the sacrifices of Lithuanian patriots, despite attempts by the Soviet Union to suppress all such communications with the Western World.

Although modern maps display Lithuania as being a part of the territory of the Soviet Union, the U.S. Government has steadfastly maintained a policy of nonrecognition of this forcible seizure of Lithuania and her neighbors. The Helsinki agreement, in fact, specifically endorses the principle of border change by peaceful means.

The proud people of Lithuania are trying to free themselves from Soviet religious and political persecution. As Americans and defenders of freedom, we of the free world join the Lithuanians in celebrating the 59th anniversary of the reestablishment of the independent state of Lithuania, and the 726th anniversary of the founding of Lithuania.

PASSTHROUGH OF SOCIAL SECURITY INCREASES

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANNUNZIO. Mr. Speaker, today veterans who receive pension benefits as well as social security benefits are being shortchanged, compared to recipients who are not veterans, because each time social security benefit rates are increased, these veterans usually suffer some reduction in their veterans pension. Therefore, I have introduced a bill, H.R. 137, to assure that these veterans receive the full benefit intended from congressional action on social security rates.

As you know, Mr. Speaker, the purpose behind vetrans pensions is income maintenance. In that sense, the Veterans' Administration pension program does overlap with social security programs. But the intent of Congress that led originally to the veterans pension is more than a mechanism for merely maintaining a needy segment of our population. The original intent was to provide recognition from a grateful Nation when most needed and in the most useful form. It is this intention that is ignored under existing law.

As presently calculated, a veterans' pension is equivalent to an amount which maintains countable income at not more than $3,450. The amount of the pension is dependent upon the difference between $3,540 and the total countable income from other sources. Since social security benefits are, in part, included in the sum of "other sources," a veterans' pension allowance is necessarily reduced with an increase in social security benefits. The amount of reduction in the pension benefit varies in degree based upon the differing levels of VA pensions, but most pensioners do suffer some reduction.

The result is that when the intention of Congress is to improve the plight of those on social security with, for example, a 10-percent increase in benefits, the veteran pensioner receives less than the full 10 percent. The nonveteran social security recipient's lot is improved to the full extent of congressional intention, but the relative position of the veteran recipient is damaged. Although most veterans do experience a net gain in aggregate income, the veteran is inequitably treated compared to similarly situated nonveterans, since the veteran does not receive all that Congress intends.

As I have said, my bill, H.R. 137, would make certain that recipients of veterans' pension and compensation would not have the amount of such pension or compensation reduced because of increases in monthly social security benefits.

The social security increases voted by Congress are meant to offset the disastrous effect of inflation, particularly on such basic essentials as food, for those most in need who are living on small, fixed incomes. Too many pensioners have suffered the bitter irony of a reduction in vetrans pension as a result of an increase in social security. It is now up to Congress to make certain that its intent is not subverted by this technicality in the language of the veterans pension program.

I urge the earliest possible action of this Congress on H.R. 137.

TERRORISM MUST BE DISCOURAGED

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. SIMON. Mr. Speaker, the Chicago Tribune had an editorial recently about the alleged terrorist who was released in France.

Its message, I think, is an important one and I commend it to my colleagues:

FRANCE PROTESTS TOO MUCH

Once more France has explained its feeling of Abu Daoud, suspected Palestinian terrorist, and has insisted on the extreme rectitude of its acts. Once more, we believe, its explanation will fail to soothe outraged nations. It will fail because Paris only sets forth why it deems its actions legal—but not why it deemed them necessary.

The latest to explain is President Valery Giscard d'Estaing, who held an angry press conference to denounce a "campaign of insult and vilification against the honor and dignity of France." But he said nothing to suggest why France's honor should not be insulted. Nothing has changed and sordid facts: Into France's hands there fell an avowed revolutionary believed involved in the the murder of the Israeli team at the 1972 Munich Olympic Games. And France let him go.

President Giscard acknowledges that West Germany was seeking to comply with extradition requirements and that Israel too was interested in extradition.

There were technical questions surrounding each effort, and after four days a court freed him. He was whisked out of the country at jet speed. All perfectly legal and all within the powers of an independent court.

Mr. Giscard makes the most of these facts, but one fact which he neglects is not easily explained away: The Court need not have freed Abu Daoud so hastily; it might have held him for as long as two weeks and thus have given West Germany time to complete the extradition process. The French government did not even ask the court to do this. On the contrary, the court—or, more accurately, the government—seemed in a tearing hurry to avoid doing so, even though it was the most important suspect to fall into French hands in years.

The possible reasons for France's frantic inaction are familiar by now: the fear of offending Arab nations which sell France oil and buy its arms, and the fear that other Palestinian terrorists might have staged atrocities in order to ransom him. These reasons have nothing to do with justice; they have a lot to do with convenience and politics. And nothing that has been said by Mr. Giscard or by Premier Raymond Barre can wipe away that truth.

We have long contended that terrorism will not work when governments refuse to cave in to it. But when nations give in, the obverse becomes true: Terrorism does work, and therefore it will increase in the future. And France, which has protested too much in this case, can expect to bear its share of those spreading atrocities.

THE RATINGS GAME

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RHODES. Mr. Speaker, in April of 1976, nearly 100 Members on both sides of the aisle signed a letter asking the nonpartisan Fair Campaign Practices Committee to initiate an investigation into the procedures used by various organizations who publish ratings of Members of Congress.

We made it very clear at the time that we were not questioning in any way the right of organizations, or anyone for that matter, to rate Members of Congress and other public officials. The right to pass judgment on elected officials is rooted firmly in the first amendment.

The thrust of our main point was that given the contradictory ratings that arise—one group says a Member is "for" senior citizens and another group says that the same Member is "against" them—there may be a need for the development of a standardized procedure or code of ethics which groups who publish ratings may choose to consult in the interests of being fair. Of course any such code of ethics would have to be completely nonbinding. Any group which chooses not to comply with such a code must be free to do so.

This has never been a partisan issue. I know of few Members of either party who have not had some cause for compaint with some organization or group that rates them in a manner they consider to be either unfair or slanted.

In addition, our intention was never to hand down a blanket indictment of every group that puts out ratings. There are numerous organizations who take great care in scrutinizing Members' voting records and go about their task in a highly responsible fashion. These groups perform an important public service and are to be commended.

Nevertheless, not every group is responsible. Hence the need for some kind of code of ethics or standard operating procedure, developed by the groups themselves, which they can use or ignore as they see fit.

I am personally very gratified that the Fair Campaign Practices Committee saw merit in our request and that it took the initiative to sponsor a conference of groups that publish ratings. This Conference of Associations and Congressional Ratings Groups was held on January 6, 1977, at American University in Washington, D.C.

I am informed by Mr. Robert Sidman, the executive director of the Fair Campaign Practices Committee, that the conference was productive and that a report will be prepared highlighting various aspects of the discussion which took place. I know that this report will be of great interest to Members of Congress and am hopeful that it will prove useful for the many organizations who publish ratings.

I commend the Fair Campaign Practices Committee for their responsiveness on this issue and am inserting Mr. Sidman's letter to me along with a list of the organizations who participated in the conference. It is both ironic and significant that the organization which really prompted this exercise, Environmental Action, Inc., refused to respond to FCPC's invitation to participate in the conference. I regret their refusal to cooperate, particularly in light of the widespread complaints which have been made against their ratings procedure and campaign techniques. If ever there was a group which needed desperately to undertake some self-examination, it is that group.

An Environmental Action's No. 1 political target in the last election, it is a source of some personal consolation to realize that only three of the so-called Dirty Dozen were defeated, proving once again that the voters of the country are entirely capable of looking beyond surface generalities and basing their decisions on the true facts.

The letter and list of organizations follow:

FAIR CAMPAIGN PRACTICES COMMITTEE, INC.

Washington, D.C., February 1, 1977.

HON. JOHN J. RHODES,
Minority Leader, House of Representatives, Washington, D.C.

DEAR MR. RHODES: Last April, you may recall, you appealed to the Fair Campaign Practices Committee to investigate possible violations of the Fair Campaign Practices Code by the Dirty Dozen organization, and to take appropriate action.

This letter is to advise you of what we have done.

As we told you on receipt of your letter (which had been cosigned by more than 80 of your colleagues in the House), our policies and practices precluded our taking the actions you requested. However, we did propose an alternative course of action.

Accordingly, we first discussed their congressional rating practices with a selected few of the organizations which have a history of making their ratings public. We found, with few exceptions, they would be willing to enter into discussions of their rating practices and policies with each other.

We then enlisted the cooperation of the School of Government and Public Administration, American University, and the School of Public and International Affairs, George Washington University. They agreed to participate in our proposed program.

Since the Fair Campaign Practices Committee had no funds for such an activity, we next approached Sears, Roebuck & Company for a grant to underwrite the costs of conducting a meeting, and preparing, printing and distributing papers that would be presented by the George Washington and American University participants. They generously approved a grant for these purposes.

We then invited some fifty officials of trade, professional and consumer organizations which traditionaly rank the votes of members of Congress and make their ratings public, to an off-the-record discussion on the American University campus on January 6, 1977. About half of those we invited accepted and attended.

The meeting was moderated by Dr. Harvey Zuchman, professor of Journalism Law at Catholic University. A last minute addition to the program was the unsolicited but welcome paper from Congressman Cleveland; this was distributed at the opening of the meeting, but it received no discussion.

We had hoped that, at the conclusion of the meeting, someone of the attendees would move that another meeting be held at which a code of fair rating practices might be discussed and developed. However, no such motion was made.

Nevertheless, from informal comments made by some of the attendees, we feel that such discussions may, in fact, now be taking place without our knowledge or help. Whether they are or not, we also feel that at least some organizations are re-examining their rating practices and policies in the light of statements and discussions at the meeting.

We are awaiting the final drafts of the papers presented at the meetings, and will then have them printed and distributed as promptly as possible. Copies will go to you, of course.

I am enclosing an attendance list and a copy of the agenda for the meeting.

It is gratifying that you thought to call upon us in the first place. We hope our efforts to be of help will be effective in the long run.

Sincerely,

ROBERT SIDMAN,
Executive Director.

LEMKOS AIDS POLAND'S UKRAINIAN MINORITY

HON. WILLIAM F. WALSH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. WALSH. Mr. Speaker, this year marks the 30th anniversary of the deportation of the Ukrainian national minority in Poland from its native lands to the territories Poland received from Germany. The deportation was executed by the armed forces of the People's Republic of Poland in 1947. The following letter by John Hvozda of Camillus, N.Y., was sent to the Department of State regarding the plight of Poland's Ukrainian minority and the efforts of the World Lemkos Federation to aid it.

This year is the 30th anniversary of the Polish deportation of the Ukrainians from their native territories in 1947 and their resettlement in the northeastern areas of Poland. The circumstances under which the Polish Government have exiled these people is a matter of historical record. The conditions under which these people live and the persecutions they are subjected to are contrary even to the Polish Constitution itself.

The Lemkos Federation has for some time, through the Department of State, attempted to establish a program to improve the living conditions of our brothers and sisters living in Poland. We would like to help the Ukrainian minority through three possible routes:

One. The Department of State;

Two. The American-Polish Committee—which is to be organized; and

Three. The Polish Government.

We would appreciate the support and technical advice of the Department of State in regards to our endeavor to assist the Ukrainian minority in Poland. We would like to develop the following lines of action:

One. A direct dialog with the Polish authorities in order to cultivate their interest in the improvement of the situation of the Ukrainian minority;

Two. A possible visit by our delegation to Poland for the purpose of assessing the range of possibilities in our relationship with the Polish authorities; and

Three. The possibility of developing some kind of understanding—at least an informal one—concerning an improved status of the Ukrainian minority.

Many Ukrainians have immigrated into the United States from Poland. Consequently, there are many families in this country who have hoped for some time to be reunited with their immediate relatives left behind in Poland. Many of them would like to extend a more active assistance to their family members and friends in Poland. There are also those who have children born in the United States—or in Poland—who would like to go to Poland for formal—or informal—studies. It is hoped that through the combined efforts of the Department of State and the World Lemkos Federation these goals can be obtained.

INCREASING STUDENT FINANCIAL AID—ONLY A SMALL PART OF EXPANDING ACCESS TO HIGHER EDUCATION?

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. CHISHOLM. Mr. Speaker, with the passage of the Education Amendments of 1976, Public Law 94–482, Congress doubled the authorized funding for the trio programs: Talent Search, Upward Bound, educational opportunity centers, special services for disadvantaged students, and, a new program, service learning centers. These educational opportunity programs provide counseling, tutoring and information services which have become increasingly important in addressing the nonfinancial barriers to postsecondary education for the disadvantaged.

The importance of eliminating these nonfinancial barriers has been documented in a recent study commission by the California State legislature. Conducted in the Los Angeles high schools, the study was released by the State assembly's permanent subcommittee on postsecondary education. It was based upon a survey of 1973 high school graduates and their activities after graduation. The results indicate that additional dollars for financial aid may ultimately have a diminishing impact on access to higher education unless we can also address the enormous additional barriers of low levels of academic achievement, inadequate information and inflexible admission policies.

Mr. Speaker, I urge you and my colleagues to take note of this study's findings and recommendations, which include a call for increased funding for trio programs. We will soon be approaching funds for the Department of Health, Education and Welfare and will thus have an opportunity to increase the level of funding for these vitally important programs.

The full study is available from the assembly subcommittee on postsecondary education, 1116 9th Street, room 34, Sacramento, Calif. 95814. I would like to bring some particular excerpts to the attention of my colleagues:

INCREASING STUDENT FINANCIAL AID PROGRAMS: A MISDIRECTED MEANS OF EXPANDING ACCESS?

(By Bruce Fuller, Committee Consultant, Assembly Permanent Subcommittee on Postsecondary Education, California Legislature, Sacramento, Calif.

The drive to increase postsecondary educational opportunities for the poor is one great society initiative which has maintained momentum. Sparked by the creation of the basic educational opportunity grant program in the 1972 Higher Education Act Amendments, increases in Federal student-assistance programs have continued.

In the current (1975–76) fiscal year the Federal Government will provide funding for student aid of approximately $1 billion in grants, $321 million in direct loans, $452 million to help finance additional loans, and $390 million in work-study funds—a total of over $2.1 billion in federal student assistance. Total appropriations in these programs have increased 38% in the past three years. State administered grant programs this year will provide an additional $456 million, an increase of 32% in the past three years.

The increasing availability of student aid dollars has clearly resulted in college opportunities for the poor. However, recently collected data indicate that additional student financial aid will most likely have a diminishing affect on the decision of low-income high school graduates to enter college. Increasing student aid appropriations have substantially reduced and approach eventual elimination of financial need as a barrier to college for the economically disadvantaged. This marks a significant change which suggests that policy makers must begin thinking about the relative priority of further reducing the financial need of middle-income students or attacking the remaining motivational, achievement, informational, and admission barriers which preclude further progress in increasing access for the poor. A point is being reached where the number of low-income and minority college students will no longer increase, regardles of how much additional student aid money is appropriated and in spite of low tuition levels.

These recent data emerged from a study of postgraduate choices of 1,600 graduates of 20 Los Angeles high schools. Extensive research on college entrance rates of high school graduates with various income, ethnic, and academic achievement characteristics was conducted in the early and mid-1960s. This research yielded helpful evidence to support advocates of publicly funded student aid programs. However, little information which discriminates between the barriers of financial need and academic achievement levels has been collected regarding choices of high school graduates subsequent to the dramatic increases in student aid appropriations for the economically disadvantaged. The Los Angeles study, commissioned by the California Legislature, was designed to examine the extent to which financial need remains a barrier to college.

The Los Angeles study yielded evidence that many moderately high achieving, low-income graduates choose not to enter college primarily due to rigid admision requirements and a lack of information about postsecondary opportunities. Of all graduates with at least a 3.0 GPA, 20% fewer low-income graduates than high-income graduates entered a four-year college, and chose instead to enter the work force. One-half of all low-income graduates were ineligible to attend California State University colleges because necessary entrance tests were not taken; 23% of this population attained GPAs of over 2.8. Of these moderately high achievers, only 4% entered a four-year institution, while 31% entered a community college.

LIMITATIONS OF THE LOST ANGELES STUDY

The data derived from the Los Angeles study certainly cannot lead to definite conclusions about nationwide situations or State and Federal policies. The data were collected in one urban area, in a State with a tripartite public system of higher education that stratifies students according to achievement levels, and in a State with a strong community college tradition.

The study, however, clearly raises the question of whether academic achievement, information, and inflexible admission requirements remain as greater barriers to college for the poor than financial need. The Los Angeles study should be replicated in other States to further test this hypothesis.

RESPONSES OF POLICY-MAKERS

At both the Federal and State levels, legislators have found increasing student aid appropriations to be the simplest and most effective method of increasing the number of low-income and minority students. Yet prior to further increases in funding, the Federal and State governments should specifically determine the actually marginal impact of expanding grant, loan, and work-study programs. As the gap between financial need of low-income students and available students aid dollars narrows, legislators and administrative agencies must decide whether additional dollars should be spent on keeping up with the legitimate increasing financial needs of middle income students or on educational opportunity programs which serve low income students comprehensively.

The distinctive feature of educational opportunity programs is the focus on supportive services for disadvantaged students: counseling, tutorial help, and information.

A stronger link between postsecondary institutions and secondary and junior high schools is the key to confronting the problems of low academic achievement levels and inadequate information about educational opportunities. Given the increasing number of older minority students, new methods of information delivery should also be utilized to reach low income individuals who have been out of high school for several years. The 12 experimental, community based educational opoprtunity centers supported by the Office of Education should yield more ample data regarding the probable need for such services.

Unlike the continuing growth of student grant programs, further development of educational opportunity programs has slowed, in part due to the political nonattraction of these programs. The pay-off of grant programs is immediately seen by legislators: Money is given directly to an applicant with documented financial need. The benefits of educational opportunity programs are less tangible, often more costly. Like other programs for the poor, the constituencies of EOP programs are often neither well represented nor organized. This political weakness is also related to the common decentralized nature of the campus based programs. Student grant programs are administered by Federal and State agencies which are experienced and sophisticated in lobbying for more dollars.

The federally supported "trio" programs for the disadvantaged—upward bound, talent search, and special services—are excellent examples of programs which comprehensively address the problems of access for the poor. Yet while Federal grant, loan, and work study programs have increased in an amount of $600 million in the past three years, the trio programs have received no budget increases. This has occurred in spite of the fact that increases in the BEOG program, in particular, have brought onto campuses many additional low-income students who need the supportive services provided by the trio programs.

President Ford's proposed 1976–77 Federal budget, now being discussed in the Congress, ironically proposes a $385 million expansion of BEOG and a $10 million cut in the trio programs. The responses of the Washington higher education lobbyists will be interesting to watch because they have consistently urged vast increases in BEOG while generally ignoring the trio programs.

As rising college costs surpass increases in family income levels, the financial needs of middle, and even upper, income students will draw away additional government resources that could otherwise go to low income students or to support expanded educational opportunity programs. Between fall 1974 and fall 1975, the median family income of new State scholarship winners in California jumped from $11,700 to $14,200.

As increases in financial aid programs more adequately meet the financial needs of low-income applicants, there is already a stronger push to allocate more and larger grants to middle and even upper income students. Low income students who have low achievement and motivational levels and little information about postsecondary opportunities and who, therefore, never apply for financial aid are not being assisted. Nor are support services being expanded for many low income students who will drop out because of a lack of necessary support services after grant programs have provided access. If it is assumed that persistence is a valid measure of effectiveness of financial aid programs, marginal expansion of supportive services may substantially improve the efficiency of grant programs

Policy-makers should also explore creative alternatives to conventional EOP programs. In the early 1970s the College Entrance Examination Board supported programs that provided work study aid to low income college students who returned to their communities as peer tutors and counselors for high school students. Funding methods are also needed which encourage greater cooperation among colleges within a specific region which currently compete for low income students.

Finally, policy makers should learn more about how students assistance programs affect choices of students. Policy makers continually assume that more financial aid will enable more low-income high school graduates to benefit from opportunities and/or lack sufficient achievement and motivational levels, entering college is not a realistic choice, regardless of how much financial aid is available. Nor are public programs of much service if they provide financial aid (like BEOG) to low income students who soon drop out due to a lack of support services. Government efforts must become increasingly concerned with these latter two groups of students if we are serious about eventually providing equal post-secondary opportunities because they are the ones with the fewest realistic choices and opportunities.

LITHUANIAN INDEPENDENCE

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. PATTEN. Mr. Speaker, today marks the 59th anniversary of the restoration of independence to Lithuania.

Although this independence was short-lived, the spirit of freedom of those in Lithuania, and those Lithuanian-Americans is strong.

Today, as we remember this anniversary, all Americans must join with this small nation in assuring them that they are not forgotten in this quest—and that it has our support. The domination and suppression which these people live with every day of their lives must remind freedom-loving Americans of how rich we are in being able to enjoy the most basic and vast human rights, and how we must persevere so that these human rights can be shared with all countries whose people yearn for them.

The history of freedom in the independent Lithuanian State can be traced back to the 11th century. I ask my colleagues to join me in working to assure that restoration of this liberty will be accomplished in this, the 10th century of that magnificent heritage.

KMPC: 50 YEARS OF COMMUNITY SERVICE

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. WAXMAN. Mr. Speaker, on February 19, 1977, radio station KMPC will observe its 50th anniversary of broadcast service to the people of southern California. Starting from a hand-engineered transmitter which broadcast only in the evening hours in 1927, KMPC has grown into one of the leaders of radio in California, providing diverse and comprehensive news, sports, public service, community involvement, and music programing. KMPC can look back with pride on its years of achievement. We can all look ahead in anticipation of its continued excellent service in the future.

I am, therefore, pleased to share with my colleagues KMPC's story of its past half century, and to join in wishing the station and its staff a productive and fulfilling future:

KMPC: 50 YEARS OF COMMUNITY SERVICE

THE HISTORY

KMPC's first official air date was February 19, 1927, when it went on the air as KRLO, brodacasting from 218 Larchmont in Los Angeles, licensed to Freeman Lang and A. B. Scott, and with the station's original engineering done by Bill Deming who is now a syndicated newspaper columnist in Southern California. The station was on the air only evenings, and then only "Sometimes," using Lang's WE 373 double button carbon mike and a phonograph and records from Scott's music store two doors away. The station boasted of 250 watts. Deming also had what was believed to be one of the very earliest remote broadcasts on radio, hosting a show which was an early-day version of Bowling for Dollars from a Los Angeles bowling alley.

Call letters, frequency and base of operation all changed when Lang sold the station to Ernest J. Krause in February of 1928, re-emerging as KEJK in Beverly Hills. Then, in April of that year, it was sold again, this time to the MacMillan Petroleum Company, and it divided its on-air time with Aimee Semple McPherson's KFSG. And, on October 15, made yet another dial position change as its power was doubled to 500 watts.

On January 6, 1929, the station moved from 401 Camden Drive in Beverly Hills to new studios which MacMillan had constructed at Wilshire and Camden, and, 19 days later, changed its dial position.

To promote association with its parent company, a request was made in February of 1929 to change the call letters from KEJK, which was still strongly identified with the former ownership, to KMP. This was refused because KMP was already assigned to Boeing Air Transportation in Omaha, Nebraska. On November 15 of that year the station made its final change of dial position, moving from 1170 to its present 710. (To make that move possible, KFVD, which later became KGBS, switched from 710 to 1000.)

On March 14, 1930, KEJK officially changed its call letters to KMPC. In mid-March of 1932

power was doubled again to 1,000 watts. On March 11, 1933, KMPC was sold to the Beverly Hills Broadcasting Corporation for $50,000.

In June, 1934, Beverly Hills Broadcasting Corporation went into receivership; was acquired by the Pacific Southwest Discount Corporation; the receivership was dissolved in December. On August 4, 1936, Beverly Hills Broadcasting Corporation (KMPC) was acquired by George A. Richards of Cleveland for $125,000.

Richards brought into his corporation as stockholders Bing Crosby, Paul Whiteman and "Amos and Andy," and renamed the station "KMPC The Station of the Stars." Peter Potter's "Platter Parade," Chef Milani Time, and live performances by Vincent Lopez, Woody Herman, Ray Bloch and Alvino Rey were part of the daily format as Richards set out to make KMPC "The west's greatest independent radio station." Robert O. Reynolds joined the station in 1938 as a salesman. In 1940 KMPC was licensed to broadcast around the clock and to increase power to 5,000 watts daytime and 1,000 watts at night. In 1941 Loyd Sigmon, who was later to create Sigalert, became director of engineering and supervised another increase in power to 10,000 watts daytime and nighttime.

In 1944, outgrowing its original facilities, KMPC moved from Beverly Hills to 5939 Sunset Boulevard in Hollywood. That was also the period when KMPC first became known as Southern California's sports station, graduating from Hal Berger's recreations of major league baseball to live coverage of Pacific Coast League baseball, boxing, football, wrestling, racing, golf, tennis and basketball.

In 1947 KMPC received approval to increase its broadcasting power to 50,000 watts during daylight hours, with 10,000 directional watts at night.

Richards died in 1951, the station was placed in the hands of his widow, and was run by now-general manager Reynolds and his assistant Sigmon.

In 1952 Mrs. Richards offered KMPC for sale, and Gene Autry became the principal owner. He, Reynolds, Sigmon and others purchased the station for an estimated $800,000 as the "Station of the Stars" became KMPC Inc., the only major radio station in Los Angeles to be owned and operated by local residents.

From KMPC grew Golden West Broadcasters, which now also includes KSFO in San Francisco, KEX in Portland, KVI and KVI-FM in Seattle, KTLA in Los Angeles, Major Market Radio, Market Buy Market, Sigalert and Airwatch.

In June of 1968 KMPC moved to its present facilities at 5858 Sunset Boulevard, a site which at various times in its own 60-year history has been the home of Warner Brothers (and where the first "talkie" was filmed and Rin Tin Tin launched his career), KFWB, Paramount Pictures, a roller skating rink, and what was billed at the time as the world's largest bowling alley.

THE MILESTONE

On February 19, 1977, KMPC observes its 50th anniversary, "Beginning Our Second 50 Years—A Gold Jubilee," and looking at that important date KMPC Vice President and General Managed Stanley L. Spero observes, "We're proud of the past history of the station and the growth and accomplishments of 50 years, but we prefer to think that we're 50 years young, not old. We learn from the past to do still better in the future, that's what it's all about.

"Obviously you can't live on your past achievements. Our 50 years of service to Southern California is like a textbook to us, showing what we did right and what we did wrong, a learning experience to make us better equipped to move ahead in the future.

"At KMPC we're looking ahead. Looking to the future for better things. Looking to be of more service to the community. Looking to be more involved in the community. Looking to afford more enrichment in our programming, our news, our music, our sports, our traffic coverage.

"This is the best market in the world for the radio medium with our automobiles, our outdoor pursuits, the diversification of residences, recreation, and the great movement and mobility of people, and KMPC is proud to be such an important part of that market."

THE PRESENT

Where does one even begin to tell the story of one of the nation's most honored, most financially successful stations?

With the personality line-up? Dick Whittinghill, now in his 27th year with KMPC; Gary Owens and Geoff Edwards and Wink Martindale and Roger Carroll and Clark Race, all known nationwide by tv audiences; Sonny Melendrez and Pete Smith and Robert W. Morgan and Sie Holliday.

With its traffic coverage? A jet helicopter, a second helicopter and the twin-engine aircraft of Airwatch, plus 11 broadcast equipped mobile units.

With its news coverage? The largest news department of any independent radio station, plus news specials and KMPC Forum and an entertainment editor and an exclusive agreement with the Los Angeles Times for utilization of its foreign correspondents and foreign bureau chiefs around the world and its oft-honored documentaries and award-winning specials.

With the sports coverage? Dick Enberg and Fred Hessler and Don Drysdale and Steve Bailey broadcasting every game of the California Angels, Los Angeles Rams, UCLA football and basketball.

With Airwatch? Honored by virtually every level of government for its service in time of emergency, for the crises and potential crises which it has discovered from the air, for its Pilot's View of the Weather feature, for its Junior Airwatch Traffic Safety Program reaching some 100,000 Southern California youngsters each school year.

With the public service? KMPC's year-round deep commitment to public service, plus its own special events which raise some $200,000 a year for charity with Show of the World, St. Jude Children's Hospital Radiothon, Dick Whittinghill Invitational Golf Tournament, and other annual events.

With the community involvement? KMPC's determination to truly serve Southern California, manifested in literally hundreds of regular and special features throughout the year such as Channelwatch, beach reports, ski reports, working with business and industry as a clearing house to get information to their employees in times of disaster, active Speaker's Bureau, and membership, involvement and participation in countless charities and causes.

Do you start at the top, with Chairman of the Board Gene Autry, Broadcast Division President Bert West, KMPC Vice President and General Manager Stanley L. Spero? Or do you try and tell the story of each of the more than 110 employees who play important roles in the station's success?

Do you try and "define" personality radio, and the philosophy behind a one-on-one relationship with the listener? Or do you simply label KMPC an entertainment-information-service communications medium?

Where does one even begin to tell the story of "KMPC Beginning Our Second 50 Years—A Gold Jubilee?"

ADDITIONAL MANDATORY SENTENCING COSPONSORS LISTED

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANDERSON of California. Mr. Speaker, on page 3460 of the CONGRESSIONAL RECORD of February 2, I listed the cosponsors of H.R. 1559, a bill to provide for mandatory minimum prison sentences for anyone convicted of misusing a firearm in the commission of a Federal crime.

Since that listing, six additional Members of this Congress have joined in cosponsorship. They include: Mr. BUCHANAN of Alabama, Mr. CORCORAN of Illinois, Mr. GOODLING of Pennsylvania, Mr. GRASSLEY of Iowa, Mr. KINDNESS of Ohio and Mr. ROBERT YOUNG of Missouri.

I would like to thank these Members for showing their dedication and sincerity to come to grips with the problem of increasing crime.

In addition, Mr. Speaker, I also enclose several letters that I have received from law enforcement officials in my home State of California in support of this legislation:

LOS ANGELES POLICE DEPARTMENT,
Los Angeles, Calif., January 28, 1977.

Hon. GLENN M. ANDERSON,
U.S. Congressman, 32nd District of California, Long Beach, Calif.

DEAR CONGRESSMAN ANDERSON: I am in receipt of your recent letter advising me that you are again submitting before the Congress of the United States H.R. 1559 which will provide mandatory five years imprisonment for any person convicted of using a firearm during the commission of a federal crime.

As you will recall, I voiced my personal support of this measure when you previously submitted it before the 94th Congress. Please be assured that you have my continued support of this measure and any other legislation which will have a beneficial effect towards the reduction of crime in this Nation.

I am happy to report to you that during the calendar year 1976, repressible crimes in the Harbor Area of the City of Los Angeles were reduced dramatically by 13.3 percent. The entire City of Los Angeles reduced repressible crimes by 1.1 percent. The Los Angeles Police Department, as you know, does not subscribe, as many leading so-called authorities do, to the fact that we can do very little about the upsurge of crime in this Nation. If we have had any success, and I think we have, in making this a safer City in which to live, work and raise our families, it is because the people here care about many things and have been most helpful in working with our Department toward the reduction of crime.

We are extremely grateful to have an elected official such as yourself that takes a genuine interest in crime control and provides us with the support we need to do an effective job. While I realize not all persons convicted of violating the law can or should be imprisoned, I certainly believe that those persons you are directing your attention to through H.B. 1559 are of the type that need to be removed from our streets and commu-

nity and provided with an opportunity for rehabilitation before they are released.

Thank you for requesting my opinion on this measure. You may be sure you will continue to receive my support in all matters having to do with community safety and crime reduction.

I have enclosed a copy of the 1976 Summary of Crimes and Arrests for the City of Los Angeles.

Very truly yours,

EDWARD M. DAVIS,
Chief of Police.
R. L. MAIRS,
Captain, Commanding Officer, Harbor Area.

COUNTY OF ALAMEDA,
Oakland, Calif., January 17, 1977.

Hon. GLENN M. ANDERSON,
Member of Congress, House Office Building, Washington, D.C.

I am very happy to see your realistic approach to the control of firearms during the commission of a felony. Your Bill is in keeping with our Section 12022 and Section 12022.5 of the Penal Code, State of California.

I do not believe that general gun control laws will take firearms out of the hands of criminals—only from honest citizens. The Sullivan Law has never been successful in New York, and Britain's gun control has not proved successful in keeping weapons from the IRA.

I strongly believe that punishment for violating the law is the best deterrent.

If I may be of further assistance, please contact me.

TOM HOUCHINS,
Sheriff.

STOCKTON, CALIF.,
January 18, 1977.

Hon. GLENN M. ANDERSON,
Member of Congress, House Office Building, Washington, D.C.

DEAR GLENN: Thank you for including me in your gathering of opinions regarding legislation that you have introduced that would provide a mandatory five-year penalty for anyone convicted of using a firearm during the commission of a federal crime, in addition to the sentence received for the crime itself.

I not only enthusiastically endorse such legislation, as it would have great meaning towards the diminishing of criminal activity if for no other reason than to have the perpetrator of a crime that was committed while he was armed, incarcerated for longer periods of time but I feel it would diminish to a great extent the opportunity to eliminate witnesses and the victims and law enforcement officers who are responding to such crime scenes.

I feel so strongly concerning this, I am recommending to my associates that they vigorously support such a measure, and I am taking the liberty of forwarding the correspondence to Mr. Ferris E. Lucas, Executive Director of the National Sheriff's Association.

I am sure my associates join me in expressing our gratitude for your interest.

Sincerely,

MICHAEL N. CANLIS,
Sheriff-Coroner, San Joaquin County.

HANFORD, CALIF.,
January 17, 1977.

GLENN M. ANDERSON,
Member of Congress, House Office Building, Washington, D.C.

DEAR MR. ANDERSON: H.R. 1559 is the type of legislation that we need to help curtail the use of weapons by the criminal.

This is better than trying to take all hand guns away from the citizens of our country.

Sincerely yours,

CLEO O. WEBB,
Sheriff.

MADERA, CALIF.,
January 19, 1977.

Hon. GLENN M. ANDERSON,
32nd District, California, House Office Building, Washington, D.C.

DEAR CONGRESSMAN ANDERSON: I have become aware of HR 1559, wherein your bill was referred to the Committee on the Judiciary. I want to tell you how pleased I am that you have, I think, been responsive to the needs of the people and law enforcement in this area.

The disarming of citizens is not a responsible way to approach crime; whereas your bill, which holds people responsible for the natural and probable consequences of their acts, is in the best Democratic tradition.

Best regards,

EDWARD B. BATES,
Sheriff-Coroner.

SAN DIEGO, CALIF.,
January 18, 1977.

Hon. GLENN M. ANDERSON,
32nd Congressional District, House Office Building, Washington, D.C.

DEAR CONGRESSMAN ANDERSON: Thank you for your letter of January 12 requesting my comments on H.R. 1559 providing for mandatory penalties for those persons convicted of Federal crimes while using firearms.

For some time I have been extremely supportive of this type of legislation at the State level. Recently, California enacted several pieces of legislation requiring mandatory sentences for those convicted of using firearms in the commission of certain crimes. I am convinced that measures such as you propose will have a greater impact on our spiralling violent crime rate than so called "firearms registration" legislation which has been in vogue in recent years. That approach would have little or no impact on the criminal element.

Please be assured of my support of your bill and by copy hereof, I am informing members of the San Diego Congressional Delegation of my views in hopes that they will lend their support in this matter.

If I may be of further assistance in this or any other matter of mutual interest, please do not hesitate to call on me.

Sincerely,

JOHN F. DUFFY,
Sheriff.

FOOD POWER

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. GLICKMAN. Mr. Speaker, over the past several years we have seen the positive power of some very important issue-oriented groups—women's groups, ethnic groups, and other minorities—emerge through their outspokenness with outstanding achievements.

Last weekend in Wichita, constituents of mine, concerned with the often powerless situation farmers in America are finding themselves, handed me a "food power" button to wear. I wore the button that day and because I am particularly concerned with the plight of American farmers today, would like to share with you the remarks I made last Saturday, February 12, 1977, at the Hutchinson Community Junior College in Hutchinson, Kans., to a mixed group of farmers and other constituents concerned with farming:

STATEMENT BY CONGRESSMAN DAN GLICKMAN TO FOURTH DISTRICT FARM FAMILIES

I propose an alliance of farmers and their families. You have too long been powerless and your lack of power has undermined your ability to survive. If you don't survive, neither does the nation. That must be your message to Congress.

The American farmer is a victim of his own strength, his individualism. But that very individualism has worked to divide our farmers and thus weaken them as a force, as a voice, as an effective lobby in Washington. Now is the time for you to start something. For yourselves and for all of us. To prove that individuals can join together in a common cause and still not lose that individualism that makes our farm families great but gain from a new found strength of unity.

And if you unite and you convince the consumer and Congress that your success is their success, that your power is their power, that your strength is their strength then you will have realized a fundamental truth—good government starts and ends with the people.

I will do all I possibly can for you. But you must help yourselves. The issue is not how to solve your problems, for you must first convince this nation's leadership that there are problems, dire problems and that those problems affect us all.

They see only the surface. They see grain surpluses, high prices in grocery stores. They do not see that surpluses cannot happen if the farmer cannot afford to farm. They can't see that the farmer is not to blame for those high prices.

Unite and teach them. Write to Washington. Organize. Come to Washington. Make Congress and the Department of Agriculture hear you. I'm wearing a button a volunteer made for me that says, "Food Power." I ask you today to join with me, to help us make people aware of the importance of food power to our economy, to our very being as a nation.

I will take your message to Secretary Bergland. I will take your message to the agriculture committee. I will take your message to Congress. But you must speak too; you must be heard too. I urge you to organize, to hep me help you. Act today.

LITHUANIAN INDEPENDENCE

HON. ROBERT N. GIAIMO

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. GIAIMO. Mr. Speaker, it is a privilege for me to join Lithuanian-Americans throughout our country in commemorating the 59th anniversary of the establishment of the Republic of Lithuania.

It was on February 16, 1918, that a council of delegates proclaimed an independent Lithuania. That country's admittance into the League of Nations in September of 1921 reaffirmed Lithuania's basic democratic principles and peaceable association with her fellow nations.

Regrettably, Lithuania's independence was to be short-lived. First Soviet and then Nazi troops overwhelmed that small

country during the worst days of World War II. After the war, the Soviet Union continued its policies of repression and occupation. While the flames of political freedom have been extinguished temporarily, however, the Soviet Union has not been successful in extinguishing the fires of liberty that burn in the hearts of the Lithuanian people and of people everywhere who cherish their independence and self-determination.

In this spirit, I am honored to join with my colleagues in the Congress to renew our support and to salute the Lithuanian people who continue to aspire to regain their individual and religious freedoms.

LITHUANIAN INDEPENDENCE

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. McKINNEY. Mr. Speaker, today marks the 59th anniversary of Lithuanian independence. As we reflect on the stormy history of Lithuania, let the fierce determination of its people be an example to all Americans.

During the Middle Ages, Lithuania was an influential and powerful force in Europe. The strength of the country was not, however, strong enough to overcome the subjugation by Tsarist Russia that began in 1795. This occupation by Russian forces did not end until German armies advanced through the country in a march toward the Russian border. Despite the damages to the resources of the country, the Lithuanian spirit remained unbroken. So, on February 16, 1918, the Lithuanian people felt that the time was ripe for a Declaration of Independence. A resolution was adopted by the Council of Lithuania on that day, declaring Lithuania to be a free and autonomous state. And I quote from a translation of this declaration:

> The Council of Lithuania, as the only representation of the Lithuanian people . . . declares that it is restoring an independent Lithuanian State on democratic foundation . . . and that it is severing all the ties that have ever bound this state to other nation.

Tragically, this period of self-determination was to last a mere 22 years. At the close of World War II, Lithuania was forcibly annexed into the Soviet Union under the reign of Josef Stalin. Since that time, the Soviet Union has made a concerted effort to destroy any and all reminders of the Lithuanian State, using tactics as mass deportation of native Lithuanians and the implantation of Soviets into the area. In one 4-year period alone, beginning in 1944, over 350,000 people were forced to leave their native land.

I know that every American of Lithuanian descent feels the injustices heaped upon the land of their ancestry as deeply as I do. Despite continuing attempts by Soviet forces to break the spirit of Lithuanians who remain in their homeland, there are strong indicators that the people have not lost their taste for freedom. It is important that the people of the United States remember this through recognition and support for the right of self-determination for Lithuania.

PROBLEMS OF AIR CARRIER INDUSTRY

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. MILFORD. Mr. Speaker, most persons are unaware of the serious problems the air carrier industry faces today.

In a speech before the National Aviation Club in Washington last year, Mr. E. H. Boullioun, president of Boeing Commercial Airplane Co., discussed these problems and detailed possible solutions.

I share his remarks with my colleagues:

REMARKS OF E. H. BOULLIOUN, PRESIDENT, BOEING COMMERCIAL AIRPLANE CO.

Thank you, Jim, for your generous introduction.

Distinguished guests, members of the National Aviation Club and Aviation/Space Writers Association.

Last year about this time we at Boeing were doing our one-year and five-year business forecasts. When the data behind these forecasts was shown to me, I was shocked. It looked to me as if a very important public service and vital industrial segment of our country was being threatened. I called my staff together to develop a plan so we could show this data to the airlines, the concerned government officials, the unions and the media. At first, I got a very negative reaction. My salesmen didn't think I should meddle in the airline business. The industrial relations organization didn't think the unions would be concerned. The public relations staff didn't believe that this was anything that was of interest to the media. They did think, however, that the government officials should hear about it. After they got over their parochialism they went to work to provide this data and I believe most of you today have been exposed to it.

Basically, the data explains why the airlines will not be able to purchase enough aircraft during the next several years to meet both replacement and traffic growth needs. This, in turn, adversely affects public service, high value employment and our world market leadership.

The reason I am mentioning this is because what really happened was just the opposite of our first reaction. We found every organization was interested in the data and the problems that were posed.

The airlines started to work together on this common problem. The unions joined us by appointing an official to get the message into those areas where it would be effective. The networks, major newspapers and magazines have presented the data in a very constructive and objective manner. Even Congress and the Administration have been impressed with the data although I must admit they have yet to see the solution in the same sequence as we see it.

It has been 50 years since our government and industry joined together to create what has become the finest air transportation system in the world and probably the best public transportation system of all time. The system is unique. It provides the largest interconnecting network for passenger travel ever achieved. Its service has been developed to accommodate both the business traveler who is predominantly schedule conscious and the discretionary traveler who is predominantly price conscious. It provides this service with coach fares that cost only 40 to 60% of similar service provided nearly everywhere else in the world.

Recently, however, the first signs of weakness have begun to appear. During the last seven years our air transportation system has been severely tested.

First, the general economic condition of the country caused air traffic growth to drop dramatically. Nearly every forecast of the late '60s missed the extent of the economic recessions of this decade.

Second, there was a major change in service patterns: The proliferation of nonstop service between many city pairs. In the late '60s, the airlines, basing their equipment purchases on moderate traffic growth and a continuation of the hub spoke system, began ordering large wide-body aircraft. When traffic dropped and the hub spoke system was replaced by the proliferation of nonstop service, the big jets could not be filled. Because of the long lead time in their equipment purchase programs, the airlines were faced with considerable overcapacity which is just now disappearing.

Third, a new rate-making formula, known as the domestic passenger fare investigation formula, or DPFI, with unique efficiency features was employed in 1971. This formula, based upon effective utilization of capacity, hit the airlines at the worst possible time, that is the period of their greatest overcapacity. They had no way to adjust capacity to meet the formula and thereby qualify for higher earnings.

Fourth, a wholly unexpected tripling of fuel cost was incurred.

Penalized by this overcapacity and burdened with a phenomenal increase in fuel prices, the earnings of the carriers have been diminished to dangerous levels. And, for the first time in the jet age, the airlines faced with the requirement to replace existing aircraft and concurrently acquiring aircraft needed for growth.

These facts are well known to this group. I shall not belabor them but I think it's important to review them and the responses they have provoked.

I believe airline responses to these factors indicate that they managed their affairs with great prudence during this period and have been able to retain a high level of public service. But as I indicated in my opening statement, this has not been the opinion of some of the people in Washington, D.C. They believe the airlines have management inefficiencies and the entire air system structure is now under challenge.

For the past several years some people here have made the air transportation industry the target for more purposes than I could ever imagine possible. When the fuel crisis hit, the airlines—using less than four per cent of our nation's annual consumption of oil—became a primary target of the fuel savers. As inflation climbed, the airlines—with the lowest percentage increase in prices of any major service industry—became the primary target for cost savers who advocated even lower fares. As the public became more and more disenchanted with our growing bureaucracy, the airlines—administered by one of the smallest government agencies—became one of the primary targets for deregulation.

Regulatory reform has now become a major issue.

Consumer advocates and some members of Congress sponsor open competition among carriers in the belief that this would (1) lower fares, (2) drive out the inefficient operator and (3) allow many more people to fly. Another group, involving many business leaders and government officials, looked with

great disfavor upon the growing government bureaucracy. They decided that the regulation of transportation would be a good place to begin to cut back government involvement with industry.

These two moves toward regulatory reform have been supported to varying degrees by a third group, including some members of the air transportation industry. This third group believes that the rate-making processes as practiced for all forms of public utilities will never allow companies within those businesses to make a sufficient return on investment. Too, a common attitude among all these groups is that regulatory reform is needed for simply speeding up the decision processes.

What are the results of these pressures to date?

On the negative side—

(1) Air service has deteriorated.

(2) Several major airlines are struggling with enormous debts with little prospect of improving their financial positions for years to come.

(3) The U.S. airlines find themselves with an aging fleet of aircraft, the average age of all commercial aircraft flying today is 8 years, the value of these aircraft is declining and their operating costs increasing.

(4) No significant improvement is being made in decreasing total aircraft fleet noise or in moving toward the introduction of more fuel efficient aircraft.

On the positive side—

(1) Congress now has received several proposals for regulatory reform and considerable testimony has provided an unusual amount of data so that the impact of the various changes suggested can be appropriately considered.

(2) The Administration has released a new international aviation policy. This policy could provide better international service patterns.

(3) A proposal to provide front end incentive funds for the replacement of older noisier jets is now under consideration within the administration.

(4) The Civil Aeronautics Board has taken the first few steps toward route realignments and adjustments.

While each of these positive steps may ultimately help the carriers, none of these actions squarely face the basic problem underlying the negative results. The airlines are just not achieving adequate earnings or an appropriate return on investment.

Their performance, as measured against other public utilities, other airline operations elsewhere, or by the attitude of most of the people they serve, suggests that they have been doing a superior job.

In my travels and contacts throughout this country, I have detected no significant public outcry over airline service or airline fares. I have not seen a solid case presented by anyone, anywhere, that proves that the airlines should be denied a just and reasonable return on their investment.

In fact, in a recent U.S. News and World Report survey, the airlines were ranked number one as the most respected business in America. Only in Washington do I ever hear that adequate fare increases are politically unacceptable.

I detect a feeling that until some airline fails—outright fails, that the Congress and the CAB are afraid that they can't defend themselves against charges of protectionism.

The whole thing is unreal to me.

As a matter of fact, the record of the CAB is strong defense against charges of protectionism.

Be that as it may, the task of the people in this room is to help fashion an improved public air service system. So, let's go to the basics. Marketing techniques can be changed, methods of capital investment can be altered but always, always there must be an adequate return to pay for the service.

Subsidies, we know, are a poor substitute. In this country we have learned that subsidies work most effective when promoting growth and work least effective when trying to salvage a business or system that has failed. To me, it's very clear that all other actions for improvement will fail unless the airlines are allowed to earn an adequate rate of return.

Varying estimates have been made as to the capital needs of the U.S. carriers between now and 1985. If we average our own forecasts with those of other authorities, it looks like the airlines will need about 45 billion dollars through 1985 for aircraft purchases relating to replacement and growth. About half of that, or up to 25 billion dollars will have to be provided by the carriers themselves with outside financial sources providing the remainder.

Whether the outside capital is provided by private sources or, Lord forbid, the federal government, either party will demand certain assurances that its investment is protected. The first assurance required will be that the carriers can achieve appropriate earnings. Second, the investor will also require reasonable assurance of market stability.

So let's put market stability into perspective. First, one has to recognize the real basis for investing in an airline. The government awarded franchise is the cornerstone of an airline's economic position. I have not heard regulatory reformers fully explain what mechanism will replace these route franchises.

Again, in regard to market stability, the air carriers must have some assurance of the markets which they will serve. The current trend to greater charter operations, if carried too far, will undermine the dual purpose service now provided by the scheduled system.

Low cost charter service may be good for vacation-oriented travel. But the record to date strongly suggests that it will never provide for adequate low cost travel to nonvacation destinations. Most of our cities fall into that category.

Scheduled service versus charter service is one form of market division. Within the scheduled service there can be the increase or decrease of competitive service on a given city-pair route. New routes can be added. What has not happened in the past but should happen in the future is for excess competition to be eliminated where the market will not support it. The public deserves a choice in carriers but it seems to me when competition does not allow any airline to carry an adequate amount of traffic to pay for its service, then a portion of that competition should be eliminated.

Let me clarify the two basic actions necessary to restore economic health to the airlines.

(1) The airlines must be allowed to earn an adequate return on investment.

(2) There must be a good program of route realignments which will provide good service and reasonable stability.

As manufacturers of commercial jet aircraft these factors are as important to us as they are to the financial community, which in the end serves us both.

The lack of earnings by U.S. carriers has seriously impacted our nation's aircraft manufacturing industry. At Boeing we have been the most fortunate because we have had the one aircraft—the 727—which has continued to be purchased by U.S. carriers. As a matter of fact, if it were not for foreign sales, it is my belief that the production of every other commercial jet, except the 727, would have ceased by now.

This heavy reliance upon foreign sales, while making a major contribution to our balance of trade and helping us to retain at least a strong core of our aerospace workforce, is not without its difficulties. Certain foreign governments, who have authorized their national carriers to purchase significant amounts of American equipment, are now demanding greater participation in the production of that equipment. The lack of U.S. sales increases their leverage in these discussions.

We recognize that there must be greater international participation in the development and production of commercial jet aircraft. We know that there will be more jobs here in America if we are able to retain a substantial portion of the world market. Foreign purchases tend to complement the U.S. purchase cycle. They provide us with greater continuity in our production rates. In turn, this adds stability to our workforce and enables us to improve our production efficiency with time.

That cycle could be broken unless U.S. carriers return to the financial position whereby they can continue to lead in the purchase and introduction of new aircraft.

This is one of the fundamental reasons why we at Boeing have elected to take such a strong active role on behalf of the U.S. airlines.

There are three basic types of commercial airplanes—long range, medium range, and short range. The long range airplanes through 1990 will be the 747, DC10–30, and L–1011. The open medium and short range market consists of new technology aircraft that are quieter and with lower fuel burn. These new aircraft are replacements for the 727, 737, and DC–9.

Good public service demands more fuel efficient and quieter aircraft. The development of this kind of aircraft cannot be launched without firm commitments from two or three major U.S. carriers.

Should our industry continue to falter, I know that a European consortium sooner or later will develop and produce this type of airplane.

The risk we are facing, should this happen, is the loss of one-third or more of the world market of jet aircraft, loss of thousands of high paying jobs, and the loss of leadership in commercial jets.

That's a high price to pay, but I assure you continued penalization of our airlines will exact that price from our nation.

Another critical point——

We must not let the prospect of improved airline earnings this year and the recent increase in aircraft orders lead us to believe that our difficult days are over. This near-term improvement looks good because of the poor condition from which the trend has developed. It will take many years of even greater airline earnings before one can say that the air transportation industry is again on its way. You remember that I indicated earlier the carriers themselves will have to come up with 25 billion dollars through 1985 in order to continue the service that is necessary.

All of us need to bear down, work together and follow through to make certain that near term improvements will evolve rapidly into an estabilshed program to assure a longer term healthy condition.

Air transportation, as I said earlier, is a vital public service industry. The term public service refers not only to our treatment of the public but also to the manner in which we organize and manage to bring about that service.

I believe that the best service can be maintained by retaining certain characteristics within our air transportation system and industry. Any proposed changes to our system should be weighed carefully to make certain they help to retain the following characteristics.

To the greatest extent possible I believe we should——

(1) Utilize private industry in all segments.

(2) Continue to maintain a scheduled air

service system designed to accommodate both time-sensitive and fare-sensitive travelers.

(3) Provide a choice of carriers to the potential traveler or shipper.

(4) Have the user pay for the service.

(5) Encourage the development of competitive aircraft.

These characteristics, in my opinion, have been instrumental in making our air transportation industry the finest in the world.

Two of these characteristics relate to competition. Competition can be visible as a football game or as subtle as a wink. Still, there are limits to competition if it is to be used effectively and serve us beneficially. However, in the air transportation industry competition has served us well. Passengers and shippers profit from a choice of carriers. Carriers profit from the choice of equipment. Equipment manufacturers profit from a choice of markets.

In every phase of our business it seems to me that the short term duplicative costs of competition are usually outweighed by the longer term improvements in performance and efficiencies.

For example, let's go back to the original 707/DC-8 competition. Boeing led with the prototype DASH 80. Douglas offered a wider body. Boeing increased the body diameter. Douglas offered intercontinental range. Boeing countered with two versions of the 707, one for domesitc and one for international. Boeing and Douglas reacted to Convair by also offering a turbofan engine. Douglas then stretched the DC-8 providing more seats or cargo capacity. Boeing continues 707 production to this day with many other product improvements made along the way.

Or take the 737 versus DC-9. The British began by selling the BAC-111 to U.S. airlines. Douglas countered with a slightly larger DC-9-10. Boeing followed with the 737. Douglas brought out the improved DC-9-30. Boeing responded with the 737-200. Douglas countered with the DC-9-50. The DC-9 and 737 are selling well to this date.

In the foregoing examples both the customer and the public benefitted—the customer with increased performance and lower relative operating costs. The traveler—more jet service to more places at lower cost. In every instance, it seems to me, the airlines and the travelers have benefitted from this type of competition. Other competitions perhaps not quite so dramatic continue to this day.

My remarks today have dwelt more upon airline matters than upon manufacturers' issues. I have done so in the firm belief that our success is greatly dependent upon the health of our domestic airlines.

My emphasis upon airline earnings and relative market stability should not be construed as being opposed to regulatory reform. If regulatory reform will provide equal or better public service and allow for improved earnings and greater market stability—I'm all for it.

My concern about major regulatory reform is that no one has developed a total scenario that convinces me how to get from here to there. The real question is how do the airlines and the manufacturers survive the transition process. I'm not asking for a guaranteed process. Can we change the system from public to private franchises without great harm occurring to public service?

I think the airlines are being put in a position of a man on a high diving board standing before an empty pool. At poolside are numerous advisors yelling for the diver to jump with the promise that the pool will be filled by the time he reaches that level. In the case of the airlines I am not convinced that the water supply is secure or that the valves will be turned on in time.

Like the diver, it seems foolhardy to jump on faith because the risk appears too great.

In summary, two basic near-term actions transcend all others in my opinion to restore our air transportation system's economic health.

(1) Allowing the airlines to earn an adequate return on investment.

(2) There must be a good program of route realignments which will provide good public service and reasonable stability.

If we don't do these things immediately we won't ever get to try some of the new ideas developed in regulatory reform because the airlines will have gone the way of the railroads.

Finally, let me acknowledge that there are many people in this audience who long have espoused the cause of commercial aviation. I salute your efforts. I hope that my remarks today have provided some perspective to the problems we face and the priorities with which we must address them.

Our industry has a record of great public interest. We can increase that service and benefit tenfold if we pursue a practical course in recognizing market requirements of the future and industry requirements of today.

Thank you.

LITHUANIAN INDEPENDENCE DAY

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. CORCORAN. Mr. Speaker, all over our country today, Americans of Lithuanian descent are celebrating the 59th anniversary of the reestablishment of Lithuania as an independent nation. This commemoration is all the more meaningful because today, Lithuania is under the alien domination of the Soviet Union.

Throughout its history, Lithuania has been forced to endure the harsh yoke of outside domination many times. Until 1915, it was under the domination of the Russian czars. The Germans conquered it during World War I. Then, in 1940, after a brief period of independence, the Lithuanians were once again conquered by the modern day czars of the Soviet Union.

In spite of this adversity, the Lithuanian people, both at home and abroad, remain a strong, spirited people, dedicated to securing, once again, the independence of their homeland. Their struggle belies the Russian propaganda, which says the Lithuanians are happy as a Soviet puppet. Those who know the Lithuanian people know that this is not, and never will be, true.

The light of freedom burned brightly in Lithuania for only a short time, but even today, that light has not been extinguished. The people of Lithuania still cherish freedom, and they still search for it—the very freedom we sometimes take for granted.

The central principle in our American way of life is that human rights must be respected, and that human freedom—religious, economic, and political—must be preserved. So, as defenders of freedom, we join today with the people of Lithuania in celebrating the 59th anniversary of their independence and the 726th anniversary of the founding of Lithuania. In so doing, we celebrate freedom everywhere, and rededicate ourselves to its preservation.

EXTEND HEALTH SERVICES PROGRAMS

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ROGERS. Mr. Speaker, I am today introducing legislation, cosponsored by most of the members of the Subcommittee on Health and the Environment, which would extend for fiscal year 1978 the authorizations of appropriations for those health programs which expire September 30, 1977.

The Health Services Extension Act of 1977 would extend the authorizations of appropriations for the following programs: grants to the States for comprehensive health services, hypertension, migrant health centers, community health centers, family planning, sudden infant death syndrome, hemophilia treatment centers, blood separation centers, community mental health centers, maternal and child health, and home health services.

The Biomedical Research Extension Act of 1977 would extend the authorizations of appropriations under the National Cancer Act, the National Heart, Lung, and Blood Act, and the National Research Service Awards Act.

The Health Planning, Health Services Research, Statistics and Medical Libraries Extension Act of 1977 would extend the authorizations of appropriations under the National Health Planning and Resources Development Act of 1974 and would extend the authorizations for health services research, health statistics, and medical libraries.

A simple, 1-year extension of these expiring programs without substantive amendments will provide the new administration as well as the interested public with the opportunity to carefully review these programs and make recommendations to the subcommittee with respect to possible future revisions. Thus, the proposed legislation authorizes the continuation, but not the substantial expansion, of programs under the Health Services Extension Act, the Biomedical Research Extension Act, and for health services research, statistics, and medical libraries by extending these well-established programs at authorization levels of 115 percent of fiscal year 1977 appropriations. This figure is intended to take into consideration inflationary factors.

Because the National Health Planning and Resources Development Act of 1974 is not yet fully implemented, it is my judgment that, rather than basing fiscal year 1978 authorizations on last year's appropriations which reflect a level of support based on preliminary implementation of the law, the authorizations of appropriations for this act be set at the fiscal year 1977 authorization levels. This level of funding would allow the program to develop during fiscal year 1978 to the extent anticipated when this new authority was enacted in 1974.

Hearings on these measures have been scheduled for February 22, 23, and 24, 1977.

A LESSON OF LEADERSHIP—JAMES EDGAR BROYHILL

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RHODES. Mr. Speaker, the January issue of Nation's Business had an article showing a fine example of the American dream being realized through hard work and the determination to succeed. Of added interest, it is a tribute to James Edgar Broyhill, the father of our colleague, Hon. JAMES BROYHILL of North Carolina. For the benefit of my colleagues I am inserting excerpts from the article at this point in the RECORD:

TRIBUTE TO JAMES EDGAR BROYHILL

A colorful part of the lore of American business is the recurrent story of the poor youth who leaves the farm and builds an industrial empire.

Romantically overdrawn?

Not a bit, as witness the life of James Edgar Broyhill, 84-year-old chairman of Broyhill Industries, a home furniture manufacturer based in Lenoir, N.C.

Ed Broyhill was 21, with a sixth grade education obtained in a one-room schoolhouse, when he decided he had "followed the mule" long enough. He left the family farm to get more education and went on to a career of striking success in the business world.

His company has 16 plants and annual sales of $200 million.

He is a humble man, says his son, Paul, chief operating officer and president of Broyhill Industries. "But I do think my father is a living example of the American dream. Our company's growth shows what one country boy can do."

Mr. J. E., as many employees call him, walks at a rapid pace, leaning forward as if he were perpetually reaching for a finish line and as if he expected to get there first.

He is in the office from eight to noon five days a week, before heading for a golf course to play his daily 18 holes.

He was born in Wilkes County, N.C., the youngest of six brothers and three sisters, and his early life was one of toil from dawn to dusk.

In Mr. Broyhill's office today there are reminders—an anvil, a model of a farm wagon, and an ancient piece of wagon equipment. His earliest excursions from the farm were in a similar wagon. Now he is flown in a Learjet, or he drives a black Cadillac that often is caked with dust from rural roads.

He delights in going back to the old farm, which is still in the family, to reminisce and to show by the tree lines the course of the rutted road that led to Lenoir in his boyhood. It was on this road one day in 1913 that he hitched a ride on a lumber wagon to embark on a new life.

With $5 in his pocket, he headed for Boone, 40 miles away, to enroll in the Appalachian Training School as a seventh grader. Within 13 years, he had started his own furniture manufacturing business.

He has built a company that provides more than 6,500 jobs and is a significant economic force in western North Carolina.

A remarkable facet of the growth of Broyhill Industries is that it has been accomplished with internally generated capital. The company is privately owned and has not taken the merger route to growth.

Mr. Broyhill's younger son, James T., an eight-term congressman from North Carolina, says his father's success is due in great part to fierce competitiveness and hard work, combined with faith in people.

A man equally at ease with national political leaders and with production workers in his factories, Mr. J. E. is on the boards of directors of a number of firms, and he is active in civic and religious organizations. He is known for philanthropies.

Ed Broyhill and his wife, whom he married in 1921, live in a spacious hilltop home not far from his company's headquarters. In addition to the two sons, there are two daughters—Mrs. W. E. Stevens, Jr., and Mrs. Willard A. Gortner. Mrs. Stevens's husband is executive vice persident of Broyhill Industries.

In an interview with a Nation's Business editor, Mr. Broyhill talked about his life, career, and business philosophy.

Let's talk about your early years. What was your ambition as a youngster?

I don't recall having any. My life on the farm consisted mainly of hard work, and that didn't leave a lot of time for daydreaming. I had to do everything on the farm. I remember doing the blacksmithing. We made our own waterwheel for power to grind corn and cut timber.

When we weren't in the fields, we would haul timber with our team of mules and wagon. We had a few apple trees, and I remember hauling those apples to Charlotte. That's about 60 miles. Sold them right out of the wagon, and when they were sold, we headed back home.

Did you put yourself through school at Boone?

Had to. My family didn't have any money. When I left home, my father gave me $5, which was a lot of money in those days for us.

How did you get into the furniture manufacturing business?

After I was mustered out of the Army, I came back to Lenoir, and I didn't have any specific plans. I had decided not to go back to school. So, while I was thinking, I started hanging around my brother Tom's factory, the Lenoir Furniture Corp.

When I was in the Army, I had learned to type. Well, my brother's office manager found out I could type, and I started typing letters for him. He would sit beside me and dictate. I could type about 60 words a minute. Then, as time went by, he taught me to do bookkeeping.

What was your salary?

The first year, my brother said nothing about paying me.

Did the subject of money ever come up with your brother?

He never mentioned it that first year, and I didn't either. I was too embarrassed. Anyway, at the end of the year, he gave me a check for $1,800. That was good money in those days. After that, I started getting a $150 check each month.

Didn't you go into sales for your brother as well as office work?

Yes. I would go out into the little towns around Lenoir and sell. My first big trip came in 1922, when I went to New Orleans. By that time, my brother's factory was making bedroom suites, and we had an idea for a glass door chiffonier. The plants superintendent sketched it out on the top of a cardboard shoe box, and I took that with me as a sales brochure.

How did it go?

I sold three or four carloads. In those days, that was a tremendous sale. Well, it made quite an impression on my brother. That was what I was trying to do all the time—impress him. After that, I started handling the sales force as well as working in the office.

Were you a natural salesman?

Selling didn't come easy for me. It took a considerable amount of bucking up of my courage for me to go in and make a call, particularly a cold call. That was the greatest obstacle I had to overcome, and I did it the way I always overcame obstacles—hard work and determination to succeed.

When did you start your own business?

My brother and I worked together until his death in 1955, but I started my own company in 1926. By that time, I had paid for my house, and I was able to borrow $5,000 on it to start the Lenoir Chair Co.

I rented an old blacksmith and buggy shop for $15 a month. With eight employees, I began making upholstered chairs, and later, living room suites. My brother's salesmen became my salesmen, too. It was good for them, because it gave them a line of living room suites to sell along with the bedroom suites my brother's plant was making.

I must have had about 100 employees. Somehow, we managed to stay in business, but I can tell you that the Great Depression was the worst period in my life. I had little capital to exist on, but we all worked hard and even expanded.

Expanded?

In 1932 a company went bankrupt that had a very modern factory. My brother, myself, and a couple of other fellows bought it for about ten cents on the dollar. This factory had good machinery, 75,000 square feet of floor space, and 60 acres of land.

My partners weren't interested in doing anything with the plant for a couple of years, and I finally went to them and offered to take over the plant and reimburse them for all expenses. They turned it over to me immediately. It cost me $19,000. Today, it would cost several hundred thousand dollars.

I started operating the factory in January, 1935, and pretty soon had about 100 people employed there. After that, I just kept expanding, but capital was a problem. Up until 1938, my brother had to endorse my notes at the bank.

When did Broyhill Industries come into being?

Initially, we simply called ourselves the Broyhill interests. My brother owned the Lenoir Furniture Corp., and I owned the Lenoir Chair Co. In 1930, we invested in another furniture company and began working as partners. There weren't any titles. We were very informal.

In 1935, we combined our two offices, and then in 1936 my brother suffered a heart attack and went into semiretirement. After that, I managed his businesses and mine. In 1943, we combined all the sales staffs into an agency we called the Broyhill Furniture Factories. The overall operation was fully combined and named Broyhill Industries last year.

How did you manage to survive and expand while other furniture manufacturers were going bankrupt in the Depression?

There were many times when we weren't sure we could keep on, but not once during those years did we fail to show a profit and grow. However, up until I was able to get that $100,000 bank loan, it was hand to mouth.

Did you every worry about the risks you were taking?

Oh sure, some. But I was determined to succeed and willing to put in the hard work that was necessary.

I think the best leadership is by example, and I always made it a point to work harder than anyone else. All of our people worked hard, too. Many times we would come back at night and work.

When was your next major expansion?

All during the Depression I would attend auctions of bankrupt plants and buy machinery and equipment at a fraction of their original cost. Then I would expand one of the plants to accommodate those purchases, and I would add a few workers and a few salesmen. That was the slow way to do it.

But with capital and credit scarce, that was the only way.

I guess the biggest risk came in 1941, when I bought two factories at the same time and put them into operation. My brother said I was out of my mind. The next year, I bought a couple more, so that we had six furniture factories.

In the years since World War II, we have added more plants, to make us the second largest furniture manufacturer in the nation. We are the largest privately owned manufacturer. Our sales would have been around $200 million last year, but they weren't because we had a plant burn down.

How would you sum up the business philosophy that has guided you up the ladder of success?

I have always given the most I have, whether in product value or service—which is usually more than the customer expects and more than my competitors are willing to give. This philosophy has seen me through some very trying times.

Has religion been an important factor in your life?

Always. Every day, I read a chapter in the Bible. Most of my reading is religious literature. The Bible is the greatest book ever written.

Thousands of books have been written on how to manage people, but none of them is as good as the Bible.

You have remarkable stamina. Has that been one secret of your success?

Unquestionably. In my early days in business, I would work as a salesman during the day and do the bookkeeping and office work at night. On the side, I sold insurance for a while and dealt in lumber.

One thing that has always helped is the ability to take a short nap and wake up refreshed and ready to go. For a while, I had a driver, and I would take naps between sales calls. When I was traveling by train, I would do my traveling between cities at night and work during the day.

What qualities have you looked for in selecting your managers?

I have always looked for reasonable intelligence. However, attitude—desire and willingness to work—has always impressed me more than education or intelligence.

What is the most effective way to get the most out of people?

First, you have to pay them well. Also, you have to be nice to them, not be offensive. Cooperate with them. I believe in giving a man a job and then having confidence in his doing it. I have always given a man a chance. A few have failed, but most have succeeded.

What about mistakes? How do you react?

Anyone can make a mistake. I expect people to learn from their mistakes. I make it clear, however, that they shouldn't make the same mistake again.

When it has become necessary to fire someone, have you found it difficult?

Always. But you must have an element of toughness in order to be a successful businessman. When it becomes necessary to make those kinds of decisions, you have to make them. You can't straddle the fence and be successful.

What do you consider the most satisfying aspect of your business career?

Overall, I suppose the most satisfaction in my career has come from seeing the business grow and provide benefits for more people, as well as witnessing the growth of people in the business.

What has been your biggest disappointment?

Witnessing the gradual encroachment of government upon the business sector and agonizing over the decline of freedom of initiative in this country.

Is there as much opportunity today as there was when you started?

There is certainly more opportunity to make a good living today. However, government regulation makes it harder to start a business and succeed than back then.

Business today has a somewhat tarnished image. What should business people do to change that image?

Businessmen of my acquaintance are very much aware of the adverse public opinion regarding business and are very disturbed about it. We regret that we have been so busy running our businesses that we have not taken the time to tell the public what great benefits business brings to them.

Perhaps we should spend a little less time creating those benefits and a little more time telling the people about them.

KOSCIUSZKO'S BIRTHDAY

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Ms. MIKULSKI. Mr. Speaker, on February 12 the Nation observed the anniversary of the birth of Tadeusz Andrzej Bonawentura Kosciuszko, the Revolutionary soldier and Polish patriot. Born in 1746, he was studying in Paris when the announcement of the American Revolution insired him to borrow money to enable him to come to the Colonies to aid in our fight for independence. Upon his arrival in Philadelphia in August 1776, he applied to various committees for appointment to service. The Pennsylvania Committee of Defense employed him to draw up plans for fortifying the Delaware River. The success of this work gained him a commission as colonel of engineers in the Continental Army—October 18, 1776. In the spring of 1778, he joined the Northern Army under General Gates at Ticonderoga, where he advised the fortification of Mount Defiance. Kosciuszko's choice of battlefields and his erection of fortifications contributed greatly to the brilliant victory of the American forces over Burgoyne at Saratoga.

In July 1974, after a successful career in the Continental Army, he left the United States for Paris and from there he returned to Poland. After 4 years of rural retirement, in October of 1789 he became major-general of the Polish Army. During the spring of 1792 he led his army in its brave resistance against the Russians and 2 years later led the famous rising which culminated in the expulsion of the occupying forces. At that point, he became leader of his country and promulgated series of liberal reforms until his nation was reoccupied by the Russians.

In August 1797, he returned to America where he continued his brave but futile efforts for Polish freedom. He settled in Ohio where he had received a 500-acre land grant from Congress. He was a strong supporter of the abolition of slavery.

Kosciuszko's brave defense of his country and his aid in liberating our Nation has made him a national figure of importance for all Americans.

DEAUTHORIZE THE TOCKS ISLAND DAM

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. MEYNER. Mr. Speaker, today I am introducing legislation to deauthorize the Tocks Island Dam Project and to transfer responsibility for the Tocks Island Area, in northwestern New Jersey, to the U.S. Department of the Interior for administration as a national park.

There are many good reasons for this bill, all of which were brought out during the last session of Congress.

The Tocks Island project has been the object of 15 years of heated debate. The U.S. Army Corps of Engineers in 1962 proposed to build a dam on the Delaware River that was to have been 160 feet high and 3,000 feet wide. This plan, the eighth largest of any of the corps' massive undertakings, would have created a 12,000-acre reservoir extending 37 miles upstream, and would have inundated some 32,000 acres of farmland, forests, and gamelands.

While some pointed to the hydroelectric and water resources that could be gained, the project has become increasingly cost-ineffective; expense of the project has now spiraled well beyond the $400 million mark. An independent study has pointed to the grave economic and environmental problems that would be caused by construction of the dam.

In 1975, the Delaware River Basin Commission, comprised of the Governors of New Jersey, Pennsylvania, Delaware, and New York, and the U.S. Secretary of the Interior, voted not to construct the dam. Subsequently, the U.S. Army Corps of Engineers withdrew its support and, in fact, called for the deauthorization of the project.

Mr. Speaker, we are still in a state of limbo on this issue. The major governmental groups, environmentalists, and the Army Corps of Engineers have all opposed construction of the dam. Yet, the legislation necessary to accomplish this has languished in the Water Resources Subcommittee of the House Committee on Public Works and Transportation.

Mr. Speaker, this delay in deauthorization of the project is unacceptable. Many residents in the 13th Congressional District are personally affected by the indecision over Tocks. Only 71 percent of the land for the Tocks Island Dam project had been acquired before the Army Corps ceased land acquisitions. This left some 19,700 acres of private property unbought, and essentially valueless to the owners until deauthorization becomes official.

My constituents have suffered long enough. In order to begin to repair the severe economic and personal damage done by the 15-year fight over Tocks Island, it is imperative that Congress:

First, enact legislation to deauthorize the Tocks Island Dam Project;

Second, authorize the establishment of the Federal park area; and

Third, authorize immediate acquisition

of lands affected by the Tocks Island project, for inclusion in the national park area.

Mr. Speaker, the bill I am introducing today does all three things. I urge it to the favorable attention of all my colleagues, and ask for its speedy passage.

FEDERAL PAY RAISE

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. GLICKMAN. Mr. Speaker, last Wednesday, February 9, 1977, I testified before the House Committee on Post Office and Civil Service's Subcommittee hearings on executive, legislative, and judicial salaries. My testimony dealt primarily with the strong conviction I wanted to share with that committee, and the conviction I want to share with my colleagues today, that the Congress should have the opportunity to vote on its salary.

First and foremost I stated my opposition to this raise and any raise in general at this time of high unemployment and rising inflation. Second, I stressed then, and will stress again, that for or against, good or bad, this issue is one that should be heard on the floor of the House of Representatives and then voted upon by those who will be affected by its implementation. While I personally am against the raise—I ran for Congress knowing that the salary for the job I wanted was $44,600 and do not feel that the job, at this time warrants a $12,900 raise—I would be anxious to hear the arguments of my colleagues who disagree.

They might just change my mind; and, in my mind that is what the democratic process is all about. We owe it to ourselves, our constituents, and the entire Nation, to deal publicly and honestly with this issue.

Following are the remarks I submitted to that Post Office and Civil Service Subcommittee last Wednesday. Although they may convince none, they fulfill the minimal qualification of openness I feel is essential to democracy.

REMARKS OF REPRESENTATIVE DAN GLICKMAN

Mr. Chairman: Today I wish to reaffirm my opposition to the proposed Congressional pay increase.

During the first several weeks of this Congress we have had the opportunity to fully consider and vote on minimal funding for the operation of the Select Committee on Assassinations and for a $6.5 million emergency appropriation for the Southwest Power Administration.

I believe that it is essential that the Congress should similarly have the opportunity to discuss, amend, and vote upon this proposed pay increase which, at the present level, would require an additional authorization of at least $6.9 million. Surely, Congressional precedent calls for a vote on an authorization of this magnitude.

I have co-sponsored resolutions to disapprove the proposed increase. I have previously made my feelings known to the then President-elect Jimmy Carter. For the record, I wish to submit a copy of my letter to him dated January 17, 1977.

Should the increase become effective, I urge that it be tied to a strong code of ethics.

Thank you for the opportunity you have provided me to make these remarks.

HOUSE OF REPRESENTATIVES,
Washington, D.C., January 17, 1977.

President-Elect JIMMY CARTER,
Plains, Ga.

DEAR PRESIDENT-ELECT CARTER: I wish to ask your reconsideration of your support, as reported in the media, of a substantial congressional pay increase. I oppose such an increase at this time.

While I recognize that congressional salaries, as well as salaries of other high government officials, have not kept pace with the cost of living, I believe that now is not the time to burden the public with an increase in Congressional salaries. We are faced with an unreasonably high unemployment rate, and inflation continues to be a cancer on our economic growth. It is up to Members of Congress to set a personal example of belt tightening at this time.

Secondly, and perhaps more significantly, a congressional pay increase is entirely inappropriate until Congress adopts a code of ethics. I believe the code of ethics should have the force of federal law to prevent the abuses of illegal and questionable payments to members, which have received so much national attention lately. How can our people have confidence in any of our institutions until such a time as our own house is in order. A congressional pay raise, if needed, should be considered and fully debated by the Congress, only after such a code of ethics is adopted.

This issue is very important to the American people and the people of my district. I respectfully request that you give consideration to the thoughts contained in my letter, in light of our need to restore dignity and trust to the American political system.

I am glad to be part of the system which makes our American government work, and am particularly excited to work with you in this endeavor.

Sincerely,

DAN GLICKMAN,
Member of Congress.

A WYOMING TRIBUTE TO ARIZONA'S BILLIE HART

HON. TENO RONCALIO

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RONCALIO. Mr. Speaker, today I would like to pay tribute to an energetic woman who possesses a good deal of ingenuity, Ms. Billie Hart of Kingman, Ariz.

Billie has a message for the American people about the livestock industry and its marvelous, often lifesaving, byproducts. As a 4–H Club beef leader with 13 members in her group, she wanted to be able to assure these young people that their project animals provided more than a meal.

After much research, including visits to slaughter houses and packing plants, Billie now makes public presentations throughout the Southwestern United States. She has assembled an exhibit entitled "A Steer Is Not All Steak," which describes the many practical items produced from the hide, bone, blood, and organs of cattle, sheep, and swine. Billie is most impressed with the role played by these animals in scientific research and the success of many scientists in developing effective medicines from what was once considered a waste substance.

Ms. Hart feels that all those individuals involved in the raising and processing of the animals making so much research possible should receive the recognition they deserve.

I believe that it is Billie Hart who deserves much of that recognition for her part in bringing this valuable topic to the public's attention.

LITHUANIAN FREEDOM

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANDERSON of California. Mr. Speaker, February 16 is an important date to many of our citizens of Lithuanian descent. For on that day the Republic of Lithuania was founded in 1918.

One of the Baltic States, Lithuania has a long and proud history as a free nation. Although today it has been absorbed into the Soviet Union along with its neighbors, Latvia and Estonia; men and women of Lithuanian descent have kept their sense of identity and ethnic heritage strong, and still believe that the Baltic nations should be allowed to choose their own destiny.

The history of Lithuania as a free and united nation goes back to 1251, when Mindaugas the Great unified a number of small principalities into the state of Lithuania. Located on the shores of the Baltic Sea, Lithuania was repeatedly invaded by major European powers through the centuries, especially Germany and Russia.

From 1918 to 1940, the Baltic States held their rightful place in the world community of independent nations. However, on June 15, 1940, the Soviet army occupied the three small nations shortly after its ally, Nazi Germany, invaded Poland.

Within a year, Hitler turned on Russia and invaded the Soviet Union. In late June 1941 Lithuanian patriots rose up, overthrew the Soviets, and established a provisional government. This last, brief period of freedom lasted for about 6 weeks before history repeated itself, and the Lithuanian nation was crushed by German troops.

After World War II, Lithuania, Estonia, and Latvia were absorbed by the Soviet Union. Despite organized resistance by Lithuanian freedom fighters as late as 1952, the small nations simply were no match for the strength of the Soviet Army.

Throughout history, the Baltic States have managed to retain their fierce spirit of independence and national pride despite adversity, and the present period of occupation and repression by a foreign power has proven to be no exception. Today, Baltic Americans retain their heritage and sense of identity with their former countries, believing that the freedom we enjoy as Americans should

be the right of people from every nation. And perhaps as a result of this, they value and appreciate many of the rights and privileges we enjoy more than others.

Mr. Speaker, I would like to take this opportunity to commend our many citizens whose antecedents are from the nations of Latvia, Estonia, and Lithuania, and express my sincere hopes that the future will see these nations independent and free once again.

CONGRESSIONAL PAY RAISE DEFERRAL GETS EDITORIAL SUPPORT

HON. CHARLES W. WHALEN, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. WHALEN. Mr. Speaker, on the first day of this Congress I introduced the Congressional Pay Raise Deferral Act, H.R. 1365.

As you know, the main point of this legislation is to provide that any increase in congressional salary shall be deferred until the start of the Congress following the one in which the pay raise is approved. This is intended to bring an end to the blatant conflict-of-interest situation in which we find ourselves whenever we must consider the issue of our own salaries.

I am pleased to note that the Congressional Pay Raise Deferral Act now has over 80 cosponsors in the House.

More importantly, though, the bill has attracted an increasing volume of favorable public attention. In addition to the numerous letters of encouragement I am receiving from various parts of the country, I have also received copies of several recent editorials that support passage of the Congressional Pay Raise Deferral Act.

At this point in the RECORD, Mr. Speaker, I would like to insert four items. They are: First, an editorial from the Sunday World Herald, Omaha, Nebr., dated February 6; second, the transcript of an editorial that was broadcast on February 8 by television station WDBJ in Roanoke, Va.; third, an editorial that appeared in the Dayton, Ohio, Journal Herald on February 9; and fourth, an editorial that the Toledo Blade ran last month:

[From the Sunday World-Herald, Feb. 6, 1977]

DEFERRING PAY RAISES: BILL WOULD AVERT CONFLICT-OF-INTEREST CHARGES

Rep. Charles W. Whalen Jr., R-Ohio, is cosponsoring a bill dealing with congressional salaries that should be passed.

It is called the Congressional Pay Raise Deferral Act. Forty-five other lawmakers have joined the Ohioan in urging approval. Included are Reps. Charles Thone of Nebraska and Mike Blouin and Tom Harkin of Iowa.

President Ford recommended that Congress raise the pay of its members from $44,600 to $57,500. Unless the House or Senate say "no," the raises automatically go into effect about mid-February.

The Ford budget also provides substantial hikes for federal judges and other top officials, but these salaries would not be included in the Whalen proposal.

The deferral act would postpone any increase in congressional salaries until the start of the Congress following the one in which the increase is proposed and approved.

"With this simple change in the statutes, we would no longer be acting to our own immediate advantage, but would instead be deciding the salaries of those who are elected to serve in the next Congress," Whalen said in the Congressional Record.

"In this way, we can remove ourselves from the awkward conflict-of-interest situation in which we are now trapped and also would be giving our constituents a fair and timely opportunity to pass judgment on the wisdom or folly of whatever we decide regarding pay increases for congressmen," he added.

Whalen said it strikes him as being "rather unseemly" to have to vote, year after year, on a matter that is to his direct, personal benefit or detriment.

Whalen said he believes the proposed pay increases are necessary and justifiable but the question of "when" should be settled.

Whalen checked the constitutions of the states and found 37 where legislators are prohibited from raising their own salaries during their term of office. Nine of these states, including Nebraska, have the salaries of state senators fixed in their constitutions.

The Ohio congressman found that around 85 per cent of the House members come from the 37 states.

(Omaha's City Charter provides that no salaries of elected officials can be raised during a term of office—only at the start of a new one).

Whalen is right in that the congressional method raises a clear conflict of interest question.

An election following approval of a pay raise would, in effect, give the public a chance to review the decision. The bill has a worthy purpose.

EDITORIAL WDBJ TELEVISION, INC., FEBRUARY 8, 1977

Come February 20th, without a recorded vote, unless either the House or the Senate vetoes the proposal, Congress will have given itself a hefty pay raise of almost $13,000 per member for a yearly salary of $57,500.

Perhaps they deserve it and perhaps not. There is, however, a right way and a wrong way of raising Congressmen's pay. Congress has chosen the wrong way. The right way is a bill introduced by Congressman Charles W. Whalen, Jr., of Ohio. It's called the Congressional Pay Raise Deferral Act. It is based on the fact that 37 states, including Virginia, prohibit their legislators from raising their own salaries during their term of office. The Whalen Bill would have Congress do likewise.

Now that seems eminently fair and sensible and WDBJ-Television heartily endorses Congressman Whalen's legislation. Indeed, we note that Joseph Fisher of Northern Virginia was the only member of the many self-styled "fiscal conservatives" of the Virginia delegation to co-sponsor the measure. Here's a golden opportunity for the rest of Virginia's Congressmen to jump on the bandwagon. There they will join Senator Harry Byrd who says that right now, "a pay increase for Congress is the worst possible example to the nation."

[From the Dayton Journal-Herald, Feb. 9, 1977]

CONGRESSIONAL PAY: BILL TO DELAY EFFECTIVE DATE IS DESIRABLE

U.S. Rep. Charles W. Whalen Jr. has devised a reasonable plan for restoring a measure of propriety to the procedure Congress has devised to give itself raises.

Congress has relieved itself of the responsibility—and the politically distasteful task—of voting pay raises for itself by creating a commission on federal salaries, which makes recommendations on executive and congressional salaries. If the president accepts the recommendations and includes them in his budget—as former President Ford did—the salary increases become law automatically unless one of the two houses of Congress rejects the recommendation.

We think the raises are warranted. The pay for federal judges, cabinet and subcabinet officials and senior civil service employes in Washington has failed to keep pace with inflation in recent years. And some government officials are being paid no more than their senior subordinates.

Congress has bought de facto support for its own pay increases by tying the salaries of the federal judiciary and the executive branch to congressional salaries.

Rep. Whalen's Congressional Pay Raise Deferral Act would make the recommended pay boost effective in the Congress immediately following the one in which the pay increase was approved. As Rep. Whalen pointed out to his colleagues, 28 states, including Ohio, constitutionally prohibit legislative pay raises during the term in which they are enacted.

Whalen's bill is not a substitute for direct congressional voting on the pay issue, which we think desirable, but it would make congressional inaction under present conditions less self-serving.

[From the Toledo (Ohio) Blade, January 1977]

One of Ohio's freshman Congressmen, U.S. Rep. Donald A. Pease of Oberlin, has moved quickly—and with considerable courage for a newcomer—into the chronic controversy over legislative pay raises. He is co-sponsoring a bill (H.R. 1365) to bar federal lawmakers from receiving increases during the term in which they are voted.

As Mr. Pease noted, the Ohio Constitution contains a similar prohibition against interm raises; in fact, it applies to most elected officials in the state. And, the new Congressman said, "As one who has just left the Ohio Senate, I can attest to the wisdom of this provision." He believes the change would make raises for Congressmen—who, he points out, need periodic pay adjustments like other Americans—more acceptable than the present system does.

The Oberlin Democrat certainly deserves credit for trying to do something about the poor manner in which Congress generally has handled pay issues. We have urged repeatedly that the current procedure be altered because it invites backroom manipulation and allows the lawmakers to get increases without having to vote on them. And we certainly agree with the principle of banning in-term raises. . . .

Mr. Pease says the legislative salary issue is too much a "political football." But the lawmakers—both in Congress and in the Ohio Legislature—have only themselves to blame for that. It is not so much their right to reasonable and periodic pay raises as it is the sleazy deceptions and irresponsible methods they use that creates the poor image of them in the public's mind. No simple change in procedure will correct that; it requires basic forthrightness and fundamental integrity on the part of the lawmakers themselves.

H.R. 2500

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. COLLINS of Illinois. Mr. Speaker, it is my fear that the passage of H.R. 2500, the emergency natural gas legislation is a substantial step in the direction

of deregulation of the natural gas industry. It authorizes through July 31 purchases of gas from intrastate markets by interstate buyers at unregulated prices. As each of us well recognizes, the structure of the natural gas enterprise in this country is inherently monopolistic. It is far from being a competitive industry and that characteristic alone is one that gave rise to national regulation in the first place.

While I strongly support those sections of this legislation which gave the President authority to declare a natural gas emergency thereby empowering him to transfer gas from one location to another through April 30, 1977, if there are severe shortages endangering the supply for use in a residence and/or use necessary to protect life and health, I see no need to deregulate through July 31.

H.R. 2500, in its failure to place a cap on the price that can be charged for any emergency gas made available to those currently in need, permits the price of this gas to rise without limit.

The measure advanced by the President does not address this fact nor the possibility of windfall profits to the seller, and makes no effort to tax those potential profits. In addition, there is no reason to believe that industrial purchasers will not pass the added cost of their gas on to the consumers in the form of higher prices. This emergency measure goes beyond its intent to the extent that deregulation has been written into it.

FEDERAL SUPPLEMENTAL UNEMPLOYMENT BENEFITS EXTENSION

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. EVANS of Delaware. Mr. Speaker, our country is recovering from one of the worst recessions in its history. Although we are well on our way to achieving a sounder and healthier economy, over 7 million people are still unemployed. For many of these people, their hardship will soon be aggravated by the expiration of the Federal supplemental unemployment benefits on March 31. Thousands of persons who have been receiving unemployment benefits will have them cut off unless Congress extends this program.

Today I am introducing a bill that would extend this program for a period of 6 months. Such an extension will prevent the severe hardships that will result if the program is not extended, but will do so for a relatively short period of time in anticipation of a continued economic recovery. By extending the program for a short while, we can prevent the harsh effects of expiration while maintaining flexibility in our future commitments to such a program.

Unemployment benefits should not and cannot be a substitute for real jobs. The Congress must quickly enact legislation such as the Jobs Creation Act, which I have cosponsored to create the millions of jobs necessary to put unemployed people back to work. The bill I am proposing is a temporary solution to prevent great hardship. The real solution lies in creating permanent and productive jobs for our unemployed.

THE 59TH ANNIVERSARY OF LITHUANIAN INDEPENDENCE

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. McCLORY. Mr. Speaker, the status of human rights within the Soviet Union has been the subject of numerous media reports and foreign policy discussions during recent weeks. I can think of no more appropriate context for us to observe the 59th anniversary of Lithuanian independence in the U.S. House of Representatives.

For the human rights of Lithuanians have been systematically suppressed since their nation was annexed at gunpoint by the Soviet Union in 1940. As recent reports have indicated, basic freedoms have continued to suffer under Russian domination despite the Basket Three provisions of the Helsinki agreement.

But one instance of this suppression was the unprovoked increase in tariffs on packages to the Soviet Union last summer. By more than doubling its duties, the Soviet Government effectively cut the links between many of its citizens and their loved ones in the West. These packages, of course, were not only tangible expressions of familial devotion but often contained much-needed food and medical supplies.

This action was motivated by politics, not trade considerations. It was a clear signal from the Soviets that they are more interested in domination than they are in human rights. Frequent reports of religious suppression and personal harassment underscore this conclusion.

Mr. Speaker, we must insist in our public statements, and at the Belgrade Conference scheduled for this summer, that these violations cease. They are a tragic affront to American values, and our Government must make this clear to the Soviets.

At the same time, we must renew our commitment to the independence of Lithuania and the other Baltic states. The political captivity which Lithuanians have endured for 37 years—but never accepted—must end.

Mr. Speaker, the heroic struggle for Baltic freedom goes on not only in Lithuania, but also in the United States. I am privileged to serve a district with a large Lithuanian community, including many officers of their national and international organizations.

Dr. Kazys Bobelis of Elgin, Ill., is president of the Lithuanian American Council. Edward R. Skalisius, from Waukegan, Ill., serves as vice president of the Lithuanian World Community. Gediminas Damasius of Waukegan, Ill., is president of the Lake County chapter of the Lithuanian American Community. Others active in behalf of the Lithuanian cause in my 13th Congressional District include: Henry Kacinskas, Mrs. Janina Salna, Gintautus Saulis, Dr. Kathryn Giniotis, and Mrs. Ida Howland.

Mr. Speaker, the attention of these good Americans, and of the world, will be focused on Belgrade this summer. I urge you and my colleagues to insist that American representatives press for full compliance with the Helsinki agreement.

PROPOSED OCEAN DUMPING LEGISLATION

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. FORSYTHE. Mr. Speaker, on January 24, 1977, Commissioner David J. Bardin of the New Jersey Department of Environmental Protection sent to the U.S. Environmental Protection Agency a recommendation that the ocean dumping activities currently being conducted at the 12-mile site in the New York Bight be moved to a dumpsite 106 miles off the New Jersey coast.

In view of the potentially disastrous effect of such a move, I think it will be useful for my colleagues in the House not only to see my reaction to Commissioner Bardin's proposal but also to have an idea of what I feel is a constructive alternative to that proposal. To this end, I am inserting in the record of these proceedings copies of my recent correspondence with the U.S. Environmental Protection Agency on this subject.

I strongly believe that scientific evidence overwhelmingly supports my conclusion that moving dumping activities to the 106-mile site would waste valuable resources—both financial and environmental—without offering either substantial relief to the present 12-mile site or a viable long-term solution to the problem.

Instead of such an irresponsible move, I advocate an approach providing additional penalty fees for dumping which will be used for research into alternatives to dumping. Such an approach should aid a more rapid phaseout of dumping while also avoiding what might be the permanent degradation of another ocean site. I will be introducing legislation embodying this approach in the very near future and hope that it will merit the support of my colleagues here in the House. The correspondence follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 8, 1977.

JOHN R. QUARLES,
Acting Administrator, Environmental Protection Agency, Washington, D.C.

DEAR MR. QUARLES: It is my understanding that the Environmental Protection Agency is currently considering moving all ocean dumping activities to a site 106 miles off the coast of New Jersey. As the Ranking Republican member of the Subcommittee on Fisheries and Wildlife Conservation and the Environment of the House Merchant Marine and Fisheries Committee and as a representative of the state of New Jersey, I take special interest in all actions considered or taken by EPA which affect our environment.

Therefore, it was with considerable consternation that I reviewed a report by David J. Bardin, Commissioner of New Jersey's Department of Environmental Protection to EPA. Mr. Bardin recommends shifting dump-

ing activities currently at the 12-mile site in the New York Bight to a dumpsite 106 miles off New Jersey's coast.

At the time Mr. Bardin made this recommendation he stated that it "was not based on the firm and solid evidence we would prefer." Furthermore, Mr. Bardin points out that data regarding the 106-mile site is "pitifully inadequate." I conducted a review of the scientific literature regarding deep-sea dumping and have included my findings in the attached report.

The results of this survey are frightening. Scientists believe that "any significant amount of waste disposal will permanently and adversely change the ecosystem" at a deep water site. While the environmental repercussions at the dumpsite will be severe, the indirect implications are shocking. A National Oceanographic and Atmospheric Administration Baseline Study of the 106-mile site concluded: "Prolonged southerly winds after a dump could quite conceivably cause waste materials to drift onto the upper slope, where the developing red crab fishery would be active or even to the outer shelf where there are several seasonally active fisheries (flounder, porgy, butterfish, lobster caught by U.S. fishermen; squid and butterfish by Japanese; squid by the Spanish; hakes by the Soviet block)." As you are well aware, our fishing industry is expected to expand greatly as a result of the 200-mile limit bill. Widespread contamination of valuable fishing grounds is an unacceptable risk for our nation to take.

Furthermore, moving dumping activities would offer little relief to the 12-mile site. The scientific consensus is that "contamination of a new area will not be balanced off by a recovery of the existing dump site. The existing site and its surrounding area are not expected to significantly improve even if sludge dumping is terminated because pollution from other sources will continue." The scientific consensus regarding a move to the 106-mile site is clear; scientists at EPA, NOAA, and universities agree that such a move in all likelihood will cause "more harm than good."

Mr. Bardin has argued that moving dumping activities to the 106-mile site would reduce the likelihood of a future fish kill similar to that of the summer of 1976. Mr. Bardin adds, "However, after future analysis, even this may prove to be too close to prevent plant nutrients and other materials in the sludge from circulating back into the near-coastal waters." The attached report analyzes the scientific creditability of the claim that moving the dumpsite will reduce the likelihood of future fish kills and, quite frankly, it is lacking. First of all, scientific evidence demonstrates that sewage sludge dumping played an insignificant role in the fish kill. At hearings before our Subcommittee this summer, a top NOAA official stated: "It is evident from all information available, that the dumping of sewage sludge at the existing site had a negligible effect in causing either the wash-up of floatables on Long Island's south shore beaches or the fish kill off the coast of New Jersey. The sewage sludge dumpsite should not be moved."

The scientific evidence clearly indicates this summer's fish kill was predominantly a natural phenomena. Moving ocean dumping to the 106-mile site to reduce the likelihood of a future fish kill is a proposal based on political expediency, not on scientific investigation. Indeed, the algae which caused this summer's fish kill first bloomed on the edge of the continental shelf from Cape Cod to Cape May. Therefore, if moving dumping activities to the edge of the continental shelf has any perceptible effect on potential fish kills in the future, it would tend to increase their likelihood and extent.

In sum, the bulk of the scientific evidence concerning the fish kill of 1976 indicates it was a natural occurrence. The Small Business Administration, after evaluating the evidence, has taken this view and, at my request, made available disaster relief loans to New Jersey fishermen under provisions for natural disasters. Governor Byrne concurred in this analysis in his letter requesting the disaster designation. There is absolutely no evidence showing that sewage sludge dumping was responsible for the fish kill. The claim that moving the dump site will reduce the likelihood of future fish kills is totally without scientific substantiation. Furthermore, evidence does exist indicating such a move could contaminate productive fishing grounds.

Mr. Bardin points out that moving all dumping activities to the 106-mile site will cost dumpers an extra $24 million annually. This cost increase does not include increased fuel costs or the cost of acquiring additional ocean dumping barges. Mr. Bardin's proposal would, for instance, increase the fuel consumption of ocean dumping activities by 900%.

The net effect of moving dumping activities to the 106-site, then, is to squander valuable resources—including energy, marine resources, investment capital, and millions of dollars for increased operational costs—on a proposal which scientists agree offers no environmental benefits and considerable environmental harm, including potential degradation of valuable Northwest Atlantic fishing grounds.

The only redeeming feature of the proposal to move ocean dumping to the 106-mile site is that it raises the cost for the dumpers. Obviously, as long as ocean dumping is the cheapest means of waste disposal, constructive alternatives will go untapped. Therefore, any proposal which raises ocean dumping costs will tend to make the alternatives more economically competitive.

Clearly, there are good ways and bad ways to accomplish any goal. Our society could increase ocean dumping costs by requiring wastes to be transported 106-miles out to sea—simultaneously wasting millions of dollars a year, consuming greater amounts of energy, contaminating yet another marine area, and risking Northwest Atlantic fishing grounds. However, in the enclosed report, I describe an alternate approach which, I believe, will efficiently and expeditiously end ocean dumping.

Currently, when ocean dumpers apply for a permit, they are only required to pay a nominal fee for processing costs. I plan to introduce amendments to the Marine Protection, Research and Sanctuaries Act (sometimes referred to as the Ocean Dumping Act) which will require ocean dumpers to pay an additional penalty fee. This penalty fee increase will be set so that ocean dumpers pay for research into constructive alternatives and for the full administrative costs involved in processing ocean dumping permit applications. Under this plan, the costs of ocean dumping will equal or exceed the cost of constructive alternative means of waste disposal.

This penalty fee schedule will accomplish two goals. First, ocean dumpers will turn to alternative means of disposal as quickly as possible since they will no longer have an economic incentive to continue dumping. Thus, in a short period of time, sewage sludge will be put to constructive purposes—such as soil conditioner, sanitary landfill, and methane which can be used as a substitute for natural gas—rather than continued contamination of the marine environment. Second, the increased fees paid by dumpers will be used for constructive purposes. This money, spent on research into alternatives, will tend to drive down the costs of these methods.

I think you will agree that such an approach to ocean dumping, based on a careful analysis of the existing situation and a thorough assessment of all alternatives, will accomplish our goals while minimizing any future damage to the environment. I am hopeful that, until the legislation I am proposing is acted on, EPA will not approve the dumping of secondary sludge at the 106-site. A careful analysis of the scientific evidence leads one to the unambiguous conclusion that moving all dumping activities to the 106-site is ill-conceived and prodigal. If our natural and financial resources are to be conserved, proposals such as moving ocean-dumping to the 106-site will be summarily dismissed as running counter to rational decision-making based on the best available scientific evidence. Rather, I believe we should seek constructive solutions—solutions which provide an impetus for dumpers to turn to alternatives which recycle our wastes, solutions which generate revenues for much-needed research, solutions which do not permanently degrade our marine environment, and solutions which do not unnecessarily risk contaminating rich Northeast Atlantic fishing grounds.

During the upcoming year, I will keep you posted on the progress of the proposed legislation I am announcing today. In the interim, I urge you to rely on the scientific wisdom of your agency, the National Oceanic and Atmospheric Administration, and the academic community in deciding the fate of ocean dumping and the 106-site. I hope the attached report is of value to you in summarizing the scientific literature on these topics.

Sincerely,

EDWIN B. FORSYTHE,
Member of Congress.

OPPOSITION TO CONGRESSIONAL PAY RAISES

HON. BOB STUMP

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. STUMP. Mr. Speaker, I unconditionally oppose, and if given the opportunity, will vote against, any pay raise for Members of Congress. On January 28, 1977, I publicly announced my opposition for a pay raise and today I wish to record in the CONGRESSIONAL RECORD my strong opposition to the pay raise.

It is time for Members of Congress to set an example and tighten our belts and discipline the increased spending in Congress. The first step to accomplishing this is to vote against the congressional pay raise.

The congressional salaries are now above the average income. All Members of this Congress knew the salary when they ran for office in 1976. If a pay increase were justified, it should not take effect until 2 years hence with the incoming Congress.

Unemployment in the United States is extremely high, 8 to 11 percent. Working citizens in our country have already been pushed to the breaking point by excessive Federal taxation which is required to assist in helping pay for the exorbitant spending of Congress.

This massive pay increase at the top levels of the executive, judicial, and legislative branches of Federal Government will cost the taxpayers of the United States approximately $37 million. Further, it would start a snowballing effect within the middle and lower levels of the Federal bureaucracy, which creates a never-ending, vicious, inflationary cycle.

These factors make it impossible for me to justify a pay increase at this time.

NEW NATIONAL PARK IN SOUTHERN CALIFORNIA

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANDERSON of California. Mr. Speaker, today I am reintroducing a bill which directs the Department of the Interior to study the feasibility of converting some of the Camp Pendleton Marine Corps Base in California into a national recreation area.

With this bill, our proposal has been cosponsored by 16 of my colleagues in the California delegation. They are Representatives BROWN, BURKE, DELLUMS, EDWARDS, HANNAFORD, HAWKINS, JOHNSON, KETCHUM, KREBS, LEGGETT, MOORHEAD, MOSS, ROYBAL, RYAN, SISK, and STARK. I am very pleased to receive their support, and I invite the other Members from California, as well as the Congressmen from the remaining 49 States to study our bill, and add their names to cosponsorship.

Mr. Speaker, I view this proposal as a logical extension of President Ford's proposal to double the size of the national park system. In his August 31, 1976, statement at Yellowstone National Park Mr. Ford called for a rapid expansion of the national parks "to alleviate overcrowding problems" in recreation areas.

The acres of Federal land that the Marines now use exclusively is staggering. The Camp Pendleton Marine Corps base is 195 square miles large—125,000 acres—encompassing 18 miles of some of the most beautiful beach property in California. Close to Pendleton, in fact 50 miles northeast of former President Ford's new home in Palm Springs, Calif., is the Twentynine Palms Marine Corps Training Center, with 932 square miles of land used for training purposes.

Our bill asks the Secretary of the Interior for an answer to the following question: Do the U.S. Marines need all this space, or could some beach and inland property be used for recreational purposes by the taxpayers?

Mr. Speaker, our State is experiencing a critical need for space to "recreate" in. With Yosemite National Park in central California already overcrowded, this idea for a national park within easy driving distance from the Los Angeles-San Diego megalopolis is a good one.

However, this bill is not an antimilitary "witch hunt" aimed at the Marine Corps. I believe Camp Pendleton has been, and must continue to be a vital training base for our Marine forces. Beach and inland areas must be kept intact for their training purposes. But, with 932 square miles at Twenty-nine Palms and 195 square miles at Pendleton, it is our belief that a 1-year study by the Department of the Interior on the feasibility and desirability of converting some of Pendleton's sprawling acreage into a national recreational area is in the national interest.

If you have any questions, or if you would like to join us as a cosponsor, please contact my legislative assistant, Mark Theisen at 225–7534.

THE THREE "E's": ECONOMY, ENERGY, AND ENVIRONMENT

HON. STEWART B. McKINNEY

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. McKINNEY. Mr. Speaker, yesterday I spoke before the Stamford Area Commerce and Industry Association, outlining my thoughts on the directions which might be taken and the improvements which could be made in the area of the three "E's"—economy, energy, and the environment. I feel it is of the greatest importance for us to promote a dialog between the public and private sectors on these issues. The concerns I voiced to the members of SACIA may prove of interest to my colleagues and I include them in the RECORD at this point:

ECONOMIC, ENERGY, AND ENVIRONMENTAL POLICIES IN THE 95TH CONGRESS

For the past several years Americans have seen an increasing interrelationship develop among three important, but previously independent, elements of our society. The three "E's"—economy, energy and the environment—are vital concerns to all of us today. While I certainly don't have all the answers to the problems spawned by these issues, I would like to discuss some of the solutions that have been offered by the Administration, by my colleagues in Congress and, if I may, my own observations about these proposals.

Under the general heading of the economy there are many different subcategories which must be considered: prices, inflation, unemployment, interest rates, money supply, corporate profits, business spending, labor, housing and construction. Clearly, the list is too long for an in-depth discussion of each today but I will do my best to touch on most of them.

There has been a lot of publicity regarding the new Administration's economic stimulus program. Recently, the House Banking, Finance and Urban Affairs Committee, on which I serve as the fifth ranking Republican, held hearings to consider the efficacy of this proposal. In addition to testimony from Treasury Secretary Blumenthal, OMB Director Lance and several other supporters of President Carter's approach, we on the Committee were also privileged to hear from Federal Reserve Chairman Arthur Burns. The testimony of these economic experts demonstrated that the exalted science of money is still in its primitive stages. There was generally so much disagreement on the majority side with the Administration's program that I thought we had a Republican President again.

From those witnesses Congress learned that the Carter Administration is not going to recommend any radical approaches which might over-stimulate an already-improving economy. I only hope this message is received and understood in this country's corporate boardrooms so that improvement continues. Confidence on the part of investors large and small will not be induced through the promise of a one-time rebate of one dollar per week, but through permanent tax reductions for individual taxpayers and incentives for business to promote employment growth, as well as inventory and fixed investment expansion.

As I see it, the issues underlying any economic stimulus proposal is balance. Mr. Carter's $31.2 billion stimulus package ($15.5 billion in fiscal 1977 and $15.7 billion in fiscal 1978) strikes hardest at hard-core unemployment through $9.2 billion in additional expenditures and $22.0 billion in reduced tax revenues to generate recovery spending. This type of balanced policy can stimulate consistent economic expansion as the most effective approach to job creation, tax reform and capital formation.

Further, the business community should take heart when the President's chief economic adviser, Dr. Schultze, discusses the Administration's intention to deal with "elements of the tax code which may be unnecessary obstacles to investment." If Congress can adopt this attitude on tax reform and enlarge on the Carter proposals, I believe there is real hope for resumed economic growth without the return of runaway inflation. However, I share the cautious attitude of those who fear an over-ambitious Congressional stimulus package which could do more harm than good, and I will do all that I can to maintain the internal balance of any stimulus proposal.

While all this may sound promising for the national economy, what is the outlook for Fairfield County? It is not necessary for me to dwell upon the cyclical lag that distinguishes our economy—whether local, state or regional—from the national economy. The highly specialized nature of Connecticut's industry causes us to be more hesitant about broad swings in the national picture which never quite materialize here. During the recent period of slow and sporadic national recovery we have suffered greater weaknesses locally. Our needs, measured against the performance of the whole nation, demonstrate the necessity for regionally-sensitive policies which can be continued in the weakest regions after a national recovery has begun. Groups such as the Northeast-Midwest Economic Advancement Coalition in Congress, the New England Regional Council in Boston and locally, SACIA and the Chambers of Commerce in Bridgeport and Norwalk, must seize the initiative to develop programs and policies that will strengthen the region's economic base. We must also develop the ability and resources to be economically self-sustaining in the long run.

One way we can do this is to stem the outflow of business dollars from this area to other parts of the country. Believe me, despite some transparent arguments to the contrary, Northeastern economic decline is no myth. The harsh realities are that between 1970 and 1975 employment in our vital areas of construction, manufacturing and transportation declined at a rate almost doubled by the growth rate of those same industries in the Sunbelt South. The closing of businesses here meant rapid expansion of existing facilities throughout the South. So too, government spending on support facilities such as sewers and waste treatment plants is devoted to new construction in the South far more than to modernization of our aging industrial plant.

Non-governmental steps can be taken to reverse this. The use of trade groups or computerized referral services, such as the New England Manufacturers Exchange (NEMEX), can simplify the matching of area buyers and sellers to the region's economic advantage. NEMEX, located in Boston, is a perfect example of cooperation between the Economic Development Administration, the New England Regional Council and private businessmen in an effort to make it easier for businesses to meet their requirements while adding to the strength of the regional economic base.

Traditionally, Connecticut's greatest natural resource is her people. Whatever approach we take to strengthen our economy must give the highest priority to job creation, job training and productivity. Obviously, federal "leaf raking" projects are not going to serve our needs, but public service training programs do give the unemployed and unskilled the opportunity to qualify for permanent jobs with a career potential. We are very fortunate in this regard to have men like Ed Canning, Madison Smith and their colleagues at the Stamford-Greenwich

CETA Administration who are devoted to the men and women trained in their programs. Their results have been excellent and have underscored the fact that once taught a skill and given a job, the unemployed have the greatest desire to support themselves without government handouts and contribute to a healthy national economy.

In the same vein, corporations have realized the value of on-the-job training for some time. If the federal government provided sufficient incentive, perhaps this would have a real impact on the size of our unemployment and welfare rolls. I am greatly encouraged by Treasury Secretary Blumenthal's consideration of an optional two-tier employment/investment tax incentive for business depending on whether the company is labor-intensive or capital-intensive. In my view, the key is allowing more flexibility to meet differing business circumstances. After all, what's medicine to some is poison to others. Programs like CETA have helped, but business cannot be forever dependent on the Federal government to do the job. Instead, government should promote, whenever possible, the creation of private training programs through a variety of incentives.*

Since unemployment affects the economy in so many ways, I ask you not to underestimate the need for a comprehensive welfare reform program combined with adequate unemployment compensation. I agree that an overhaul of both programs as they exist is essential. Toward this, I think business leaders can ill afford to rely on old approaches, but must mount new initiatives to reform social programs which, if run ineffectively, rob government of the means to adequately support local business growth. I look for a positive contribution from the business sector in the upcoming welfare reform debate.

When President Carter announced that Vietnam veterans were to receive top priority in his job creation program, I was pleased. But I have to ask if this is going to reduce the development of job opportunities in our cities—like Bridgeport, Stamford and Norwalk. We are deeply indebted to the men and women who fought in Southeast Asia as we are to veterans of previous wars. However, we should not forget the other war that is being fought by millions of Americans every day—the battle for survival in the cities. With teenage and minority unemployment far higher than national unemployment, I think job creation programs should be based on the training needs of all the jobless with admission and placement preferences for veterans.

These are the problems politicians and businessmen must join forces to combat. In Washington we can reduce taxes, create jobs programs, restructure welfare and provide aid to the cities. All of these are of lesser importance when measured against the necessity for active involvement on the part of local businesses and the people who own and operate them. Restoration of the economic vitality that has been slipping away from New England for the last twenty-five years is going to require the concerted efforts of all of us in ways never before contemplated. As far as business is concerned, the Northeast must now become an area of creative economic rebirth.

That creativity will meet no more severe test than in overcoming our most obvious economic disability—energy costs. Once again the absence of a national energy policy has come back to haunt chilly New Englanders like a recurring nightmare. This winter we have witnessed more clearly than at any time since the long gasoline lines of 1973 the price we must pay for the lack of a national program of resource utilization. How many times must the American people be subject to the physical and financial burdens of energy shortfalls before Congress will begin the task that has awaited it for almost two decades? The time is fast approaching when the United States will have procrastinated for too long and stop-gap measures will no longer be able to feed our energy-starved economy.

As President Carter's proposals for a comprehensive national energy policy emerge, I plan to stress the need for these elements as the foundation of that program: 1) a realistic mixture of voluntary and mandatory conservation measures; 2) realistic production incentives for both existing and alternate fuels; 3) an ambitious program to develop energy use priorities stressing the use of abundant domestic fuels and reduction of reliance on foreign sources; and finally 4) a complete reorganization of federal government agencies dealing with energy.

As our sweater-clad President stressed in his address to the nation, we must stop wasting energy. It is estimated that much of our dependence on foreign oil could be eliminated if the remaining fuels were used as efficiently as possible. With simple, do-it-yourself measures ten dollars of every hundred spent on home heating could be saved. Insulation, weather stripping around windows and doors, the use of daytime sunlight, clean furnace and hot water tank systems, and a multitude of common sense devices can save part of your tax rebate from the bite of winter fuel bills. On a broader scale, I have again introduced, along with numerous other House members, legislation to provide tax breaks for the purchase and installation of insulation and other services in homes, industrial and commercial plants. Clearly, the cornerstone of any successful energy policy will be our ability to rely on the American people to use only what they need.

The energy needs of our nation are well known and the obstacles we face to fulfillment of these needs are by no means insurmountable. The second essential step toward a national energy program must be to increase production of available domestic supplies to offset our reliance on insecure foreign sources. As a result of the severe winter, the United States is now importing an unprecedented 50% of its total petroleum requirements. New England's "habit" is now up to 90% dependence. However, this winter's deep freeze is not solely responsible for these unacceptable import levels. Decreased domestic production and increasing foreign reliance is also the result of our somewhat unrealistic view of the economic requirements of energy production.

The first step toward increasing domestic production must be a reliable analysis of the production costs for each individual fuel source. We must determine what incentives and capital investments are needed to stimulate their production and delivery. I recall with considerable distaste the legislative fiasco that ensued when the 94th Congress debated the deregulation of interstate natural gas prices. Gas industry spokesmen repeatedly advised the nation and Congress of the facts: in the 1950's and 60's, stimulated by artifically low prices, natural gas consumption grew at an average rate of 6.5 percent annually; by 1974 gas was providing over 30 percent of our energy needs; while low prices stepped up demand, they also discouraged the exploration and development of new reserves. The product of this factual scenario is that proven reserves have fallen to their lowest level since 1952. Production of our cleanest and most efficient fuel source, which peaked at 22.6 trillion cubic feet in 1973, is presently declining at an annual rate of 7 percent.

Unfortunately, a majority of the Members of the 94th Congress either chose to ignore, or did not understand these facts. Rather, in the name of consumer portection, a majority of my colleagues supported the continuation of unrealistic price controls for interstate gas. This winter, it is painfully obvious that Congress did the consumer no favor with that decision. It wasn't price, but the availability of natural gas, which was effectively lowered as a result of that attempt to repeal the law of supply and demand.

The argument for production incentives is not applicable in every instance, however, and I have never considered myself a proponent of all-inclusive petroleum decontrol proposals. For instance, it is estimated that the proposed decontrol of gasoline would increase gas prices 5.5 to 8 cents per gallon. FEA's recent action to re-impose price controls on home heating oil supports my fear of disruptive price hikes. Also, I feel the resulting $5 to $7 billion increase in profits would constitute an undeserved windfall for producers and a cruel tax on the working people who can least afford it.

Perhaps more deserving of our economic favor are producers of alternate, renewable or infinite fuel sources. In this Congress, I and my colleagues have introduced several measures to stimulate the development of technology and commercial applications for solar, geothermal and other alternate energy sources.

These range from new loan authority to help homeowners and businesses install nonfossil energy systems to tax incentives for the use of new energy technologies.

In particular, I am concerned by the Energy Research and Development Administration's apparent nuclear bias. ERDA estimates no more than a one percent contribution by solar generation to our national energy mix by 1980, and they fund their research and development accordingly. However, with solar devices already in place in homes and businesses, I believe the facts argue for a more ambitious solar development program. I am now working with an *ad hoc* Congressional group to prove these ERDA estimates unnecessarily low and identify specific solar technologies with more immediate commercial potential.

The third essential criteria in the development of a successful national energy program is the formulation of an accurate and enforceable timetable to coordinate the contribution of each available fuel source in meeting the Nation's consumption requirements. A priority listing for the utilization of fossil fuels, nuclear power, solar energy, geothermal generation and others—based on available reserves, costs, efficiency, and environmental impact of each—must be devised. In this way, the efficient use of present sources can be balanced with the commercial introduction of alternative fuels in an orderly, economically sound manner. A firm commitment to this priority timetable would grant oil producers, refiners, distributors and importers the assurances they need to make decisions toward maximizing their operations. So too, producers of new technologies would be assured of their rightful place in our national energy picture without the spectre of being devoured by so-called "big oil" for their efforts. These priorities would also require us to structure our environmental regulations so as to compliment this timetable and avoid costly interruptions and plant conversions by our utilities. You can be sure that the need for energy development will be on my mind as Congress again moves to debate clean air and clean water legislation.

While granting financial incentives and priority assurances to the energy industries,

*For those of you who have not seen it, I recommend the November-December '76 issue of the Union Trust Company bulletin which contained an excellent discussion of the employment structure of Fairfield County. It is much easier to appreciate our strengths and weaknesses after reading that material.

we must in turn demand the assurances of producer compliance with the dictates of that national energy policy. Cooperation by certain energy industries has been sadly lacking in the past and cannot be tolerated as a challenge to the viability of a national energy program. One case in point is the desire of the Alaskan oil consortium to export petroleum produced from Alaska's North Slope.

Due to the "energy crisis" the 93rd Congress went to great lengths to accommodate the oil industry by eliminating environmental regulations which blocked construction of the Trans-Alaska pipeline for two years. In their plans for construcion, the oil companies found the right-of-way permitted in the provisions of the Federal Mineral Leasing Act insufficient for their purposes. After unsuccessful industry attempts to circumvent legal obstacles to construction, the 93rd Congress enacted new legislation which waived existing laws to accommodate pipeline needs. Having ultimately succeeded in overcoming environmental considerations and eliminating the rights of citizens and/or groups to contest that decision, the companies involved are now attempting to implement policies of their own in clear contrast to the plain language of the Trans-Alaska Pipeline Authorization Act, which specifically provides for domestic distribution of Alaskan oil. I don't intend to accept the self-serving arguments for convenience of transportation made by proponents of exportation. Plans to exchange Alaskan oil with Japan for that country's O.P.E.C. supply merely postpone the inevitable task of establishing a system of domestic delivery for North Slope crude. Furthermore, any exportation arrangement would place a larger portion of our already vulnerable energy supply in greater jeopardy of interruption. Those who claim that the flow of Alaskan oil could be diverted from foreign to domestic ports in the event of another embargo are naive. If domestic distribution can be accomplished so readily under emergency conditions then can't it be more easily accomplished now?

As a follow-up to Congress' approval of my amendment requiring an Executive report on the feasibility of alternative distribution systems, I have introduced a bill in this Congress to suspend the export authority of the Trans-Alaskan Pipeline Authorization Act and hereby force the initiation of domestic distribution plans. With passage of the pipeline law Congress specifically designated Alaskan oil as a domestic resource to be used to offset our growing domestic shortages. I intend to see that the intent and purpose of that law are not violated and that the American people receive the benefits of that long-awaited supply.

While cooperation and compliance with federal programs is essential, it is no more important than the need to assess and re-establish specific reporting guidelines regarding exploration, discovery and development of domestic resources. To some degree, the responsibility for our present natural gas shortage must be shouldered by the gas industry itself.

Its own failure to make available accurate reserve estimates was directly responsible for the skepticism on the part of many House members regarding the extent of supply shortages. That skepticism was in turn responsible for the ultimate demise of efforts to decontrol interstate prices. The effectiveness of any national energy program relies in great part on the accuracy and completeness of industry reports and I applaud President Carter's recognition of this need.

In the same vein, I am planning to introduce legislation to address the potential problem of horizontal concentration in the energy field. Again, I see this problem primarily as one of information. Oil companies, in particular, tell us that their holdings in coal, uranium, geothermal and solar technology patents can best be developed within the capital-rich environs of that horizontally integrated structure. My bill will take those statements as true and simply monitor the development of those holdings. If these reports show that potentially competing energy sources are in fact being developed consistently with our national energy goals, then those assets could remain in that structure. However, if those same reports indicate that America's energy future is being held for ransom until foreign oil deposits are depleted, the bill would trigger a Federal Trade Commission and Justice Department antitrust action to remove those energy sources from oil company hands and make them available to those who will develop them.

Another vital element of a national energy program is a comprehensive government energy administration to replace the present fragmented structure which confuses producers, consumers and congressmen. If done correctly, President Carter's proposed reorganization of the regulatory agencies could be of great assistance to both industry and regulatory officials in formulating a more accurate information gathering system. In addition, I would hope that the Presidents reorganization would improve the effectiveness of some energy regulators and more clearly deliniate the scope of others. I am specifically concerned with the ability of the Federal Power Commission to operate a well coordinated program for the efficient utilization of natural gas. In addition, I would like to see the potential for duplication between the Energy Research and Development Administration and the Federal Energy Administration eliminated. A specific designation of responsibility for energy regulation would greatly assist our efforts to implement a national energy policy.

Another of the many things which this winter has demonstrated is the unique aspect of the New England region's energy needs. With each "energy crisis" it becomes increasingly clear that the energy-related programs of the nation and even the Northeast do not accurately reflect the needs of New England. The relatively lower home heating oil costs in New York, New Jersey and Pennsylvania this winter are indicative of the vast differences that exist between the requirements of the six New England states and the rest of the Northeast. While Pennsylvania is suffering from the most severe natural gas shortage in its history, Connecticut's supplies are relatively stable.

In its reorganization of the federal energy agencies, the Administration must also reassess the boundaries for energy information and distribution regions. As more specifics of President Carter's energy plans emerge, I will suggest that he designate the six New England states as a separate energy region.

It is my belief that the designation of an independent New England region will highlight our most unique energy problem—access to refinery capacity. Despite certain political and environmental misunderstanding of the issue, I will continue to push for the construction of refining facilities in New England which will be able to bid for crude supplies and produce the unique regional mixture of petroleum products. The time is long past when New England can resist refinery construction, resist nuclear expansion, resist coal conversion and then cry when the rest of the country balks at subsidizing every gallon of the already-refined products on which we depend. Even a limited function "cracking plant" to produce products used more here than elsewhere could reduce our vulnerability. Be sure, I am not insensitive to the environmental problems inherent in any of these energy alternatives. However, I have come to learn again and again from angry constituents that a cold, dark home and impossible heating bills are not the proper environment for our people any more than polluted air and water. As I said at the outset of these remarks, energy production and environmental protection must proceed together. Divisive adherence to extreme positions on either side produces nothing but energy waste and further environmental damage in the name of the "energy crisis".

These are some of the broad policy alternatives the new Administration and Congress must confront in revitalizing our economy and producing the energy to fuel economic recovery. In the Northeast, we must find ways to avail ourselves of this nation's vast coal reserves by meeting transportation, storage, efficiency and environmental difficulties. In addition, the inevitable contribution of nuclear and solar power in New England must not be overlooked. It is my belief that the implementation of a national energy policy, reflecting an awareness of regional energy differences, fostered by the lack of such a policy is the most fundamental answer to the problem at hand.

LITHUANIAN BIRTHDAY: ANNIVERSARY OF INDEPENDENCE

HON. PAUL G. ROGERS

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ROGERS. Mr. Speaker, today we mark the 59th anniversary of the reestablishment of independent Lithuania, and the 726th anniversary of the founding of the Lithuanian state. It is a good time to reflect upon the history of this country which has for 37 years sought independence from her Soviet masters.

Lithuania had developed into a large state by the 15th century, stretching from the Baltic to the Black Sea. In 1569, Lithuania merged with Poland and eventually shared the fate of the Polish lands when they were partitioned and nearly all of Lithuania was submerged into the Russian empire. Despite this, Lithuanians continued for centuries in their spirit and drive for an independent country and by the late 1880's this sentiment had developed into a strong nationalist movement.

In 1917 the movement was recognized by the German Reich and months later independence was achieved on this date. Almost immediately after the end of the first World War, this tiny nation was faced with a Bolshevik invasion. The Soviets moved to capture the ancient Lithuanian capital of Vilna in January 1919, but were forced to give it up to the Poles, who would hold it for 20 years. Lithuania ended her war with the Soviet Union in July 1920, and as recognized as an independent country by the great powers in 1922. In 1926, Antanas Smetona took over the leadership of Lithuania which he held until 1940, when Stalin issued an ultimatum to establish a government more acceptable to the Soviets. Since that time Lithuanians have endured religious persecution, political repression, and denial of their basic human rights. But they have not been silent, the world has seen and heard sacrifices by Lithuanian patriots.

Mr. Speaker, the Lithuanian Club of Lake Worth, Fla., has called upon me and the Members of Congress to insist that the U.S. representatives to the Belgrade conference demand that the Soviet

Jamboree which brings Scouts together from all over our country in a fun-filled educational camping experience. The Cub Scouts are looking forward to projects such as local safe bicycle-driving rodeos and clinics, and a summer long learn-to-swim program.

I am particularly proud of the fine community spirit shown by our Boy Scouts in Kentucky. As their Bicentennial project this year Kentucky and Ohio Scouts have worked together to plan the dedication of the Daniel Carter Beard Bridge spanning the Ohio River to connect their two States. This bridge is named after Kentucky's well-loved woodsman and naturalist, Daniel Carter Beard, one of the founders of the Boy Scouts of America.

Through experiences such as these Boy Scouts have learned a great deal about their communities, their Nation, and perhaps most importantly, about themselves. They learn there is joy in helping others, find satisfaction and well-being in physical fitness, discover the camaraderie of new friends, and develop the strength of character that will assist them as they become responsible and participating citizens of tomorrow.

I often recall with fond and cherished memories the adventures and experiences I enjoyed as a Boy Scout and I feel confident that the early lessons of fellowship and citizenship provide a deeply personal and meaningful experience for every Boy Scout which will stay with him all through his years.

Mr. Speaker, I consider it a privilege to congratulate these fine young men for their splendid achievements and I look forward with them to a future full of challenge and bright with promise.

THE PRESIDENT AND THE PARDON

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. McDONALD. Mr. Speaker, much has been said about the Presidential pardon of Vietnam deserters, but, in my view, the columnist Smith Hempstone best summed up the way most people in the United States feel about the matter. In particular, Mr. Hempstone points out who the real culprits are—the so-called leaders who encouraged desertion, and also who will benefit the most—the Soviet Union and the Communist world as our internal cohesion suffers yet another blow. The column as it appeared in the Richmond Times-Dispatch of February 1, 1977, follows:

THE PRESIDENT AND THE PARDON

(By Smith Hempstone)

WASHINGTON.—President Carter can, as he has done, grant "a full, complete and unconditional pardon" to those light-footed thousands who fought the Vietnam war from the safety of Canadian bunkers.

But the President lacks the authority to bestow upon those who violated the Selective Service Act the gratitude of their country, the respect of their peers or that sense of honor they sacrificed in the pell-mell pursuit of their own comfort and safety.

These, to paraphrase President Kennedy, were willing to pay any price, employ any loophole, travel any distance, shirk any responsibility to assure their own survival and success.

One can, and must, respect a man who refuses to kill. There is a place for him—and 30,000 found it during the Vietnam war—in the non-combatant medical corps.

It is possible to esteem those 35,000 who said they would not under any circumstances don a uniform and dignified that stance by their willingness to go to jail or to perform alternative civilian service.

But it is not possible to admire a person whose most profound statement of belief is a skedaddle from graduate school to the closest safe haven, who refuses to dignify his principles with a sacrifice more severe than having to make do with the Canadian edition of Time for a few years.

Wives have been widowed, children left fatherless and parents deprived of their sons because someone had to go in place of those who fled to Canada. That is the burden of the draft-dodgers, and it is a measure of their morality that they bear it lightly.

John Stuart Mill, the 19th century British philosopher and economist, put it this way:

"A man who has nothing for which he is willing to fight, nothing which he cares about more than his personal safety, is a miserable creature who has no chance of being free, unless made and kept so by the exertions of better men than himself."

Just so.

But, protest the exculpators, Vietnam was an unjust war. That is drivel.

Wars are neither just nor unjust. They are simply horrible for those unfortunate enough to be caught in the middle of them. But wars must be fought from time to time, and no man can set himself up as more competent than society to judge whether he should or should not go to war.

Vietnam may have been an unwise and unnecessary war. It almost certainly was, if only because we failed to win it and thus compromised our ability to protect interests elsewhere that are likely to prove more vital.

But in a democracy, that is a decision that is made at the ballot box. Four American presidents asserted our interest in Vietnam and at least eight Congresses accepted it. If we didn't like it, we had but to vote them out of office.

The worst culprits never went to Canada. They were the politicians, commentators, columnists, professors and clergymen who told those younger, more inexperienced and less wise than themselves that there was no moral turpitude involved in fleeing their country, evading their responsibilities and betraying their generation. People who should have known better made criminals out of those foolish enough to listen to them.

Carter's pardon changes none of this. Indeed, the granting and acceptance of pardon clearly implies guilt in a way that amnesty does not. To decline to prosecute is not to praise. Neither is it to forget nor forgive.

What the President has said to those who departed when it was dangerous to remain, and stayed away until it was safe to return, is simply this: The war's over; come home, if you like.

In so doing, Carter is not—indeed, he cannot—denigrating the sacrifice of those hundreds of thousands of other Americans who fought, died or were maimed in Vietnam. What they did has a life and meaning of its own that will remain untarnished.

So the return of the self-exiled and ignoble few is largely meaningless, inconsequential and irrelevant. It is not worth getting excited about. Canada is just fortunate it did not have to fight a war while these timorous ones were its visitors.

Predictably, *Pravda*, the Soviet Communist party newspaper, had a good chuckle over Carter's pardon of the draft dodgers. "Peaceloving Americans," *Pravda* added, "are awaiting for full restoration of justice for all citizens who refused to take part in the shameful Vietnam adventure."

The source of that statement suffices as an indictment for those who, when their country needed them, replied they would rather switch than fight.

APPOINTMENT OF SPECIAL PROSECUTOR

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. HYDE. Mr. Speaker, one of the items of unfinished business remaining from that painful experience known as Watergate is the need for legislation providing for the appointment, whenever necessary, of a special prosecutor.

In response to this need, I have filed H.R. 2711, which amends title 28 of the United States Code by creating a triggering mechanism authorizing the appointment of a special prosecutor under certain circumstances with carefully defined standards.

Former special prosecutor Archibald Cox told a Senate Judiciary Subcommittee in 1975 that a servant cannot investigate his master. After Mr. Cox was fired, the then-president of the American Bar Association Chesterfield Smith said:

> It clearly was and is improper for an investigation of the Executive Branch of the government (to be conducted) by a prosecutor who is under the control or direction of either the President himself or some other person who himself is under the direction and control of the President.

We know from that experience that the Attorney General has the power to appoint a special prosecutor and did so after public and congressional pressure became severe. But public opinion is not always easy to mobilize and it is foolish to wait until a grave crisis has developed before establishing workable procedures to meet that crisis.

With both Houses of Congress and the executive branch under the control of one party, the checks and balances that might prompt more vigorous oversight are lacking and so the need for having a workable procedure to appoint a special prosecutor is all the more necessary.

This proposed legislative precaution is prompted not by any suspicion of either political party, but only by an understanding of how human nature has reacted in the past and can be expected to react in the future to a difficult situation.

H.R. 2711 is based on the premise that a nonpolitical independent prosecutor is best equipped to investigate and, if necessary, to prosecute high Government officials whenever the evidence warrants. The officials covered include: First, the President and Vice President; second, Cabinet-level officials; third, Executive Office employees earning at least $39,900 per year; fourth, the Director of the FBI and the Director of the Central Intelligence Agency; fifth, someone who

Union comply with the full implementation of the Basket III provisions of the Final Act of the European Security and Cooperation Conference in Helsinki.

GOOD TIMES ROLLING FOR FUNNY-VAN MAN

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. MILFORD. Mr. Speaker, on February 2, 1977, the University of Texas at Arlington's student newspaper—Shorthorn—published an article written by Ms. Anne Rose, which detailed the efforts of Mr. John Dycus to obtain his own car.

Ordinarily, such efforts would not be newsworthy. Mr. Dycus, however, suffers from cerebral palsy, and has limited use of his hands and arms.

This story of Mr. Dycus' determination and the dedicated efforts of his friends is an inspiring blend of the dreams and technology of Americans.

I share it with my colleagues.

GOOD TIMES ROLLING FOR FUNNY-VAN MAN

(By Anne Rose)

Vans modified to express the owners' fancies are almost commonplace on Arlington streets. One boxy vehicle recently appearing around town represents wishfulfillment of a different sort.

Look inside this plain blue Chevrolet and you won't find shag carpeting or cushiony seating. Instead, you're suddenly aware of what's missing: a driver's seat and a steering wheel. And extending from the dashboard, a large dark metal box resembling a workbench sprouts a complicated-looking arrangement of chains, switches and cables that make the dream possible.

The van belongs to John Dycus, Shorthorn adviser and a beginning driver at age 28. For Dycus, who has cerebral palsy, independent travel until now has been limited to getting around in a motorized wheelchair.

"I've been blessed with good friends—and parents—who would take me practically anywhere I wanted to go," he says. "The van will take some of this off my mother, who's done a lot of the driving. Now she worries so much when I drive that the point of diminishing returns may be met."

That concern, however, stems mostly from the natural anxiety of having a new driver in the family. In adapting the vehicle to meet Dycus' needs, safety and reliability had top priority for J. R. Baker, the engineer who designed the controls, and Roger Dycus, John's father, who built them.

"I think it's amazing what these two people have done," Dycus said. "It really does work, just like they planned."

Their achievement, he explained, goes far beyond that of hand-control devices on the market since the '40s. With those, floor pedals are merely replaced by a lever—pushed to accelerate, pulled to brake. But the driver still needs enough range in his other arm to turn a steering wheel and enough finger dexterity to operate other controls.

"These modifications are just dandy if you've got two good arms," Dycus said. "Otherwise they won't work."

The controls in Dycus' van use his shoulder and arm muscles together with his hands' gripping and pushing capacities to perform all the driving operations. With one small lever, his left hand does the steering, accelerating and braking, while his right operates the gear shift and pushbutton switches for turn signals and horn.

Other equipment makes it possible to get in and out of the van, as well as drive, while remaining in his wheelchair.

Finding someone who could accomplish all this—and at a price Dycus could afford—took more than a dozen years, from the time he developed the typical American high school boy's yearning for a car.

"I'd always envisioned a joystick of some sort," he said, referring to the steering and speed lever.

He began investigating the possibilities, getting in touch with anyone who might offer a solution. "I'd get the phone book down and turn to the Yellow Pages and start making calls," he said. One firm estimated a cost of $30,000 to outfit an automobile for his needs.

Letters to others around the country brought "just enough response to keep me interested." One went to Ed Roth, a flamboyant California showcar builder whose "Beatnik Bandit" featured a joystick. Roth replied that the Bandit couldn't be driven on the street and advised: "Your best deal is to marry a rich chick and hire somebody to drive you around."

"I suspect everybody thought I was crazy," Dycus recalled. He described their attitudes as "it's nice for you to shoot for the moon but I know and you know this can't be done, though we certainly admire you for trying."

Still optimistic, he continued to save money for the car. Living at home kept expenses minimal and, he added, "I didn't have a car to take me places where I could spend it."

His hopes rose in 1973 when first one, then a second UTA engineering student tackled the project; however, both graduated before a design could be implemented.

Looking back, Dycus regards the disappointments philosophically, "I met a lot of people and received some encouragement. Maybe I was too young then for the responsibility."

A friend at church who had given Dycus some books on hydraulics and automotive electrical systems discussed the project with Baker, a General Dynamics flight test engineer, and introduced the two.

A deeply religious man, Baker told Dycus of his conviction that the job could be done. Calling at "a very large task," the engineer said "I wouldn't undertake it except that I feel the Lord wants me to do it."

With this motivation, Baker offered his skills without charge.

The decision was made to buy the V-8, automatic shift Chevy van in October 1974. Describing the night they brought it home, Dycus said "I was sitting beside him (my father), behind the motor, I'm not an overly emotional person—I tend to be on an even keel—but I can recall being moved. It was my money and the van was in my name.

"Of course, at this stage, we thought it would be six months, but it took two years."

The leading that Baker felt seemed to prevail during the development of the equipment. "In everything we tried to do," Dycus said, "when we needed somebody to give some help, we did get it."

W. H. Reed, a family friend who had a machine shop in Bridgeport, offered his services, supplying "literally thousands of dollars worth of machine work for free," Dycus said. "Overall, it cost $2,700 for steel and the hydraulic motor and valves and a few mistakes."

A Fort Worth neighbor helped with the building and a friend of Baker's relieved their apprehensions about plumbing requirements. "We could just see oil spurting everywhere," Dycus remembers, "but it's very clean. You're not sitting in oil up to your knees and that was a fear."

When the family moved to Arlington, three blocks away they found Bill Meador, "a man who makes cars for a living and can do anything in steel." Meador installed the seat belts and came up with a simplified method for shifting gears.

"Everything has worked out extra well, and I am most thankful for this," Dycus said.

He enters the van on a hydraulic lift—standard equipment—which descends at the side door in response to switches on the outside. It folds up once he's inside. A hydraulically operated mechanism designed by Baker secures the chair with hooks from the floor, at the same time releasing the emergency brake.

The added hydraulics work off a standard power steering pump. Oil also is forced into an accumulator, an emergency power reserve to allow steering and braking should the motor die.

The brakes work by "a valve on the floor which is on a movable plate linked up here to my hand by a cable," explained Dycus. Controlled by his left hand, the joystick, a 4½ 5-inch lever rising from the desk-like control box, also regulates the speed by a cable to the accelerator.

The stick's most impressive feat is enabling Dycus to steer the 5,000-pound van. Baker's design, and Roger Dycus' construction, succeed in reconciling a tiny movement of this lever with the multiple rotations normally made by a steering wheel.

A sideways tilt of the stick activates a hydraulic valve which determines the left or right movement of a hydraulic motor. From this motor a chain loops around a sprocket on the steering column to turn it.

Baker was originally unsure the van would be controllable at speeds greater than 40 miles an hour, but Dycus has achieved 52 "on the freeway with no traffic around me.

"I change lanes like a pro—of course, there's not much market for that. The reason I do that well is the makeup of the van. Just a small movement of the stick will zip into the other lane."

Dycus may eventually overcome the need for giving himself on-the-road pep-talks, "just to keep alert." But, he said, "I don't think I will ever become complacent. It's just too exciting, too much fun to drive."

LITHUANIAN INDEPENDENCE DAY

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. BLANCHARD. Mr. Speaker, today, February 16, 1977, marks the 59th observance of Lithuanian Independence Day.

On this day, Lithuanian-Americans commemorate one of the great moments in Lithuania's long, rich, and varied history—the day in early 1918 when the Lithuanian National Council proclaimed their country's independence, after occupation by the Soviet Union and Germany.

Since that day, the desire for freedom in the hearts and minds of Lithuanians has never lessened, despite their betrayal by the Soviet Union, which broke its treaties of friendship and invaded Lithuania on June 15, 1940, beginning an illegal occupation that has now lasted for 36 years.

The invasion of the Baltic States by the Red army remains today as one of the great unrectified injustices of modern history. Today, Lithuania is still a part of the Russian sphere of domination in

Eastern Europe—the last remaining colonial empire.

Nonetheless, resistance continues in Lithuania, and in her sister Republics of Estonia and Latvia. As a great Lithuanian freedom fighter, Simas Kudirka, told me only a year ago:

The thirst for freedom can conquer all obstacles.

Today, I join with Simas and his countrymen in saluting the spirit of Lithuania, which resulted in the proclamation of freedom in that country in 1918 and which will one day see her free again.

THE ITALIAN HERITAGE OF WATERBURY

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. SARASIN. Mr. Speaker, on Saturday, February 26, 1977, the Italian Heritage, Inc. of Waterbury, Conn., will be holding its second Carnevale Festival. In celebration of this occasion, I would like to take this opportunity to honor this social organization which has done so much for the city of Waterbury, for Italian-American groups in the area, and for the preservation of the Italian culture.

In April 1975, a group of people from various Italian organizations in Waterbury met together at 30 Center Street to discuss the forming of a new group that would include all Italian-American men, women, and children in the area. Their chief aim would be to promote Italian cultural activities as well as supporting those programs which would benefit the community.

Some of the original members were: Angelo Barbino, Frank Albini, Angela R. Pugliese, Joseph Petino, Charles Lanza, Angelo Izzi, Sal Terenzo, Rosario Costa, Victor Guerrera, John Sarlo, Anthony Mastrantuone, Albert Izzi, Josephine Negaro, Florence Lorusso, Thomas Garrantano, Fred Perugini, Matt Cipaldo, Carmine Gugliotti, Ugo Ciarlo, Frank Porto, Jr., William Bochicchio, Joseph Tramuta, Peter Augelli, Carl Padula, Ed Maglio, Vincent Bruno, Angelina DeAngelis, Sue Calvo, Mary Cappello, Pat Longo, Sal Coppola, Salvatore Perugini, George Testa, Dan Morrelli, and Vincent Onalfo.

These individuals represented such clubs as the Favale-Generali ITAM War Vets, Lega Siciliana, Pontelandolfo Community Club, Ladies of Unico, Ceremaggiore Community Club, Unico National—Waterbury Chapter, Sons of Italy—Leonardo DaVinci Lodge.

The first function of this new united group was a revival of the Italian festival which had not been held for half a century. Lakewood Park was chosen as the site because it was the popular rendezvous place for Italians 50 years ago when Lakewood was a recreation and picnic area with an amusement park and carousel. The festival, held in August 1975, was planned and put together in less than 2 months. Many members felt that the festival should wait until the following year, but the majority ruled that they had waited long enough for this event and that it must go on. The festival turned out to be an outrageous success, drawing over 10,000 people. Seeing all the happy faces of the people in attendance was evidence enough that all the hard work and planning was well worth the effort.

Italian Heritage, Inc., followed up with a carnevale in February 1976. This was patterned after the traditional prelenten celebration. Held in the State armory, the largest hall in the Waterbury area, it drew 1,200 people which filled the hall to capacity. It was another smashing success. Everyone enjoyed the nostalgia, the renewal of old friendships, the gaiety, the laughter, and the plain, good old-fashioned fun.

After 1 year of existence, the organization had a membership of over 400 people. By 1977, the rolls had increased to over 650. The club branched into other activities. In the spring of 1976, they raised over $2,000 and collected clothing to aid the Italian Earthquake Relief Fund. Monthly meetings are held at the St. Lucy's School auditorium courtesy of the pastor, Father Thomas Ritucci. The club offers Italian lessons and encourages the learning of Italian ethnic dances. Currently, they are working to establish two music scholarships to send students to Siena, Italy, for 6 weeks to study Italian and their music specialty. For this, they will receive college credits from Columbia University.

But Italian Heritage, Inc., has one ultimate dream—to build a large Italian community cultural center. It would be a monument to the community and a source of deep pride to the Italian people, something that would encourage the performance of the arts. Plays, operas, art exhibits, lectures, and other events could be held in this center. The center is a long way into the future, but with determination, leadership, and the willingness of the members to work together toward this goal, it can be done.

I believe that Italian Heritage, Inc., will one day see its cultural center be built. If all of their past accomplishments are a good indication, they have the inspiration, the drive, and the strong desire to see that their dreams become reality.

I can only bear witness to the wonderful things they have done for the city of Waterbury, not only in bringing together all the Italian-Americans, but in their vibrant celebration and preservation of the Italian culture. I know that their second carnevale festival will be as big a success as the first, if not bigger, and I want to wish them many more enjoyable festivals in the future.

DRUG MENACE

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RANGEL. Mr. Speaker, last week myself and other members of the Select Committee on Narcotics Abuse and Control released a report on the narcotic law enforcement efforts in New York City. In November I chaired a hearing of the select committee in New York on this very problem.

On December 1, 1976, WINS Radio 1010 New York issued an editorial comment on this issue, which I would like to share with my colleagues at this time. The editorial follows:

DRUG MENACE

Recently, Manhattan Borough President Percy Sutton told a Congressional Committee that New York is a city being abandoned to the users and pushers of drugs. He pointed out that on streets such as 117th and 8th Ave. in Manhattan, drugs were on sale, by brand name. There are on other streets in central Harlem, hard drugs are being peddled right out in the open, and the pushers are calling out the brands . . . True Blue, Bingo, Mean Machine, Dynamite, Blue Star and Death Wish.

What is most disturbing about this is that so many officials are surprised or shocked. This kind of open selling of hard drugs is nothing new. As a kid growing up in New York, I not only knew about it. I, and thousands of others, saw it . . . twenty and thirty years ago. What we ought to be shocked about is that Federal and City officials and law enforcement authorities are still failing miserably in wiping this kind of activity off the streets. Its been going on so long, and so blatantly, that we have to question whether they really want to clean it up. You don't have to be an especially talented undercover agent to see what is happening. Our officials here and in Washington and maybe the courts, too, have failed us. They are guilty of allowing the drug peddlers to openly profit on the misery of the poor and the young. This kind of thing makes you wonder who is more to blame . . . the pushers, or the people who are supposed to protect us and crack down on this vicious form of crime, but have not.

CONGRESSIONAL BUDGET IMPOUNDMENT AND CONTROL ACT

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. COLLINS of Illinois. Mr. Speaker, inasmuch as the former Administration's budget proposal for fiscal year 1978 was submitted to Congress on January 17, 1977, for modification under provisions of the Congressional Budget Impoundment and Control Act (Public Law 93–344), I feel compelled to bring its serious shortcomings to the attention of my colleagues.

Throughout the budget proposal, a great deal of emphasis has been placed on instituting permanent reductions in Federal spending, decreasing individual and corporate taxes to stimulate the economy, and cutting back drastically on direct job-creating programs.

In my view, the budget unrealistically assumes that economic recovery will be achieved without public service programs. With the labor force growing and the possibility of higher-than-normal unemployment, the proposed tax relief is not sufficient to counteract what appears to be a structural unemployment rate affecting minorities, youth, and indeed, our cities.

It is my understanding, however, that we are expected to see one major area in the Ford budget undergo significant growth—the Department of Defense—DOD—by 12 percent. Planned DOD outlays of $110.1 billion for fiscal year 1978 represent 25 percent of the total proposed Federal budget and 5.4 percent of the Nation's gross national product—GNP. Needless to say, I am fully aware of the important role played by the Defense Department in maintaining national security. However, with rampant increases in the unemployment rate, I believe the budget should direct a larger share of Federal funds to the area of creating and improving public service programs.

Despite the former administration's estimation that employment in defense industries will increase by 217,000 to 2.1 million during the next fiscal year, I am alarmed that former President Ford would propose to phase out and/or cutback public-service job programs that employ more than 260,000 employees as well as to close down eight nationwide Public Health Service Hospitals that serve 277,000 merchant seamen and other Federal beneficiaries. In short, this budget lacks the necessary elements to adequately stimulate the economy and to effectively respond to the needs of lower-income groups.

I sincerely hope that this Congress and the Carter administration will not be insensitive to our Nation's major domestic problems. Now is the time to move in a positive direction by fashioning a budget receptive to those areas long overlooked by past administrations.

THADDEUS KOSCIUSZKO DAY

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RODINO. Mr. Speaker, on February 12 we celebrated Thaddeus Kosciuszko Day, in commemoration of the birthday of the great Polish soldier and statesman whose superb military talents were a major contribution to the cause of American independence.

Perhaps General Kosciuszko's finest military achievement was his outstanding ability to use the natural terrain of our country to the full advantage of the Continental Army. His impregnable fortifications both at West Point and Saratoga were major factors in both winning and maintaining these positions for the Americans. Indeed, the forts constructed by Kosciuszko on Billingsport Island to defend the Delaware River from British naval attacks were crucial to Washington's famous Christmas night crossing of that river and the subsequent dramatic victories at Princeton and Trenton.

Following the Revolution Kosciuszko immediately began another quest for independence—that of his native Poland, which had been partitioned by Catherine the Great. While Kosciuszko never was able to witness the reunification and independence of his homeland, he was regarded by his contemporaries as the personification of Polish liberty.

Less well known than his military exploits is his compassionate and selfless nature. During the Revolution he refused to accept his salary while enlisted men went unpaid. He repeatedly turned down promotions to brigadier general and refused to accept credit for his brilliant strategy at Saratoga. General Washington himself once remarked to Kosciuszko, "You are too modest."

Two incidents further serve to highlight Thaddeus Kosciuszko's great compassion for his fellow man, regardless of race or nationality. When presented with a black slave to serve as his manservant during the Revolution, General Kosciuszko promptly freed the man, stating that he had no idea of what to do with a slave. Later, when Kosciuszko was awarded property in Ohio by Congress in recognition of his extensive military services, the general sold the land and established a school for black children in New Jersey with the proceeds.

Mr. Speaker, Thaddeus Kosciuszko's life was dedicated to the cause of freedom and justice and all Americans should remember with pride and gratitude his contributions to our Nation.

INCREASE IN SOCIAL SECURITY BENEFITS FOR PERSONS RETIRING AFTER AGE 65

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. EVANS. Mr. Speaker, I am today introducing legislation to provide for an annual 6⅔-percent increase in social security benefits for those persons between the ages of 65 and 72 who voluntarily choose to delay their receipt of such benefits.

This measure would give individuals maximum flexibility under the social security system by allowing their benefits to increase annually, up to age 72, by the same percentage as benefits are now reduced for early retirement.

Most importantly, this legislation would end the bias toward retirement that the present system possesses. As it stands now, individuals are literally forced into retirement in order to receive the maximum benefit from their social security, regardless of whether that man or woman desires to or is capable of continuing work.

I believe that the experience and ability of mature Americans is a resource that our Nation cannot allow to go untapped. Age 65 must not be an arbitrary test of whether an individual can still contribute to society. We simply cannot allow the waste of anyone's skills in this country, regardless of their age.

Even more important is the effect that work has on the potential retiree. Disinvolvement from the mainstream of life has a terrible impact on many retirees, particularly those who would have preferred to stay on the job. Yet in many cases individuals have no choice. They must retire, because the actual return for continuing work does not encourage the worker to remain at his place of employment. Not only does the full-time worker lose social security benefits, but he or she must also pay income taxes and social security taxes on earnings. When these costs are added to the expenses incurred in traveling to and from a job, little if any incentive remains to encourage one to stay at work.

Simply put, this measure gives freedom of choice to older Americans. It does not affect current law regarding early retirement, or retirement on schedule at age 65. All it does is remove the barriers which now exist against those who wish to remain on the job.

An identical bill has been introduced in the Senate by Senator HANSEN, of Wyoming, as well as 15 other Senators of both parties and varying ideologies. Its broad-based support in that body is testimony to the crying need for this change in our retirement laws.

This measure would cost about $200 million per year, or 0.21 percent more in payroll taxes. However, this estimate does not take into account the fact that older workers are paying Federal and social security taxes while they work. Nor does it include the savings in such programs as SSI, food stamps, medicare, medicaid, and public assistance programs which will undoubtedly occur when individuals can once again be productive.

We need to give older Americans the freedom to choose for themselves when they wish to retire. This bill gives them that choice, and I urge its speedy consideration.

THE NATIONAL GARDENING ACT OF 1977

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. BROWN of California. Mr. Speaker, I am introducing a bill today entitled the National Gardening Act of 1977. As indicated from the title this bill provides for a system within every county in this country for: First, assessing the amount of unused, barren public and private land; second, coordinating agreements between the local county or city officials and the Agricultural Stabilization and Conservation Service of the USDA for the temporary voluntary donation of such lands to be used as garden plots by local residents; third, the initial preparation of the land—tillage, mulching, fertilization, and so forth—for gardening use; and fourth, the distribution on a bid basis to local individuals or groups interested in growing food, herbs, and other plants.

Interest in gardening has increased significantly over the past few years. In my own district I have been extremely pleased by the number of telephone calls to the Extension Service requesting information and advice on soil fertility, planting dates, and other gardening tips. But many of those who would like to be outside working the soil, seeing the fruits of their labor, have no access to

land suitable for planting. In these days of growing awareness regarding resource conservation, waste utilization, and world food shortages, it seemed illogical to me that so much land within our cities and counties is left as unused eyesores. Such plots of ground could be a source of food production for home consumption, a source of recreation and education for our young and old, and a source of green, natural beauty to those passing by.

Through a national gardening program people will be able to have some direct influence over the food they eat and they will develop a greater understanding of man's dependence on nature for sustenance. They may also learn a preference for a more natural way of life, a life slightly less tangled by technological, mechanical intrusions.

I ask my distinguished colleagues to join me in this effort to provide a means of personal enjoyment and a bit of self-sufficiency to many people throughout this country.

LITHUANIA

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RUSSO. Mr. Speaker, this year, as in years past, we of the House of Representatives celebrate the anniversary of the Declaration of Independence of Lithuania, when its people threw off the chains of Russian domination and declared themselves a nation free to govern themselves according to the principles they chose as best. This was a great moment. It marked the end of Russian rule in Lithuania which had denied the people their essential human rights for hundreds of years.

This is a celebration stained with tears of both sorrow and joy. It is the joy of 22 years of freedom for Lithuania until the Soviet Union once again invaded and oppressed her people. It is the sorrow we must feel because the oppression of the Lithuanian people continues.

As we enter this assembly we are not harrassed for our political differences, not tormented for our individual moral and ethical beliefs, not stifled by the notion that our thoughts will possibly become our jailors. We must remember that the people of Lithuania are not afforded the same freedoms of thought, speech, or religious choice which we in this great assembly take for granted.

We do well to remember the fight of our own Nation for freedom—a fight which has enabled us to grow, prosper, and achieve. We are, despite our shortcomings, the freest nation in the world; thus, we must bear the burden in our hearts when another people is denied the basic liberties that we hold so dear.

I ask my fellow colleagues and Americans to stand up and protest the treatment of Lithuania. It is time, as the Lithuanian World Congress resolution of 1958 declared—"to reaffirm on every suitable occasion the inalienable rights of the Lithuanian people to national independence and individual freedom." It is unconscionable that a people should not live free in their own land. There is no place for such barbarism in the modern world. We must make the cause of Lithuania, and all people unfree, our own cause. Today is a day to remember Lithuania. Today is a day to renew our commitment and hope that independence will be a reality, not merely a memorial, for all the people of the world.

DEPLORABLE CONDITIONS IN BRITISH HOSPITAL CITED

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. CRANE. Mr. Speaker, for the past several years I have been citing the numerous problems in the British National Health Service as examples of what we can expect if national health insurance were to be adopted in the United States. NHS in Britain has resulted in shortages of hospital beds; long waiting lists, even for necessary surgery; and the emigration of skilled physicians to the United States and other Western countries.

In August 1975, I personally visited many of Britain's finest hospitals and was shocked by the antiquated buildings and equipment. But a recent article in the Londan Daily Telegraph revealed that sanitary conditions, which are presumed to be of the highest standards in hospitals, are worse than at public eating places in one of London's medical centers. Ironically, hospitals are exempt from public hygiene regulations and, therefore, can get away with unsanitary practices that would have instantly closed them down otherwise.

I am inserting this article into the RECORD in the hope that it will be a sobering lesson for those who advocate that the Federal Government take over the health care system in the United States:

HYGIENE AT HOSPITAL ATTACKED

Standards of hygiene at the Central Middlesex Hospital, Park Royal, Northwest London, were intolerably bad, local public health officers said yesterday.

Long-standing conditions of neglect had not been put right despite a call more than two years ago for action to remove vermin and insects.

There were still no separate handwashing facilities in kitchens, and drugs were stored alongside food in the refrigerators.

Any restaurant or canteen with similar failings would have been closed long ago. But hospitals were exempt from public hygiene regulations.

100,000 POUNDS SPENT

A hospital spokesman said 100,000 pounds had already gone towards putting things right. More needed to be done but spending restrictions were making this difficult.

Mr. William McLellan, chairman of Brent borough council environmental health committee said hot water, soap and soda could deal with some of the hospital's problems.

Mr. Robert Govett, environmental health officer, said hospital authorities had fobbed on constructive suggestions for improvement.

A NATIONAL ENERGY POLICY

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. HARRINGTON. Mr. Speaker, during the district work period, I received a copy of a resolution passed by the Massachusetts State Senate, which I believe all of us can benefit from. The Massachusetts Senate is urging the Congress to develop a national energy policy.

We can ill afford any further delays in formulating a national energy policy. I would like to submit for the RECORD a copy of the senate resolution as well as my response to the Massachusetts Senate:

RESOLUTIONS MEMORIALIZING THE CONGRESS OF THE UNITED STATES TO ENACT A NATIONAL ENERGY POLICY

Whereas, The well-being and security of this nation depend upon assured quantities of reasonably priced energy; and

Whereas, This winter has resulted in serious energy shortages in many areas of this country; and

Whereas, America's dependence on imported oil has increased since the oil embargo of 1973; and

Whereas, Efforts at development of alternatives to petroleum as a source of energy are fragmentary and halting; and

Whereas, Nuclear fission, fusion, coal gasification, and solar energy all require careful evalutaion and a concerted national effort for their implementation; and

Whereas, The research and development required to institute such a policy will foster the creation of an advanced technological infrastructure; now therefore be it

Resolved, That the Massachusetts Senate respectfully urges the Congress of the United States to enact a national energy policy; and be it further

Resolved, That copies of these resolutions be sent by the Clerk of the Senate to the Congress of the United States, and to the members of the Massachusetts congressional delegation.

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 15, 1977.

Hon. KEVIN B. HARRINGTON,
President, Massachusetts State Senate, State House, Boston, Mass. 02133

DEAR KEVIN: Yesterday I received a copy of the Resolution passed by the Massachusetts Senate urging the Congress to enact a national energy policy. Your frustration and sense of urgency have not been shared by the Nixon and Ford Administrations, or the Congress. Your resolution is a welcome reminder that we are ten years late on the energy question, and I intend to insert it tomorrow in the CONGRESSIONAL RECORD.

An energy policy is made of many separate parts on which there will be much debate and controversy. But on several matters I think there is agreement:

First, the energy policy must be comprehensive, with all its parts working toward the same ends and with the same timetable. Our current hodgepodge shows how individual policies can conflict and negate the effect of the other, to the detriment of energy consumers and energy producers. A single federal agency should be formed to provide the comprehensiveness and coordination we need.

Second, the policy must stress research and development of so-called alternative sources of energy—alternatives to oil, natural gas, coal, and nuclear fission. In varying de-

grees, these forms of energy are based on resources whch are running out.

Finally, a national energy policy must be based on an all-out effort toward conservation. Studies have shown we are wasting about one of every two units of energy we produce in America—waste exceeding the total energy consumption of Africa, Asia and Australia combined.

In translating these three goals into specific policies, there are two areas related to energy which ought to be kept in mind, as well.

Too often we find that the interest of greater energy or production run head-on with concerns for our environment and health. These head-on clashes have proved expensive, politically damaging and inevitably indecisive. We ought to establish mechanisms for sorting out the energy-environment conflicts quickly and fairly, so the agony of a Seabrook or a Dickey-Lincoln can be avoided.

An energy policy should also be mindful of its effect on low income families, and make allowances which shift the burden to those who can best afford to shoulder it. Price rises and energy taxes may be an inevitable part of a comprehensive national policy for energy production and conservation. If so, some allowances should be made to assure that this does not translate into added suffering for those who already suffer too much.

With these considerations in mind, what are the first steps? I would like to take this opportunity to express my ideas.

We ought to establish a new Department of Energy, as President Carter has suggested. The department could consolidate the activities and powers of 50 existing agencies, streamline their operations and avoid waste and duplication. The department could also submit to the country, and the Congress, an energy agenda of realizeable goals for the next two years, the next ten years, and the next 25, against which we can judge our progress and chart an agreed upon course.

The new department should also publish comprehensive and accurate data each month on energy supplies, reserves and demands, so that policies can be designed to reflect real rather than imaginary situations. Too often, current sources of information on energy are inaccurate or completely contradictory. This surfeit of misinformation has been a principal cause of our uncoordinated federal energy efforts to date.

The first item on the agenda for the new energy agency should be conservation—the best short-term solution to the energy crisis. Conservation is technologically available, easily instituted and economically sound. Devices already exist to increase the efficiency of home furnaces. Combined with a nationwide insulation program, we could cut furnace fuel consumption in half. Increased taxes on inefficient automobiles, more efficient water heating devices, recycling of paper, metal, glass and wood all would greatly add to that conservation effort.

It should be stressed that these conservation measures would not effect our national standard of living. Sweden and West Germany are two good examples of countries with high standards of living, high industrial output, and per capita energy consumption half that of ours.

Item number two on the new department's agenda should be to assure that current reserves of oil, natural gas and coal are allocated fairly. This winter is proof enough that we cannot continue our dependence on natural gas producers to get us what we need at a price we can afford. In August of last year, thirty House members and I asked the General Accounting Office to conduct an audit of the nation's natural gas reserves. While a final report won't be completed until July, it now appears as if our current shortage is more the result of reluctance to sell off gas reserves at lower profits and less the result of too little gas from too few wells.

Unfortunately, the crisis this winter has given new life to proposals for deregulation of natural gas prices. The argument in favor of deregulation is that the free market forces of supply and demand should govern the price of natural gas, not artificial ceilings set by bureacrats in Washington. I would be willing to live with that thesis if I thought a free market situation would result from deregulation. Unfortunately, I don't believe it will. There are now 300 producers of natural gas in the United States, but 12 of them—all major oil companies—supply 80 percent of the total. Only divestiture of the natural gas industry from the oil industry will provide the basis for a truly fair and equitable market situation in which deregulation could occur, and I have introduced with Congressman Udall, Seiberling and other legislation to do just that.

As for coal, I think our best efforts lie not in developing gasification and liquefication techniques so much, as developing environmentally sound methods of just burning it. Burning coal could provide us with 500 more years of energy at current rates of usage. Trying to turn it into natural gas would produce only about one fifth the energy overall, probably at much greater expense.

The third item on the Department of Energy agenda should be accelerated development of what have been called "alternate" sources of energy—alternatives to oil, gas, and uranium, which may run out sometime during the next century.

Solar and geothermal energy are the two alternate sources which come readily to mind, both because they are safe, clean and renewable and because the necessary technology is already available. Dr. Robert L. Hirsch, the top federal official in this field, told a Congressional Committee last year that "There is no question of technical feasibility in the major solar technologies—they all work. The major problem is cost in all cases." It is projected that by 1980, solar water and space heating will be cost competitive with all other forms of energy in almost all parts of the country, either as primary or secondary sources of energy. And in some states, plans are already being approved for generating stations using steam extracted from earth's core.

In order to foster accelerated research and development in this field, and encourage new techniques for mass production, I have introduced legislation with 30 colleagues to provide low-cost, long term federal loans for installation of solar space and water heating in private homes and multifamily housing projects. In addition, I would like to see the federal government take the lead by installing this type of equipment in all of its new buildings, both for heating and cooling.

We could go on with this discussion for literally hundreds of pages. But I wanted you to know that there are some of us who are worrying about energy supply and energy prices, trying to do something about it, and sensitive to your all-too-legitimate frustrations with the lack of leadership exercised in this field by Congress and the White House.

Yours sincerely,

MICHAEL J. HARRINGTON.

INTELLECTUALS ARRESTED BY KGB

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. DOWNEY. Mr. Speaker, recently I was informed of the arrest, by the Soviet Union's KGB, of Mykola Rudenko and Oleksiy Tykhiy. Mr. Rudenko and Mr. Tykhiy are the cochairmen of the Ukrainian Citizens Group to Monitor the Helsinki Accords.

The arrests were made Saturday, February 5, and no official information as to the whereabouts or the charges leveled against these two respected Soviet intellectuals have yet been released.

It is both unfortunate and curious that the leaders of a group established to evaluate the Hensinki Conference were arrested only months before the scheduled Belgrade, Yugoslavia, conference to review compliance with the Helsinki accords.

We cannot let up on our attempts to focus world opinion on the practices of persecution in the Soviet Union. We, as Americans, should express our moral indignation when those like Mykola Rudenko and Oleksiy Tykhiy, whose diligent efforts have been to uphold the agreements set forth by the Hensinki accords, find that they themselves are the victims of persecution and repression.

In the spirit of the Helsinki agreement and in light of Secretary of State Cyrus Vance's visit to the Soviet Union in late March, I urge my colleagues attention to the cases of Mr. Rudenko and Mr. Tykhiy to see that they do not suffer any unjustified imprisonment.

LITHUANIAN INDEPENDENCE

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RHODES. Mr. Speaker, 59 years ago, on February 16, 1918, the Republic of Lithuania came into being. On June 15, 1940, it was overwhelmed by Russian communism. Many of its people were relocated, taken from their homeland, and sent to Siberia.

It is most fitting that the U.S. Congress pay tribute to the brave people of Lithuania, to the more than 30,000 freedom fighters who have lost their lives in a courageous attempt to throw off the yoke of repression.

Today, throughout the Communist empire, a new spirit is stirring. Downtrodden peoples are growing restless under the soul-deadening burdens of totalitarianism, the atheistic indifference to personal dignity and identity.

Communism is reacting with its characteristic brutality. As we observe the anniversary of Lithuania's struggle, we must demand that our Government take a firm stand on enforcement of the human rights section of the Helsinki agreement.

The colossus of communism is discovering that the spirit of freedom has not died among those Baltic peoples, and their descendants and relatives who have fled to freedom.

It is important that we in the United States honor their heroic efforts to regain freedom, and offer our strongest support for people everywhere who seek to rule themselves and control their destinies. At this point I include the following:

LITHUANIAN AMERICAN COMMUNITY OF THE U.S.A., INC., WESTERN REGION,

February 1, 1977.

Hon. JOHN J. RHODES,
House Office Building,
Washington, D.C.

MY DEAR REPRESENTATIVE: Americans of Lithuanian origin or descent and their friends in all parts of our great nation will commemorate two very important anniversaries this month (starting February 12th): (a) they will observe the 726th anniversary of the formation of the Lithuanian state when Mindaugas the Great unified all Lithuanian principalities into one kingdom in 1251; and (b) they will mark the 59th anniversary of the establishment of the modern Republic of Lithuania on February 16, 1918.

The United States Congress marks these anniversaries each and every year. We kindly ask you to take part in the commemoration of the Lithuanian Independence Day in the United States Congress. That will take place during the second part of February of 1977.

Enclosed you will find a copy of an essay prepared by us which could be one of the sources for your remarks in the House of Representatives.

Needless to say, all Lithuanian-Americans and other freedom-loving constituents of yours will really appreciate the aid and assistance given by you to this crusade to free the Baltic States.

Thank you.

Sincerely,

V. P. VIDUGIRIS,
President, Lithuanian-American Community, of the U.S.A., Inc., Western Division.

LITHUANIA'S SEVEN-CENTURY QUEST FOR FREEDOM (RED TERROR IN LITHUANIA, LATVIA, AND ESTONIA)

It isn't often that a nation fights on both sides of a major war and comes out with a prize derived from each adversary.

The younger generation of today wasn't even born when it all happened. For on the 15th of June, a tragic anniversay will be recorded. On that day in 1940 the Soviet Union—then an ally of Nazi Germany—annexed Lithuania, Estonia and Latvia, which the Red Army had invaded and occupied after the conquest of Poland. Later on, when Hitler turned on the Russians in June 1941, America came to their aid and, a consequence of the victory of the Western allies, the Soviet Union was able to secure control over the so-called independent governments in Poland, Czechoslovakia, Hungary, Romania, Bulgaria and East Germany.

Without Hitler's help, the Russians wouldn't have acquired the Baltic States. Without America's aid, they wouldn't have won control of the "captive nations" of eastern Europe.

ANCIENT NATIONS

The Balts are proud people who have lived peacefully on the shores of the Baltic from time immemorial. For instance, this year marks the 726th anniversary of the formation of the Lithanian state. Mindaugas the Great unified Lithanian principalities into one kingdom in 1251.

The Baltic peoples have suffered for centuries from the "accident of geography." From the West they were invaded by the Teutonic Knights, from the East by the Russians. It took remarkable spiritual and ethnic strength to survive the pressure from both sides. The Lithuanians, Latvians and Estonians, it should be kept in mind, are ethnically related neither to the Germans nor the Russians.

MOST BRUTAL OCCUPATION OF ALL TIME

Since June 15, 1940, it began one of the most brutal occupations of all time. Hundreds of thousands of Balts were dragged to trains and jammed into cars without food and water. Many died from suffocation. The pitiful survivors were dumped out in the Arctic or Siberia. The Baltic peoples have never experienced such an extermination and annihilation of their people in their long history through centuries as during the last almost four decades. Since June 15, 1940, these three nations have lost more than one-fourth of their entire population. The genocidal operations and practices being carried out by the Soviets continue with no end in sight.

Since the very beginning of Soviet Russian occupation, however, the Balts have waged an intensive fight for freedom. During the period between 1940 and 1952 alone, some 30,000 Lithuanian freedom fighters lost their lives in an organized resistance movement against the invaders. The cessation of armed guerrilla warfare in 1952 did not spell the end of the Baltic resistance against Soviet domination. On the contrary, resistance by passive means gained a new impetus.

SUCCESSFUL REVOLT AGAINST SOVIETS

The year of 1977 marks the 36th anniversary of Lithuania's successful revolt against the Soviet Union. During the second part of June of 1941, the people of Lithuania succeeded in getting rid of the Communist regime in the country: freedom and independence were restored and a free government was reestablished. This free, provisional government remained in existence for more than six weeks. At that time Lithuania was overrun by the Nazis, who suppressed all the activities of this free government and the government itself.

WORLD OPINION

The principle of self-determination of peoples is no longer honored. The rest of the world, while occasionally voicing protests, made no positive effort to interfere with the virtual seizure of the countries of Lithuania, Latvia and Estonia.

But what about world opinion? If a long and expensive war like that which was fought in Vietnam could be waged in order to protect the right of self-determination for the South Vietnamese people, why should the same right for the peoples of the Baltic States be disregarded?

Ten years ago, both houses of Congress, by a unanimous vote, adopted a resolution (H. Con. Res. 416, 89th Congress) urging the President "to direct the attention of world opinion at the United Nations and at other appropriate international forums and by such means as he deems appropriate, to the denial of the rights of self-determination for the peoples of Estonia, Latvia and Lithuania, and to bring the force of world opinion to bear on behalf of the restoration of these rights to the Baltic peoples." The resolution says in part:

"The subjection of peoples to alien subjugation, domination, and exploitation constitutes a denial of fundamental human rights, is contrary to the Charter of the United Nations, and is an impediment to the promotion of world peace and cooperation . . .

"All peoples have the right to self-determination; by virtue of that right they freely determine their political status and freely pursue their economic, social, cultural, and religious development."

The time has come for the whole world to demand that the principle of self-determination be respected and that the nations of Lithuania, Latvia and Estonia, too, shall be free from domination and be permitted to choose their own form of government. For that is what self-determination really means.

CONFRONTING THE SOVIETS WITH THEIR ACTS OF AGGRESSION

The United States Government still refuses to recognize the forced incorporation of the Baltic States into the Soviet Union. But this lack of official recognition by our Government is not enough. Our diplomatic representatives at the United Nations and elsewhere should be prepared to confront the Soviet Union with its acts of aggression against Lithuania, Latvia and Estonia when Soviet spokesmen raise the cry of "imperialism" against our own country.

The Soviet Union has signed the United Nations Declaration of Human Rights. This document describes the fundamental privileges which are due to every individual from a state in which he lives. These include the rights of assembly, of free elections and of freedom of worship. Most importantly, they include the right to move freely over the borders for emigration or temporary visiting.

The United States and other countries of the free world should urge the Kremlin leaders to make these rights described in the Declaration available to the Balts and other captive people.

CRIME—AND THE DEATH PENALTY

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. SIMON. Mr. Speaker, I am not among those who could be labeled as "soft on crime." I will soon be introducing a measure which would require that once a person is convicted of a criminal charge in Federal court and sentenced, that the sentence should be commenced immediately rather than be postponed pending appeal. I believe our State governments should enact similar legislation. It makes no sense to read and hear time and time again about people who have been found guilty of committing a crime, then are out on appeal and commit the same crime while out on appeal.

But the Gary Gilmore execution, or suicide, in my opinion encourages crime rather than discourages it. It brutalizes all of us. We reserve capital punishment for the children of the poor and that strikes me as a gross injustice.

Anthony Lewis had a column which I think makes a great deal of sense and which I call to the attention of my colleagues:

LET'S DO IT

(By Anthony Lewis)

In the early morning of Nov. 13, 1849, Charles Dickens came upon a crowd outside Horsemonger Lane Jail in London. People were waiting to see a Mr. and Mrs. Manning hanged for the murder of their lodger. Dickens watched through the hours until sunrise, as the crowd screamed and laughed and sang "Oh Mrs. Manning" to the tune of "Oh Susannah." Later that day he wrote a letter to The Times of London.

"A sight so inconceivably awful as the wickedness and levity of the immense crowd collected at that execution could be imagined by no man . . ." he wrote. "I am solemnly convinced that nothing that ingenuity could devise to be done in this city, in the same compass of time, could work such ruin as one public execution."

Three days later, after some other comment, Dickens wrote a second letter to the editor. He said executions attracted as spectators, "the lowest, the most depraved, the most abandoned of mankind." And he said steps should be taken to limit titillation of the public by stories about a condemned person.

"I would allow no curious visitors to hold any communication with him," Dickens said. "I would place every obstacle in the way of his sayings and doings being served up in print on Sunday mornings for the perusal of families."

Not even Dickens, with his sense of the grotesque, could have imagined the spectacle enacted last week in the United States. The last sayings and doings of a murderer were detailed by the press. His picture graced the weekly journals. And the grossest details of his execution were reproduced on television, to be savored by millions of families in their homes.

Most people I know who have been physically present, when the state killed a human being—prison wardens, priests, newspaper reporters—have thereafter been opposed to capital punishment. Twenty years ago, on assignment as a reporter, I watched an electrocution in the District of Columbia jail. When it was over, the room smelled of roasted flesh.

But to experience such scenes vicariously removes, for many, the nausea factor. Television drama has made blood and violence as acceptable as cherry pie. It was only a small additional step to re-stage an actual execution. And so we had the scene of Gary Gilmore's death on the evening news programs, and sketches of his last moment in serious newspapers.

The great innovation in the Gilmore case was an execution literary agent. A movie producer named Lawrence Schiller signed the condemned man and his relatives to an exclusive contract for a film to be shown on television. Schiller was allowed to interview Gilmore in prison and then to attend the execution.

The agent gave the press the juicy details of the end. When the execution order was read out by an official, Schiller said, "Gary looked at him, holding his own, not quivering." It was Schiller who said he "believed" Gilmore's last words were 'let's do it"—a phrase that the press flashed across the land.

The slaughter of gladiators and Christians in the Circus Maximus is generally regarded as a symptom of the decadence of Rome. What does it say about a country when punishment for crime becomes a circus, to be reenacted in every home?

Murderers do not usually deserve sympathy. But the objection to having the state kill them in turn is not sentimental. Using the apparatus of official power to extinguish a life has corrupting consequences—the more so when capital punishment is, as it has become, a spectacular occasion: an event cruel and unusual.

In the absence of convincing evidence that executions deter murderers, there must be a suspicion that the practice goes on to satisfy an atavistic public desire for dramatized vengeance. Revival of the death penalty in the United States may indeed encourage murder by persons such as Gary Gilmore—a man with suicidal impulses, who could have seen a way to assure his own spectacular death.

LITHUANIAN INDEPENDENCE DAY

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. MINISH. Mr. Speaker, I ask that this body pause for a moment to reflect on an event affecting all free men. Today marks the 59th anniversary of the Independence of Lithuania.

Unfortunately, that freedom was short lived. For in 1940, following a brief span of 22 years in which the Lithuanian people demonstrated the highest capacity for self-government, the Russians ended that freedom.

Since that time, the people of Lithuania have been firm in their efforts to retain their own language, their own culture, their own identity. Throughout the world, persons of Lithuanian descent have cherished the dream of independence.

At this point in American history, with 200 years of freedom as a foundation for future growth, illustrated by the recent, orderly transition of power from one source to the next, let us extend our sincerest wishes that the brave nation of Lithuania soon regains its deserved place among the free nations of the world.

TO IMPROVE HEALTH CARE IN KANSAS

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. GLICKMAN. Mr. Speaker, recently I received word of the fine job the University of Kansas is doing to improve health care throughout Kansas. I would like to bring the following report to the attention of my colleagues in the House of Representatives with the hope that those of them representing rural districts might use this information in whatever beneficial way they deem advisable and as a corollary, also see fit to provide those of us who represent similar districts with information on the steps being taken in these other districts to guarantee fine rural and small town health care.

At the University of Kansas, there is no higher priority than the efforts that have been taken to produce more doctors, nurses, and other health care professionals, and to encourage them to practice in Kansas—in locations where they are most needed. Since there has been much public attention given to this problem, I would like to share the following example of creative thinking and implementation in the area of health care with my colleagues in the House of Representatives:

THE UNIVERSITY OF KANSAS,
Lawrence, Kans., December 28, 1976.

To: Members of the Kansas Legislature.
From: Archie R. Dykes, Chancellor.

MEMORANDUM

In the period of time since the 1976 Legislative Session was adjourned two committees of the Legislature—the Special Committee on Health and Welfare headed by Senator Sowers and the Interim Committee on the Medical Center chaired by Representative Burgess—have reviewed efforts that are being made to meet the health care needs of our state. We in the University of Kansas have been pleased with the work of these two committees and believe their efforts will be helpful to us in our efforts to provide doctors, nurses and other health care professionals for our state and especially for the smaller communities and rural areas of Kansas.

Because of the interest of all members of the Legislature in efforts to improve the availability and quality of health care in our state, we thought it appropriate to summarize in a single memorandum some of the steps the University has taken and some of the new efforts which are just getting underway. For clarity, these are enumerated as follows.

A. EDUCATION OF MORE DOCTORS

1. Increased numbers of medical students.—In 1970, the entering class in the KU School of Medicine numbered 125. This year, for the second year, we have 200 students in the first year of the medical program—representing a 60% increase in five years. Based on the number of medical students in ratio to population, we are now educating doctors in Kansas at a rate approximately 50% higher than the national average. It will be four or five years before these increased numbers of students complete their training, but the larger number of physicians should contribute significantly to meeting the state's health needs in the coming years.

2. Office of Student Development.—Because of our concern that perhaps not enough students from the smaller communities and rural areas of our state consider entering the health professions, we have established an Office of Student Development. The primary responsibility of this office will be to provide consultation services for faculty and counselors at high schools, colleges, and universities throughout Kansas, and to help attract qualified students to the study of medicine, nursing, and allied health. In this effort, special attention will be given to encouraging students from medically underserved areas of the state to consider the study of medicine, and these students will be encouraged to return to medically underserved areas after they have completed their training.

3. Medical School Admissions.—Considerable discussion has occurred among various persons and groups throughout the state as to the advisability of changing the admissions criteria for the School of Medicine. The major objective of the plans which have been discussed is to identify persons who are likely to locate in rural and medically underserved areas of the State of Kansas after they have completed their medical education.

The University of Kansas has taken several steps to meet this objective. Personnel at the Medical Center are studying plans developed by other states to help meet the needs of medically-underserved areas, including admissions criteria and procedures. From a study of these plans, we hope to reassess our criteria and procedures, utilizing those parts of other plans which might be effective in Kansas, while at the same time preserving the quality of students admitted to the School of Medicine.

As an additional effort to refine our admissions process and to secure external participation, six lay citizens, appointed each year by the Governor, have been added to the medical school admissions panel. Representing all geographic regions of the state, we believe their participation in the admissions process will assure that the health care needs of Kansas are well represented in the selection of medical students. Hopefully, this will result in bringing into the medical school students who are strongly committed to Kansas and who are likely to practice their profession here. Moreover, six practicing physicians, mostly primary care practitioners from over the state, serve on the admissions panel and bring to the selection process the perspective of community doctors.

B. EDUCATION OF MORE NURSES AND ALLIED HEALTH PROFESSIONALS

1. Expansion of the Graduate Nursing Program.—The State of Kansas has, through recent legislation, embarked upon a major

program of upgrading nursing education in the state. The statutory requirement that persons teaching nursing education possess a master's degree has resulted in an expansion of the graduate nursing program in the University of Kansas College of Health Sciences. This expansion will result in increased capacity to prepare nurses throughout the state, and to provide continuing education for nurses currently in practice. An increase in the number of nurses in the state as well as an increase in the quality of health care provided by nurses may be expected as a result of this program.

The graduate program in nursing at the College of Health Sciences, which focuses on developing clinical nurse specialists who can provide a large measure of support for practicing physicians, has grown immensely, and graduate nursing education courses are being offered by the School of Nursing in locations throughout the state as a convenience for nurses who cannot travel to Kansas City for their studies. Initial response to these course offerings has been virtually overwhelming, with more than 150 nurses expressing interest in the graduate nursing program, nearly double the number of nurses (82) now enrolled in graduate study.

2. Baccalaureate Programs in Allied Health.—Our Board of Regents has approved proposals for baccalaureate programs in Emergency Medical Services, Nurse Anesthesia, and Respiratory Therapy. As the number and quality of highly trained allied health personnel increases, some of the current workload of practicing physicians can be relieved, allowing them to devote more of their time to matters which require their personal attention.

3. Team Concept for Health Care Providers.—With the expansion of our medical school enrollment, increasing capacity to prepare nurses, and expansion of programs in allied health, the ground work is being laid for a team concept for providing health care. Training programs in our College of Health Sciences now emphasize the need for medical, nursing, and allied health students to learn to work together, and to share common bases of knowledge.

C. EXPOSURE OF MEDICAL STUDENTS TO COMMUNITY PRACTICE

1. Strengthening the Medical Preceptorship Program.—We believe an essential part of a medical student's education is having opportunity to observe the practice of medicine in a doctor's office. Consequently, we have strengthened the Medical Preceptorship Program to require medical students to spend more time with a practicing physician. Under the restrictive three-year curriculum, undergraduate medical students were able to spend only one month in a preceptorship, but under the new flexible curriculum, students will spend a minimum of two months with a practicing physician in a community setting.

2. First Week of Medical School in Practicing Physician's Office.—We are now studying the possibility of requiring each admitted medical student to spend the first week of medical school in the office of a practicing physician. This experience at the start of the medical school could assist in orienting the medical student toward community practice. While there are several logistical problems to be worked out, we believe the idea is worth pursuing.

3. The Harper Program.—The Harper Program represents an excellent opportunity to expose medical students to the advantages of practicing in smaller communities. The unique set of circumstances which allowed the Wichita State Branch of the KU School of Medicine to develop the program in Harper does not occur often. However, we do think that other such programs can be developed, and we plan to do so as opportunities permit.

D. EXPOSURE OF MEDICAL RESIDENTS TO COMMUNITY PRACTICE

1. Medical Residencies in Locations Over the State.—Of all factors determining where a physician will locate, the place where the medical residency is served apparently is one of the most important. Consequently, we have increased the number of programs for training residents in locations other than Kansas City and Wichita. In the 1975–76 school year, 39 residents spent 106 man-months in residencies away from Kansas City and Wichita; this year, 68 residents will have spent 175 man-months in such residencies, and we are planning further expansion of this effort. At the present time, we have residents in Family Practice, Internal Medicine, Pediatrics, General Surgery, and Obstetrics/Gynecology serving residency rotations in Topeka, Garden City, Halstead, Hays, Kingman, Norton, Minneola, Belleville, Phillipsburg, Howard and other locations. Having our residents spend part of their residencies in such communities throughout the state serves, we believe, three major purposes: it broadens their education, it exposes them to the advantages of practice in communities other than major metropolitan areas, and it provides additional medical service to the communities to which they are assigned.

2. Integrated Family Practice Residency Program.—The University's most ambitious effort to expose medical residents to community practice is the Integrated Family Practice Residency Program.

Briefly, the program calls for residents to spend the first year of their residency training associated with the basic medical disciplines either at Kansas City or at Wichita; then for the second and third years of training, these residents will be based in "headquarters" cities over the state where community physicians will serve as faculty and mentors. While based in "headquarters" cities, residents will rotate into smaller communities for periods of time, thereby gaining exposure to communities and areas which are not now sufficiently served by medical practitioners.

As things now stand, it appears the Integrated Family Practice Residency Program will be in operation in two locations and perhaps three or four by FY 1979. With an anticipated expansion to 48 residencies within four years, this program represents an important opportunity to attract physicians to the smaller communities of Kansas.

E. EMPHASIS ON PRIMARY CARE

1. Plans for expansion of the Department of Family Practice.—By the beginning of Fiscal Year 1978, the Department of Family Practice at the Medical Center will be providing educational training for 24 residents and 40 medical students annually. This represents an increase of more than 25 percent over the FY 1976 level of training, and we plan to double the size of the department as quickly as possible. Since our greatest need in Kansas is for family physicians, we believe it is important to increase the Department of Family Practice rapidly.

2. Primary Care Residencies.—In addition to the expansion of the Department of Family Practice, we have established a goal of having at least 50 percent of the graduates of the medical school selecting residencies in primary care fields by next year. To accomplish this, we have requested for Fiscal Year 1978 12 additional residencies to be assigned to primary care departments. In the years ahead, we hope to be able to further increase the number of residents taking their training in primary care.

F. EFFORTS TO IMPROVE AVAILABILITY OF HEALTH CARE IN RURAL AREAS OF THE STATE

1. Office of Rural Health Affairs.—We have appointed a member of our medical faculty—a doctor who grew up in Hiawatha, Kansas—as Director of the Office of Rural Health Affairs. His understanding of the rural health care needs of smaller communities, combined with his experience on the medical faculty, will enable him to direct talents and resources of the College of Health Sciences toward a program that will improve the availability of health care throughout the state. His responsibilities will include the development of support necessary for improving rural health, working with students and faculty to help them understand the special opportunities for practice in rural areas, serving as liaison with communities to assist them in their physician recruitment efforts, and devising new programs which would assist medically-underserved areas of the state. We believe this new office can serve an exceptionally important function in assisting communities who are recruiting physicians and in developing efforts to place physicians in less-populated areas of Kansas.

2. Transportation.—We are, with the assistance of persons trained in designing transportation systems, attempting to devise a transportation network that will enable persons to get to clinics and hospitals by whatever means are necessary to meet medical exigencies. Such a system ultimately would include private and public ambulance services, military helicopters, conveyances such as the mobile neonatal intensive care unit (Jaystork), and hospital vehicles.

3. Referral System.—In concert with development of a transportation network, it is important to devise a primary/secondary/tertiary care hospital referral system. Any such effort will likely stir some controversy, but if we in Kansas do not initiate the development of such a system, some Federal agency undoubtedly will within the next few years. Consequently, we believe initial planning for a primary/secondary/tertiary care referral system should be coordinated with development of a transportation network and made applicable to the unique requirements of our state.

4. Physician Placement Service.—Virtually every professional school in a college or university has a placement service. Medical schools, however, constitute a general exception. Since assisting physicians seeking a place to establish medical practice and assisting communities seeking physicians constitutes an essential component of our total effort to improve the availability of health care in Kansas, we believe such an office represents a service that is much needed in Kansas. The Special Committee on Health and Welfare also recognized this need and recommended developing such an office.

5. Development of a Health Care Data Base and Research Unit.—We believe, and the Special Committee on Health and Welfare recommended, that the State of Kansas needs to develop a means of systematically and periodically assessing the distribution of doctors, nurses, and allied health professionals in Kansas, and to assist in developing outreach programs that will improve distribution of heath care. The availability of such information in a Kansas Health Care Data Base would facilitate efforts to improve distribution of health care providers.

6. Community Assistance Programs for Education of Medical Students.—From various indications we have received, we believe there may be some medical students who would be willing to practice in communities which help support them during medical school. Consequently, we are developing a

file of communities willing to help finance the education of a medical student and are using that information to put medical students and communities in contact with each other. This, too, may help communities in their efforts to attract physicians.

G. SUPPORT FOR PRACTICING PHYSICIANS

1. Locum Tenens Program.—One of the most effective and important developments that has occurred in the past year is the locum tenens program. This program makes available advanced medical residents who can relieve practicing physicians who need vacation time, or who need time away from their offices to attend postgraduate courses or because of other reasons. This has proven to be an attractive program, so much so that requests are beginning to exceed our capacity to respond. We have sent medical residents and, in some cases, medical faculty to communities all over the state which need medical assistance for a short period of time.

We are currently reviewing our training program for residents to see if modifications can be made so that the capacity to respond to these requests can be increased. Further, we are opening this opportunity to more members of our faculty as a means of increasing our capacity, as well as to provide an opportunity for more members of our faculty to experience the practice of medicine in a community setting.

2. Continuing Education for Practicing Physicians.—We are continuing to give emphasis to postgraduate education for doctors throughout the state. As doctors are encouraged to establish medical practices in the smaller communities and rural areas of our state, it is essential that opportunities be provided for professional renewal and growth. Each year almost half of the practicing physicians in the State of Kansas enroll in some course offered through the Division of Continuing Education, and our continuing medical education program remains one of the best and most active in the country.

3. Services for Practicing Physicians.—We have for some time had an inward WATS line so that physicians over the state may consult with clinical specialists at the Medical Center about unusual medical problems. We plan to continue this service and expand it as necessary. Additionally, we will continue to provide medical library materials to practicing physicians on request. These services, along with continuing medical education programs, keep physicians in smaller communities from feeling isolated from their professional colleagues.

* * * * *

The foregoing describes efforts the University of Kansas is making to address the health care needs of our state. While some of these efforts have been described earlier, I thought it might be informative to combine them with a summary of other steps we are taking in a single comprehensive report. We have tried to cover a number of topics in this report, so the information about each is relatively concise. If you should want additional information or if you should have questions about any of these efforts, or about other matters, please let me know.

We know you share fully our concern that every effort be made to improve the availability and quality of health care in Kansas. We in the University of Kansas have no higher priority, and we look forward to working with you to assure that all the citizens of our state have access to health care, whether they live in rural areas or urban centers, in small towns or medium-sized cities, in western or eastern Kansas. We shall continue to do everything possible to educate increasing numbers of doctors, nurses, and allied health professionals and to encourage them to establish practices in Kansas and in locations where their services are most needed.

WHO IS RESPONSIBLE FOR THE NATIONAL GAS CRISIS?

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. McDONALD. Mr. Speaker, for years the natural gas industry has warned of severe natural gas shortages unless Congress removed price controls. So long as prices are held below market levels, further exploration and development will be unprofitable, capital will flow elsewhere and shortages will inevitably result, it was argued.

Now this reasoning is not too hard to grasp—that the marketplace is ruled by the law of supply and demand can be understood by children in elementary school. Even liberals seem to sense its existence in some vague sort of way, as witness their concern that piddling $44,000 per year salaries are allegedly driving Government executives into private industry.

Yet many liberals seem to have a blind spot with respect to those who produce what they wish to redistribute. Surely supply and demand and other laws of reality do not apply to producers, they seem to be saying. If shortages of natural gas have developed, the existence of price controls for 22 years is merely a coincidence. There must be a better explanation, one consistent with our moral sense of the inherently evil nature of the productive—a conspiracy among producers to withhold from consumers what is rightfully theirs by virtue of the fact that they have not produced it.

It is interesting to observe just how selectively this theory is applied. I am aware, for example, of no charges of a conspiracy to withhold executives from the Government employment market.

Just as the inverted sense of morality implicit in such a theory has no relation to reality, neither do the specific charges that natural gas is being withheld. The following editorial from the New York Times of February 1, 1977, points out that a careful look at the manner in which natural gas is produced and marketed gives no support to the charges that producers are hoarding natural gas:

THOUGHTS FOR AN EMERGENCY ABOUT THOSE THEORIES OF CONSPIRACY . . .

"Those pipeline guys in the South have learned how to make money from the camel drivers," opined Mel Perez, who represents 4,700 General Motors workers laid off by natural gas curtailments in New Jersey. Mr. Perez is not alone in believing that the current gas shortages were manufactured by suppliers eager to emulate the OPEC oil cartel. Reports from New Jersey suggest that many local officials and homeowners have resisted Governor Byrne's order to cut back thermostats. The gas is somewhere, they argue, and will be delivered when the gas companies extract enough gold from panicky legislators.

A careful look, however, at the way that natural gas is produced and marketed lends little support to conspiracy theoreticians. Local utilities simply have no incentive to hold back. They make money only by distributing the gas they buy from pipeline companies through contracts open to inspection by state regulators. Besides, it would be almost impossible for utilities to hoard gas in their limited storage facilities. Interstate pipelines, the conduits of all natural gas used in the Northeast, are equally free of incentive (or capacity) to hold out on their customers, the utilities. Pipelines are limited by the Federal Power Commission to a fixed fee per cubic foot of gas above the price they pay at the source; the more they move, the more their stockholders collect.

That leaves just one possible conspirator: the natural gas producers. In theory these primary suppliers could be holding out on the system, storing precious fuel in capped wells and underground reservoirs. In practice, though, significant concealment would be extremely difficult. Moreover, the circumstantial evidence also points away from conspiracy. Gas companies have been meeting production levels forecast early this fall and those levels would have been sufficient to see us through a normal winter. Are we to believe in a plot which could only have succeeded in the (then) unlikely circumstance of an especially bitter season?

This is not to say that the long-term prospects for gas production have not been influenced by expectations of higher future prices. The market for fuel produced and sold within a single state—and thus out of reach of Federal regulators—has captured a major portion of newly discovered supplies. Why sell gas to an interstate pipeline at the regulated rate, $1.42 per thousand cubic feet, when local utilities in Texas will pay $2.10? It is conceivable, even probable, that gas fields subject to Federal Power Commission controls have not been developed in recent years, the gas companies anticipating the collapse of regulation. To put it another way, if the companies had been in a hurry to sell at regulated prices, they would now owe their stockholders an explanation.

The bottom line: turn down your thermostat. Nothing anyone does this winter is going to get much more gas for hard-pressed consumers. Conservation now, a new energy policy in the weeks to come.

ATTENTION U.S.A.

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RHODES. Mr. Speaker, I would like to share with my colleagues the following editorial which recently appeared in the Phoenix Gazette. It was brought to my attention by an old friend, Mr. J. C. Dunn of Scottsdale, Ariz., who suggested that it be "must" reading for every Member of Congress:

IRONY OF HISTORY

Who won the war?

This is a question that Britons might well ask themselves, for the nation is now in a position where it must tailor its economy to satisfy the demands of foreigners. Among them: The West Germans and the Japanese, Britain's two deadliest enemies in World War II.

On the verge of bankruptcy, Britain was forced to ask the International Monetary Fund for $3.9 billion to keep its economy afloat.

After chastising Britain for having failed in the years since the war to put its economic house in order, eight IMF members and one non-member, Switzerland, agreed to put up the money, but they made the credit conditional on "various performance clauses."

Among other things, this will force the British government to curtail spending, take measures to curb inflation, and keep the lid on wage increases.

To make sure that Britain doesn't ignore the performance clauses and simply waste the money, the nine foreign nations are giving the government only $1.14 billion immediately. It will get another $1.11 billion during the rest of the year, but the consortium will review what Britain has done to reform its economy by then before releasing the final $1.64 billion.

For Britain, the most humiliating thing about this is that West Germany and Japan are putting up the biggest chunk, $1.44 billion, and therefore will have the biggest say on whether it gets the $1.64 billion.

German and Japanese armed might never was able to make the British bow, but what they couldn't accomplish the economic mismanagement of the country by successive Tory and Labor governments did.

Britain, in other words, defeated itself, thereby becoming an economic vassal of its World War II foes.

It's a terrible comedown for a nation that created the Industrial Revolution and once was the greatest economic power in the world, as well as the world's banker.

But the British have nobody to blame but themselves.

CONGRESSIONAL ETHICS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for February 16, 1977, into the CONGRESSIONAL RECORD:

CONGRESSIONAL ETHICS

The time has come for the United States Congress to get serious about its ethics. The standards of conduct for Congressmen must be made clear so that trust can be re-established in an institution that touches the life of every American.

The first impression that comes to one who delves into the matter of Congressional ethics is that standards of conduct are easier to talk about than they are to formulate. The life of a Congressman is filled with subtle ethical complexities. The legislation he acts upon affects not only his constituents but also himself. Someone will always be ready to charge him with acting in his own interest and against the interest of others. He lives in a world of controversy and must choose among difficult options hundreds of times each year. Each time he makes a decision someone becomes angry with him and accuses him of acting with ulterior motives. He is often subjected to a double standard. The businessman who makes money is a success, but the Congressman who makes money is suspect. Most people go to church to worship, but as a constituent once told me, a Congressman goes to "grandstand". A Congressman makes numerous financial arrangements and there are no clear guidelines for him. What is a campaign expense and what is a personal expense? Is entertaining a group of constituents at the Capitol a personal expense or a cost of doing business? Where is the fine line between official duties and partisan politics?

It is the feeling of many who observe the Congress that there are simply too many abuses of office by members of Congress. Since 1968, 15 Congressmen have been indicted on criminal charges and at least a dozen have been convicted. Last year several members were involved in scandals (Wayne Hayes and Wilbur Mills were the most prominent), and the Korean businessman, Tongsun Park, dispensed thousands of dollars to Congressmen.

A trip can be an important part of a Congressman's duties, but it can also be a junket. Instances of double payment for expenses and collection of expenses for trips not taken have been reported. There is also a potential conflict of interest when large fees are paid to Congressmen for speaking engagements. Such fees may prompt some legislators to cast votes favorable to powerful benefactors. Some members own shares of stock in corporations seeking federal contracts, or belong to law firms representing clients involved with the federal government. Free rides in corporate jets and the access-buying of large political contributions are also parts of the problem.

Observers have noted that some Congressmen act as if they were above the ethical and legal standards that apply to ordinary citizens. The special perquisites of office, the trading of votes for favors, the compromises that are part of the legislative process, the constant pressure to look good, the false posturing on issues, the demands of being polite and interested in all kinds of people, the ordinary deceptions of the legislative trade (such as introducing bills to satisfy a constituent when the bill has no chance of passage or consideration and may not even be supported by the Congressman), and the insistence from folks back home to get everything possible for the district eventually blind members to what actions are right and what actions are wrong.

The Wall Street Journal has said "Is there something in this (legislative) process—the type of ambition required to stand for office, the temptation to indulge in pretense, the necessity to manipulate people, the clubbish tolerance of the peers you find in office—that in the end warps character?"

Although I believe that the great majority of Congressmen are hard-working, dedicated and honest, I recognize that reforms are needed. Each day I see evidence of grinding pressure, old-fashioned integrity and courage on Capitol Hill, but the press usually does not see it or chooses not to report it. In all candor, however, I would have to say there are also instances of senility, venality and stupidity.

I have concluded that the Congress must draft a strong Code of Ethics. What that Code of Ethics should contain is now a subject of intense debate. The proposals that are being discussed, and which I personally favor, include the following: public disclosure of income, restrictions on outside earned income, a ban on gifts, the abolishment of unofficial office accounts (often referred to as "slush" funds), limitations on the franking privilege, and restrictions on foreign travel (particularly "lame-duck" travel).

It is necessary for the House Ethics Committee, which has been inactive for eight years, to enforce the Code of Ethics vigorously. What is clear is that Congress, which sometimes investigates other persons and institutions with fervor, is undergoing a searing examination of itself. I think there is a good chance, when we have run the course, that Congress will be more worthy of respect than when we began.

MISCONCEPTIONS ABOUT THE ENERGY CRISIS

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. WIRTH. Mr. Speaker, this winter has been a recordbreaking cold period for the eastern two-thirds of the country. Once again the Nation was reminded of the critical energy situation. I feel it is important that we realize the severity of the crisis is not temporary. It is no longer practical to move from one crunch to another. This is the second major shortage we have faced in the last 4 years. I feel it is representative of the need for some long-range energy planning. A serious effort must be made to inform the public that we must find alternative energy sources.

I would like to share with my colleagues an article that appeared in the Oil Daily newspaper, on Thursday, February 3, 1977. It is an interview with Dr. David Gottlieb, head of the University of Houston's Department of Social Services. Dr. Gottlieb discusses the misconceptions held by many Americans regarding the realities of the energy shortage. These misconceptions highlight the need for developing credible information sources for the public:

EDUCATOR SAYS AMERICAN PUBLIC DOES NOT BELIEVE IN ENERGY CRISIS

(By Jim Drummond)

HOUSTON.—An educator rapped "the oil corporations" here Tuesday for "overdoing it with Congress," then painted a disheartening picture of the kind of public relations task they face.

Dr. David Gottlieb, head of the University of Houston's Department of Social Services, cites UH studies indicating that few Americans believe this country faces a long-range energy crisis.

This winter's snows and freezeups haven't convinced them, he told the Houston chapter of the American Petroleum Institute.

"As soon as the thaws come and the natural gas is there again, they'll react as they did when adequate gasoline supplies returned after the Arab oil boycott. They'll feel you (oilmen) are sitting on the gas, and when the price is right, plenty will be available. It will be hard to convince them otherwise when there is no shortage," Gottlieb said.

Gottlieb said his investigators found no great difference between the attitudes of Texans and the rest of the U.S. population. He summarized the public's opinions as:

A strong belief in the miracles of science. ("Someone in some laboratory is only a step away from a solution of the energy problem.")

"Big and small corporations wouldn't do anything so dumb as to run out of the products they sell."

"If the chips are down and someone else has energy, we'll get it, no matter what."

"The reappearance of adequate amounts of energy, when it comes, will prove there isn't any crisis and never has been."

Asserting that the public's beliefs are the key to government action, Gottlieb outlined a series of peculiarities said to make energy opinion-making difficult. Some of his observations:

Those who believe there is a crisis are the more likely to use energy. They are the affluent, whose shift to larger automobiles is a matter of record. By contrast, our poorer citizens believe least in the crisis but conserve the most energy because they are short of cash. So dollars are more important than attitudes.

As to credibility, no one ranks very high. Television has the highest rating, but this has fallen a bit lately. The government's mark is up a bit; so inexplicably, is that of oil companies and utilities. Unfortunately, the cynical public is most likely to get its energy information from the service station operator, "and he doesn't like you oilmen at all."

Those who believe oil's version of the crisis are most likely to be oil company employes,

held any post in one through four during the incumbency of the President or of the last preceding President, if that President was of the same political party; and sixth, a national campaign manager or chairman of a national campaign committee seeking the election or re-election of the President, and seventh, also Members of Congress.

The Federal criminal offenses included are: First, crimes involving abuse of Federal office; second, crimes involving the financing or conduct of elections and election campaigns; and third, crimes involving obstruction of justice, perjury, or conspiracy to obstruct justice, commit perjury or defraud the United States.

Appointment of such a prosecutor is mandated in specific situations such as those involving allegations that someone in a limited group of persons committed a Federal criminal offense involving abuse of Federal office, violation of election laws, or perjury or obstruction of justice.

Furthermore, the bill would require the Attorney General to apply for the appointment of such a prosecutor if he determines that the investigation or prosecution of any Federal criminal wrongdoing may so directly and substantially affect the political interests of the President, the President's party, or of the Attorney General himself that it would be inappropriate for the Justice Department to conduct the investigation or prosecution.

The special prosecutor is appointed by a panel of three judges of the U.S. Court of Appeals for the District of Columbia Circuit. The judges on the panel are disqualified from participating in the decision of any case involving a special prosecutor appointed by the panel. In addition to appointing the special prosecutor, the panel also defines that prosecutor's area of prosecutorial jurisdiction. Within that jurisdiction, the special prosecutor is independent of the Justice Department and may exercise all of the powers of the Attorney General.

This bill provides that a special prosecutor is subject to removal from office by the panel of judges for extraordinary impropriety or for such incapacitation or other condition as substantially impairs the performance of that prosecutor's duties. The office of Special Prosecutor terminates when the Special Prosecutor notifies the Attorney General that the investigation and prosecution of all matters within the office's prosecutorial jurisdiction have been completed or so substantially completed that it would be appropriate for the Justice Department to complete them. In addition, the Special Prosecutor must file a final report with the panel of judges. The bill gives the panel of judges discretion to terminate the office of a Special Prosecutor at any time—either on its own or at the suggestion of the Attorney General.

H.R. 2711 contains a sunset provision that provides that the mechanism it sets up expires 5 years after the effective date of the legislation. As to matters pending at the expiration date, the bill provides that the legislation shall be in effect with regard to them until they are completed.

The sunset provision is to insure that this mechanism is experimental, and should it prove to be unwieldy or, hopefully, unnecessary, its provisions will expire after 5 years.

This legislation will not only remove partisan bias from a sensitive area, but also the public's perception of such bias. Respect for law can only exist in an atmosphere of faith and trust in our governmental institutions and in the fair and fearless prosecution of those who betray their public trust for personal or political gain.

There are several salient reasons for authorizing a temporary special prosecutor rather than creating a permanent office. The availability of lawyers of stature and achievement for this difficult post would be diminished if the post were permanent. But certainly top-caliber people could be retained to investigate and prosecute a particular set of allegations or a crisis.

Mr. Speaker, in the flurry of self-cleansing ethics proposals that are being offered almost daily, we must not forget the lessons of the recent past. I urge my colleagues to consider this proposition and support it.

SOLAR ENERGY FOR HOMES ACTS

HON. MAX BAUCUS

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. BAUCUS. Mr. Speaker, as natural gas supplies dwindle into nonexistence during this winter of cold and crisis, shivering Americans are turning their eyes toward the Sun. They read of the fortunate few who live in scattered homes around the country which are heated by solar power. Their owners can afford to laugh in the face of gas cutbacks, because they know that their source of heat—the Sun—will not run out. The advantages of solar power are becoming abundantly clear. Current and prospective homeowners as well as builders are seeking information on where to buy solar systems, how much they cost, and how to finance them. Those who look hard enough are surprised to learn that laws and programs at the State, local, and even Federal levels actually discriminate against their purchase of the attractive solar systems.

Solar power has been gaining ever-increasing attention in recent years, and with good reason. Solar systems are clean and quiet. They rely on the Sun, a renewable source of energy which requires no pipelines or powerlines. Some systems can even be used to air-condition as well as to heat. Congressional interest in solar power is reflected in the explosive growth of appropriations related to its development and demonstration. In view of the advantages of solar power, it certainly seems strange that discriminatory laws and programs remain on the books.

The heart of most governmental discrimination against solar power is a set of laws and programs, previously adopted, which reflect the old thinking of the age of apparent energy abundance. Under this old thinking, the cost or value of a home heating system was viewed as its cost at installation only. The cost of a furnace, for example, did not seem to include the cost of the fuel which went into it.

Today, energy experts recognize that the true cost of a heating system—what they call its "life-cycle cost"—does include the cost of the fuel which feeds it. Solar systems generally have higher initial costs but lower life-cycle costs than conventional system. In other words, solar users save more on fuel over time than the extra amount they have to pay when purchasing solar equipment. Discrimination results primarily from laws and programs which only consider the higher initial costs of solar systems.

At the State and local level, property tax laws often discriminate against solar power. When a homeowner adds a solar system to an existing home or includes one in a new home, the value of that home is higher because the solar system costs more initially than the conventional system it replaces. When a home's value rises, so do the property taxes on it. Even though solar users are essentially doing their neighbors a favor by conserving energy, they get charged a higher tax for it. Because of this, they are less likely to buy a solar system in the first place.

Unfortunately, our Federal house is also not in order when it comes to solar discrimination. In our case, the discrimination occurs in the many Federal programs of loans and loan guarantees for purchasing or improving homes. These programs enable potential borrowers to obtain loans for homes or home improvements at lower than market rates of interest. However, these programs have limits on the size of the loans which may be made or guaranteed. Many borrowers are discouraged from putting solar systems in their homes because their higher initial cost would put the total loan amount over the limit. The unrealistic limits force people to choose low-initial but high-life-cycle cost conventional heating systems in order to qualify for a low-interest loan.

I propose a simple solution which would end Federal discrimination against solar power. I propose to amend all of the current FHA, VA, and FmHA loan programs to allow the limits to be raised by up to 20 percent, only if needed to cover the higher cost of solar systems. Such a change would enable those choosing solar heating systems to include such systems in their loan applications. My proposal is embodied in the three bills which I introduced yesterday, known collectively as the Solar Energy for Homes Acts.

This proposal has several advantages. First, it could be easily implemented. Instead of creating a new loan program, a short, simple amendment changes existing programs. Hence, no new administrative bureaucracy would be needed. Furthermore, since it deals with loan and not spending programs, the proposal would cost the taxpayer virtually nothing. Finally, the intermediate performance criteria developed by HUD in the solar heating and cooling demonstration program would enable Federal loan agencies to provide consumer protection in the purchase of solar systems with Federal loan funds.

I do not claim that adoption of my proposal will cause an immediate rush

although not the younger employes, who tend to be more doubtful as their ages decrease. Those who believe what environmentalists say blame the petroleum industry and the government; those who believe the government blame oilmen and environmentalists. But very few Americans fail to listen to environmentalists, who are perceived as "nice people out there trying to preserve butterflies."

Most Americans are willing to make sacrifices if they can give up what will cost them the least in convenience. For example, many are willing to retain the 55 miles-per-hour national speed limit on the grounds this may save lives and is not being enforced in any event

Gottlieb, nevertheless, characterized Americans as neither stupid nor selfish, just overindulged to the point of regarding luxuries like television sets and electric dishwashers as necessities. If they can be convinced there is an energy emergency, he said, and particularly, that it will adversely affect their own children, "I believe attempts to provide them with the facts will have some impact."

The educator accused big oil companies of wasting millions on television advertising that conveys the image the public had expected them to convey.

"When Exxon runs an ad showing granddaddy and sonny driving through a beautiful landscape in which hardly a valve shows and says that's how it develops oil product, the public yawns," he observed. "What if Exxon had announced instead: 'Well, we had a bad oil spill and really contaminated the shore there for a while. But that's how it goes—you win some and lose some.' My God, how much attention that would attract!"

Gottlieb nominated petrochemical executives and environmentalists as "polar extremes" on energy but maintained they are more alike (in education, affluence, dislike of federal policies, etc.) than unlike. Their main differences, he said, are over energy-environmental tradeoffs and public policy. He added, "One wonders what would occur if a serious and rational interaction between these two groups were attempted."

REUSS AMENDMENT TO THIRD BUDGET RESOLUTION

HON. HENRY S. REUSS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. REUSS. Mr. Speaker, when the House considers the third budget resolution on February 22, it is my intention to offer an amendment requiring an increase in Federal revenues by $1.7 billion over the $348 billion revenues presently contained in the resolution.

In order that Members may be aware of the amendment and my reasons for offering it, I include its text, and my recent letter explaining the amendment:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 15, 1977.

DEAR COLLEAGUE: The third budget resolution for fiscal 1977, which comes before the House on February 22, raises the direct job-making portion of President Carter's stimulus package from $1.8 billion to $3.5 billion, and adopts the package's $13.8 billion tax stimulus, thus raising the proposed deficit by an additional $1.7 billion, to a total of $70 billion.

The addition emphasis on direct job-making programs, I believe, is well justified. But the resulting increase in the overall deficit seems ill-advised.

Quite apart from the fact that President Carter has several times said that he believes the size of his stimulus package is "adequate", there are two reasons to be wary of increasing the overall deficit of the President's request.

Most importantly, Chairman Arthur Burns of the Federal Reserve has indicated that he would be accommodating in his monetary policy toward a deficit restricted to the amount requested by the President, but that any enlargement of this would be the cause for monetary tightening and higher interest rates. Higher interest rates—and Congress would be powerless to stop them—would have a devastating effect on both housing and capital investment, two important sectors of the economy that are currently showing signs of malnutrition.

Secondly, a Congressional boosting of the presidentially-requested deficit could have an adverse effect upon financial markets. Further market weakness would simply intensify existing problems of capital adequacy.

Accordingly, I plan to introduce a simple amendment increasing revenues by $1.7 billion over the $348 billion revenues in the third budget resolution. It will then be open to the tax-writing committees either to cut down on the proposed $13.8 billion of tax reductions by $1.7 billion, plug tax loopholes in that amount, or obtain the needed revenues in any other way.

The amendment's effect would be to maintain a deficit no greater than that requested by the President, although shifting the emphasis slightly toward job-making programs and away from tax reductions.

My amendment is supported by Dr. Lawrence Klein of the Wharton School, a leading economic adviser to the President, who testified on February 8 before the Joint Economic Committee: "My preference would be for your change in the package, to make an inroad into the tax concession, and beef up the public works aspect."

If this reasoning appeals to you, I ask for your support.

Sincerely,

HENRY S. REUSS,
Member of Congress.

Amendment to H. Con. Res. 110 to be offered by Mr. Reuss.

At Page 1, line 5, strike "$348,500,000,000" and insert "$350,200,000,000"

At Page 1, line 7, strike "$10,600,000,000" and insert "$8,900,000,000"

At Page 1, line 13, strike "$70,315,000,000" and insert "$68,615,000,000"

At Page 1, line 14, strike "$720,500,000,000" and insert "$718,800,000,000"

EMPLOYMENT TAX CREDIT

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. DERRICK. Mr. Speaker, I should like to note today that I am reintroducing with cosponsors, legislation to provide the American businessman with an employment tax credit. The purpose of this bill is to serve as an incentive to expand the labor market in the private sector with a minimum of Federal administration and at the least possible cost to the Federal Treasury.

Sixty Members of the House of Representatives have endorsed the concept and philosophy employed in the bill and I wish to urge my distinguished colleagues on the Ways and Means Committee to give serious thought and consideration to an employment tax credit.

Basically, if enacted, this bill could:

Create an estimated 1.5 million jobs at an estimated cost to the Treasury of $3,100 per job.

Allow an employment tax credit equal to 50 percent of the salaries of 10 new employees per business.

Set a ceiling of $80,000 per tax credit per business per year.

Stimulate the creation of jobs in the small business sector—small, labor-intensive firms and businesses.

Automatically expire in 5 years and is, therefore, not a permanent feature of the Tax Code.

Require the Secretary of the Treasury to report to the Congress during the second and fourth years of implementation, the job creation effect of the tax credit, net loss of revenues to the Treasury, and other information needed for effective congressional review.

Create a jobs program that is streamlined, free of unnecessary oversight by numerous agencies and departments. An employer would simply declare his participation in the program when filing his tax return and be subjected to audit by the Internal Revenue Service, as is the current practice.

The above proposal has been endorsed by members of both political parties with varying philosophies. I have been exceptionally pleased with the nonpartisan support this bill has generated based on our desire to initiate positive tax relief as a means of creating jobs.

As I have said before, the Congressional Budget Office has projected that 7 million new jobs are needed in this country by 1980 to absorb new entrants to the labor force and to reduce unemployment to 5 percent. Eighty percent of the American work force is employed in the private sector and it has been the growth of the private sector which has made our economy the strongest in history.

This 50-percent tax credit means that the Federal Government is willing to go half-way with private business to solve our No. 1 domestic problem, unemployment.

Every job created under this formula will cost the Treasury, in lost revenues, approximately $3,100. In comparison, a public service employment job costs $8,500 and a public works job costs between $10,000 and $12,000. And, I would like to note that the latter two figures are conservative estimates.

Almost half of all American workers are employed in the wholesale and retail trades, the service industries, and in small manufacturing companies. Almost two-thirds of all U.S. employers have less than eight employees. Even though the tax credit is available to every business in the United States, it will clearly have the greatest impact on the small businessman, the one individual who is in need the most.

For the RECORD, I wish to insert the names of my colleagues supporting an employment tax credit:

The following Representatives are cosponsors of H.R. 2691:

Mr Abdnor, Mr. Akaka, Mr. Breckinridge, Mr. Brodhead, Mr. Broyhill, Mr. Burgener, Mr. Duncan of Tennessee, Mr. Duncan of

Oregon, Mr. Fountain, Mr. Flowers, Mr. Gephardt, Mr. Hannaford.

Mr. Hansen, Mr. Leach, Mr. LeFante, Mr. Lehman, Mr. McHugh, Ms. Mikulski, Mr. Miller of California, Mr. Moakley, Mr. Moorhead, Mr. Mottl, Mr. Neal, Mr. Runnels.

Mr. Ottinger, Mr. Panetta, Mr. Quayle, Mr. Rinaldo, Mr. Rose, Mr. Rosenthal, Mr. Scheuer, Mr. Sebelius, Mr. Sisk, Mrs. Spellman, Mr. Stanton, Mr. Tucker, Mr. Wilson.

Mr. Wirth, Mr. Whitehurst, Mr. Yatron, Mr. Young of Florida, Mr. Pressler, Mr. Jones of Oklahoma, Ms. Oakar, Mr. Beard of Rhode Island, Mr. Patterson, Mr. Preyer, Mr. Bedell.

Mr. Pattison, Mr. Harrington, Mr. Rooney, Mr. Badillo, Mr. Oberstar, Mrs. Fenwick, Mr. Collins, Mr. Kostmayer, Mr. John Burton, Mr. Downey, Mr. Ertel, and Mr. Nowak.

FIRE PROTECTION SERVICES MUST BE MAINTAINED AT A SAFE LEVEL

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. RICHMOND. Mr. Speaker, one of the saddest factors resulting from the Nation's economic difficulties is the reduction in vital human services as a means of tightening budgets.

It is clearly understood that the recession has produced a need for a certain amount of belt tightening, but I believe it must also be understood that no budget cut should permit any human lives to be placed in jeopardy. The closing of local firehouses and the dismissal of substantial numbers of fire personnel do just that.

Though the evidence is not conclusive enough to point the finger directly at budget cuts, the loss of several human lives in localities across the country over the past several months has brought into focus what the budget-cutting strains on the fire department mean in human terms.

Firemen are seriously concerned with their ability to do the job with one less man on the rig, and with fewer personnel covering a greater area. In New York City, companies in Brooklyn are covering for companies in Manhattan, and some companies in Brooklyn must go across the Verrazano Bridge to assist in fighting fires in Staten Island. For the fireman, arriving at a fire when it is large and dangerous rather than when it is small and manageable can be both costly to lives and property.

In my district in Brooklyn, the residents of the Northside area were horrified when they learned that Fire Engine Co. 212, which normally serviced the community, was to be disbanded. The people who live in Northside, which is primarily composed of wood frame attached houses built prior to 1900, knew that in the case of a fire every second counted. As expressed by the Northside Community Development Council:

> Thirty seconds could mean the difference between one apartment burning and one block burning and between life and death.

For a community which is in the process of rebuilding itself, the destruction caused by a fire, which with proper facilities and personnel could have been restrained, can be both costly and demoralizing to a revitalization effort.

In New York City, 800 men were laid off in 1975. Though all but 240 were rehired, the increase in retirements in addition to the dismissals seriously depleted the strength of the fire department. And in Washington, D.C., the rotating firehouse system was cited as the cause of four or five deaths in the Northwest and Northeast sections of the city.

Volunteer fire and rescue organizations which have complemented the services of the fire departments in large cities, and which are very often the sole source of protection in many suburban and other smaller communities, have always faced financial difficulties. Rising fuel prices have further aggravated this situation. Equipment for these volunteer organizations has often been bought with the proceeds from bingo games and cake sales, and with solicitations from passing motorists. General revenue sharing funds have permitted some communities to take advantage of more modern equipment and emerging technologies, but this is true for only a small percentage. For the 24,000 volunteer firefighting and ambulance corps throughout the Nation, every penny counts.

For these reasons, I have introduced two bills to insure the delivery of adequate fire services to all of our communities.

H.R. 3016 would provide emergency financial assistance to local firefighting units in order to maintain essential services. The funds authorized under this bill would be available at the discretion of the Secretary of the Treasury and would be available when a locality could demonstrate that its only other recourse was to reduce services below a safe level.

H.R. 3017 is a bill to clarify a long-standing private ruling by the Internal Revenue Service that volunteer fire departments and rescue operations should be exempted from Federal excise taxes. A 1955 ruling did set a precedent for excluding these departments from taxes on manufactured items, such as tires, petroleum products, and necessary vehicles. Because of their status as governmental organizations however, the IRS has never specifically exempted them. Consequently, organizations have only received the exemption after requesting an interpretation from the IRS. The International Association of Fire Chiefs predicts this bill will enable these organizations to devote their limited savings, not to the payment of Federal and other taxes, but to the delivery of essential services.

I believe both these bills will prevent a reduction in fire protection services and I commend them to my colleagues.

WELFARE REFORM

HON. BENJAMIN S. ROSENTHAL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ROSENTHAL. Mr. Speaker, welfare is one of the biggest expenses facing Americans today, and the evidence is overwhelming that the taxpayer is not getting his money's worth. It costs every American taxpayer $548 to support the 25 million persons receiving public assistance.

Behind the waste and failure of the $45 billion system is the Federal Government's lack of a uniform policy to prevent abuse, relieve the States of staggering and unfair financial burdens or insure equitable and sufficient coverage.

A coordinated nationwide overhaul of public assistance is long overdue. The four principal Federal welfare programs—food stamps, medicaid, aid to families with dependent children, AFDC, and supplemental security income for the aged, blind and disabled, SSI—are administered by hundreds of Federal, State, and local agencies. A lack of coordination and clear delineation of responsibility have invited abuses. For example, a 1976 General Accounting Office investigation revealed that improved communication among Federal assistance agencies could reduce SSI payments by $60 million, correct $4 million in annual underpayments, eliminate 35,600 duplicate payments and save millions in administrative and medicaid costs.

Another congressional study suggested that possibly half of all welfare program outlays may be unnecessary, improper or illegal. Only a small fraction of the costly errors stem from fraudulent aid applications. Fraud among vendors, vague and wordy Federal regulations, misprogramed computers, careless employees and time-consuming procedures account for the largest losses. In fact, the growing complexity of welfare programs has caused AFDC administrative costs to soar 192 percent in the last 5 years, compared with increases of 115 percent in total program costs and only 24 percent in the number of recipients.

The Federal Government distributes welfare assistance to the States according to the benefits each State offers its citizens. Thus the Federal share diminishes as the State contribution increases.

Since we have at least 50 separate welfare systems in this country instead of a single, nationwide program, inconsistency and inequity prevail. Under present practice, a State which is miserly in support for the poor and disabled can have the Federal Government pick up a bigger percentage of the tab than a State which is more generous. For example, Mississippi pays AFDC recipients an average of $14.35 a month and Washington pays 78 percent of that amount. But Washington assumes only 50 percent of the costs in New York, which pays higher benefits. As a result, New York winds up paying $2.2 billion more for AFDC each year than Mississippi.

A further inequity forces cities like New York to pay half of the State's share of local welfare costs. In 1975 New York City alone spent $700,000 more than the entire State of Mississippi for the care of the poor.

Welfare recipients also suffer acutely from the program's failings. To qualify for assistance, applicants are shunted from one office to another, harassed by shifting regulations, forced to break up

their families and discouraged from finding jobs. Moreover, even with public assistance, the majority will remain poor; program benefits are unable to provide most of the poor with enough money to meet their basic needs. In 1976, the Federal SSI program provided $236 a month nationwide to a couple, or about 87 percent of the poverty level, and AFDC paid between 6 and 50 percent of poverty level, depending on the State.

The welfare crisis was exacerbated by disastrous Federal economic policies which resulted in high unemployment and spiraling inflation. In 1975, 2.5 million additional persons dropped below the dividing line into poverty. This created a ballooning of Federal administrative and support services, adjustments in public jobs programs and demands upon locales to fill needs not met on the Federal level.

The absence of comprehensive Federal coverage has prompted many States to shape their own assistance programs or to supplement the Federal grants. These suplements to basic SSI benefits range from none to $271 a month, depending on the State. Additional assistance is provided by some States for rent payments, emergency clothing, furniture, food, temporary shelter and the replacement of essential heating, cooking, refrigeration, water supply and plumbing and sanitation equipment.

There is one solution to the "welfare mess"—the creation of a comprehensive, federally funded system of uniform coverage, standards and benefits, adjusted only for regional cost-of-living differences. Such a program would ease significantly the financial problems of our locales. Full Federal reimbursement for welfare costs would release $1 billion of New York City's revenue for other urgent needs. Even Federal assumption of only 75 percent of welfare costs would mean a savings to State and local governments of $4.8 billion.

This new national welfare system must have strong work incentives. We must avoid, at all costs, a society in which those who work are worse off than those who do not. The reform legislation should reduce program benefits gradually as earned income increases. This would avoid work disincentives created by an abrupt eligibility cutoff.

Work-enabling expenses such as day care should be deductible from the income eligibility level so the recipient will not be penalized for the unavoidable costs of holding a job. Registration at local employment agencies and active job seeking should be prerequisites for eligibility for all able-bodied persons.

The new Federal welfare program also should insure that no families are forced to break up in order to qualify for benefits. Eligibility should be extended to childless couples, intact families, individuals, retired couples, and dependent children and their parents. Emergency needs now covered by some welfare programs should be incorporated into the national system.

The Federal Government also must assume its rightful responsibility for investigating abuses. Toward this end, the 94th Congress passed and President Ford signed my bill to establish an inspector general's office at the Department of Health, Education, and Welfare. Its primary responsibility is to assure that HEW funds are disbursed lawfully, economically, and efficiently. This office will provide States with expanded resources, experience, and direction so they can cope with the sophisticated array of schemes and devices used to evade the law. It is often far more economical to conduct investigations at the Federal level because many fraudulent operations cross State lines or occur in many areas of the country. A nationwide approach and perspective in meeting these challenges is essential.

Welfare reform is vital if the urban areas of our country, including New York, are to remain economically viable and if our country is to treat its poor justly. Producing an efficient and responsive program of welfare reform will be a lengthy and complex task. In the meantime, many of this country's State and local governments need immediate relief from the inequitable and staggering financial burden of welfare.

LITHUANIAN INDEPENDENCE DAY

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANNUNZIO. Mr. Speaker, it is a privilege for me to join Lithuanian-Americans all over this Nation in commemoration of an outstanding event in the rich history of Lithuania. Fifty-nine years ago, on February 16, 1918, a courageous people proclaimed to the world its right to stand proudly among free countries.

The very brief time—less than a quarter of a century—that the Lithuanian people enjoyed the privilege of living in independence has left an important impression on the Lithuanian people. And the years of Communist domination and Nazi occupation have made their love of freedom all the more keen.

Under the brutal domination of Soviet communism, the Lithuanian people have been under intense pressure to forsake their history and traditions, and to this day, Lithuanians have proudly resisted outside pressures and remain faithful to their language, culture, and religion.

In 1974, Miss Nijole Sadunaite was arrested by Soviet authorities and in 1975, she was sentenced to 3 years of harsh regime in a forced labor camp to be followed by 3 years of internal exile simply for the possession and distribution of the publication entitled, "Chronicle of the Catholic Church in Lithuania."

Mr. Speaker, Rev. Casimir Pugevicius, the executive director of Lithuanian-American Catholic Services, has written an introduction to No. 10 of the Chronicle of the Catholic Church in Lithuania, and a portion of the introduction follows:

INTRODUCTION

In 1940, when the Soviet Union occupied Lithuania by force, 85.5 percent of the country's more than 3 million inhabitants were Roman Catholic, 4.5 percent Protestant, 7.3 percent Jewish, 2.5 percent Orthodox, and 0.2 percent of other persuasions.

In the two archdioceses and four dioceses were: 708 churches, 314 chapels, 73 monasteries, 85 convents, three archbishops, nine bishops, 1271 diocesan priests, 580 monks, of whom 168 were priests. Four seminaries had 470 students. There were 950 nuns.

Nuns cared for 35 kindergartens, 10 orphanages, 25 homes for the aged, two hospitals, a youth center, and an institute for the deaf-mute.

There were 18 Catholic primary schools and the same number of Catholic high schools. Religion was taught in all public schools.

Catholic organizations numbered about 800,000 members. In 1935, there were 28 Catholic magazines and newspapers, with a total circulation of 7,000,000.

On June 15, 1940, the Red Army marched into Lithuania; the independent government was replaced by a puppet regime.

On July 14–15, rigged elections were staged. On July 21, with the Red Army surrounding the assembly house, the new People's Diet "unanimously" declared Lithuania a Soviet Socialist Republic.

On June 25, 1940, the Church was declared separate from the state, and the representative of the Holy See was expelled.

Parish lands were confiscated, clergy salaries and pensions were cut off, and their savings confiscated. Churches were deprived of support. Catholic printing plants were confiscated, and religious books destroyed.

On June 28, 1940, the teaching of religion and recitation of prayers in schools was forbidden. The University's Department of Theology and Philosophy was abolished, and all private schools were nationalized. The seminaries at Vilkaviskis and Telsiai were closed, and the seminary at Kaunas was permitted to operate on a very limited scale. The clergy were spied upon constantly.

On June 15, 1941, 34,260 Lithuanians were packed off in cattle-cars to undisclosed points in the Soviet Union. After World War II, the mass deportations resumed and continued until 1953.

Vincentas Borisevicius, Bishop of Telsiai, was arrested on February 3, 1946, and condemned to death after a secret trial. Before year's end, his auxiliary, Bishop Pranas Ramanauskas, was also arrested and deported to Siberia. Bishop Teofilius Matulionis of Kaisiadorys and Archbishop Mecislovas Reinys of Vilnius were deported to a Siberian labor camp. Archbishop Reinys perished in prison at Vladimir, November 8, 1953. By 1947, Lithuania was left with a single bishop, Kazimieras Paltarokas, of Panevezys. He died in 1958.

In 1947, the last convents and monasteries were closed, their communities dispersed, and all monastic institutions were outlawed.

In 1972, the Chronicle of the Catholic Church in Lithuania, clandestinely published in that country, began to reach the free world at irregular intervals. Primarily intended to keep Catholics in Lithuania informed of the situation of the Church there, these Lithuanian samizdat also serve as a constant appeal to the free world not to forget the plight of a people struggling against overwhelming odds to defend their religious beliefs and to regain their basic human rights.

Mr. Speaker, I was glad to appeal to the Soviet Ambassador recently on behalf of Miss Sadunaite, and also alert the Department of State in this matter. Copies of my letters follow as well as a copy of the reply I received from the State Department:

DECEMBER 9, 1976.

Mr. ANATOLY F. DOBRYNIN,
Ambassador, Union of Soviet Socialist Republics, Office of the Embassy, Washington, D.C.

DEAR MR. AMBASSADOR: It has come to my attention that in 1975 Miss Nijole Sadunaite was sentenced to three years of harsh regime

in a forced labor camp to be followed by three years of internal exile in the Soviet Union for distributing and possessing the publication entitled, "Chronicle of the Lithuanian Catholic Church."

As you know, this act by Soviet authorities is in direct contravention of the 1975 Helsinki Accord and the 1948 Universal Declaration of Human Rights, both of which were signed by your nation, and I would be most appreciative if you would use your good offices to see that Miss Sadunaite is released, or at the very minimum, is granted a retrial of her case.

Thank you for your assistance and cooperation in this matter.

Sincerely,

FRANK ANNUNZIO,
Member of Congress.

DECEMBER 9, 1976.

Mr. ROBERT J. MCCLOSKEY,
Assistant Secretary for Congressional Relations, Department of State, Washington, D.C.

DEAR MR. MCCLOSKEY: It has come to my attention that in 1975 Miss Nijole Sadunaite was sentenced to three years of harsh regime in a forced labor camp to be followed by three years of internal exile in the Soviet Union for distributing and possessing the publication entitled, "Chronicle of the Lithuanian Catholic Church."

As you know, this act is in direct contravention of the 1975 Helsinki Accord, as well as of other international agreements signed by the communists, and I would be most appreciative if you would let me know the action being taken by the Department to protest this action and to see that she is released or, and the very minimum, request Soviet authorities grant a retrial of her case.

Thank you for your cooperation and assistance in this matter.

Sincerely,

FRANK ANNUNZIO,
Member of Congress.

DEPARTMENT OF STATE,
Washington, D.C., December 30, 1976.

Hon. FRANK ANNUNZIO,
House of Representatives

DEAR MR. ANNUNZIO: Thank you for your letter of December 9 concerning Miss Nijole Sadunaite who is imprisoned in the Soviet Union.

We have made clear to the Soviet Government at various levels and on numerous occasions that the American people deplore the persecution of individuals for their political, cultural or religious beliefs. Our policy of promoting respect for human rights is both traditional and well known. The Soviet Government is fully aware of American concerns for the situation of religious believers in the Soviet Union.

Although our ability to produce direct positive results in individual cases of religious repression is limited, we do believe that our continuing efforts in the field of human rights have an overall ameliorating effect.

Sincerely,

KEMPTON B. JENKINS,
Acting Assistant Secretary for Congressional Relations.

Mr. Speaker, Nijole Sadunaite and many others are sacrificing their own well-being for the freedom of their peoples in the captive nations and on this commemoration of Lithuanian Independence Day, I proudly join with Americans of Lithuanian descent in my own 11th District, in the city of Chicago, and all over this country as they share with Lithuanians everywhere the fervent prayer that their bravery and strength of character will soon be rewarded, that right will triumph over injustice, and that Lithuania will be free once more.

A TRIBUTE TO JOE GIDYNSKI

HON. LUCIEN N. NEDZI

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. NEDZI. Mr. Speaker, a few days ago, Joseph C. "Joe" Gidynski, a very good friend of the Nedzi office, passed away suddenly. He was in his seventies.

Mr. Gidynski was such an interesting man, as well as a friend, that his passing should not go unmentioned. He was, moreover, a familiar face to Congressmen of Polish descent. I myself met Joe Gidynski in 1962, shortly after my first election, when he came to the office to tape a Voice of America broadcast.

He had two very substantial and distinguished careers, one in Poland and one in the United States. His life was divided, as it was for so many, by the tumultuous events of World War II, particularly the Nazi invasion of Poland in September of 1939.

Mr. Gidynski was a well established attorney in Poznan with an extensive practice, in addition, in Warsaw many years prior to the war. His knowledge of Polish history and law was so wide-ranging that even in his semiretirement he was retained as special counsel by both American and European law firms on specialized litigation relating to Poland. He also wrote extensively and was an art collector.

When Poland fell, Mr. Gidynski escaped to America with virtually none of his worldly goods. He graduated from Columbia University Law School and was a member of the New York and District of Columbia Bars.

In the mid-1940's, he began his second career as director of the Polish section of Voice of America.

In this capacity, his voice and pseudonym became familiar to millions of listeners in Poland during the most difficult years of the Cold War. He also scored two memorable journalistic scoops.

Around 1951, he broadcasted on a daily basis the stunning revelations of Russian complicity in the Katyn Forest Massacres. A special House committee, headed by Congressman Ray Madden of Indiana and including Congressman Thaddeus Machrowicz, later a Federal judge, traveled to Germany, France, and England detailing the cruel murder by the Russians of the cream of the Polish Officer Corps, which had surrendered when Russia attacked Poland.

His second journalistic beat had dramatic consequences. In 1955, Joseph Swiatlo, the Polish Communist chief of police of Warsaw, defected to the West. He brought with him a vast body of detailed information establishing Russian penetration and control of the Polish Government. Joe Gidynski flew to Europe and interviewed Swiatlo in several weeks of steady broadcasts beamed over the Iron Curtain. These broadcasts shattered official myths and helped lead to the "October Revolution" in Poland in 1956, which required Khrushchev's emergency flight to Warsaw to make concessions of a kind which permitted liberalization in Poland.

Mr. Gidynski remained with Voice of America until 1971, and was an area division chief at the time of his retirement.

He remained vitally interested in foreign policy and in Polish and Eastern European affairs. He practiced some law in Washington and continued his lifelong pursuit of encouraging Polish artists and writers. He contributed articles to intellectual Polish journals, particularly in Paris.

A physical fitness enthusiast, he walked several miles a day and also was a regular visitor to mineral baths in Hot Springs, Ark. This regimen helped him overcome the effects of two serious accidents.

Joe was a popular figure with my staff because of his enthusiasm for life and his old world charm. Beyond that, his pursuit of knowledge was untiring and he was a ready resource whenever we were seeking out historical data and other information on Polish affairs.

He is survived by his wife, a physician, his son, an engineer, and his daughter, a psychologist.

Polonia has lost a scholar and worthy son. America, his adopted land, has lost a patriot. We who valued his friendship do not want to allow his passing to fall into a void and so we pay tribute to him and well remember the good cheer and rare knowledge and marvelous anecdotes he brought into our lives.

On a Saturday morning, 10 days after Mr. Gidynski's passing, a group of his friends gathered on the roofdeck of his apartment building in the Kalorama section of Washington.

They had obeyed Joe's wish that his passing should not be marked by any formal observances, but they wanted to pay an informal tribute to him nevertheless.

And so on this roofdeck, with its sweeping view of the city, a place where Joe had often relaxed, they came together. None of them is celebrated, none is ever likely to make the Style section of the Post. But they are highly intelligent, dedicated, multilingual, well traveled—and known to each other. They, and people like them, constitute a valuable part of the real life of the capital.

A touching tribute to Joe, written by his old friend Serban Vallimarescu, of USIA, who was ailing, was read by Aldo d'Allessandro, assistant to the director of the Voice of America.

Mr. Vallimarescu's words are set forth below:

I am truly sorry that I cannot be with you this morning.

I very much wanted to be here to pay my respects to the memory of a man who was an old and respected colleague whose companionship I always enjoyed—whose counsel and advice I always valued, and whose energy and enthusaism I always admired.

Joe was 20 years my senior in age, but I often felt that he was the younger of us in spirit . . . and, yes, even in body.

About a month ago Joe and I had lunch together, as we tried to do at least once a month. Whatever the reasons I was depressed that day, and not very good company.

Joe never alluded to my rather grim mood. Instead, he talked about the exciting things that were happening in Poland—about the Polish intellectuals, workers, students, about Sakharov and Solzhenitsyn, about the opportunities the Carter administration had to promote the cause of human rights.

It was exciting, it was stimulating, it was convincing. By the time we parted my mood was very upbeat indeed. Joe had buoyed my spirits—not with chit-chat, gossip or idle chatter, but with intellectual and spiritual arguments.

I went back to the office ready to do battle and feeling much more hopeful about the future of mankind—thanks to my friend, Joe Gidynski.

Joe was a gentleman of the old school, but he did not live in the past. He did not waste time bemoaning the "good old days." For Joe was an activist by nature, not a day dreamer.

Joe was an idealist, but not an ideologue . . . He was a realist with a cause. And the cause was our common one—freedom, dignity and justice for all men and women on this earth.

And with the enthusiasm and the optimism of the true believer, and the young at heart, he never despaired that this cause would prevail.

I am proud to have been his friend, and I will sorely miss him.

May he rest in peace.

TAXPAYER ASSISTANCE FOR THE ELDERLY

HON. CHARLES A. VANIK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. VANIK. Mr. Speaker, because of the numerous changes in 1976 in the Nation's tax laws, many taxpayers are likely to be confused or have questions as they fill out their tax returns this spring. The Nation's complex tax laws can be particularly confusing to the Nation's elderly, both because of the complexity and because of the numerous special provisions for retirement income, credits for dependent care, et cetera.

Therefore, I am today introducing legislation which would provide for a special program of assistance for the elderly within the IRS Taxpayer Service Division. In addition to providing assistance to volunteer organizations to train tax consultants for the elderly, the amendment would authorize the IRS to hire retirees—particularly some of its very experienced former personnel—to assist others in the preparation of their tax returns. I believe it is possible that if this legislation is passed promptly—perhaps as an amendment to the tax stimulus now being considered by the Committee on Ways and Means—that it could provide some assistance in the current, difficult tax filing season, as well as help the IRS better prepare for future tax filing seasons.

The need for this legislation and the problems facing the elderly as they prepare their taxes was eloquently described by Mr. Richard Halberstein in the latest issue of People & Taxes:

[From People & Taxes, January–February 1977]

COMPLEX FORMS: PROBLEMS TO OLDER TAXPAYERS

(By Richard Halberstein)

On August 27 the House-Senate Conference Committee for the 1976 Tax Reform Act eliminated a Senate amendment to spend $2 million to help elderly taxpayers meet their filing requirements. The same day, the conferees also agreed to liberalize tax treatment for owners of historic structures. It might be unfair to conclude that Congress thinks more of older buildings than older taxpayers. But the failure to pass the $2 million assistance provisions does show insensitivity to the needs of older citizens at tax time, and delays for at least another tax season the possibility of making it as simple and pleasant as possible for them to file their returns.

The provision mentioned would have authorized IRS to assist private volunteer organizations to train tax consultants for the elderly. The agency also would have hired retirees to work in programs for older taxpayers and would have reimbursed expenses of volunteers doing similar work. Most importantly, the amendment would have resulted in greater publicity for tax provisions of particular interest to the elderly. The lack of adequate publicity and education about available tax saving provisions and about free tax assistance services is a serious handicap to older citizens.

The annual ordeal of preparing tax returns will be more complicated for everyone this year because of several retroactive (often tax-saving) changes in the 1976 Act. The "short form" is longer, and commercial preparers are predicting a 20% increase in business. Older taxpayers, especially those with fixed lower incomes, generally have more intricate and confusing tax situations anyway. Thus they will be seriously affected by these changes. As usual, older persons will have difficulty determining whether they must file at all, or whether any of the new provisions apply to them.

Many older persons were unaware of the old retirement income credit, and it is a safe presumption that many who qualify will not know about the new elderly credit for 1976 (new schedules R and RP). Most older persons with pension, disability or survivor's annuity incomes do not understand how the tax laws apply to them or the forms for reporting such income. Relatively few persons last year knew about the "earned income credit," or the "personal exemptions credit," and predictably very few retirees will be aware of the new rules for taxation of "sick pay," or disability payments or gains from sales of personal residences. And for some reason, too many older taxpayers believe that no income is taxable after age 72.

A congressional committee concluded a few years ago that as many as half of all older Americans overpay their federal taxes because they are unaware of tax-saving provisions, do not know where to seek competent inexpensive or free help, or both.

As a partial answer to this problem, the Senate Special Committee on Aging issues a pamphlet entitled "Protecting Older Americans Against Overpayment of Income Taxes." This is a checklist of deductions, exemptions and credits that may be available to the elderly. Copies are available free to anyone sending a return mailing label to the committee at Rm. 225, the Dirksen Senate Office Building, Washington, D.C. 20510.

But a checklist, while helpful, is not the answer. The IRS needs to make special efforts to inform elderly taxpayers of the programs available nationally and locally to provide free tax assistance.

One operation which should get greater attention—and be modified for the benefit of the elderly—is the IRS taxpayer assistance program. This program is intended to provide free help to people preparing their own tax returns, but it is not intended to be a complete tax preparation service. Each year journalists and congressional staffs create embarrassment for the IRS by asking the same tax question of several taxpayer assistance offices and report receiving several different (often conflicting) replies. Error rates, telephone delays, and incompetence met in the program have been mentioned frequently in the press and by the House Ways and Means Oversight Subcommittee. This particular program, as it stands now, is not much help to older poorer taxpayers.

The IRS does issue an annual pamphlet (Publication 554, "Tax Benefits for Older Americans") available from any local IRS office, which contains information useful for the elderly. IRS would greatly improve its treatment of older taxpayers if it offered them a return preparation service and made a greater effort to furnish copies of Publication 554 to all older persons who could use it, not just those who ask for it.

Older persons cannot be expected to wait for long periods in an IRS office, and often find it hard to arrange transportation. IRS could provide special appointments for them at locations which might be more convenient for example. So far the attitude of IRS (concurred in by the General Accounting Office which examined the assistance program last year) is that IRS should not attempt to compete with the many existing tax preparation services.

Another program which needs greater publicity and attention is Volunteer Income Tax Assistance (VITA), operated through the IRS to provide training and services to local volunteer organizations. According to an IRS official, this year's VITA program will emphasize training volunteers to assist the elderly with tax problems, and will utilize local newspapers and other media to publicize locations and times for assistance. Information about VITA is available from local IRS offices, or from VITA, 1111 Constitution Ave., N.W., IRS Building, Washington, D.C. 20005.

A program which is receiving more attention each year is the nationwide "Tax Aide" project operated by the American Association of Retired Persons and another organization, the National Retired Teachers Association.

Tax Aide started modestly nine years ago with four counsellors helping 75 elderly taxpayers in Washington. Last year, AARP estimates, more than 300,000 persons were given help with their forms by over 5,000 counsellors in 1,200 cities and towns. The phenomenal growth of Tax Aide alone shows the crying need of older persons for assistance on tax returns.

Tax Aide publishes an excellent easy-to-read pamphlet called "Your Retirement Income Tax Guide" which discusses filing requirements, how to seek outside help with taxes, and recent relevant law changes. (For information about the program or the pamphlet, write Tax Aide, 1909 K Street, N.W., Washington, D.C. 20049).

The tax problems of the elderly obviously center more on getting the annual task accomplished than on particular provisions of law. The Federal Council on Aging (an independent government advisory body) recently completed a study concerning the problems facing older taxpayers. The Council concluded that federal tax law properly favors taxpayers over 65 compared with others because of the different daily living situations faced by the elderly, especially those on fixed incomes. Yet, it seems obvious the elderly still need much more from Congress and the IRS, not in the form of further tax reductions or gimmicks, but information, education and assistance in utilizing present law fully.

In this writer's view, the following suggestions should be considered immediately by Congress and the IRS:

IRS should modify its taxpayer assistance program to provide complete tax services for all older taxpayers, including special locations and service by appointment. Congress should enact rules for omission of penalties and interest when ever older taxpayers make appointments before the filing date, regardless of when IRS finally can provide personnel to assist them;

IRS should change its VITA program to

give first priority to training volunteers (preferably qualified retirees) who seek to assist older taxpayers;

Taxpayers over 65 (or where one spouse is over 65) should be permitted to file their tax returns as late as June 15th in order to avoid the problems of seeking and obtaining help during the peak period before April 15, especially where inclement weather prevails during the tax season. In such cases interest on any amounts due would be calculated at the regular rate from April 15th; and

The older taxpayers' assistance program rejected by the Conference Committee last year should be enacted, thus providing greater information to older taxpayers through the media, and increased IRS participation in training and funding local volunteer organizations assisting older taxpayers.

1976 TAX ACT WILL AFFECT SENIOR CITIZENS

The Tax Reform Act of 1976 contains several important changes effective this year. Several provisions are of particular importance to older taxpayers, and may result in reduced taxes.

CREDIT FOR DEPENDENT CARE

For 1976, taxpayers whose household contains a child under 15 or a spouse or other "dependent" incapable of self-care, may qualify for a credit of 20% of the expenses of caring for such person (up to stated maximums). These expenses must have been paid so that the taxpayer could work full or part time. A tax credit is a direct subtraction from taxes, whether or not the taxpayer itemizes other personal expenses as deductions. More information is available from IRS Publication 503, which is free, from the instructions accompanying IRS Form 2441.

PERSONAL EXEMPTION CREDIT

For 1976, taxpayers of all ages are entitled to a tax credit equal to $35 for each "exemption" indicated on line 6(d) of this year's tax forms (taxpayer, spouse, and all dependents, but not including special "exemptions" for age or blindness), or 2% of taxable income (line 47 of Form 1040, or line 15 of Form 1040A) but not more than $180, or $90, if married and filing separately. This provides increased tax savings over last year's credit.

CREDIT FOR THE ELDERLY

For 1976, the old "retirement income credit" has been replaced by a simpler and more liberal credit for the elderly. Taxpayers over 65 (or under 65 if retired under a public system) may be able to reduce taxes by as much as $375 if single, or $562.50 if married. This credit is reduced by any exempt social security or other exempt retirement income, and is phased out as the taxpayer's income begins to increase over $7,500 for singles, or $10,000 for married couples. Computation for this credit is still complicated though the credit is more equitable for older persons. More information is available from IRS Publication 524, free, and IRS's new Form R and accompanying instructions (Form RP for persons under 65 on a public retirement system is on the back on Form R).

"SICK PAY" AND DISABILITY

Under prior law, employees and disabled retirees (still under the age of normal retirement) were able in certain circumstances to exclude up to $100 per week from sick pay or disability annuity payments. In light of the new expanded tax credit for the elderly (above) the sick pay or disability exclusion for those over 65—even if totally disabled—has been repealed effective for 1976. Many older taxpayers who previously qualified for up to a $5,200 exclusion ($100 each week), may find that their tax liability is greater than expected for 1976, and that withholding taxes taken out during the year are not sufficient to cover such liability.

AMNESTY: A DIFFERENT VIEW

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. DRINAN. Mr. Speaker, I bring herewith to the attention of my colleagues a perceptive article written by Mrs. Anne Barclay Priest on the question of amnesty.

Mrs. Priest, in this article reprinted from the Boston Globe of February 11, 1977, reminds us in a dramatic and poignant way of the profound accountability which all persons have for their conduct.

The article follows:

AMNESTY: A DIFFERENT VIEW

(By Anne Barclay Priest)

All my adult life, I guess, I've rather enjoyed my prejudice against the Germans. What horrors of genocide and atrocities of World War II couldn't one call up to justify it?

Then, summer before last, on my farm in Nova Scotia, I met my East German refugee neighbors, Karl and Erika (now Canadian citizens). There was a drought at the time and, since I have the only artesian well around, I spread the word for anyone who needed water to come help themselves. One day Karl and Erika came for water and I invited them in for a drink. We sat around my kitchen table and drank vodka. It prompted Karl to reminisce.

"I haven't had any vodka since the war," he said, and smiled for a moment. He is a man of slight build. His handsome face resembles one of those carved Swiss wooden figures, a rather curvy mouth, the rest in lean, flat planes. He leaned back in his chair to tell his story.

"Back when I was proud to be in the German army, I was in charge of all the trucks on the Russian front and we were billeted in a small village."

I felt my whole body turn cold. He said he was proud. How could he? How should I behave? I found that I was automatically reacting politely. After all, he was my guest. His story continued.

"Every village had its own vodka factory. Since the water was hopelessly polluted, we drank nothing but vodka."

"But how could you fight battles when you were all drunk? I asked.

"Why do you think we lost the war?" laughed Erika.

It was funny and so utterly unexpected that I laughed, too.

They left eventually and I cleaned up the kitchen, my head a mess of confusion, with my body trembling, my ancient prejudices hammering. I guess it wasn't until the following morning that I recalled the key phrase: "Back when I was proud . . ." What an admission!

For days my anguish continued. I had been a child during the depression and a teenager during World War II. I had grown up firmly believing that America was good. All this was fortified in every way during Roosevelt's years, during WWII and during the Marshall Plan. But, of course, the Vietnam war ate away at all those feelings, as I had opposed the war early.

But even through the worst time of the Vietnam war and the Nixon rot, I was somehow able to keep alive the faith in our goodness. And now, triggered by one amusing story from a German, the whole structure of that faith was crumbling. For the first time I believed what he and so many other Germans had said about the horrors of Buchenwald, Dachau, Auschwitz—"But we didn't know . . ." I had always felt that they didn't know because they didn't want to know. And, in a way, I still feel that.

Recent memories: I had spent the final three weeks of the '72 campaign organizing Johnstown, Pa., for McGovern. The city's only daily newspaper, the only TV station and one of two radio stations were owned by the same man, a rightwing Republican. And the people supported the Vietnam war all the way. The McGovern supporters were a lonely lot. I literally had to hide my long-haired workers in the back of the headquarters.

For days these jumbled thoughts did battle in my head. And, suddenly, the light shone with a strange new brilliance on the question of amnesty.

It is a tribute to our country and to the fact that we have freedom of the press, that we were able to get the facts about the true nature of the Vietnam war. In Hitler's Germany, the young didn't have that possibility. And yet, how many single-paper cities like Johnstown, Pa., are there in this country? What a struggle did so many have to make to get those facts? How many people today are shaking their heads in confusion and saying, "But we didn't know . . ."?

So what kind of a person did it take in 1967–70 to get those facts and then to be willing to go to jail or be exiled in Canada or Sweden? We need those men right here today. Men who have the courage to seek out the truth and the moral strength to act on it, no matter what the cost.

As a nation we need that act of love that asks forgiveness. Nothing can diminish the bravery of the men who did go to war. They responded to what they perceived as a nation's need. They were victims of a deception and manipulation greater than this country has ever seen before. No amnesty or lack of amnesty can change that.

For the families of men who gave their lives in Vietnam the burden is double. They lost their loved ones. Surely, many must wonder if their sacrifice was for nothing, for a corrupt government (ours!) and to cover up lies from the CIA. I weep for them. No matter what happens with amnesty, it doesn't change the quality of their sacrifice. But to use that sacrifice as an excuse to keep from offering amnesty to those with vision and courage, those who refused to take part in that immoral war, merely continues the manipulation of all of us.

We need those men now. We need their courage, their dogged perseverance and their strong sense of justice.

Along with my new insight came the crumblings of my anti-German prejudice. It seems to have been based on a belief, not that America was good, but that it was better. That belief is gone forever, thank heaven. We are a fortunate nation in many ways. And we have the entire range of frailties as human beings everywhere. It is important to make that distinction clear.

H.R. 3431

HON. SHIRLEY CHISHOLM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. CHISHOLM. Mr. Speaker, on February 9, 1977 Representative CLAUDE PEPPER introduced H.R. 3431, a bill to amend the Elementary and Secondary Education Act of 1965 and provide for an additional title—"Special Demonstration Programs in the Biomedical Sciences for Secondary Students from Disadvantaged

Backgrounds." This legislation authorizes a 5-year research and demonstration project to establish model partnership programs between higher education institutions and community agencies in order to provide disadvantaged students with academic enrichment, motivational development, and work experience in the biomedical sciences. The goal of these programs is to increase the opportunities for disadvantaged students to pursue college and professional careers in the biomedical sciences.

I want to personally commend Mr. PEPPER for developing this innovative legislation, which I believe takes an important step toward eliminating many of the barriers preventing disadvantaged students from pursuing careers in the biomedical sciences. Also, I would like to encourage my colleagues, who have not done so already, to consider joining the 50 House cosponsors for this legislation. Finally, as a prime sponsor, I would like to share the text of this bill with my colleagues and the public:

H.R. 3431

A bill to amend the Elementary and Secondary Education Act of 1965 to provide grants to establish demonstration programs to education, motivate, and encourage secondary school students from disadvantaged backgrounds to pursue professional training at the graduate level in the biomedical sciences

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Elementary and Secondary Education Act of 1965 is amended—

(1) by striking out "and VII" before paragraph (a) in section 801 (20 U.S.C. 881) and inserting in lieu thereof "VII, and X"; and

(2) by adding after section 907 (20 U.S.C. 900a–5) the following new title:

"TITLE X—SPECIAL DEMONSTRATION PROGRAMS IN THE BIOMEDICAL SCIENCES FOR SECONDARY SCHOOL STUDENTS FROM DISADVANTAGED BACKGROUNDS

"FINDINGS AND PURPOSE

"SEC. 1001. It is the purpose of this title to—

"(1) introduce secondary students from a disadvantaged background to the challenges, opportunities, and needs of serving in communities which have a need for professionals trained in the biomedical sciences;

"(2) motivate and educate these students to successfully pursue careers in the biomedical sciences;

"(3) develop academic, cognitive, and communicative skills in these students;

"(4) to rectify disadvantages resulting from foreign language barriers; and

"(5) instill awareness and concern in these students for the health of their families and communities;

by offering these students academic programs in mathematics, the sciences, and English, study skill development, experiences in laboratory and health care delivery settings, and frequent exposure to individuals trained, or receiving training, in the biomedical sciences.

"DEFINITIONS

"SEC. 1002. For the purposes of this title:

"(1) The term 'school of biomedical science' means an institution of higher education which provides training leading to a doctorate or master's degree in a biomedical science.

"(2) The term 'demonstration program' means a demonstration program funded under this title.

"(3) The term 'applicant' means an institution which has made application under section 1005 for assistance under this title.

"(4) The term 'student from a disadvantaged background' means an individual who is enrolled in good standing in a secondary school and who comes from a deprived educational or economic background.

"(5) The term 'deprived educational background', with respect to a student, means an educational environment that has not provided those skills, knowledge, exposures, and experiences that would enable the student to undertake successfully a course of study in a biomedical science at an institution of higher education.

"(6) The term 'deprived economic background', with respect to a student, means an environment in which the income of the student's family provides only for basic necessities, such as food, housing, clothing, and transportation.

"(7) The term 'biomedical science' means a field relevant to the study of human biology, and includes chemistry, biology, medicine, dentistry, osteopathy, optometry, podiatry, pharmacy, and public health.

"DEMONSTRATION PROGRAMS TO EDUCATE, MOTIVATE, AND ENCOURAGE STUDENTS FROM DISADVANTAGED BACKGROUNDS TO PURSUE PROFESSIONAL TRAINING AT THE GRADUATE LEVEL IN THE BIOMEDICAL SCIENCES

"SEC. 1003. (a) The Commissioner is authorized, after consultation which the advisory committee established under subsection (c), to make grants to, and to enter into contracts with, institutions of higher education for the purpose of offering five-year demonstration programs to educate, motivate, and encourage students from disadvantaged backgrounds to pursue professional training at the graduate level in the biomedical sciences.

"(b) The Commissioner, in his selection among applications meeting the requirements for approval under section 1005, shall give special consideration to each such qualified applicant that proposes the offering of a demonstration program to students enrolled in secondary schools located in a health manpower shortage area (designated under section 332 of the Public Health Service Act) or in a rural area.

"(c)(1) The Commissioner shall appoint and advisory committee composed of members who represent diverse backgrounds, such as consumers of health care services, residents of urban and rural health manpower shortage areas, secondary school personnel, and professionals in the biomedical sciences, to advise the Commissioner on the approval of applications for assistance under this title.

"(2) No member of the advisory committee shall participate in the consideration of an application submitted by an applicant which, or which proposes involvement of a secondary school system which, employs such member.

"(d) The amount of money provided in any grant or contract entered into for a demonstration program shall not exceed $1,200,000 for the five-year period of such program provided under section 1004(a)(1).

"PROGRAM ACTIVITIES

"SEC. 1004. (a) Each demonstration program shall—

"(1) except as provided in subsection (b), extend over a period of five academic years;

"(2) be carried out in cooperation with a public secondary school system, or with a combination of such systems, which is located in the region in which the applicant is located and which has a relatively high proportion, as determined by the Commissioner, of students from a disadvantaged background enrolled in the secondary schools in such system;

"(3) provide that not less than 100 students from a disadvantaged background, who are enrolled in the ninth grade in such public school system in the first academic year in which the program is offered, participate in the program for not less than 100 hours during such academic year;

"(4) provide for validation of the participation of a student from a disadvantaged background in such program by a science teacher or the parent or guardian of such student;

"(5) make arrangements to use in such program—

"(A) the research and other facilities and personnel of schools of biomedical science located in the area in which such program is offered;

"(B) the special knowledge of individuals from disadvantaged backgrounds who live in the area in which such program is offered and who are employed in the biomedical sciences;

"(C) the expertise of teachers in secondary schools and institutions of higher education located in the area in which such program is offered; and

"(D) the talents and experience of other groups located in the area in which such program is offered, such as parent-teacher associations, foundations, civic groups, and professional organizations, which would further the goals of such program;

"(6) expose students from a disadvantaged background to professionals trained in the biomedical sciences and to the resources of the biomedical sciences, including those described in paragraph (5), and such other academic and health-related experiences as are designed to—

"(A) inform and educate such students to the challenges, opportunities, and needs of serving in the biomedical science professions;

"(B) educate and motivate such students to successfully pursue careers in the biomedical sciences;

"(C) cultivate the development of academic, cognitive, and communication skills in such students; and

"(D) instill awareness, concern, and information in such students for the health of their families and communities;

"(7) provide academic counseling to students from a disadvantaged background who are participating in the program, and may provide such counseling to other secondary schools students, on the range of opportunities available in the biomedical sciences upon completion of high school, college, and professional training, and on the financial and other prerequisites to pursue such opportunities;

"(8) provide for the offering, by a school of biomedical science during each academic year of such program, of a course or courses in one or more of the biomedical sciences which (A) encompasses at least 100 hours of classroom, laboratory, and fieldwork experience, and (B) uses the facilities of such school, including laboratories, libraries, classrooms, audiovisual equipment, conference and meeting rooms, and other necessary facilities to students from a disadvantaged background, and may provide that such course be open for enrollment by other students;

"(9) provide for the offering—

"(A) on the campus of the applicant or of a cooperating undergraduate institution of higher education,

"(B) in the summer following each academic year of the demonstration program, and

"(C) to each student from a disadvantaged background who has participated satisfactorily for not less than 100 hours in the demonstration program in the previous academic year,

of a summer program consisting of at least six weeks of intensive academic study in mathematics and chemistry taught by college faculty and graduate students; and

"(10) provide for the tracking (through documentation of a student's cumulative grade average in high school, scholastic aptitude test scores, acceptances to colleges and universities, and grade point average and major pursued at the end of the first-year of college) of each student from a disadvantaged background, who has participated in the program for not less than 100 hours in the first academic year in which the program is offered, to evaluate the impact of the program on the careers pursued by students from a disadvantaged background participating in the program.

"(b) The Commissioner may not provide funds under this title to an institution for a demonstration program during the third, fourth, or fifth academic year (hereinafter in this subsection referred to as the 'program year') of such program unless not less than 50 per centum of the particular students from a disadvantaged background who—

"(1) participated for not less than 100 hours in the demonstration program, and

"(2) were enrolled in the ninth, tenth, or eleventh grade,

during the second academic year preceding the program year also participated for not less than 100 hours in the demonstration program during the academic year preceding the program year.

"APPLICATIONS

"SEC. 1005. (a) Any institution desiring assistance under this title shall make application therefor in accordance with the provisions of this title and other applicable law and with regulations of the Commissioner promulgated for the purposes of this title. The Commissioner shall approve an application under this title only if he determines that the demonstration program for which the application seeks assistance—

"(1) will be operated by the applicant and that the applicant will carry out such program in accordance with this title;

"(2) will provide for the activities described in section 1004(a);

"(3) will involve in a formal role in policy-making decisions in such program an individual who is employed at an administrative level, no lower than principal or dean, in a secondary school whose students are involved in such program; and

"(4) has been planned, and will be carried out, in consultation with an advisory council which is composed in accordance with subsection (c).

"(b) In approving an application for assistance under this title, the Commissioner shall insure that there is cooperation and coordination of efforts among the demonstration programs, including the exchange of materials and information among such programs.

"(c) Each demonstration program shall have an advisory council composed of at least nine members—

"(1) at least one-third of whom are parents of students from a disadvantaged background who are eligible to participate in such program;

"(2) at least one-third of whom are—

"(A) teachers or counselors working in secondary schools whose students are participating in such program;

"(B) individuals involved in a parent-teacher association, or similar organization, working with secondary schools participating in such program; or

"(C) civic leaders from the communities located in the area in which such program is offered; and

"(3) who are appointed in a manner prescribed by the Commissioner by regulation.

"USE OF FUNDS

"SEC. 1006. Funds appropriated to carry out this title may be used to cover all or part of the cost of establishing and carrying out demonstration programs, including the cost of stipends, allowances, travel, and subsistence expenses (in such amounts as may be determined in accordance with regulations of the Commissioner) to students from a disadvantaged background during their participation in a summer program offered pursuant to section 1004(a)(9).

"APPROPRIATIONS AUTHORIZED

"SEC. 1007. For the purpose of carrying out this title, there are authorized to be appropriated $12,000,000 for the fiscal year ending September 30, 1978. Sums appropriated pursuant to this section shall remain available for expenditure and obligation on or before September 30, 1983.".

MAYOR WISNIESKI'S LETTER

HON. RONALD M. MOTTL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. MOTTL. Mr. Speaker, I have just received a most thoughtful letter from Mayor Winfred "Pete" Wisnieski of Independence, Ohio, who is one of the most respected mayors in the Greater Cleveland Area. He is very much in tune with what many Americans are thinking.

In his correspondence, Mayor Wisnieski raises some excellent points as to what he feels are some of the shortcomings of the Federal Government. I found myself agreeing with the mayor's diagnosis of the problems of today, and feel that his thoughts should receive some degree of permanency.

Consequently, I would like to have Mayor Wisnieski's letter in its entirety placed in the CONGRESSIONAL RECORD to give all of us something to think about:

DEAR CONGRESSMAN MOTTL: Enclosed find a copy of the Cleveland Press dated 1/26/77 and entitled "Tax rebate: Use it to pay heat bill". This rebate is a great thing if you want to give money back to people to pay bills, then I'm for it 100%. However, if it is given back to put people to work, I feel you are going in the wrong direction. The only way to put people to work through the government is by Public Works Projects where the money will be actually spent to put people to work on projects and when the projects are completed, the taxpayer will have something to show for the money he pays the government.

While writing, I'd like to point out another thing. You are going to have to do something to control inflation. Everyone is saying that inflation is quieting down but, each year or two, the unions come back for more money and what can you do, except give it to them, as much as you can afford. This sets off another round of inflation and you know what this does to people on fixed incomes and senior citizens, especially in communities like ours which has a large amount of senior citizens.

I know you in Washington are in a better position as I've read in the papers where you are about to give yourselves an increase in salary which those on fixed incomes are unable to receive. Not only that, but when you read where you in Washington pay only $2.00 for a haircut while we pay $5.00 for one in Independence, you can see what your voters have in their minds.

Whether you realize it or not, the senior citizens with their organizations throughout the country are going to be the voting force in coming elections.

I feel the only way you can control inflation is by putting controls on everything across the board, not only wages. As the newspapers say, you are afraid to put out money for putting people to work because it will start another round of inflation so, it's time you recognize this fact. You also have controls on oil and gasoline at the present time and by being afraid to remove these controls in fear of spiraling prices, it shows the controls do do some good. The papers this past week carried an article where the present 13c postage stamp may increase to $1.00 in the near future. In looking back in history, every country going in the direction the United States is now, had a calamity with money and had to revalue their currency structure. I hope this doesn't happen in our United States.

These are not my suggestions alone but from the average residents in our community that I've spoken to. I am sure your leadership will be able to stabilize our inflation and get people back to work again.

Thank you for your cooperation.

Very truly yours,

WINFRED WISNIESKI,
Mayor, City of Independence, Ohio.

ESSAY: FORESTS: USE AND RENEWAL FOR MY COMMUNITY

HON. JOHN BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. BRECKINRIDGE. Mr. Speaker, every so often there comes along one of our young people who is able to catch the essence of one of our national problems in a clear and uncomplicated way. Such a one is 13-year-old Sylvia Jane Stephens of Harrison County Junior High School.

Sylvia, who is from Cynthiana, Ky., won her county's Conservation Essay Contest with words that in a fresh and important way point out to all of us the importance of wanting and working to preserve our forests. I congratulate her for her perception and commend her for writing her essay "Forests: Use and Renewal for My Community," submitted here from the Cynthiana Democrat newspaper:

FORESTS: USE AND RENEWAL FOR MY COMMUNITY

(By Sylvia Jane Stephens)

Look around you! What do you see? Wood, wood, wood. Did you ever think of how many uses of wood there are? Doors, counter tops, desks, wooden floors, sidings of houses, cabinets, the pencil and paper you are writing on, and many types recreational equipment, are all made of wood. Wood comes from forests, and there are more than one hundred eighty million acres of forest land in the United States. If we do not protect our forests and conserve their use, then we will not have much forest land left in the future.

Forests provide homes for many animals, jobs for people, heat for homes, and recreation for the family. Forests save the land from erosion, provide shade when it is hot, and absorb sound. Forests help to purify the water, and provide a place to go when you want to get away from all the big cities, and just have a place to sit down and think.

I was privileged enough to get to see a forest from the inside out this past summer while I was "backpacking". It is hard to describe my experiences inside the forest, be-

cause you really have to experience it for yourself. When I was in the forest all I could hear was quietness interrupted by an occasional leaf dropping, or a mountain breeze blowing between the trees. I was with nature itself. There was no pollution, and when I took a deep breath, my lungs about burst from all the fresh air produced by the trees. There were no mean people in the forest, because it is so nice experiencing the beauty, that the people were too content to be mean. The mountain springs were so cold that when I stuck my hand in the spring, my hand got numb. But the best of all was not seeing any "manmade" objects, or hearing any horns blow. The forest provides a place of solitude for mankind.

When Kentucky was just a pioneer territory, twenty-five out of twenty-six million acres of land were covered with forests. These forests were unexplored and uninhabited by human beings. The trees were so close together, that the branches and leaves formed a mat that the sun scarcely ever got through.

When the pioneers came to Kentucky, they used the forests as cropland, and grazing land for their livestock. The pioneers used the timber for building cabins, furniture, fuel, and sport. After they wore away the soil and used up all the minerals, they went to another piece of land and burned off the forest.

Loggers started coming to Kentucky and they cut down the trees. The loggers did not care if a tree fell on a sapling and killed it. Their only interest was profit.

Fires killed hundreds of acres of forest land a year. The greatest cause of forest fires is people being careless. People not extinguishing campfires, and the uncontrolled burning of brush, cause raging fires that destroy everything in their path. Two other leading causes of forest fires are smoking and incendiary. Incendiarism is the practice of starting fires purposely, by people who think they will be helping the land, or for spite.

Droughts damage many of our trees in the forests every year. If the drought is bad enough, it may kill the tree or stop its growth. If the trees die or stop growing then many animals will die of hunger.

Disease and insects are another leading cause of killing trees. Insects carry certain diseases with them, and when they start eating the bark or the leaves of the tree, the tree will get the disease, and the tree somtimes dies.

While I was in the mountains last summer, I saw where wild razorback boars were eating the roots of many trees and killing the trees and the grass. When the roots of the trees have been eaten or chopped off, the tree cannot get water, causing it to die.

While drought, disease, insects, and damage from forest animals kill some trees, mankind is still the greatest destructive force of our forests. So today Kentucky forests cover only forty-six percent of the land.

People can help save and preserve our beautiful forests, if they would only try. People everywhere in the United States as well as Kentucky can send all the old and used paper to recycling plants so thousands of trees will not have to be cut down just for pieces of paper.

Forest owners can cut the dead and diseased tree, and plant new young trees. Forest owners can cut down certain areas of trees and plant new trees that will grow and mature faster.

We can try to prevent forest fires by cleaning out all the dead and dried up trees and brush, and have good fire emergency squads ready to fight the fires and keep them under control. Something everyone can do is to make sure that his cigarette is out before he throws it out the window, or just put the cigarette in the ashtray.

To prevent wild animals from eating the roots of the trees, we could have open hunting season on the animals that are overpopulated. But these solutions will not help if the people do not help!

Unfortunately no one can make you want to save and preserve our forests. You have to want to save them yourself! By the time that you decide it is important to have forests, it may be too late, because all of our beautiful forests may be gone.

CONGRESSIONAL SALUTE TO THE PEOPLE OF LITHUANIA IN COMMEMORATION OF THE 59TH ANNIVERSARY OF THE REPUBLIC OF LITHUANIA

HON. ROBERT A. ROE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ROE. Mr. Speaker, I wish to join my colleagues and the Lithuanian American community today in commemorating the 59th anniversary of Lithuanian Independence Day and salute the people of Lithuania who steadfastly cling to the richness of their cultural heritage and seek freedom of expression, religion and basic individual human rights in the country of their birth.

As we sit in session today and reflect on the history of the people of Lithuania, we look to the country of Lithuania situated at the southern end of the eastern coast of the Baltic Sea, right at the European continent's geographic center. Historians tell us it emerged as a unified state in the early decades of the 13th century and became internationally recognized as the Kingdom of Lithuania in 1251 A.D.

After centuries of vast expansion eastward and southward, in 1569 Lithuania became a partner in the Polish-Lithuanian Commonwealth, which lasted till 1795 when it was partitioned between Austria, Prussia, and Russia. Lithuania fell under the Russian rule.

Lithuania succeeded in reestablishing its independence in 1918, at the end of World War I, but was occupied again in 1940 by the armed forces of Russia, now known as the Soviet Union.

During the last Congress we were instrumental in establishing the Commission on Security and Cooperation in Europe (Public Law 94–304) to monitor international compliance with the Helsinki Agreement. We also reaffirmed our Nation's policy of nonrecognition of the legality of the 1940 incorporation into the Soviet Union of the independent states of Lithuania, Latvia, and Estonia. I was pleased to sponsor and vigorously support these congressional resolutions.

Mr. Speaker, we are all agreed that there is a continuing need for concerted action in mustering world opinion as a viable force in achieving universal understanding and agreement on basic human rights principles to eliminate government controls that dominate the personal freedoms of the individual to live and worship in the land of his or her choice and stifle the independence and sovereignty of a nation of people.

On February 10, 1977, I joined with many of our colleagues in sending the following letter to the President:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 10, 1977.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Having been heartened by your Administration's statements in defense of human rights and civil liberties abroad, we view recent actions in the Soviet Union, renewing repression of political dissent there, as a significant test of the strength of America's commitment to the principles you have voiced.

In this regard, we are pleased to note the statement of concern issued by the Department of State this past Monday, February 7th, over the arrest of Mr. Alexandre Ginzburg.

The simultaneous expulsion of George Krimsky, an Associated Press correspondent in Moscow, and the arrest of Alexandre Ginzburg amount to a clear disregard of the principles contained in the 1975 Helsinki accords which the Soviet Union agreed to honor. Mr. Krimsky, it is obvious, is being penalized for his energetic reporting of the activities of Soviet dissenters. Mr. Ginzburg, who has been acting on behalf of Alexandre Solzhenitsyn in aiding the families of Soviet political prisoners and who has been an active member of the public Soviet groups established to promote compliance with the Helsinki accords, is being singled out for punishment as a means of intimidating others. In both instances, Soviet officials have acted in direct contravention of the Helsinki pledge to "promote and encourage the effective exercise of civil, political, economic, social, cultural and other rights and freedoms all of which derive from the inherent dignity of the human person and are essential for his full and free development."

Such behavior requires an effective and credible response from the American government. Soviet leaders must recognize that they cannot, with impunity, violate their international agreements. Good faith compliance with the Helsinki accords must be made a test of good faith in negotiating other, bilateral undertakings.

By insisting on Helsinki compliance, your Administration can honor the commitment you have made to protect human rights, strengthen the Helsinki accords as an instrument of such protection and establish a reliable foundation for honorable dealings with the Soviet Union.

Mr. Speaker, on behalf of the people of my congressional district and the State of New Jersey, I join in the annual observance of our Lithuanian heritage and trust that through our mutual endeavors and responsibilities that we will strive to continue to achieve international understanding and agreement that will eliminate the oppression of people and restore "human rights" and the rights of self-determination by the people of Lithuania and other captive nations of the world.

DEEP SEABED MINING

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. BREAUX. Mr. Speaker, I have joined with Chairman JOHN MURPHY in sponsoring legislation which I believe to be one of the most important issues to come before Congress this session. Our bill, entitled the "Deep Seabed Hard Min-

erals Act," will authorize the U.S. mining companies to continue in the development of their technology to recover manganese nodules from the seabed on an interim basis. I must stress the concept of an interim basis—the authority contained in this bill would not extend beyond the time when an international law of the sea treaty is ratified by and becomes binding upon the United States.

We in the Congress have been patiently waiting for some resolution of the differences at the U.N. Law of the Sea Conference for too many years now. Every time we propose to assist U.S. citizens to fully enjoy their rights on the high seas, our State Department and others have urged postponement of congressional action. We have clearly cooperated in this mutual endeavor with our colleagues at the State Department, but now it is time to look for other alternatives. I have personally been distressed to witness the series of concessions made by the U.S. negotiating team during the last few LOS conferences. The U.S. team has been acting in good faith to resolve the differences between our national interests and those of developing countries of the world. This is admirable on the part of the United States, but how many concessions can be made without any given in return by other nations?

The main impasse at the conference concerns the management of mineral resources on the deep seabed and the rights of nations to conduct activities to recover these resources. The resources to which I refer are manganese nodules—hard mineral rocks which lie on the seabed floor in abundant quantities. These nodules contain valuable concentrations of manganese, copper, cobalt, and nickel which are critical materials to our national economy. To assure developed and developing countries a secure source of supply for these minerals is a goal worthy of serious consideration. The bill which I am sponsoring today would achieve this goal.

The bill would allow the Secretary of Commerce to issue licenses to qualified U.S. nationals for the purpose of exploration and preparation for commercial recovery of nodules on the sea floor. Qualifications are set forth in the bill in a restricted manner to prevent speculators from "sitting" on a mining site. The Secretary would also be directed to issue comprehensive environmental standards after conducting baseline and site surveys of the ocean mining areas.

An integrity of investment provision in the bill is key to stimulating U.S. industry to continue their technology development. This provision would offer protection to U.S. corporations in the event that a future treaty would prevent them from a continuation of deep seabed development activities.

This bill represents a moderate approach to a series of very profound conflicts, and I firmly believe that the Congress must attempt to assist in arriving at alternatives. As chairman of the Oceanography Subcommittee of the Committee on Merchant Marine and Fisheries, I am dedicated to holding comprehensive hearings during the next few months with a view toward resolving some of the disputes presently pending before the Law of the Sea Conference. Mining of the deep seabed offers great new potentials to U.S. and foreign economies. We must find solutions where the international forum has failed, and I believe that this bill offers the concepts which can achieve eventual success.

TAX SIMPLIFICATION

HON. MARTHA KEYS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. KEYS. Mr. Speaker, I am today introducing tax simplification legislation which could cut in half the paperwork required by most taxpayers.

You may not remember, but there was a time when filling out your tax forms was simple. In 1955, the short form was a 3-by-7-inch card the size of today's W–2 form, and it required only four easy mathematical calculations to complete. Astonishingly, the instructions were 1 page long—and that page included the tax table and a copy of the form for the taxpayer's use.

It hardly needs to be said that the complexity of tax returns has increased substantially in recent years. The 1976 short form requires 13 separate mathematical computations—5 more than last year. At the same time, the 1040A instructions have increased from 8 pages to 12.

By far the greatest burden on the taxpayer is in the computations he is required to make. In 1946, a taxpayer could simply submit his W–2 form and the IRS would calculate his tax. This year the taxpayer is forced to compute his own standard deduction in a complex formula that reads:

If you checked the box on line 2 or 5, enter the greater of $2,100 or 16% of line 13a—but not more than $2,800.

Similar alternate calculations are required if other boxes have been checked.

A study done by the University of Michigan in 1965 found that the second most difficult problem encountered by taxpayers was the computation of their tax.* The present structuring of the tax forms can certainly have done nothing to relieve this burden. Although the short form was intended to provide the taxpayer with a simple means of preparing his own form, over 22 percent of those filing short forms last year found it necessary to go to a tax return preparer for assistance.

The measure I am proposing would cut the short form in half by requiring the IRS to compute the tax of individuals using the standard deduction who elect to have the IRS calculate their tax. Such a provision would eliminate as many as 21 of the 39 lines on the 1976 short form. Coupled with President Carter's proposed changes in the standard deduction, this measure could significantly reduce the work of well over half of all taxpayers.

The IRS is presently required to calculate the tax of an electing individual who is entitled to take the standard deduction and whose gross income from wages, dividends, and interest is less than $10,000. In recent years, however, this provision has fallen into disuse. In 1956, 40 percent of those filing the short form availed themselves of this service. By 1968, the number had dwindled to 10 percent. More recently, that figure has sunk to 1 percent.

There are a number of reasons for this decline. One is the complete disappearance of the short form between 1969 and 1971. However, the primary reason lies in the failure of IRS to inform taxpayers of the availability of the service. In 1975, there was an inconspicuous notice at the bottom of the 1040A short form noting the availability of IRS computation. This year the notice has been moved to the back side and refers the taxpayer to a small box buried on page 10 of the 1040A instructions.

The staff of the Federal Paperwork Commission has recently reviewed this problem and made the following recommendations to reduce taxpayer paperwork:

1. The IRS should develop and place into effect a program to encourage all eligible taxpayers to file income tax returns on Short Forms 1040A.

2. The IRS should review each of the additional information requirements which preclude use of Short Form 1040A to see whether they could not be resolved to permit expanded use of the simpler form.

3. IRS should further simplify Short Form 1040A by eliminating all items not required by IRS to determine tax liability such as "occupation" and "names of dependents."

4. IRS should rewrite the Instructions for preparing Short Form 1040A at a lower reading comprehension level since a 90 percent comprehension of the present Instructions requires a college level reading ability.

5. IRS should vigorously encourage wider tax payer use of IRS tax computation by:

a. Designing of the Short Form 1040A to emphasize ease of use when IRS computes the tax.

b. Stressing advantages of IRS computation in the Instructions.

c. Using public information channels to stress advantages of IRS computation.

There are numerous advantages to IRS computation which should be emphasized in the instructions:

1. IRS computation substantially reduces the possibility of mathematical error delaying a refund.

2. The IRS will compute the tax by the method which is most advantageous to the taxpayer.

3. If additional tax is due, the taxpayer may delay payment until he is billed by the IRS.

4. Since no computation of any sort is required, there is no need to pay a tax return preparer.

While increased utilization of this service will significantly reduce the burden on the taxpayer, it will not unduly increase the work of the IRS. At present, every tax return, whether short or long, is checked by computer for mathematical errors. First the form is visually verified to see that the W–2 forms and enclosed payments correspond to the appropriate lines on the form. Then every return is keypunched to feed all sources of income, withholding, and other information into the computer to confirm mathematical calculations.

*The first is gathering the data for itemizing

to buy solar heating systems. There are other more significant incentive packages under consideration on Capitol Hill, and other State and local barriers yet to be removed. My point is simply that we have no business taking up incentives at all until we remove roadblocks. My proposal is essentially a small one—but it can be implemented quickly, easily, and cheaply.

THE B–1 BOMBER PROGRAM AND MILITARY PROCUREMENT REFORM

HON. THOMAS J. DOWNEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. DOWNEY. Mr. Speaker, I have long opposed the B–1 bomber program as an ill-advised alternative for strengthening our strategic bomber force. The cost-effectiveness of this program, which I am convinced is very poor, is an issue that still awaits a final resolution by the Congress and the new administration.

Our experience with the B–1 program is also indicative of a more comprehensive problem, military procurement reform. In a recent letter, Adm. Gene R. La Rocque of the Center for Defense Information points out, I believe correctly, that the future of military procurement reform is inextricably tied to the final decision on the B–1 program. I would like to share Admiral La Rocque's letter with my colleagues and urge them to carefully consider his arguments:

CENTER FOR DEFENSE INFORMATION,
Washington, D.C., January 14, 1977.

Hon. THOMAS DOWNEY,
U.S. House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN DOWNEY: The B–1 bomber program is a cancer in the military budget.

Either the President or the Congress must excise this exorbitantly wasteful program without further equivocation. If it is not done, all the U.S. military services will be sapped by the cost of the B–1 program, and the American taxpayers will be penalized by the failure of our national leaders to act decisively on their behalf. In this year alone, $3 million *a day* goes into keeping the B–1 alive. The total cost during the new administration's four-year term of office will approach the $12 Billion mark.

The issue is not whether the B–1 is a good airplane. At close to $100 million per copy, it ought to be. The real question is whether this country needs to stampede into a new manned bomber program. This cannot be considered in isolation from the other strategic nuclear systems on land and at sea which will continue to provide our main deterrent to a Soviet attack.

The facts have been on hand for a long time, with very little new except for the rising program costs of the B–1:

The Air Force wants 244 new B–1 bombers. By latest official estimates their purchase price will be $23 Billion.

Their operating cost over 20 years will add nearly $30 Billion to the purchase price.

Another $14 Billion will have to be spent on new aerial tanks and missiles for the B–1, and these will cost $28 Billion to operate and maintain along with other support needs. In 1976 dollars *the potential cost of the B–1 program is at least $95 Billion*—a $4¾ Billion annual mortgage on the military budget for the next 20 years.

The Air Force does not plan to retire its B–52s, even if it gets the B–1. Its leadership has conceded there are "no structural problems which would require a B–52 phase-out schedule in the 1990's," and consequently envisions "over 300 B–52s remaining in the active inventory for the rest of this century."

The U.S. currently has 420 B–52s in 25 operational squadrons, and another 185 in reserve. Over half of this force, principally the later model bombers, have up to 20 more years of useful service, and it can be modernized if required by shifts in the strategic balance, at a fraction of the $95 billion that would be wasted on the B–1 and its support.

We've got the B–1 problem on our hands because of a basic flaw in the way our military services go about deciding their hardware requirements. Essentially, they commit themselves too early to a weapon system, and close off all reasonable alternatives. They put themselves in the position of dressing up their choice with yards of specious rationales, and they put presidents and congresses in the difficult position of going along with them because there are no alternatives.

Fortunately, the B–1 program does have a clear-cut alternative: cancellation. Many other military procurement requests will not be so lucky—witness the Navy's shipbuilding program.

There is a cure for this lamentable situation, and all it lacks is the convincing and energetic support of the President and his Secretary of Defense. The last Congress enacted far-reaching reforms in the military procurement system. The Defense Department has so far done nothing to breathe life into these reforms, apparently preferring business as usual. In the meantime, new "B–1s" are being dreamed up by the military services and some of them undoubtedly will be wrapped up in the next military budget. The list of doubtful projects is long and expensive: nuclear strike cruisers for the Navy, new attack helicopters for the Army, still another fighter-interceptor for the Air Force, and more amphibious equipment for the Marines.

We cannot afford to go on this way. The B–1 itself should be promptly terminated on its own merits, but I would hope such a decision would also signal the Pentagon that Congress is serious about procurement reform, that our new President is committed to eliminating waste and inefficiency throughout government, and that we, the taxpayers, have the ultimate decision on what kind of armed forces we want.

Sincerely,

GENE R. LA ROCQUE,
Rear Admiral USN (Ret),
Director.

LIBERIAN TANKERS

HON. GERRY E. STUDDS

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. STUDDS. Mr. Speaker, in preparing for hearings and for legislative action on the issues of oil spill liability and oil tanker safety, I have conducted a bit of research into the past and present character of the Liberian tanker fleet. Because of the extremely high level of interest shown in this subject in recent weeks, I issued the following special report to my constituency which I thought might also be of interest to my colleagues:

Last December the largest oil spill in U.S. history occurred from the tanker *Argo Merchant* which grounded, broke up, and spilled nearly all of its 7.5 million gallon cargo of heavy fuel oil into the Northwest Atlantic. Two days later, the tanker *Sansinea* suffered a massive explosion while moored in Los Angeles harbor. On December 24, 5,000 gallons of bunker oil escaped through a fracture in the hull of the *Oswego Peace* into the Thames River in New London, Connecticut. On December 27, the tanker *Olympic Games* grounded and spilled 133,000 gallons of crude oil into the Delaware River and, the next day, the tanker *Dalphne* ran aground while approaching a harbor in Puerto Rico.

All of these incidents involved vessels flying the flag of the nation with the world's largest tanker fleet, Liberia.

ORIGINS

In 1947 the nation of Liberia, which is about the size of Ohio, did not have a significant shipping fleet, nor did it have a body of maritime law. Its one port, Monrovia, was suitable for small vessels only, and its economy depended primarily on its ability to produce rubber in large quantities. Who, one might ask, had the vision to see that Liberia was capable of becoming the largest maritime nation in the world?

Oddly enough, the answer is Edward R. Stettinius, Jr., former United States Secretary of State. Mr. Stettinius gathered a group of lawyers and politicians together in New York that year and proceeded to write the laws of the Liberian shipping industry. They also drafted changes in the Liberian corporation laws to make it easy for those wishing to join the Liberian fleet to do so. They established the Liberia Company, with headquarters in New York, to administer the Liberian shipping industry, and then created the International Trust Company, with offices one block from the White House in Washington, to handle finances.

According to a State Department official of the time, the International Trust Company was also intended to be a bank deposit for flight capital ("hot money"), accepting such deposits into numbered or concealed accounts, as did banks in Geneva and Tangier. Fortunately, however, this particular aspect of the Stettinius scheme was successfully discouraged by a special review committee of the State Department.

On January 30, the Liberian Legislature approved an act which it described officially as "approving the statement of understanding entered into on the 3rd day of September A. D. 1947 by and between the government of the Republic of Liberia and the Stettinius Associates, Inc. and incorporating the Liberia Company." The Stettinius group, and the Liberian shipping industry, were in business and the long road toward the *Argo Merchant* had begun.

GROWTH OF THE INDUSTRY

Most of those who own Liberian-flag ships have never been to Liberia. Most Liberian-flag ships have never been there either. If you happen to have a spare ship and want to switch registry, you don't go to Monrovia, you go instead to the office of Mr. Fred Lininger (a member of the original "Stettinius group"), Deputy Commissioner for Maritime Affairs, in his office at 103 Park Avenue in New York. Registration, complete with all the paperwork, should be finished in 48 hours.

As the owner of a Liberian vessel, you will have to pay no income taxes on your earnings from that vessel. You will not have to pay high wages, you will not have to comply with U.S. Coast Guard safety or maintenance standards. No record of true ownership will be kept by the Liberian Government. If your captain learns of an oil spill coming forth from your ship but he de-

At the same time, the computer calculates the tax on the basis most advantageous to the taxpayer including regular tax, alternative tax (schedule D), and income averaging (schedule G). Because the IRS already provides computation services on a limited scale, it would be very little additional burden for them to expand their services.

The measure which I am proposing would encourage the use of this service by eliminating the limitation on the size of one's income and providing assistance to all taxpayers having certain types of income. Little-used classifications of income presently appearing on the short form such as dividends would be removed. The free space could then be used for inclusion of the elderly credit and the child care credit which now require use of the 1040 long form.

Elimination of items such as dividends and FICA withholding would require approximately 500,000 taxpayers with these entries to switch to the longer form. However, the addition of a few simple questions regarding the elderly and child care credits would permit 6.4 million elderly and working parents to use the short form—assuming they also took the standard deduction.

I am presently preparing a sample short form which will include these credits and return the form to the size of the W–2. The form would: First, make it clear that the IRS would compute the tax; and second, briefly state the advantages of such computation.

Under my proposal, any taxpayer who wished to continue to do his own calculations could use a worksheet provided for him in the 1040A instructions or file the 1040 long form.

One usually characterizes progress as a "step forward" for the country. In this case what we need is a long step back—back to simplicity. I am confident that this measure will mean a return to simplicity for the vast majority of taxpayers and I hope it will receive the support of my colleagues.

THEY ARE GIVING US GAS, ALL RIGHT

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mrs. MEYNER. Mr. Speaker, the experiences of this winter have forced us to deal not only with the immediate gas crisis, but to contend with the future. If we are to do anything constructive about the crisis, we need reliable data. The problem is, we just do not have it. No one does.

This is not the first time, nor will it be the last time, that we will be forced to rely on insufficient data. Last month, President Ford presented an ill-timed, ill-advised proposal to remove the price controls from gasoline. This provided a not-so-fortunate opportunity to deal with data distortions—the same kind of distortion that troubles us now. Illustrative of the data gap was a Federal Energy Administration report which said that decontrol would have a "minimal impact" on the consumer, and a Congressional Research Service study which indicated that decontrol would cost the American consumer $6 to $8 billion.

Now, as we sift through the morass of evaluations of natural gas deregulation, discrepancies, deficiences, and selective estimates are obfuscating the debate. We in Congress, administration officials, and the millions of Americans who rely on the delivery of natural gas, do not know where to turn for the answers. We are forced to base our approach on conflicting data, much of which is supplied by the gas companies themselves. Estimates of the available reserves of natural gas are as high as 1,200 trillion cubic feet. But, natural gas companies deny this.

Someone is lying to us.

Questions persist. What are our natural gas reserves? What are our needs? Are the gas companies holding back supplies in order to force deregulation? What are our exploratory needs for the future? And, most importantly, where and when are we going to get the facts?

Mr. Speaker, I am entering into the RECORD, for the information of my colleagues and our constituents, an article that appeared recently in the New Republic and Washington Post. The author, James Nathan Miller, calls upon Congress to force a full disclosure of the facts. We need an immediate disclosure that is not tainted by the influence of vested interests. A disclosure that will provide us with a beginning for the formulation of our future policy and a guide for our current debate. I share Mr. Miller's concerns and beliefs: I ask that Congress initiate the kind of investigation called for in the article, the kind that—once and for all—will provide us with the facts:

THEY ARE GIVING US GAS, ALL RIGHT

(By James Nathan Miller)

The companies that supply U.S. energy are trying to convince Congress and the public that the present cold-weather crisis actually does prove that there is a long-term shortage of natural gas. If they succeed, the U.S. soon will have a gas deregulation law that's based on data that are at best doubtful and at worst false. To understand what's involved, it's essential to realize that the deregulation question actually involves two very different kinds of shortage, which press accounts have jumbled together. There is a true, demonstrable shortage in deliveries of gas. The reasons for it are the apparent physical inability of pipelines to satisfy the demand created by the record-breaking cold wave, and the unwillingness of producers to meet this emergency demand at a controlled price when they know they can get several times as much if they can force the removal of controls.

The second shortage is something quite different. It is an alleged shrinkage in the country's long-term underground reserves of gas. The companies that own the long-term reserves—and claim that the shortage exists—also claim that the size of their holdings is a trade secret; as a consequence, the figures that could prove or disprove the existence of a reserve shortage are hidden behind a curtain of secrecy that the present cold spell has done nothing to pierce.

For many years the gas industry has claimed that underground stocks of "proved" reserves have been declining at an alarming rate. "Proved" reserves are the only ones that the country can be certain about. They represent gas fields that the producing companies have drilled into, measured with considerable precision and deemed to be economically recoverable. Beyond the "proved" reserves there are others labelled with adjectives representing the spectrum of geological speculation: "probable," "inferred," "possible," etc.

How much does the U.S. now possess in these various categories? The most recent estimate of the industry's trade association, the American Gas Association (AGA), is that there are 228-trillion cubic feet of proved reserves now in the ground, or about a 10-year supply at the present national consumption rate. But nobody expects us to run out in 10 years, because geologists know that there are huge amounts of the less certain categories waiting to be discovered; most estimates conclude there are between 700 and 1200 trillion more cubic feet of gas ultimately available; some go much higher. This means we probably have enough to carry us several decades into the next century if we go out and prospect for it. Which brings us to the industry's main argument for deregulation.

The producers say that, because government regulation is holding down the price of gas, they haven't been doing the expensive exploratory work that's necessary to move the "probable," "possible," etc. fields into the "proved" column. According to AGA's figures, the decline in proved reserves began in 1968. From 1945 to 1968, the gas companies managed to discover a lot more gas each year than the country consumed. So for 22 years our proved stockpiles kept increasing, until they reached a peak of 293 trillion feet in 1967. Since then, according to industry figures, new discoveries each year have totalled less than consumption, and the proved reserves have shrunk from 293 to 228 trillion feet. At that rate, we will run out of proved by the end of this century.

But the "proved" figures come from only one source: the gas producers themselves, who draw them up in complete secrecy. Thus for the critical set of statistics that underlie the whole deregulation debate, the country depends totally on the chief private participant in the debate. In the last few years several outside investigations have turned up evidence that these figures may be fundamentally incorrect. They may be a statistical delusion—a gross underestimation of the nation's true reserves.

Proved estimates require a large amount of raw data—core samples, pressure readings, voltage measurements, etc.—that can be obtained only by actual drilling into the gas pockets. Acquiring these data for all the country's 6300-odd gas fields is a colossal physical job, and only the gas industry itself owns the billions of dollars' worth of equipment necessary to do it. The only group the producers are willing to confide some of their information to is the AGA, for its once-a-year survey of the nation's total reserves. Each year the association assigns 100 industry geologists to its so-called Committee on Natural Gas Reserves. These geologists annually canvass the producers in their assigned areas for the necessary data to form their own estimates.

In 1970, responding to suspicions that had been voiced about the accuracy of the figures, the chairman of the Reserves Committee described the system in detail to the Federal Power Commission. He said the drawing up of the estimates was a rigorously supervised process specifically designed to eliminate any chance of manipulation by the producing companies. He said the companies gave the 100 geologists all the data they needed, and that the geologists, regarding themselves as public servants rather than as representatives of their companies, were scrupulous about insulating themselves from company pressure. All the geologists used the same precise AGA estimating formulas, said the official, and the resulting national estimate was "one of the most consistent and reliable series of statistics available anywhere." The FPC, which is known as one of the most supine of regulatory agencies in its relations with the industry it regulates, accepted this testimony at face value, and looked no further.

Last year a House committee headed by Rep. John Moss (D., Calif.) conducted an investigation that drew a very different picture of the way the process worked. Moss' picture was based partly on facts turned up by an investigation by the Federal Trade Commission of AGA's estimates in the Gulf of Mexico, and partly on testimony by industry officials, including some of the geologists who had drawn up the AGA estimates for the Gulf.

What Moss found was that the whole estimating process was dominated by a few of the largest gas producing companies. These companies were allowed to choose the geologists who served on the Reserves Committee, and they regarded these geologists not as servants of the public but as their own representatives. AGA made no attempt to make the geologists follow its own estimating rules, and in fact the AGA man in charge of the program admitted that he had no idea of what estimating methods they used. Under oath, the geologists admitted that they ignored AGA's definition of what constituted "proved" reserves and, in case after case, gave whatever estimates their companies wanted them to give. One admitted that his company drew up all his estimates for him. Another said that when a company refused to give him information on a gas field, he simply listed the field as "zero"; in one year he listed five such fields. Another geologist said that companies often refused to give him any information at all, and he was forced to make "ballpark" guesses based on scraps of information from the trade press. Moss turned up one huge field containing 400 billion cubic feet of gas that had been unlisted for two years, even though it had two platforms and 13 wells and its existence was known to the entire industry. If this single field had been included in AGA's figures, it would have increased the AGA's 1974 national estimate of new-field discoveries by 23 percent.

The FTC's investigators, after a five-year examination of AGA's estimating methods, had recommended taking the association and the companies to court for "concertedly maintaining a deficient reporting system" that produced "serious underreporting." The FTC commissioners rejected this recommendation on what appears to have been political grounds. Moss uncovered a memo in the FTC files recommending against any legal action that might encourage "continued FPC regulation into the distant future." The FTC investigation, now seven years old, drags on.

The obvious reason the companies have to give AGA incorrect figures is the propaganda value of proving that a national shortage exists. But there is a more immediately practical reason: The Supreme Court ruled in 1968 that the FPC could let producers *increase* the price of gas whenever AGA's figures showed that their rate of new discoveries had *decreased*. Thus the fewer new discoveries the producers tell AGA about, the more they can charge their customers. Interestingly enough, the first drastic drop in the new-discovery figures appeared in the AGA statistics that were issued a few months after this landmark decision.

The industry claims that AGA's figures are accurate because two national surveys of proved reserves—one by the FPC, the other by the Federal Energy Administration—came up with totals that were only a few percentage points different from AGA's. However, FPC and FEA both have been lobbying for deregulation; and though the two agencies claim that their surveys were completely independent of the industry, both surveys actually depended heavily on industry cooperation and in fact couldn't have been carried out without it.

The FPC, in its survey, selected 158 out of the nation's 6,300 gas fields, and asked the industry for the raw data on these fields. On the basis of this information the FPC's geologists projected a national estimate that was only 10 percent different from AGA's. The FPC's methodology was developed by a "technical advisory task force" whose chairman and cochairman were Exxon geologists, and a majority of whose members were industry executives. Three subsequent analyses of the 158-field sample by others all concluded that the sample had been drawn up in such a way as to minimize the possibility of finding underreported fields.

As to FEA's study, its dependence on industry-generated figures was also self-evident. In authorizing the FEA's survey, Congress gave the energy agency power to subpoena whatever raw data it needed from the producers. But FEA chose not to subpoena anything, even when companies refused to provide requested information. Instead, it used only what information the companies were willing to turn over voluntarily. Since this is the same information AGA depends on, it doesn't seem surprising that FEA's and AGA's reserves estimates were almost identical.

Besides failing to report reserves, the companies are withholding from the market large quantities of gas that they *have* reported. By law, when companies discover produceable quantities of gas in fields leased from the federal government, they are required to market it at the federally regulated price. But Moss' staff exposed cases in which companies—at the very time they were warning of a gas shortage—had failed to produce very large quantities of gas available in fields in the Gulf of Mexico developed under federal lease. President Carter's energy chief James Schlesinger was quoted last week in Newsweek as saying, "I keep hearing about gas that's been squirrelled away, but whenever we get close to it, it becomes evanescent." He should look at Moss' findings; they are not evanescent.

Here is one example of what the Moss committee discovered. By law, companies that lease oil- and gas-producing land from the federal government must turn over all their raw data on these leases to the United States Geological Survey. By subpoenaing the AGA's (hitherto secret) estimate of reserves in the Gulf of Mexico (all developed under federal lease) and comparing this to USGS's own (hitherto secret) estimate of the reserves in the Gulf, the Moss staff was able to make the first direct comparison between the AGA's detailed estimates of reserves in a specific group of fields and another set of estimates for the same fields that were based on the companies' own raw data. Moss found that the USGS estimate was 60 percent higher than AGA's: 23.5 trillion feet for USGS, 14.7 trillion for AGA. Thus, in only 153 fields (2.4 percent of the nation's 6300 fields) AGA apparently had missed 8.8 trillion feet of gas. This is a little more than twice as much as the estimated 3.5 trillion feet of delivery curtailments that are involved in this winter's gas crisis.

The AGA insists that to compare its figures with USGS's is comparing "apples" and "oranges," because USGS said it was estimating "measured" reserves, while AGA uses the "proved." But USGS says that the two terms are "essentially synonymous."

From all the above, it seems apparent that the present 3.5-trillion crisis in pipeline deliveries caused by a record-cold winter tells us nothing about the more fundamental question of what the companies' reserves actually are and why they are not making them available in sufficient quantity. The answer to these questions will come when and if Congress uses its subpoena power to conduct a survey of the industry's holdings that is demonstrably and unquestionably independent of the industry's influence. I don't pretend to know what such a survey will prove; perhaps it will confirm the industry's figures. But it is startling to realize that the nation's basic energy policy is being formulated on the basis of a fundamentally important set of statistics supplied by an industry that has every incentive to misrepresent them.

LITHUANIAN ANNIVERSARY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. DERWINSKI. Mr. Speaker, it has now been 59 years since the people of the Republic of Lithuania declared their independence from the Russian empire. On this date, February 16, 1918, this small nation on the Baltic Sea sought to assert their rights of freedom and national independence; and did so for 22 years before the liberty that they enjoyed was destroyed when the Soviet armies forcefully annexed that Republic within its Union of Soviet Socialist Republics.

Although approximately one-fourth of its citizens were removed from their homeland in an attempt to destroy their unity and identity, the Lithuanians have not repressed their desires for individual freedoms and self-determination.

Well over a million people of Lithuanian background live in the United States, many thousands of them in Illinois. I am pleased to join with them in the commemoration of this anniversary of the establishment of the independent state of Lithuania.

As a result of migrations, deportations, and repopulations from other sections of the Soviet Union, over half of the people now living in Lithuania are unable to speak Lithuanian. However, not only their language but their national, religious and cultural heritage face ex-

tinction, because of the oppression inflicted by Communist doctrine.

Although the Lithuanian peoples are not allowed to celebrate this meaningful occasion in their own country, it is significant that a country whose people have not been allowed to govern themselves for 37 years still has strong national ties. The hopes and aspirations of these peoples have not been diminished as evidenced by their continuing defiance of the Soviet regime.

We condemn the Soviet suppression of such fundamental rights as repugnant to the principles of free world nations. The United States has consistently refused to sanction the forcible occupation of Lithuania and Baltic neighbors. This policy reinforces Lithuanians in their determination to await national independence and free existence of human rights.

I would hope that some day very soon we may not have to speak in Congress of the anniversary of the loss of liberty by the Lithuanian people; but instead, we will speak of Lithuania's realization of the ideals of personal liberty, independence, and human dignity. Until that day, we all owe a debt to the Lithuanian people for reminding us through their struggle, of how precious and valuable is freedom and how costly is the loss of that freedom.

As we pause to mark this anniversary, we recognize also the large contribution made by the more than 1 million Americans of Lithuanian descent to the development of the United States and the preservation of its ideals of freedom and liberty. But let us never forget the continuing struggle of the Lithuanian people for the fundamental human liberties long suppressed by harsh Soviet domination.

HUMAN RESOURCE DEVELOPMENT: A. H. RASKIN REPORTS

HON. STANLEY LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. LUNDINE. Mr. Speaker, I have long been an admirer of A. H. Raskin, the respected columnist and editorial writer for the New York Times who specializes in reporting on labor issues. Recently, Mr. Raskin wrote an article on labor-management cooperation which appears in the February 1977 issue of Psychology Today. He pointed out that efforts to improve the quality of working life and increase the participation of workers in the decisionmaking process are growing throughout the world, particularly in the United States and in the industrialized democracies of Western Europe.

The principles cited by Mr. Raskin have wide application. Efforts to improve economic performance by encouraging the full use of the talents and capabilities of American workers can and will benefit every segment of American society: Workers and management alike.

Such principles are embodied in the Human Resource Development Act, H.R. 2596, which I introduced into the Congress on January 27, 1977. At this time I would like to insert into the RECORD the full text of Mr. Raskin's article:

THE HERESY OF WORKER PARTICIPATION

(By A. H. Raskin)

An insidious idea is penetrating the hierarchical cell-blocks of industry all over the world. A productive system built on the theory that efficiency is best attained through paramilitary lines of command is experimenting with the heretical notion that everybody may come out ahead if workers are recognized as grown-up human beings with useful contributions to make on how to do their jobs and even on how to run the company.

It would be preposterous to suggest that this concept is sweeping forward with the irresistibility of a tidal wave, but high levels of worker participation in functions traditionally reserved to management are already widespread in Western Europe's industrialized democracies. Gingerly moves in the same direction are being made by significant elements in American industry and labor.

The search for ways to improve the quality of working life by giving workers a more assertive voice in the work place stems from a spreading awareness that fatter pay envelopes and other conventional incentives are no cure for the frustrations many employees feel performing empty jobs in dreary factories or offices.

The expressions of job reform are infinite. In some places committees representing the workers are called in to help decide the basic layout of the factory and the types of equipment that will be used. Autonomous work teams rotate jobs, map production schedules, assign time off, propose departmental budgets, and take over most of the responsibilities of first-line supervision.

In many cases workers designate foremen from within their ranks, leaving their former bosses free for more challenging duties. Even such sacrosanct managerial prerogatives as the power to hire or fire are now occasionally entrusted to departmental work groups. In line with this trend, some companies are permitting workers to establish their own pay systems.

The rigidities of the old five-day, 40-hour work schedule, with every worker punching in and out at the same time, have been relaxed. In many enterprises, including such robotized bureaucracies as the Social Security Administration in Baltimore, flextime arrangements now allow workers, especially mothers with small children, plenty of latitude about when they come to their desks and when they go home.

The sabbatical has stopped being something for teachers only. In a handful of companies, executives and other key personnel get a year off with pay or half-pay every 10 or 15 years. The union contract covering steel workers gives them three months of paid vacation every five years in addition to normal paid time off of four to six weeks each year. Pressure is building up in many industries to introduce midcareer sabbaticals as a means of letting employees go back to school as adults and reconsider what they want to do with their lives.

Perhaps the most intelligently planned and most cooperatively engineered American experiment aimed at increased shop-floor democracy is the one jointly sponsored for the last three years by the General Motors Corporation and the United Automobile Workers. Their experiments in trying to make jobs more satisfying to the workers range from job realignment and redesign to troubled-employee programs geared to assisting workers with family and mental-health problems. Educating foremen and union-shop stewards away from adversarial attitudes has been a major stumbling block in some plants, but both sides are enthusiastic about the overall results.

None of these innovations is introduced as an indulgence to the work force. The initiative usually comes from management itself out of recognition that a younger and better educated work group, brought up in an era of skepticism about the eternal correctness of established values, is more likely to be productive if it senses that there is some worth and purpose in what it is doing.

Not every employer who comes forward with a project for job enrichment is genuinely interested in fostering more industrial democracy. His motive may be just the opposite—to build a wall against unionization of his business; or to create a mechanism for speeding up production without adequate sharing of the financial benefits with his workers.

Fear of such manipulative designs on the part of management has made most American union leaders suspicious of the whole trend toward increased worker involvement. No labor movement in the free world supports the basic tenets of capitalism the way labor in the United States does, which may help explain why it is so distrustful of anything that seems to erode the dividing line between managment and labor in the enterprise system.

George Meany is as dedicated as any pillar of the Naional Association of Manufacturers to the proposition that it is management's function to manage and it is labor's function to represent the interests of employees at the collective-bargaining table. That is why, even in the new climate of experimentation, almost nothing is being done in this country toward putting worker representatives on corporate boards of directors. Such representation has been general in West Germany since World War II and is now being established by law as a requirement in most of the Common Market and Scandinavian countries.

The theory does not always hold. Not every worker wants a job with variety and challenge. Even some well endowed with imagination prefer to dream their private dreams while going through the metronomic routine of a slumberous assignment. Many jobs, by their very nature, can never be anything but drudgery, devoid of pride or inspiration, however ingenious the attempts at reform.

What eventually evolves in the U.S. will undoubtedly differ from the patterns now taking shape in Europe, but the shifts already discernible point away from the dehumanizing effects of an economy dominated by multinational conglomerates toward increased self-fulfillment in the workplace.

DAVID LEVY ON VIOLENCE AND THE NETWORKS

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. WAXMAN. Mr. Speaker, over the past 2 years, increased attention has

again been focused on the amount and pervasiveness of violence on television. In that time we have witnessed the formulation and termination of the family hour, the mobilization of public opinion against the continuing exhibition of gratuitous violence on the screen, the involvement of groups such as the American Medical Association and the Parent-Teacher Association in efforts to educate the public and guide a consumer-based response to televised violence, and the endeavor of the National Citizens' Committee for Broadcasting and such firms as J. Walter Thompson to identify for the public the sponsors of violent programing.

The result of these efforts has been an inceased awareness on the part of the American people, the advertisers, and the Hollywood production community that it is possible to bring the widespread desire to limit televised violence to bear on the networks, who exercise ultimate responsibility over which programs will be produced. People are demanding that television shows be less violent. Advertisers are beginning to refuse to sponsor violent programing. The Hollywood production community is forcefully expressing its desire to create new and imaginative shows, with broad appeal, which are not constrained by the lowest common denominator of action entertainment.

The House Subcommittee on Communications has provided, over the last year, a forum for the expression of views on this issue. On March 2, we will continue our hearings by receiving testimony from the networks, the FCC, the National Association of Broadcasters, and others who have a central obligation to be responsive to these concerns.

The subcommittee's hearings in Los Angeles in August 1976 generated several suggestions from many constituencies as to how to approach the issues presented by televised violence.

At that time, David Levy, a noted and talented producer, joined three of his colleagues in speaking for the caucus, a group of more than 100 of Hollywood's leading producers, writers, and directors. The caucus has worked informally but closely with the networks to evolve an imaginative response to the need to broaden the current base of television programing.

Recently, David Levy published an article in the Los Angeles Times which suggested that the networks voluntarily reach a consensus on newer, alternative standards for programing—a consensus which would foster the development of nonviolent entertainment with the potential for attracting large audiences.

I believe David Levy's proposal has some merit, and can make a beneficial contribution to our continuing review of these concerns. I am pleased, therefore, to attach his article for the consideration of my colleagues:

[From the Los Angeles Times, Jan. 30, 1977]

TV VIOLENCE: A SCRIPT FOR VOLUNTARY CLEANUP

(By David Levy)

The growing movement to do something about violence on television found a focus last week in Chicago, where the national PTA held hearings and discussed possible action against the major networks. Challenges of television station licenses and boycotts of crime programs' sponsors were spoken of as possible options.

One spokesman for the industry was nearly shouted off the stage when he asserted that "television is the least permissive medium in a very permissive age" and added, "There is honest confusion about what is violence."

The PTA, which has been criticizing gratuitous, excessive and socially harmful violence on television for years, will hold a similar hearing in Los Angeles Feb. 22 before drafting a final report and announcing a course of action.

We know there is violence on television. And if there is a cancer that threatens to destroy much of the good that television has to offer, it is violence.

No network official, no advertiser—except, perhaps, the manufacturers of guns whose products get a free ride on television in (living?) color—can defend the large number of shows in which blood and mayhem, brutality and sadism, pimps and prostitutes and hoodlums, mangled bodies and corpses are essential ingredients of storytelling. And who can defend the practice of bringing into our homes graphic illustrations of how to commit a rape, mug the elderly, steal the price of a "fix" or solve human problems with gunfire? What pride can there be in offering so many programs with such tasteless ingredients?

The men and women who operate the networks and those who commit advertising funds supporting programs of dubious quality are caught in the bind. The networks seek vast audiences in order to sell their products. There is nothing wrong in reaching for large numbers, but the result has been an overuse of action adventure programs, meaning mostly police and private-eye series.

Network officials have firm policies that prohibit the excessive use of violence, but the interpretation of what is or is not excessive varies. There is, however, near unanimity in most quarters about the central issue: There is simply too much violence on the air no matter how well justified individual violent actions may be in the development of a particular story.

What should be done about it? First, network officials should be congratulated on their Second Season schedules which recently were announced. The scheduling of Who's Who and the success of CBS' 60 Minutes in prime time are encouraging signs that viewers may soon be seeing more varied, and possibly more worthwhile, television. Another telling sign for the future is the indication that the scheduling of contemporary "action" shows apparently has reached its peak.

Still another sign of change for the better came when Robert T. Howard, president of NBC television, promised last week that the network will deemphasize violence in the future. He said there are few crime programs among the 50 new pilot programs to be announced in mid-April.

No business is more competitive than network television. The battle for ratings—which simply means the drive to obtain the greatest number of viewers each half hour—places severe strains on the networks. If one kind of show is a ratings winner, then that type will proliferate despite public criticism.

The violence problem is exacerbated by the fact that crime dramas are naturals for late evening scheduling. The Family Hour, whatever the motives of those who decreed it, was responsible for the unfortunate concentration of such programs into the last two hours of prime time, 9 to 11 p.m., thus creating the heavy impact of "crime time."

That, plus the long-established practice of block programing—a successful type of program almost inevitably is followed by a similar program—helps create the sheer tonnage of crime drama. Since crime drama plays better in one-hour form, two such programs scheduled back-to-back make such action adventure extremely visible.

Much criticism of television violence in the past has come from groups like the PTA, government agencies, the surgeon general's office and the academic community. Now they are being joined by important advertisers such as General Foods Corp. and advertising agencies such as J. Walter Thompson. Obviously the time is ripe for something to be done about it, and the framework for doing so is already in place.

The practical way for the three networks to cut the number of crime programs without affecting their competitive standing would be for them to use the neutral offices of the Dept. of Justice. The networks recently approached the Justice Dept. for approval of pooling their resources in assuming the costs of broadcasting the 1980 Olympics. Through its business review procedure, the Justice Dept. helps industry ascertain in advance whether contemplated joint actions might trigger antitrust suits.

The three networks could use this same machinery as a pragmatic way out of their dilemma. They would not have to take public positions on whether crime programs are too violent, and no question of censorship would be involved. They would simply notify the Justice Dept. that they were planning mutual actions dealing with violence and were doing so in the public interest.

They might then agree on voluntary action along these lines:

Prohibition of back-to-back crime time programing, which would break up the 9 to 11 p.m. concentration.

Limitation of a crime series to no more than 90 minutes per episode.

Limitation of the number of such programs, perhaps to two or three per week per network, possibly by the start of the 1978–79 season.

Such voluntary action would give the networks sufficient time to develop new program formats for the 1978 season and allow the producers of such programs to turn their resources toward new forms. It should, in part, satisfy the social critics of television, be approved by sponsors who find the advertising of their goods and services often incompatible within programs of contemporary violence and should win the applause of the public as a statesmanlike move to improve the general quality of network programing.

It would be appropriate, I think, for the PTA, the advertisers and other interested groups to urge the networks to begin such a course of voluntary action. In addition, the National Assn. of Broadcasters should endorse the idea and call on its members to adopt the same vountary restrictions as the networks.

HOUSE OF REPRESENTATIVES—*Thursday, February 17, 1977*

The House met at 11 o'clock a.m.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

I am come that they might have life and that they may have it more abundantly.—John 10: 10.

O Thou who art the life of the true-hearted and the light of the whole-hearted, we pray that the guidance of Thy Spirit and the graciousness of Thy presence may bring forth the best within us as we labor together this day. Out of the depths of our need we come seeking insight and inspiration for those of us charged with directing the affairs of our country.

Undergird us by Thy grace that we may be diligent in our efforts, dependable in our loyalty, and dedicated to our high desire that justice and peace may be realized on our planet. Together may we go forward to build a stronger nation and a better world with life and liberty for all.

In the spirit of the Master we offer this our morning prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

THE CONGRESSIONAL PAY RAISE

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, regarding the proposed congressional pay raise, let me say this.

We find ourselves in this harsh winter of 1977 with literally millions of our citizens out of work. Inflation has reduced the value of every dollar. Prices have risen to such levels that many of our citizens on modest incomes cannot afford even the basic necessities of life.

In this cold winter, we see schools forced to close for lack of heat. We see people thrown out of work by factory and business shutdowns. We see utility bills so high that literally hundreds of thousands of our citizens cannot pay them—certainly not those on fixed meager incomes where a single utility bill may exceed a pension check.

In other times and in different circumstances, a pay raise "maybe." But in times as dire as these, a pay raise for Members of Congress of $12,900 a year, more than many of our people earn, to be paid for by those suffering the ravages of inflation and unemployment, is nothing short of unseemly. Surely, we do not want to be compared with Marie Antoinette who, when told the French poor were without bread, said, "Let them eat cake."

This proposed pay raise—costing millions of dollars a year—is now scheduled to become law without requiring a single Member of this House to go on record. True democracy cannot function this way.

Mr. Speaker, I most respectfully call for the leadership of this distinguished House not only to permit, but to require, a vote on this question—and to hold us here in session, however long it takes, to get this matter out of committee and brought to a record vote in the whole House.

Mr. Speaker, let us vote this pay raise either up or down, and let the people to whom we are accountable be the judge of our actions.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO FILE REPORT ON H.R. 3347

Mr. MAHON. Mr. Speaker, I ask unanimous consent that the Committee on Appropriations may have until midnight tonight to file a report on the bill H.R. 3347, rescinding certain budget authority recommended in the message of the President of September 22, 1976.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION TO CONSIDER H.R. 3347 IN THE HOUSE AS IN COMMITTEE OF THE WHOLE

Mr. MAHON. Mr. Speaker, I ask unanimous consent that when the bill H.R. 3347 is called up, that it be considered in the House as in the Committee of the Whole.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

THE CONGRESSIONAL PAY RAISE

(Mr. REGULA asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. REGULA. Mr. Speaker, I rise to speak in opposition to the proposed congressional pay raise.

Failure of the House of Representatives to vote on the pay raise issue represents an abandonment of our constitutional responsibility. We have been elected by the people to represent their interests and to provide leadership for this great Nation.

Allowing a pay raise to become law without a vote will erode confidence in our Government and make the speeches in this Chamber calling for sacrifice in reducing inflation a mockery and an exercise in hypocrisy.

During my tenure in this body I have voted against pay raise bills and additions to expense allowances to make it clear to my constituents and the American people that our call for sacrifice is one of deeds and not just empty words.

I have sponsored legislation to prohibit pay increases becoming effective during the term of those voting for them.

Members of this body are entitled to a reasonable compensation for their services. Let those we represent judge our actions on their behalf by putting each Member on public record on the issue of congressional salaries. Only by so doing do we deserve their confidence and respect.

During the past 4 years I have heard many eloquent speeches in this Chamber demanding openness and accountability in Government. If these are to be believable I urge you and the Members of your party to join JOHN RHODES, the Republican leader, in putting the issue of pay raises to a recorded vote in full view of the American people.

CONGRESSIONAL PAY RAISE

(Mr. CORCORAN of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CORCORAN of Illinois. Mr. Speaker, yesterday, the Ad Hoc Subcommittee on Presidential Pay Recommendations of the Post Office and Civil Service Committee held its final meeting. That subcommittee refused to take the steps necessary to bring the matter of salary increases to the full committee and to the House for a recorded vote.

As one of the original cosponsors of House Resolution 115, which would disapprove the President's recommendations, I am disappointed with this action, or lack of action.

For those of us who oppose this pay raise, and the methods by which it is being brought about, there is still a chance, however slim, of defeating this measure. Yes, it will require major parliamentary maneuvers; yes, it will be a wrenching and traumatic experience; yes, it will put us on the spot. But I believe there is no other way for us to face up to our responsibilities as the elected representatives of the people than by a recorded vote on this issue.

I will not dwell on the reasons why I am opposed to an increase in congressional salaries. I have stated those reasons before, and many of my colleagues have stated the same objections themselves. Further enumeration of those arguments would serve little—if any—purpose. Instead, I would like to elaborate on the reasons why this House should, at the very least, have the political courage to take a vote on this issue.

There is, of course, the right of the people to know where each of us stands on this issue. If some of our Members feel a need for increased compensation, then

they should be willing to go before their constituents and support their position.

More important than this, however, is the need for this House to be candid with itself. Many of the Members of Congress have bemoaned the reckless spending policies in which this country has indulged. Only yesterday, a column in the Washington Post predicted that Congress will be taking a hard line approach to pay raises for Federal employees. If we really believe what we say about the need to cut Government spending, then we must prove it.

The people of this country are already convinced that we in the Congress are more concerned with ourselves than with the good of the country. By refusing to at least go on the record in this matter, we will only confirm that suspicion.

In short, Mr. Speaker, this Congress must hold itself accountable to the American people. They expect, and deserve, no less.

FOR ECONOMIC RECOVERY WITHOUT INFLATION LET US CUT THE TAX RATES INSTEAD OF TRYING TO SPEND OUR WAY

(Mr. KEMP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KEMP. Mr. Speaker, in my remarks yesterday I mentioned that the Revenue Act of 1964 was the most substantial tax reduction the Congress has ever authorized since the 1920's. Its impact was such that total individual income tax liabilities were reduced by approximately 20 percent. This was accomplished primarily by reducing the highest marginal tax rate from 91 to 70 percent, and reducing the lowest rate from 20 to 14 percent. The immediate results were evident in a rise in employment and a drop in inflation with a sustained period of real economic growth.

Today, however, a considerable amount of inflation has eroded real income and vital investment in our economy. This has had the effect of pushing all incomes into higher tax brackets without increasing the real purchasing power of those incomes. The result is that almost everyone is paying a higher proportion of their income in taxes than they were in 1964.

By way of illustration, in the early 1960's only about 3 percent of all tax returns were subject to marginal tax rates over 30 percent. Today, nearly a third of all tax returns are in these higher brackets. If Congress does not act, there will be a 25- to 30-percent increase in taxes for all Americans by 1981.

Mr. Speaker, high tax rates have built into our tax system strong disincentives to production, investment, and employment which in turn is preventing real economic growth. If we can remove these disincentives by substantially reducing tax rates in the same way President Kennedy did in the early 1960's, we will have such a stimulus to new investment, production, and jobs creation that the Treasury would actually make up for the tax cuts through increased revenues and reduced transfer payments. This is precisely what happened after passage of the Revenue Act of 1964. I think it is time we followed that example and left more money in the hands of hard-working American people. In the interest of equity and in the interest of stimulating work production and investment, I urge the Congress to adopt a permanent reduction in the tax rates for all.

APPOINTMENT OF COMMITTEE TO ESCORT THE PRESIDENT OF THE UNITED MEXICAN STATES INTO THE CHAMBER

The SPEAKER. The Chair appoints as members of the committee to escort the President of the United Mexican States into the Chamber the gentleman from Texas (Mr. WRIGHT), the gentleman from Indiana (Mr. BRADEMAS), the gentleman from Washington (Mr. FOLEY), the gentleman from Wisconsin (Mr. ZABLOCKI), the gentleman from Texas (Mr. YOUNG), the gentleman from Texas (Mr. GONZALEZ), the gentleman from California (Mr. ROYBAL), the gentleman from Texas (Mr. DE LA GARZA), the gentleman from Texas (Mr. KAZEN), the gentleman from Louisiana (Mr. LONG), the gentleman from Arizona (Mr. RHODES), the gentleman from Illinois (Mr. MICHEL), the gentleman from Michigan (Mr. BROOMFIELD), and the gentleman from New Mexico (Mr. LUJAN).

RECESS

The SPEAKER. Pursuant to the order of the House of Monday, January 31, 1977, the House will stand in recess subject to the call of the Chair.

Accordingly (at 11 o'clock and 6 minutes a.m.), the House stood in recess subject to the call of the Chair.

MEETING BY THE HOUSE OF REPRESENTATIVES TO HEAR AN ADDRESS BY THE PRESIDENT OF THE UNITED MEXICAN STATES

The SPEAKER of the House presided.

The Doorkeeper (Hon. James T. Molloy) announced the Ambassadors, Ministers, and Chargés d'Affaires of foreign governments.

(At 11 o'clock and 35 minutes, a.m.,) the Doorkeeper announced the President of the United Mexican States, President Jose Lopez Portillo.

President Lopez Portillo, escorted by the Committee of Representatives, entered the Hall of the House of Representatives, and stood at the Clerk's desk.

[Applause, the Members rising.]

The SPEAKER. Members of the House, it is my great privilege, and I deem it a high personal honor and pleasure to present to you His Excellency, Jose Lopez Portillo, President of the United Mexican States.

[Applause, the Members rising.]

President LOPEZ PORTILLO. Mr. Speaker, distinguished Members of Congress, it is a great honor to stand before you and a privilege to bring you a message from my people, the people of Mexico.

I seek understanding, balance, and respect.

I offer our good will; good, because in our circumstances we are willing to treat others as we would wish others to treat us, even if those circumstances were changed. That, I know, is the golden rule, valid among men as among nations. By following it, we can become better people and rise above that other law which holds that he who owns the gold makes the rules. The world of the arbitrary is based on the latter. The world of democracy, of the just, is based on the former.

Allow me to refer to some known facts:

We are geographic neighbors, sharing a border more than 3,000 kilometers in length. We exemplify two different historical experiences within the concept of what was, at one time, a new world.

You constitute a powerful political unit, and it is difficult to be powerful.

We are a long way from being powerful. It is also difficult to be the neighbor of a nation as powerful as yours. We run two grave risks: arrogance, which is easy but sterile, and submission, which is easy but abject.

We have chosen instead the difficult path of dignity, based on the liberty we want to maintain and the responsibility we wish to assume. That path has brought me here today.

To those who hold to one of the extremes of our ideological geometry, my presence here means that I have come to receive instructions from the seat of empire; to adherents to the other extreme, it means that I have come to smooth the way for denationalized and untrammeled business.

Rather, I affirm that I have come before you as the Constitutional President of my country to present the real facts of our situation and the problems they imply at a moment which is of critical importance to us. What can a president offer, and what should he demand of his powerful neighbors, when he is convinced, as I am, of the actuality of the Mexican Revolution and of the political option it entails, whereby we seek to combine liberty with justice in a world in which, as we have said before, there are those who sacrifice liberty to justice, others who have instituted a Leviathan of order, sacrificing both liberty and justice, and still others who have lost everything in a sea of disorder?

We want understanding. I have studied the American Revolution at length. I know that the Constitution of the United States is the rational product of the Age of Enlightenment. It was the first to be written, and is now almost two hundred years old, which speaks for the genius and congruity of the illustrious men who laid the foundations on which it is based.

Lincoln, that colossus of your history, said that this nation was "conceived in liberty and dedicated to the proposition that all men are created equal". That same conviction recently led President Carter to state, with solid and simple pride, that "We have found a high level of personal freedom and are now struggling to bring about equality of opportunity". That is what gives strength and effectiveness to American democracy. We for our part share the same concern.

I would like our democratic stand to be well understood: before we can guarantee equal opportunities we must guarantee equal security, because there are painful inequalities in our internal situation that are due to a lack of real capacity. And that security—security against such elemental risks of life as hunger, disease, ignorance and neglect—can only be provided as a service of the state. This is in plain terms what we call "social justice": the just treatment which a society owes to any man who belongs to it, independently of his own capacity, and which is aimed at improving that capacity. That is our dream. It entails cost and requires generation of wealth.

Because of this, democracy is defined in our Constitution not only as a regime of law or political system, but also as a life-style based on the constant economic, social and cultural improvement of our people. That is the abiding purpose of our Revolution, now institutionalized. Josephus Daniels, an unforgettable American ambassador, showed that he understood this clearly when, in 1941, he said: "Mexico has its own particular concept of Revolution. It has come to regard good government in the light of its revolutionary practice. While with others, 'revolution' is a stage reached, preached and passed, with Mexico it is a continuing and vital condition to successful government that it shall first be 'revolutionary'. Hence progress is its hallmark".

In meeting this challenge, we do not want the present circumstances to make us lose our way or our structures by forcing us, as others have been forced, to extremes. We know our Revolution is still alive.

Undoubtedly, these are difficult times for the whole world, but they are particularly grave for those of us who live in developing countries. Growth problems find no solution in what remains of the Bretton Woods system. To our monetary, financial and trade problems we must add the technology gap and multinational forms of organization. To none of these situations do we have answers that depend on us.

Developing countries face a colossal debt. Serious growth problems exist, and in order to survive, those without oil have even begun to export the products they need to maintain and improve their standards of living.

In the face of this dramatic situation we could, of course, try to find who is guilty or who is responsible. I would counsel, however, that we seek what is most essential—those who can provide a solution—rather than to punish the sinners.

I consider that for some time now, individual nations have been unable to solve basic problems by their own efforts alone. International solutions are inevitable, and there are, of course, many: some bilateral, others multilateral; some specific, others general.

Some are based on dominating political hegemony, others on economic power, including that power which is beginning to be dangerous even to the powerful—a stateless, faceless power that is transnational.

None of these hegemonic solutions clearly reveal their purposes, nor do they expose themselves to the light of reason, right or simple conscience.

My people believe that national lacks can only be remedied by rights and obligations assumed through sovereign, free and responsible participation in open and established forums.

This is the alternative the world faces: hegemonies that are veiled because they cannot be openly admitted, or sovereignties that make commitments because in doing so they express their will to improve; the road we want to follow is the latter. I speak on behalf of my people's sovereignty before the representatives of the sovereignty of the American people.

We share a common reality. Let us make of its contradictions a conscious, open and rational expression of problems. In this way we shall move forward toward a solution favorable to both. Our shared problems involve both people and the exchange of goods and services. Some are licit, others are not.

We are neighbors, and we shall go on being neighbors as long as the earth circles the sun.

We are aware that the United States is concerned over many problems with many countries. Mainly, of course, with industrialized nations: problems of security, nuclear balance, limitation of the arms race, the search for favorable conditions for United States trade and foreign investment, as well as other questions such as exploration of the moon, Mars and, soon, Jupiter. Someone must attack these problems in order to face the future.

There are also questions pending between this great nation and developing countries: the Middle East conflict, currently in abeyance, with its implications for oil politics, and in Asia and Africa, problems of hegemonic influence, of poverty, oppression and racial discrimination, which forebode international turbulence in the near future.

It would appear that for the United States, the basic problems with Latin America are limited to the negotiations on the Panama Canal and the evolution of relations with Cuba. The repression of human rights in Chile constitutes another though lesser irritant, due to the reaction of the American liberal sector.

As far as Mexico is concerned, a special policy was established in 1933, when President Roosevelt stated: "In the field of world policy I would dedicate this nation to the policy of the good neighbor—the neighbor who resolutely respects himself and because he does so, respects the rights of others—the neighbor who respects his obligations and respects the sanctity of his agreements in and with a world of neighbors".

Nevertheless, owing to recent events, incidents which under different circumstances would have been dealt with by our embassies, have been ruthlessly brought to light and given unprecedented publicity that has exposed them to the attention of the American public in a sometimes virulent and not always objective manner.

A whole series of factors has transformed the traditional relations between Mexico and the United States. Financing, trade, currency, foreign investment, tourism, migrant labor, drug traffic, prisoners, and relations with the Third World have all taken on new political dimensions.

All these problems derive from the different levels of development on either side of the long border which is the busiest in the world. In order of importance, you are our first client and we are your fourth. The balance of trade is very unfavourable to us and, at times, restrictions are placed on imports that might eliminate the deficit, thus aggravating our economic problems by causing unemployment. It is understandable that many of our men want to work in your country in order to improve their standard of living, as has been the case in other times and places. Due to these and other well-known and reprehensible reasons, some of our people, together with some of yours, cultivate drug crops and deal in narcotics. Therefore many of the problems that bother you the most are closely related to our economic problems.

Mexico must solve its own problems and you should examine those of your decisions which may adversely affect or undermine our development efforts and, above all, the spirit of the political ideal of international coexistence.

Mexico has never been, nor is it now, the leader of any continent or group of countries. Our past major conflicts have taught us hard lessons. We fought alone, and alone won our independence and liberties. Neither do we proclaim isolation, because it is politically unattainable in the world in which we live. If we propose solutions to improve the living conditions of different peoples, we do so with deep respect for their national characters, as we are convinced that universality can only be attained through national solutions. It is not a matter of leadership, but of participation.

I have come to contribute an awareness of reality and a conception of problems from our point of view, which we ask you to take into consideration. I have come to agree to continue reaching agreements, because neither dialogue nor analysis should cease.

I am here to remind you that our common American continent continues

south of the border, that it requires from your powerful nation the establishment of a sensible policy based on efficient mechanisms that will help to eliminate or reduce fundamental problems; a policy aimed at achieving a lasting equilibrium that only your government, as such, can establish, because the private interests that today almost exclusively rule our relationship are unable, or perhaps, unwilling to attain that balance.

I have come to insist that unless a new international economic order, based on rights and obligations, is put into effect, it will not be surprising if weak countries despair in the absence of guarantees of fair treatment that often means survival itself and seek to unite, as the strong do, in order to overcome our weakness when faced with lack of understanding or abuse. This is not a crime, nor does it deserve punishment; it deserves a solution.

In short, we, like you, want a better world for our children; we want to be freer and more respected; we want peace and justice. To a great extent, at least where my country is concerned, this depends mainly on the industrialized countries.

I have come to pose again a serious question that I once put before an international forum: Does humanity belong to the industrialized countries, or do they belong to humanity?

That is why I have said it is difficult to be powerful. But how gratifying it must be to know oneself to be strong and to deserve that power.

Thank you very much.

[Applause, the Members rising.]

At 12 o'clock and 10 minutes p.m., the President of the United Mexican States, accompanied by the Committee of Escort, retired from the Hall of the House of Representatives.

The Doorkeeper (Hon. James T. Molloy) escorted the invited guests, the ambassadors, ministers, and chargés d'affaires of foreign governments, from the Chamber.

The SPEAKER. The Chair announces that the House will continue in recess until approximately 12:20 p.m.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 12 o'clock and 22 minutes p.m.

PRINTING OF PROCEEDINGS HAD DURING RECESS

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the proceedings had during the recess be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

DISPENSING WITH BUSINESS IN ORDER UNDER THE CALENDAR WEDNESDAY RULE ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule may be dispensed with on Wednesday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

REQUEST FOR ADJOURNMENT OVER TO MONDAY, FEBRUARY 21, 1977

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, as the gentleman from Texas well knows, a great many of us would like to have a chance to vote on the issue of the pay raise. I am well aware of the action taken by the Committee on Post Office and Civil Service and the expressions that were made by the Speaker and others of the leadership here yesterday that we are to be denied that right. However, as the gentleman from Texas also knows, the pay raise will take effect, as I understand it, Saturday at midnight unless this House acts in some manner. We would hope that the leadership might reconsider its present stand and bring to the floor of the House, in whatever manner, either today or tomorrow, that legislation so that there could be a vote. And, against that remote possibility, we would also hope the leadership would be willing to remain in session.

Will the gentleman from Texas respond to that?

Mr. WRIGHT. Mr. Speaker, I would be happy to respond to the gentleman from Maryland if the gentleman will yield.

Mr. BAUMAN. I yield to the gentleman from Texas.

Mr. WRIGHT. Mr. Speaker, as the gentleman from Maryland fully recognizes, the rules of the House are being followed. I am sure the gentleman from Maryland makes no implication that anybody in the leadership on either side of the aisle has endeavored in any way, or in any respect or under any circumstances to thwart or obstruct or to change those rules. The gentleman from Maryland is also well aware of the rights and privileges available to every Member of the House. The rules are being followed and that is about all that one can expect of a parliamentary body.

Mr. BAUMAN. Mr. Speaker, I would ask the gentleman from Texas further is it then the majority leadership position that there is no possibility of a vote on the issue even in the event that we should stay in session?

Mr. WRIGHT. If the gentleman will yield still further, those possibilities exist within the rules of the House, I would say to the gentleman, and that if a manifest will existed among a substantial number of the Members of the House, that it would have been expressed in such a way that it would have brought this matter to the floor.

I think the gentleman from Maryland is aware of the numbers and is aware of the great thrust some years ago, in 1967, I believe, when the law was enacted creating the system, in which editorialists in the newspapers, and others, throughout the country, were urging that Congress take this question out of the political arena by creating a commission, and a high level, blue ribbon commission, to make those determinations. In response to those objections, and in response to that great will that it be taken out of the political arena, the Congress did enact that legislation, and the legislation is being followed. The law is being followed, I will say to my friend, the gentleman from Maryland, although it does seem difficult at times to get anything out of the political arena.

Mr. BAUMAN. I appreciate the very lucid response given by the majority leader. I do not think that anyone charges the law is not being followed or the rules are not being followed.

Obviously the gentleman knows what the request is that the gentleman from Maryland is making, and that others in the body have made repeatedly over the last few days, which is that we have a chance to vote. Obviously, if we are not here, we cannot vote, and so against the possibility that we might have a chance to vote, I would object to the request.

REQUEST TO CONSIDER HOUSE RESOLUTION 115

Mr. BEDELL. Mr. Speaker, I ask unanimous consent for the immediate consideration of the resolution (H. Res. 115) disapproving the recommendations of the President with respect to the rates of pay of Federal officials transmitted to the Congress for the fiscal year ending September 30, 1978, which was introduced by the gentleman from Iowa (Mr. GRASSLEY).

The Clerk read the resolution as follows:

H. RES. 115

Resolved, That the House of Representatives, in accordance with section 225(1) of the Federal Salary Act of 1967 (81 Stat. 643; Public Law 90–206), hereby disapproves all of the recommendations of the President of the United States within the purview of subparagraphs (A), (B), (C), (D), and (E) of section 225(f) of the Federal Salary Act of 1967, transmitted by the President to the Congress in the budget for the fiscal year ending September 30, 1978.

The SPEAKER. Is there objection to the request of the gentleman from Iowa?

Mr. BURKE of Massachusetts. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

REQUEST FOR ADJOURNMENT OVER TO MONDAY, FEBRUARY 21, 1977

Mr. WRIGHT. Mr. Speaker, I renew my unanimous-consent request that when the House adjourns today, it adjourn to meet on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. BAUMAN. Mr. Speaker, reserving the right to object, for the reasons previously stated, I do feel that we should stay here and vote on the pay raise issue. It would be my intention to ask for a roll call vote on the motion to adjourn if it is put, and we can interpret a no vote to show those who are willing to stay here. For that reason, I object.

The SPEAKER. Do I understand the gentleman from Maryland has objected?

Mr. BAUMAN. Yes, I object.

The SPEAKER. Objection is heard.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, I take this time to inquire of the distinguished majority leader the program for next week.

Mr. WRIGHT. Mr. Speaker, would the gentleman yield?

Mr. MICHEL. I will be happy to yield.

Mr. WRIGHT. Mr. Speaker, next week will be clearly the busiest week the Congress has had this session and will be undoubtedly one of the most important weeks that we can have throughout the year. For that reason I should like to suggest the importance of all Members' presence certainly from Tuesday on.

Mr. Speaker, on Monday the House will meet at noon. There are no bills scheduled for suspension and none for consent. By tradition the reading of Washington's Farewell Address will consist of the business for the day, Monday.

On Tuesday the House will meet at noon. There will be first a joint meeting to receive the Prime Minister of Canada.

Following that four bills are scheduled under suspension of the rules, and votes on suspension will be postponed until the end of all suspensions. Those bills will be:

H.R. 26—Providing for increased notice of air carrier fare charges;

H.R. 27—Providing reduced fare transportation for elderly and handicapped persons;

H.R. 735—Relating to eligibility for aliens to register aircraft; and

H.R. 736—Relating to requirements for emergency locator transmitters.

Following that there will be H.R. 3347, the helium rescission bill;

House Resolution 261—Providing for the Committee on House Administration Funding; and then

House Concurrent Resolution 110—The third concurrent resolution on the budget for fiscal year 1977, with general debate only to be conducted during that time.

Then on Wednesday we would hope that the House, meeting at 3 o'clock, would again take up the conclusion of House Concurrent Resolution 110, and we would hope to complete consideration of that resolution on Wednesday.

Thursday and the balance of the week the House would meet at 11 a.m. and be considering H.R. 11, providing increased authorization for the 1976 public works jobs program, subject to a rule being granted.

I should like to suggest that it is planned that the House will adjourn by 3 p.m. on Fridays and by 5:30 p.m. on other days except Wednesdays when circumstances may require us to meet quite late.

Mr. MICHEL. Do I understand now from the majority leader that the last statement he made would apply for all days for the balance of the session?

Mr. WRIGHT. This is a plan that has been agreed to earlier that would last for the first several months of the session, during which time we can test its validity and see how well it accommodates the problems and the needs of the House and the committees of the House. The idea would be that we would have a target that Members could rely upon for daily adjournment but that Members, because of that, must expect to remain on Wednesdays until all business is completed that has been scheduled for those days.

Mr. MICHEL. Let us take for example next Tuesday when there are several suspensions scheduled and general debate on the concurrent resolution, and we get to 5:30 and only half of the time has expired for the general debate, would it be the gentleman's view that we simply hold fast to 5:30 and carry over the general debate until the following day or would there be a degree of flexibility to the extent that there are only a few more speakers, let us wrap up general debate, so it does run to a quarter of 6 or 6 o'clock

Mr. WRIGHT. The plan would be to follow this program that was established earlier this year and scheduled to continue until May 15. That therefore would imply that we would rise or plan to rise at or about 5:30. It was hoped we would conclude most of the general debate by that hour. If we are unable to do so, then of course general debate would have to be continued the following day.

Mr. MICHEL. I thank the gentleman.

Mr. WRIGHT. I would say of course there is the usual reservation that conference reports may be brought up at any time and any further program may be announced later.

Mr. MICHEL. I thank the majority leader.

MOTION TO ADJOURN TO MONDAY, FEBRUARY 21, 1977

Mr. WRIGHT. Mr. Speaker, I move that when the House adjourns today it adjourn to meet on Monday next.

The SPEAKER. The question is on the motion.

The question was taken and the Speaker announced that the ayes appeared to have it.

Mr. BAUMAN. Mr. Speaker, I object to the vote on the ground that a quorum is not present.

The SPEAKER. Does the gentleman demand the yeas and nays or object to the vote?

Mr. BAUMAN. Mr. Speaker, I demand the yeas and nays.

The SPEAKER. May the Chair announce so the Members may understand, this is a question on adjourning to Monday next. If the House fails to adjourn to Monday we will meet tomorrow at 11 a.m. In the event there is no quorum tomorrow the House will meet on Saturday at 11 a.m. I just want the Members to understand the procedure and what may happen.

The gentleman from Maryland has asked for the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 109, nays 224, not voting 98, as follows:

[Roll No. 22]

YEAS—109

Alexander	Flood	Pattison, N.Y.

Messrs. STRATTON, MURPHY of Pennsylvania, BONKER, and FINDLEY changed their vote from "yea" to "nay."

So the motion was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair announces that when the House adjourns today, it will adjourn to meet tomorrow.

PERMISSION FOR COMMITTEE ON HOUSE ADMINISTRATION TO HAVE UNTIL MIDNIGHT TOMORROW, FRIDAY, FEBRUARY 18, 1977, TO FILE REPORT TO ACCOMPANY HOUSE RESOLUTION 287

Mr. THOMPSON. Mr. Speaker, I ask unanimous consent that the Committee on House Administration may have until midnight Friday, February 18, 1977, to file the report to accompany that portion of House Resolution 287 which was referred to and considered by the Committee on House Administration.

AN ACT OF FUTILITY

(Mr. CARTER asked and was given permission to address the House for 1 minute and revise and extend his remarks.)

Mr. CARTER. Mr. Speaker, if I ever saw an exercise in futility it has occurred just today. Why in the world do we vote not to adjourn when we have no business to be taken up on the floor tomorrow? If it is a protest vote then it is silly and it does not mean one thing and it is not going to inure to the benefit of the Members or to anyone else. But, for myself, I want to go back to the hills of Kentucky. Mammy Bradshaw is sick and I want to see her.

If we have any business here then I am willing to stay here.

I wish that some of the Members of this House would take a little courage into themselves and vote their convictions, which they are not doing, I am afraid—and I say that in all candor and sincerity.

Anyway, let us have a good weekend.

Thank you, Mr. Speaker.

THE HOUSE SHOULD VOTE ON THE PAY RAISE

(Mr. ALLEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALLEN. Mr. Speaker, in view of the vote that would keep us here tomorrow, I call on the most honorable leadership of this House to use their influence to bring from the committee, for our consideration tomorrow, the congressional pay raise bill so that we may go on record as voting it up or down, as the true democratic process demands. If we do not have the courage to do that, and to utilize this time when we are back here tomorrow, indeed, as the distinguished Member from Kentucky, Dr. TIM LEE CARTER, just said, it will be an act of futility and a total waste of time. But it need not be so if those in position of leadership will exercise their prerogatives and responsibilities.

PARLIAMENTARY INQUIRY

Mr. CARTER. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. CARTER. Mr. Speaker, I should like to ask the question of the majority leader as to the agenda for tomorrow.

The SPEAKER. The Chair will respond there is no business scheduled for tomorrow.

Mr. CARTER. I thank the distinguished Speaker. With his permission, then I will go back to the mountains of eastern Kentucky and see Mammy Bradshaw.

PARLIAMENTARY INQUIRY

Mr. DEVINE. I have a parliamentary inquiry, Mr. Speaker.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. DEVINE. Mr. Speaker, I make this parliamentary inquiry as a result of the vote not to adjourn over until Monday and the announcement that the House would reconvene at 11 o'clock tomorrow. Are there any circumstances that the Chair could perceive under which the pay raise legislation would be considered by the House tomorrow?

The SPEAKER. The only possibility would be if unanimous consent were asked, and the Chair would recognize a gentleman or gentlewoman for that purpose, and if there were not an objection, then there would be a vote. That would be the only possibility. The Chair has been informed that there will be objections.

Mr. DEVINE. I thank the Speaker.

THE HOUSE HAS ACTED

(Mr. FORD of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FORD of Michigan. Mr. Speaker, the question was just asked, and it is being asked elsewhere, how could the House act on the matter of the more than 23,000 people who are affected by the Presidential Pay Commission recommendation as submitted by President Ford. The House has acted. By unanimous consent the committee which I chaired invited all three major networks in, and they televised, live, the meeting, at which the Republican member of the committee who was present offered the same resolution that has been discussed here. Debate took place. Rollcall votes occurred, and by a vote of 4 to 1 and 4 to 0 we rejected each of the resolutions that was then pending before the committee.

The House has acted, Mr. Speaker, I submit in the way in which the House has traditionally acted ever since the creation of the committee system on important legislation. I, on the basis of the experience we have had with this committee, earnestly solicit the Members of the House who are playing games to understand that grandstand stunts will do nothing to enhance the public's understanding of its impression of the image of this institution. The tactics being followed today do nothing but keep us from getting on with the more important things this House should be doing.

Mr. CHARLES H. WILSON of California. Mr. Speaker, will the gentleman yield?

Mr. FORD of Michigan. I yield to the gentleman from California.

Mr. CHARLES H. WILSON of California. I should just like to serve notice that I will be here tomorrow, and I will be here Saturday, and I will be prepared to object to any request for unanimous consent on each day that we meet.

REQUEST FOR ADJOURNMENT OVER TO MONDAY, FEBRUARY 21, 1977, AT 11:30 O'CLOCK A.M.

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn until 11:30 o'clock a.m. on Monday next.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. BAUMAN. Reserving the right to object, Mr. Speaker, did I understand the Speaker's response to be earlier to the inquiry of the gentleman from Kentucky (Mr. CARTER) that there is no way the leadership will permit the pay raise to come up?

The SPEAKER. There is no way in which under the rules the leadership has any jurisdiction, nor in any manner whatsoever can the leadership of this House bring this resolution before the House. The Chair noticed that well over 219 Members voted not to adjourn, but there is no possible manner in which the leadership can bring this legislation up. The gentleman is well aware of that.

Mr. BAUMAN. The gentleman from Maryland, further reserving the right to object, regrets that this matter will not be permitted to come to a vote. In something of this nature and of this magnitude the gentleman from Maryland would have hoped the leadership would allow a vote. It is clear that many Members want such a vote in view of the fact that two-thirds of the House today voted not to adjourn.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. ASHBROOK. Mr. Speaker, I object.

I was on my feet and I object.

The SPEAKER. The gentleman was on his feet and the gentleman objects, and so when the House adjourns today it will adjourn to meet tomorrow at 11 a.m.

PROPOSED PAY RAISE

(Mr. MAZZOLI asked and was given permission to address the House for 1 minute.)

Mr. MAZZOLI. Mr. Speaker, I would appreciate the indulgence of the gentleman from Michigan in giving me some advice. I would propound a question to the gentleman from Michigan, if he is willing.

This pay raise appears to be inevitable and everything appears to be a foregone conclusion as of today. As the gentleman knows I appeared before his committee urging there be a vote on this issue. I wonder if the gentleman might clarify what happens next October, if the gentleman's committee does not report a bill or take any action on the congressional pay raise matters. Do we then become qualified for two separate automatic cost-of-living adjustments next October without having a vote on the issue?

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will yield I have to tell him honestly that my committee has outlined a set of recommendations which include the recommendation patterned on the Whalen proposal that would affect the matter when pay raises go into effect in the future, but we did not have before us nor did we consider the Comparability Act, which is not involved in the matter being discussed and which has everybody excited now.

Had this House and the other body not played some election year politics in 1974, we would not be facing the trauma that some people seem to feel over this issue at the moment. In 1975 for the first time, there went into effect a provision that linked the legislative compensation to the rest of the Government on automatic cost-of-living increases, and only one of the two adjustments since then has gone into effect. I found during these hearings that most Members of the House do not know what their salary is, because everybody thinks it is $44,600. It is not. It is over $46,800 now. But we voted in the House last year to deny ourselves the money in the current budget appropriation for legislative compensation. The statute that raised that level of compensation is still in effect.

And assuming that the cost-of-living index was on a continual rise, the recommendation or the effect of that statute would be to increase the compensation of everyone in the Government from the bottom to the top by the same percentage. Had we had that device in place and received exactly the same kind of adjustments that the General Schedule employees got, there would not be any adjustment necessary now. The Peterson Commission would have, we presume, reported that the compensation of the top executives and the judicial and legislative branches, as well as the chief of staff and the military people, who will receive an increase when the rate for Level V goes up, was adequate because it would have kept pace with the rest of the Government.

As it is, the automatic increases for the rest of the Government employees have amounted to approximately 65 percent during the period of time when the 23,000 plus people covered by this legislation received a 5-percent increase.

Mr. MAZZOLI. Mr. Speaker, I thank the gentleman for this information.

Mr. Speaker, I thank the Members of the House for indulging me.

Mr. Speaker, I do believe that come next October there will be two separate cost-of-living increases for us that will be effective without a vote, without any further action of the House.

Mr. Speaker, I would only say to the gentleman from Michigan that I admire the gentleman very much. I have worked with the gentleman in the Committee on Education and Labor. I would hope that the gentleman's committee would look into that matter.

Frankly, I think we are not entitled to anymore cost-of-living increases, but beyond that, to decide whether this procedure is the best procedure, I think, is the job of the whole House.

Mr. FORD of Michigan. There would only be one increase next October, not two, assuming that there is a comparability increase for the General Schedule employees.

ADJOURNMENT TO MONDAY, FEBRUARY 21, 1977, AT 11:55 A.M.

Mr. FORD of Michigan. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 11:55 o'clock a.m. on Monday, February 21, 1977.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

Mr. ASHBROOK. Mr. Speaker, I reserve the right to object.

Mr. SKUBITZ. Mr. Speaker, I reserve the right to object.

The SPEAKER. The reservation is already made.

Mr. SKUBITZ. Mr. Speaker, I would like to ask the gentleman from Michigan this question. In view of the fact there is not any business on the calendar for tomorrow and the statement that was made by the gentleman from California (Mr. CHARLES H. WILSON) that he will object to any unanimous-consent request that is placed before the body, does that mean that the meeting tomorrow would just be a useless gesture?

Mr. FORD of Michigan. Mr. Speaker, if the gentleman will yield, I suppose one could characterize it that way. I would like to assure the gentleman from California that I intend to be here as a backstop if the gentleman has to go to the bathroom or anything. I will be here to object.

I have just spent 2 of the most interesting weeks of my life in this body with a whole variety of people in this country who are trying to tell us what to do. I really feel very strongly that having legislated as openly as we did and held hearings and generated some 700 people's testimony that it is an insult to my committee as being representative of the entire committee structure of the House to be treated in this sort of shabby fashion; so I will be here to object until the cows come home. We will not get a vote on this issue if I can help it. We had a vote in my committee.

Mr. ASHBROOK. Mr. Speaker, further reserving the right to object, when the gentleman from Michigan made the motion a few moments ago, I did object. I do intend to withdraw that objection. I can see very clearly there is no chance

for a vote. My friend, the gentleman, has been very honest in saying that there is nothing to be gained by having a token session on Friday.

I am reminded a little bit, I would say, of the Broadway critic who observed a play some time ago and wrote, as a part of his review in a famous New York newspaper that, "a creeping paralysis set in, which turned out to be the plot."

I think in many ways that is basically what has happened here. We can see the plot, whatever else it is called. The American people can see it too. While I do have some reservations, I think it would be a vain thing to object, and on that basis, Mr. Speaker, I would withdraw my previous objection.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

BILL MOORHEAD AND JACK KEMP INTRODUCE THE NATURAL GAS STRIPPER WELL EXEMPTION BILL WITH BROAD BIPARTISAN SUPPORT

The SPEAKER. Under a previous order of the House, the gentleman from New York (Mr. KEMP) is recognized for 15 minutes.

Mr. KEMP. Mr. Speaker, my colleague from Pennsylvania (Mr. MOORHEAD) and I introduced the natural gas stripper well exemption bill this afternoon with broad bipartisan support. We were joined in that introduction by another 33 Members of the House.

This legislation is of substantial importance, and so is the nature of its support. Support for this bill has come not only from Democrats and Republicans alike, liberals, moderates and conservative alike, but also from those who oppose and those who support the total deregulation of natural gas. I think it cannot go unnoticed that one of its principal sponsors, BILL MOORHEAD, is one of the most knowledgeable authorities on energy and natural gas in the entire country, having served in prior sessions as the chairman of the House Subcommittee on Conservation, Energy, and Natural Resources.

Today's bill would exempt sales by small producers—very tightly defined—of certain natural gas from regulation by the Federal Power Commission and from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act. We are legislating here principally over the "mom and pop" wells throughout Appalachia and parts of the Midwest, where the only things these well owners usually have to their names are their land, a pickup truck, and these low-production wells. These owners are typically small farmers, trying very hard to earn a living. In recent years, the low wellhead prices for this gas have caused many wells to be capped. No one will ever know how many additional wells were not drilled. I add, parenthetically, that because of the constitutional questions which could be raised if we treated wells in Appalachia and parts of the Midwest differently from identical wells in other parts of the country, the bill has been written to include all low-production natural gas wells meeting the definitions in the bill. The principal effect, however, would be on wells in these Appalachian and Midwestern areas.

Our bill does not get into the broader questions of deregulation.

Our purpose here is to increase the flow of natural gas in interstate pipelines by getting capped stripper wells uncapped, by encouraging the testing of new or improved techniques to increase flows from stripper wells already flowing, and by providing more economic incentive to operate additional stripper wells.

This question is of particular importance to the Appalachian region, the Northeast, and the Midwest for two reasons. First, because these areas are where most of these wells are located, and additional wells and additional dollar resources will help the economies of those areas. Second, because this is where additional natural gas supplies are needed to reopen plants and businesses and public institutions, and to keep them open.

The gas we need brought to the surface through this legislation is very closely associated with the eastern gas shales question. These shales underlie 160,000 square miles in 13 States and contain tremendous volumes of natural gas now trapped within them. Current estimates range from 460 to 1,200 trillion cubic feet. That volume can best be understood by realizing that estimates of all natural gas reserves in the entire country—without those eastern field gases—is only about 240 trillion cubic feet. This gas is trapped below Pennsylvania, New York, Ohio, Illinois, Michigan, Indiana, Virginia, Alabama, Kentucky, Maryland, Mississippi, Missouri, Tennessee, and West Virginia.

Of all the natural gas now moving in interstate commerce, about 2 to 3 percent of it derives from stripper wells. Inasmuch as the latest natural gas shortage shows us just how close—how narrow the dividing line is between having enough gas or not having enough—one can see the importance of doubling or tripling the output from these stripper wells. One can also see the little effect it would have on the final price of natural gas at the burner tip for consumers. Yet to the small producers who own these wells, it would be enough to uncap them, try to increase the flow, or start up new ones.

Several questions have been raised about this legislation, since we proposed its introduction, and I think they should be addressed. I have already addressed myself to the question as to which areas of the country are legally and effectively encompassed by the definition in the bill. But there are others.

Where did the definition of small producer—not in excess of 10 million Mcf per annum—come from? It is Congress most recent definition of a small producer, found in the changes in the tax laws on depletion allowances of last Congress. That was the cutoff used in that law, and we felt it best to stick with Congress most recent indication of what it considered to be a small producer.

Where did the pressure definition—14.05 psia—come from? This is the standard pressure classification used by the regulatory agencies.

How do we know this seemingly innocuous bill is not a backdoor way of helping the big natural gas companies? This is taken care of in the definition of the small producer. A small producer will mean an independent producer of natural gas—so right there we declare the producer must be an independent—first, who is not affiliated with a natural gas pipeline company or a producer who is not included within this definition; two, whose total sales of natural gas on a nationwide basis, together with such sales of affiliated producers, are not in excess of 10 million Mcf at 14.05 psia during any calendar year; and, three, whose average production per well for all wells for such calendar year is not in excess of 100 Mcf per day. An affiliated producer is defined as those persons who, directly or indirectly, control or are controlled by, or are under common control with, a small producer. I cannot think of a tighter definition.

Does this exemption of one size of natural gas producer not undercut efforts to deregulate the entire industry? It may or it may not, but I think Congress' principal responsibility is to assure an increased flow of natural gas to homes, factories, schools, and other institutions, and this bill would help do that.

I think this answers all the questions which were raised.

The following Members joined in the introduction of today's legislation:

Mr. ASHLEY of Ohio.
Mr. BROWN of Ohio.
Mr. DAN DANIEL of Virginia.
Mr. DENT of Pennsylvania.
Mr. DERWINSKI of Illinois.
Mr. DEVINE of Ohio.
Mr. DUNCAN of Tennessee.
Mr. EDWARDS of Oklahoma.
Mr. FLIPPO of Alabama.
Mr. GUYER of Ohio.
Mr. HARSHA of Ohio.
Mr. HYDE of Illinois.
Mr. KEMP of New York.
Mr. KINDNESS of Ohio.
Mr. LOTT of Mississippi.
Mr. MADIGAN of Illinois.
Mr. MOLLOHAN of West Virginia.
Mr. MOORHEAD of Pennsylvania.
Mr. MOORHEAD of California.
Mr. MURPHY of Pennsylvania.
Mr. MURTHA of Pennsylvania.
Mr. NEAL of North Carolina.
Mr. PERKINS of Kentucky.
Mr. PREYER of North Carolina.
Mr. PRICE of Illinois.
Mr. QUILLEN of Tennessee.
Mr. RAHALL of West Virginia.
Mr. REGULA of Ohio.
Mr. RUDD of Arizona.
Mr. STOCKMAN of Michigan.
Mr. SYMMS of Idaho.
Mr. VANDER JAGT of Michigan.
Mr. WALSH of New York.
Mr. WHITEHURST of Virginia.
Mr. YATRON of Pennsylvania.

Mr. Speaker, I wish the leadership of the House and of its energy committees

was insisting upon the immediate consideration of energy and natural gas legislation. I personally do not see any reason why we should wait on public hearings until the President's message comes up to us on April 20. Much could be done before then, considering the President's message once it got here. But, when you are in the minority, there is little one can do about that.

It is my hope, therefore, that my friend, Jim Schlesinger, and his associates will incorporate the provisions of today's bill in their proposals to the President, and that the President would accept them. Should this not be the case, I would hope the Congress would incorporate today's bill in any legislation it sends back to the White House for signature.

This legislation could have been passed by the House last year. Two of my colleagues from the other side of the aisle, JOHN MURTHA, from Pennsylvania, and BOB MOLLOHAN, from West Virginia, and I put this text into the RECORD in December of 1975, announcing our intention to offer it as an amendment to the Krueger natural gas bill. We were on the floor preparing our remarks the next month, when that legislation was suddenly transformed by a substitute amendment changing its entire character. We never did, therefore, have the chance to offer it.

It is a new ball game this year. The need for additional natural gas is more apparent than ever. The cosponsors for our bill is both much larger and more influential. I hope it will become law this year.

Mr. Speaker, one of the best articles written in years on the importance of drawing the natural gas locked in the eastern shales out of those shales appeared in this month's issue of Petroleum Independent. Authored by W. Gibson Jaworek, a Ph. D. in geology and former chairman of the Independent Petroleum Association of America's Cost Study Committee, this article shows what must be done to get more of this gas to market. It is very closely related to the bill we introduced today.

That article follows:

THE DEVONIAN SHALE FRAC

(By W. Gibson Jaworek)

New ideas and solutions for solving the US energy supply deficiency may require more careful review by producers of geologic formations in geographic areas long thought devoid of significant remaining oil and natural gas. The Devonian gas shales of the Appalachian Basin are such an example.

The shales, often called black and/or brown shales, underlie 160,000 square miles in 13 eastern states and range in thickness from a few feet to over 8,500 feet. Much of this shale contains natural gas. Current estimates range from 460 to as much as 1,200 trillion cubic feet. Even though more than 600,000 and possibly 750,000 wells have been drilled in the area, few have tested the eastern portion of the Basin where the shales are thickest.

The U.S. Energy Research and Development Administration (ERDA), with support of the 13 states in the Appalachian region, has initiated an eight-year program. "The Eastern Gas Shales Project," to stimulate increased commercial production of natural gas by providing reliable resource (geologic) data and developing economic extraction (fracturing) alternatives for the low-permeability shale formations.

The program funding, excluding monies provided by industry for commercial demonstration tests, is approximately $10 million in FY 1977, and planning budgets through FY 1983 are projected to cumulatively amount to $80 million. As a minimum objective, the program is expected to add 3.5 trillion cubic feet of reserves of gas in the Appalachian Basin and triple the average open flow production rate of new shale wells through fracturing improvements, while doubling the average total gas reserves added per well drilled. The results could be much greater.

For the independent producer active in the Appalachian Basin, the research program promises a revival of drilling for an area which has been nearly dormant for many years.

Production of shale gas is not new. Wells drilled in Fredonia, New York, in the 1820's—150 years ago—tapped the shallow shales for natural gas for residential cooking needs and for fuel for a lighthouse on Lake Erie. The "play" eventually extended along the lake to Cleveland, and a few of the wells continue to produce to this day.

The largest shale gas field to date, the Big Sandy field of southwestern West Virginia and northeastern Kentucky, was discovered in 1910 and has produced a total of 3.1 trillion cubic feet of gas from 4.616 wells. Other fields, some of which are still producing, are located in West Virginia, Ohio, Pennsylvania, Virginia, Kentucky, Michigan, and other Appalachian states. Most recently, shale gas has been discovered in the Quebec lowlands of Canada near St. Hyacinte. Here the fractured shales are of Cambrian or Ordovician geologic age, but are related to the Devonian formations as sediments deposited in the Appalachian Basin.

History may not always repeat itself. Nevertheless, the future course of development of Devonian shale gas warrants the interest, the support and the encouragement of the independent producer, the industrial and home gas consumer, and the cooperating state and federal agencies. In the context of the next decade this new (old) fuel resource can contribute, to some measure, to increasing domestic supplies of hydrocarbons in one region, and possibly serve as a guide to unlocking other overlooked resources in other areas.

Initiating the program was not easy and required the combined efforts and interests of several, often uncoordinated, groups and persons. The following may illustrate the point.

The Eastern gas shales have not been considered a significant energy resource by either government or industry, except in occasional reports by the US Geological Survey. Until now, economic incentives have not existed to develop the shales because of interstate FPC price regulation and the fact that well production is small, though long-lived; and peak producing rates are short, requiring long investment payouts. Costs are several times the national average for producing natural gas.

The natural gas potential of the Devonian shale has been seriously overlooked by several authoritative surveys. For example, the 1973 FPC Natural Gas Survey, charged with assessing "all potential future sources of gas," neglected to include the shales. Other surveys of US resources have likewise omitted their potential.

The Columbia Gas System and the Dow Chemical Corporation, both of which have had modest research programs underway to evaluate the shales for several years, in 1975 increased their efforts to evaluate its potential. In early 1975, also, a series of folio maps were published by the USGS describing, from the meager data available, the geologic framework of the Appalachian Basin as it pertains to the shales together with information on shale gas producing areas.[1]

Columbia and Dow proposed cost-sharing demonstrations on the Devonian shales to ERDA shortly after the agency's formation in 1974. Their proposals were given prominence by Rep. William Moorhead (D-Pa.) at hearings held before his subcommittee on Conservation, Energy and Natural Resources (House Government Operations). The Columbia proposal, which involves massive hydraulic fracturing experiments at three well sites in West Virginia, was approved by ERDA on June 19, 1975. The Dow proposal, which involves in situ combustion of the organic portion of the shale in Michigan, locally called the Antrim shale, was initiated on October 13, 1976.

With these strong indications of cooperative interest by industry in shale gas development, 36 congressmen from the Appalachian region, led by Reps. Jack Kempt (R-N.Y.) and Jack Murtha (D-Pa.), urged the Congress to provide a major funding provision in the ERDA FY 76 appropriation. Important support was also provided by Governor James Rhodes of Ohio and that state's two senators, Glenn and Taft. The governors of the states included in the Appalachian Regional Commission, extending from Alabama to New York, also approved a resolution urging that at least $100 million be invested by government and industry in Devonian shale gas development.

The result of these efforts was an initial $11.5 million funding to ERDA for gas stimulation research in the shale and geologic resource studies. On May 17, 1976, the American Gas Association lent its support to the program and urged an expedited and greater cooperative effort by ERDA with the gas industry "for enhancement of natural gas recovery from Eastern and Western tight rock formations."

Funding for the Devonian shale project for FY 77 was increased by the Congress to about $16 million, although the exact expenditures of moneys may be below that amount. During the past year the program emphasis has been on planning and staffing the project.

The response of the Congress and ERDA for recognizing the need for a multifaceted research effort on gas shales can be contrasted with related decisions affecting the natural gas development in the Appalachian Basin by the Federal Power Commission.

In May 1975 the Columbia Gas System, in addition to applying to ERDA for a cost-sharing, massive-fracturing demonstraion of the shales, also requested approval by the FPC of an $8.5 million research program, involving fifty test wells in Ohio, West Virginia and Virginia, to provide geologic information and to test "novel explosives and hydraulic fracturing materials and designs." The program was estimated to take 36 months to complete.

With no adverse interventions the FPC (on August 18, 1976) denied rate approval for the experiments on extremely dubious grounds. The project, thus, has been shelved.

In a similar manner applications by independent producers in the region for higher natural gas wellhead prices, based on proven costs were only approved by the FPC on March 22, 1976, after prolonged two-year proceedings. No better illustration of the ineptness of the Commission might be given

[1] Oil and Gas Data From Devonian and Silurian Rocks in the Appalachian Basin, by Wallace de Witt, W. J. Perry, Jr. and Laure G. Wallace. Folio Maps 1-917A and 1-917B.

in their lack of concern for new gas supply for the U.S.

The impact of regulatory delay by the FPC on West Virginia natural gas production is particularly striking. Production in that state peaked in 1918, again in 1943, and resumed an upward growth in the postwar period. As shown below (see box), the annual volume reached a third maximum in 1970, but the delay in higher regulated prices in 1974 caused a precipitous drop in the following year.

Marketed production of West Virginia natural gas

	(bcf)
1918 (first peak)	265
1943 (second peak)	223
1970 (third peak)	242
1971	234
1972	214
1973	208
1974	202
1975	154

Another frustration for Appalachian natural gas producers was the failure of passage in late 1975 and early 1976 of natural gas legislation and a proposed amendment—the so-called Kemp/Murtha/Mollohan amendment—to deregulate "stripper gas" production from FPC controls. The amendment was supported by most area legislators.

However, the Eastern Gas Shales Program at ERDA did proceed during 1976. The project consists of the following elements: [2]

1. An inventory of the natural gas resource and recoverable reserves contained in the eastern shales.

2. A characterization of the nature of the shales in the three sedimentary basins in the East (Appalachian, Illinois and Michigan).

3. The development of exploration methods for locating fractured shale and other gas reservoirs associated with shale.

4. The performance of research and development studies on methods for improving gas recovery from shales.

5. The implementation of a concurrent field-test program to transfer the concepts in exploration, drilling, stimulation and production to the natural gas industry.

6. The performance of environmental assessments to assure acceptable environmental impacts from exploratory and demonstration activity.

7. The performance of economic analyses to indicate commercial viability of various options.

8. The transfer of developed technology to the private sector as rapidly as possible by the timely publication of information. (Emphasis supplied)

The project will be initially managed by ERDA's Morgantown (W. Va.) Energy Research Center and geologic studies will be supervised by Wallace de Witt, Jr., of the US Geologic Survey, whose research in the Appalachian Basin initiated the impetus and revival of the oil and gas potential of Devonian and Silurian rocks.

The Devonian shale program can be a test of the joint efforts of a government agency and the producing industry to solve the impending oil and gas shortage. Cooperation in such difficult, costly, but promising projects is essential if this nation is to benefit totally from its natural resources. If this particular program is not successful, however, there are other geologic occurrences of natural gas, onshore, that only require innovative geologic and engineering techniques. These include methane in coal beds, natural gas from tight sand formations, and methane from geopressurized water zones.[3]

The next source of major US supply of natural gas could be, as the first, from the Devonian shales. The contribution to the energy effort in this area by the independent producer will be delayed, of course, until the new techniques are proven. At that time the independent will be anxiously called upon.

REIMBURSEMENT TO MEDICAL TREATMENT FACILITIES FOR CARE PROVIDED TO INDIGENT ILLEGAL ALIENS

The SPEAKER. Under a previous order of the House, the gentleman from California (Mr. BOB WILSON) is recognized for 5 minutes.

Mr. BOB WILSON. Mr. Speaker, I am most happy to join with the gentleman from California (Mr. SISK) in cosponsoring legislation to reimburse medical treatment facilities and local governments for care provided in emergencies to indigent illegal aliens.

I am sure that we all agree that the overall economic implications of the illegal alien problem are grave indeed. There are the questions of job loss and of excess welfare cases. But to a great number of Americans, the illegal alien problem is a distant one.

However, there is one side of the question that all of us feel—and that is taxes. Specifically, the paying of taxes to administer health care to those who enter our country illegally. To the local taxpayer, the money he or she pays is already high enough. But to pay an additional sum to support such illegal aliens through community health care facilities is to add an onerous burden to our citizens, especially those in our border cities and States.

Mr. Speaker, the illegal alien problem is a national one, and I think it not fair to ask but a few of our fellow Americans to bear this excess burden. It is the responsibility of the Federal Government to maintain the integrity of our borders and if it cannot do so, then it should be the job of the Federal Government to provide some measure of relief to our local governments who are having to foot the bill for medical care for these aliens. The legislation we have before us will go far toward helping out those of us who are in the frontlines dealing with the problem.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. RAHALL) is recognized for 5 minutes.

Mr. RAHALL. Mr. Speaker, on February 9, 1977, I missed the vote on H.R. 692, the Small Business Act and Small Business Investment Act amendments, due to the Committee on Public Works and Transportation's markup on H.R. 11, the Local Public Works Capital Development and Investment Act of 1977.

Mr. Speaker, if I would have been here my vote would have been yea.

SHOULD PROFITS ALWAYS TAKE PRECEDENCE OVER CONSUMER BENEFITS?

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

Mr. ANNUNZIO. Mr. Speaker, several months ago I applauded a step taken by a major bank which was a definite boon to consumers. I am speaking of a major revision in consumer credit loan notes. This bank, on its own initiative, undertook the formidable task of translating the traditional complicated loan note into a simplified clear document easily understood by the average consumer.

As one who has long been a supporter of simplifying technical consumer documents, I saw this as a positive and noteworthy move by a leading bank. As one who has also worked years to see consumer credit protection legislation enacted, I can appreciate the frustration of wanting immediate gratification.

However, just as no one expects an acorn to grow overnight into a full-size oak tree, neither should the bank creators of this new loan note expect to double their profits from anticipated loan increases due to the simplified loan.

I was somewhat disheartened during our consumer informational hearings when I heard a witness express doubt about the value of revised consumer loan notes. Apparently there is some skepticism among a few bankers since they expected immediate and tangible results from this expensive and difficult program they invested in.

Let me assure you, I am not against banks implementing profitmaking ideas—on the contrary, they should be strong and financially secure. However, most banks could afford to invest time and money in consumer-oriented programs for the long-range benefit of both the bank and the consumer.

Perhaps banks are accustomed to seeing tangible profits in such ventures as speculative loans or real estate investments. While I can assure you that investing in consumer relations won't net banks a predictable dollars and cents income, I do know banks will profit immeasurably in time.

It might be a little more difficult to monitor and record how much the bank is profiting, but an overall attitudinal change should be clearly evident. It stands to reason that if consumers find one service of the bank sympathetic to their needs, they might be willing to trust the bank in other areas. Since it has been determined that consumers now make up two-thirds of banks' deposits, banks should be aware of the importance of meeting consumer needs in all areas.

I would like to return to the theory that everyone will profit from this step toward simplifying consumer credit transactions. One example cited by

another bank on the west coast that has also been streamlining everything from consumer loans to credit card applications, is the benefit to bank personnel.

Loan officers have experienced far fewer difficulties and questions from consumers about technical terms and complicated phrases. This has undoubtedly eased the burden for the loan officers as well as pleased the consumer.

I look forward to the day when consumers can walk into any financial institution and read and readily understand credit contracts without legal assistance.

While the leaders in this trend towards simplifying consumer credit forms may be somewhat skeptical about the immediate rewards, let me assure them that benefits will become evident. They should note the increase in smaller banks toward joining the simplification trend—a trend which will soon become a standard expected by consumers dealing in credit transactions.

CIVIL RIGHTS AMENDMENTS ACT OF 1977

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California, (Mr. EDWARDS) is recognized for 20 minutes.

Mr. EDWARDS of California. Mr. Speaker, yesterday I introduced with my colleague, Mr. DRINAN, the Civil Rights Amendments Act of 1977, a comprehensive revision of title VII of the Civil Rights Act of 1964 relating to equal employment opportunity and title VIII of the Civil Rights Act of 1968 concerning fair housing. Title I of the bill contains the Equal Employment Opportunity Reorganization Act of 1977 while title II is entitled the "Fair Housing Amendments Act of 1977."

TITLE I

The first title of the bill addresses the immediate need for a major restructuring of Federal equal employment opportunity efforts to end discrimination against this Nation's minority and female citizens. Although there has been progress in the last decade, the Federal effort to end employment discrimination based on race, ethnicity, and sex is fundamentally inadequate. It suffers from a number of important deficiencies including lack of overall leadership and direction, the diffusion of responsibilities to a number of agencies, the existence of inconsistent policies and standards, the absence of joint investigative or enforcement strategies, and the failure of agencies to develop strong compliance programs.

In particular, the promise of title VII of the Civil Rights Act of 1964 in creating the Equal Employment Opportunity Commission—EEOC—remains essentially unfulfilled. EEOC is the primary Federal agency charged with the enforcement of equal opportunity requirements. However, while the agency has been the most progressive in setting policy defining discrimination and shaping case law interpreting title VII, EEOC appears to be unable to meet its congressional mandate to eliminate employment discrimination. A recent report in the Washington Post described the agency as "in shambles—leaderless, confused, swamped in trivia, afloat but rudderless" while the New York Times called for the administration "to restructure radically" EEOC's internal workings.

I believe that, while many of the deficiencies of present enforcement by EEOC are attributable to poor and unstable leadership, inept administration, and insufficient resources, title VII contains substantial structural defects which have contributed to the present totally inadequate compliance efforts. In its 1975 report evaluating Federal agencies with major responsibilities for insuring equal employment opportunity, "The Federal Civil Rights Enforcement Effort—To Eliminate Employment Discrimination," the U.S. Commission on Civil Rights took a similar view and recommended extensive revision of title VII. Further support for statutory change was proposed in a staff report released by Congressman HAWKINS' Subcommittee on Equal Opportunities in December 1976. The report recommended sweeping changes in the Federal enforcement program, including consolidation of equal employment opportunity enforcement authority in EEOC.

The bill which Congressman DRINAN and I introduced, therefore, aims to correct these substantial shortcomings under the present law. One of the major criticisms of EEOC has been that its organizational structure and the roles of the Chairman, the Commissioners, and the General Counsel have created fragmentation of Commission operations. My bill would realine the responsibilities of the Commissioners and vest quasi-judicial powers in the five-member body. Authority over personnel and administration would be transferred from the Chairman to a newly created position of Chief Executive Officer—CEO—which would replace the existing office of General Counsel, and would oversee all the administrative and enforcement activities of EEOC. In supporting the creation of a similar position, a draft proposal for EEOC reorganization circulated by the Congressional Black Caucus has pointed out that administration, staff morale, and program effectiveness would all be improved through the development of clear lines of authority.

The General Accounting Office, furthermore, indicated in its 1976 report, "the Equal Employment Opportunity Commission has made limited progress in eliminating employment discrimination," that different evidence standards and little cooperation between EEOC litigation and compliance efforts have hindered the agency's effectiveness. The Commission's failure to utilize its law enforcement authority also appears to have resulted in part from lack of integration between the litigation and compliance functions. As the Equal Opportunities Subcommittee staff report pointed out—

> The Office of General Counsel maintains two separate organizational structures in the field which results in conflict, duplication and delay.

By combining all enforcement activities under a Chief Executive Officer, we intend to create a unified and consistent approach to charge resolution in which compliance and litigation are complementary and consecutive steps rather than independent options.

In addition to revamping the structure of the agency, the bill envisions a completely revised enforcement system. At present, EEOC enforces title VII primarily by investigating charges of employment discrimination, attempting conciliation of these charges, and, where conciliation fails, bringing civil suits against discriminatory parties. The abysmal failure of this process is well-documented in the Equal Opportunities Subcommittee staff report:

> Charges filed with the Commission are not resolved in a timely fashion. The inability of the Commission to resolve the steadily increasing backlog of charges threatens to transform the Commission from a law enforcement agency into a charge processing agency. At the end of the first twelve months of fiscal 1976, 127,800 charges were pending, including charges filed in 1967.
>
> Few of the charges filed with the EEOC result in successful resolution; approximately half of the charges are closed without investigation, only one in eight are successful conciliations. The rate of no cause findings has increased substantially as EEOC's caseload has increased.

The bill I am introducing today with Congressman DRINAN would give EEOC administrative adjudication authority to process complaints of employment discrimination. Under this system, charges may be reviewed in administrative proceedings and, if necessary, cease and desist orders issued by EEOC to terminate any unlawful employment practice. The Commission would serve as a quasi-judicial review panel for appeals in the administrative process. EEOC, of course, would retain its current authority to litigate in both individual and systemic discrimination cases but a position paper of the Leadership Conference on Civil Rights concluded:

> Court litigation is cumbersome and time consuming and the courts are best used to deal with cases involving unresolved questions of law or other matters of public importance and not as a forum for routine, day-to-day enforcement.

The addition of administrative enforcement powers should increase the agency's ability to handle its massive workload, and has been supported by the Civil Rights Commission, the Leadership Conference, and Congressman HAWKINS' subcommittee report as an effective enforcement tool to EEOC.

At the same time EEOC's ability to combat discrimination will be strengthened, the bill also seeks to increase the alternatives available to complainants by extending the time limitation on filing either a charge with EEOC or a civil action. In addition, those persons wishing to pursue private actions may seek moneys from an equal employment opportunity loan fund established by these amendments to defray the expenses of

plaintiffs' attorneys prior to a court determination on any award of attorney fees and costs. In this respect, my bill reflects the Civil Rights Commission recommendation in its 1975 employment report and is designed to facilitate speedy action on discrimination complaints by creating several avenues for possible action.

In its 1975 report, the Commission on Civil Rights concluded that—

> The diffusion of authority for enforcing equal employment mandates among diverse agencies is one of the paramount reasons for the overall failure of the Government to mount a coherent attack on employment discrimination.

I share the Commission's view that this fragmented administrative picture has resulted in duplication of effort, inconsistent findings, and a loss of public faith in the objectivity of the program. In addition, attempts to coordinate the overall Federal effort have consistently failed. The Equal Employment Opportunity Coordinating Council, created to promote coordination and eliminate inconsistencies in the operations of Federal agencies with compliance responsibilities, has failed in its mission and has even been used to thwart structural and administrative changes that would improve enforcement.

For example, three Council members, the Department of Justice, the Civil Service Commission, and the Department of Labor, recently issued testing guidelines which are in conflict with those developed by EEOC, the primary Federal agency in the employment field. Aside from questions of merit of the new guidelines, the result is that the courts, industry, unions, and minorities are left without uniform guidance on policies and standards for compliance.

Congressman DRINAN and I, therefore, propose to vest in EEOC the duty and authority to develop substantive standards for compliance with the equal opportunity mandate. These standards would be binding upon both private employers as well as Federal agencies with civil rights responsibilities. In addition, the bill would transfer to EEOC jurisdiction over Age Discrimination and Equal Pay Act complaints, and the present Attorney General authority over State and local governments, thus consolidating similar enforcement schemes.

Another element in the consolidation approach of this bill would transfer to EEOC the functions now exercised by the Civil Service Commission—CSC—and the Labor Department's Office of Federal Contract Compliance—OFCC. The rationale for reassignment of OFCC's supervision and coordination responsibilities to EEOC were convincingly articulated by the House Committee on Education and Labor in its report (H. Rept. No. 92–238, June 2, 1971):

> The Committee believes that the transfer will benefit both the administration of the contract compliance program and the Title VII program. The two programs are addressed to the same basic mission—the elimination of discrimination in employment.
>
> The obligations imposed on the government contractor by the Executive Order would reinforce the obligations imposed by Title VII. The transfer would promote the centralized enforcement of all Federal employment non-discrimination programs. It would reduce administrative overlap and encourage coordination. Clarity, uniformity, and predictability in policy and practice are aided by having the definition of discrimination and the shaping of remedies developed by a single agency. More significantly, it will authorize a single agency with a full complement of enforcement mechanisms that can be coordinated in the attack on employment discrimination.
>
> Studies have shown that current jurisdictional overlap between the Office of Federal Contract Compliance and the Equal Employment Opportunity Commission have contributed to confusion, duplication and a general lack of coordination of equal employment opportunity enforcement programs.
>
> Although administrative efforts have been made to coordinate the overlapping legal jurisdictions of the Commission and OFCC, such as the memorandum of understanding agreed to in May 1970, they have not been effective. Each agency has continued independently to develop its goals, policies and programs. As a result, the entire Federal effort to end employment discrimination in the private sector has suffered.

Similarly, studies by committees and subcommittees of Congress and by the Commission on Civil Rights and the experience of organizations of the Leadership Conference on Civil Rights all have concluded that the Civil Service Commission has failed in the mission assigned to it by Congress under the Equal Employment Opportunity Act Amendments of 1972 of insuring equality of employment opportunity in the Federal service.

Congressional intent, as evidenced by the legislative history of the amendments and decisions of the Supreme Court, was to assure, so far as possible, that Federal workers enjoyed the same rights and remedies as workers in the private sector. The history of administrative proceedings and litigation under the act since 1972 has been that of frustration of that intent by the Commission. The leadership conference has documented the refusal of the agency to comply with the discrimination prohibitions:

> The Civil Service Commission has, with the support of the Civil Division of the Justice Department (at times over the opposition of the Civil Rights Division), opposed the right of Federal employees to trials de novo under the Act, their right to file class action complaints, the right to have the 1972 amendments applied to cases pending at the time of passage, the right to have EEOC standards and precedents applied to Federal employment and other rights granted under the Act.

It has refused to apply to Federal agencies standards it applies to contractors with which it does business. Its concept of affirmative action also falls short of that which it applies to Government contractors. In many other ways it has aided in preventing the promises of the 1972 amendments from becoming reality.

These problems would be ameliorated under my bill which would divest CSC of responsibility for supervising equal job opportunity in Federal employment. These duties would properly be vested with the commission that has chief responsibility for enforcing the law—EEOC. All of the departments and agencies would retain line responsibility to prevent discrimination in their own employment and by their contractors and recipients, but they would be supervised and coordinated in their operations by EEOC. The Commission would promulgate a uniform set of procedural standards, modified as necessary by EEOC or each agency to meet the needs of particular programs.

Title I of this bill encompasses many additional and important concepts which should be examined carefully. I would, however, like to point out for special attention the expansion of the coverage of the act's prohibitions to the handicapped and to certain legislative and judicial branch employees. Both of these proposals will require serious investigation to determine what specific action is required. I have suggested a method of enforcement for legislative and judicial branch employees but other alternatives should be discussed to identify the most effective procedure. I am, however, convinced that Congress can and must no longer exempt itself from the equal opportunity mandate it has established as the law for the rest of this Nation and that we must take steps to meet the same high standard of compliance we demand of our Federal and private employers.

As we introduce this bill, much discussion and speculation has been circulating on the best method to effect the changes that many civil rights groups have concluded are necessary in equal employment opportunity enforcement. Some of the basic proposals for reform in this bill could be implemented through other than legislative means; that is, reorganization and Executive order. Some, such as cease and desist authority, could not. However, I believe that the legislative process can provide the most effective forum to stimulate public comment on the proposals, to identify the appropriate vehicle to institute the revisions, and to indicate congressional concern to the administration. We must, however, act now for we share a responsibility to make equal opportunity a reality, not an unrealized promise.

TITLE II

Mr. Speaker, the second title of the bill which I introduced today, with my colleague, Mr. DRINAN, is intended to make much-needed improvements in title VIII of the Civil Rights Act of 1968, otherwise known as the Fair Housing Act.

Back in March of 1976, when my subcommittee, the Subcommittee on Civil and Constitutional Rights, began its fair housing hearings, one of our most distinguished witnesses, Dr. Robert C. Weaver, himself a former HUD Secretary, recommended that we review the provisions of title VIII to determine whether the legislation is adequate "to achieve the goals enunciated by Congress."

Indeed, only this past September, again in hearings before my subcommittee, former HUD Secretary Carla Hills, when discussing title VIII, stated that the current HUD enforcement powers, limited to conference, conciliation, and persuasion, "have proved inadequate to secure compliance with the substantive

provisions of the title." Former Secretary Hills went on to indicate that because of its lack of enforcement powers, HUD is finding it difficult to process housing discrimination complaints in a timely manner. She stated that "respondents know all too well that HUD has no meaningful enforcement power" and "many have virtually ignored (HUD's) conciliation efforts because they have no inducement to cooperate." In sum, her position was that the present title VIII enforcement structure "is an invitation to intransigence."

Faced with this unequivocal pronouncement on the part of a department charged with enforcing a major civil rights provision, I feel that the time has come to examine, as thoroughly as possible, various alternatives for putting teeth into HUD's now feeble fair housing enforcement machinery. Some, including former Secretary Hills, have urged that the way in which to correct the deficiency is to authorize the Secretary of HUD to bring civil actions to assure that acts of housing discrimination are redressed and deterred. The bill which Congressman DRINAN and I have introduced today would take a different approach. It would authorize the Secretary to conduct administrative proceedings on housing discrimination charges and, when warranted, to issue cease-and-desist orders requiring that the discriminatory practices be terminated.

The cease-and-desist approach was recommended by the U.S. Commission on Civil Rights, in its December 1974 report, "The Federal Civil Rights Enforcement Effort—1974, To Provide * * * for Fair Housing." Similarly, in a recent Potomac Institute publication, Equal Housing Opportunity: The Unfinished Federal Agenda, David Falk and Herbert M. Franklin recommended that HUD be given cease-and-desist powers. Indeed, those authors suggest that such an approach is preferable to authorizing HUD itself to sue in Federal court.

Another provision contained in the bill which I have introduced would make it unlawful to discriminate against the handicapped in the sale or rental of housing, the financing of housing and the provision of brokerage services. This provision is similar to a number of measures which were pending before my subcommittee during the 94th Congress. Because of the relative newness of the issue and the lack of any substantial body of precedent, it is one which will require very careful analysis during any hearings called on the bill. Clearly, handicapped persons in this country must not be treated as second-class citizens and have denied to them housing opportunities which they should have. Extensive testimony will have to be taken on whether or not there are unreasonable barriers set up against the handicapped, in terms of housing opportunities and also on what the proper parameters of any prohibitions should be.

The bill which I have introduced would also make it unlawful for insurance companies and their agents to refuse to write an insurance policy insuring against hazards to a home because of the racial or ethnic composition of persons residing in the home or in the neighborhood in which the home is located. Since the passage of title VIII in 1968, another discriminatory housing practice, which may or may not be prohibited by that title, has come to our attention; that is the practice of insurance companies refusing to write homeowners' policies because of the race of the owner or the racial composition of the neighborhood. Hearings on my bill should thoroughly explore the extent to which this practice exists and whether or not existing law is sufficient to prohibit such practices. Mr. Speaker, I would think that few could deny the importance of exploring this issue if we are to check adequately the constant process of deterioration now taking place in our inner city and minority neighborhoods. For race alone to prevent a homeowner from obtaining adequate insurance coverage cannot be allowed.

Discriminatory land use practices would also be prohibited under the revisions which I propose to title VIII. My amendment would make it unlawful for towns and other communities to exclude low- or moderate-income housing, through zoning, housing codes, and so forth, because the housing is eligible for government, including Federal, assistance or because of the race or economic status of the prospective occupants. In some respects, this would serve simply as a clarifying amendment because there is precedent indicating that title VIII already prohibits the adoption or enforcement of land use policies which exclude housing on racial grounds. I should also note that it is my understanding that the land-use litigation now brought under title VIII is distinguishable from cases alleging violations of the Constitution. Under the statutory cases, a prima facie case of racial discrimination is established upon proof of adverse racial impact, whereas, under the Constitution, proof of discriminatory purpose must be shown. See *"Village of Arlington Heights v. Metropolitan Housing Development Corporation,* —— U.S. —— (1977)."

That aspect of my amendment which would make it unlawful to exclude low- or moderate-income housing because of its eligibility for governmental—including Federal—assistance is almost identical to an amendment which was proposed by HUD back in 1970. I would also propose to make it unlawful to discriminate against low- or moderate-income housing because of the economic status of the prospective occupants. Mr. Speaker, it would seem to me that we, the Congress, have as great an interest in insuring that land use policies do not discriminate against the poor as in insuring that they do not discriminate against racial minorities.

All of these facets of my land use amendment must be thoroughly explored and analyzed during any hearings called on the measure. Moreover, since in his recent confirmation hearings, Attorney General Griffin Bell stated that, under his leadership, the Justice Department would move to strike down discriminatory land use policies, I believe that we need to begin intensive study of the need for amendments such as the one which I propose. This bill will provide an excellent opportunity for the new administration to comment on the adequacy of existing legislation for fulfilling its commitment to move against restrictive zoning and other restrictive land use policies.

The last major provision in the bill which I have introduced would establish a fair housing loan fund from which private litigators can borrow funds to bring housing discrimination cases. It is believed that in many instances, it would be inadequate to provide for the payment of attorneys' fees, after the completion of a suit, to a prevailing plaintiff. Initial costs and expenses involved in filing such a suit may preclude the bringing of the suit altogether. For this reason, it is important that we study this concept of a fair housing loan fund, and its need, if we are to further the objectives of title VIII. I have proposed the creation of a similar fund in my suggested amendments to title VII of the 1964 Civil Rights Act, the title prohibiting employment discrimination.

Mr. Speaker, to put all of this into perspective, I believe that we must simply say that the promise of fair and open housing embodied in the 1968 enactment of title VIII has fallen far short of being fulfilled. In recent testimony before my subcommittee, Dr. Reynolds Farley, a demographer from the University of Michigan, analyzed why American neighborhoods continue to be so highly segregated along racial lines. Dr. Farley concluded that the cause continues to be discrimination. Indeed, he went to great lengths to urge that those who suggest that the cause is economic are in error. He stated that:

> If people were in fact residentially distributed according to their economic resources rather than their skin color, residential segregation by race would be low.

In view of such documentation and studies, the time is now to examine why such discrimination persists and to study alternatives for legislative reform which might in fact make our fair housing promise a reality.

Mr. DRINAN. Mr. Speaker, yesterday I joined with Congressman DON EDWARDS, chairman of the Judicial Subcommittee on Civil and Constitutional Rights, in introducing the Civil Rights Amendments Act of 1977. This proposal seeks to improve the enforcement mechanisms in the Federal statutes forbidding employment and housing discrimination. Title I of the bill, entitled "The Equal Employment Opportunity Reorganization Act of 1977," deals with employment problems arising under title VII of the Civil Rights Act of 1964. Title II, the Fair Housing Amendments Act of 1977, deals with housing problems arising under title VIII of the Civil Rights Act of 1968.

It has frequently been observed that employment and housing discrimination are inextricably linked. The inability of minorities, women, and handicapped individuals to obtain decent housing is frequently related to their inability to obtain decent employment. Conversely, discrimination in housing regularly precludes such persons from gaining access to good jobs. This is particularly true with respect to suburban employment,

where the bulk of expanding employment opportunities has been concentrated as employers have moved out of the cities.

TITLE I—EMPLOYMENT

Let me first address title I of the bill. The need to revise the enforcement scheme of title VII of the Civil Rights Act of 1964 has long been recognized. Since 1964, when Congress declined to give the Equal Employment Opportunity Commission enforcement powers, commentators have called repeatedly for a strengthened Commission and an expanded title VII. Congress responded in part to those calls for reform in 1972. It is time now to respond once again.

CEASE AND DESIST AUTHORITY

Since 1964 advocates seeking to strengthen EEOC have regularly proposed to give it cease and desist powers. In the 1969 Brookings Institution study for the Civil Rights Commission, "Jobs and Civil Rights," Richard Nathan concluded:

Cease and desist authority for the EEOC is essential no matter what else is done.

During consideration of the amendments to title VII in 1971–72, the question arose again. Congress decided to give EEOC the right to sue, putting aside once more the cries for an effective administrative remedy.

The need to give EEOC cease and desist power has not diminished and suggestions to provide it have not subsided. In July 1975, the Civil Rights Commission released volume V of its massive study on the "Federal Civil Rights Enforcement Effort." In that volume, "To Eliminate Employment Discrimination," the Commission recommended that EEOC be given cease and desist authority.

Finally in December 1976, the Education and Labor Subcommittee on Equal Opportunities, chaired by Representative HAWKINS, released its "Staff Report on Oversight Investigation of Federal Enforcement of Equal Employment Opportunity Laws." Among other recommendations, the report called for legislative changes to give EEOC the power to issue cease and desist orders.

In light of this history and the present need to strengthen EEOC, title I of this bill would provide the long awaited cease and desist authority. Hopefully it will fare better in this Congress than it has in the past. The present need is quite critical. A number of recent reports, studies, and newspaper accounts have documented the severe backlog and other management problems presently plaguing the EEOC. Providing cease and desist authority would help the Commission improve its processing and resolution of complaints.

ELIMINATING DUAL STRUCTURE

Title I would also make other important changes in EEOC operations. When the Commission was given the right to sue in 1972, the amendatory law created the Office of General Counsel and grafted it on to the existing arrangement. As a consequence, a dual structure has developed within the EEOC. The recent reports of the General Accounting Office and Mr. HAWKINS' subcommittee staff thoroughly document the need to eliminate that bifurcation. Title I would consolidate that dual structure into a single enforcement process under the direction of one person, the chief executive officer.

EEOC AS PRIMARY AGENCY

Furthermore studies have shown the need to make EEOC the primary authority at the Federal level in equal employment opportunity matters. Title I of this bill addresses that need in several ways. First, it would give EEOC the power to issue substantive regulations which would have the force of law. Such authority would extend to all persons and entities covered by the statute, including the agencies of the Federal Government. In this way, private companies and individuals who deal with the Government will not be subjected to the differing standards which are sometimes applied by different Federal agencies. Although the Equal Employment Opportunity Coordinating Council, created in 1972, was designed to resolve those inconsistencies, its failure is well known. Title I abolishes the Council as the Civil Rights Commission and the Hawkins subcommittee staff report recommend.

Second, certain equal employment opportunity responsibilities, now lodged in other agencies, will be transferred to EEOC over a period of time. Three areas of jurisdiction, now within the Labor Department, would be transferred on a staggered basis: Equal Pay Act, Age Discrimination in Employment Act, and Executive Order 11246 relating to the Federal contract compliance program. In addition, the enforcement authority for Federal employment, now in the Civil Service Commission, would also be transferred in time. I should note that each Federal agency would retain its initial responsibilities to insure equal employment opportunity both in its contracts and programs and its own employment. It would be counterproductive to divest agencies totally of all duties to insure fair employment.

Third, after 3 years, the authority of the Justice Department to bring pattern or practice suits against State and local governments would be terminated. During that period, EEOC would have concurrent authority with Justice for such suits. In addition, the authority of Justice during the transition to initiate its own litigation, without awaiting a referral from EEOC, would be clarified. While the Department has made a significant contribution to the development of the law under title VII, Congress has steadily narrowed its jurisdiction. It is now time to phase it out altogether.

SYSTEMIC VERSUS INDIVIDUAL DISCRIMINATION

Because of the tremendous backlog at the EEOC and because of the need to maximize the use of existing resources, there has been a great amount of discussion over the question whether the Commission should continue to concentrate its efforts on individual complaints or whether it should focus on systemic discrimination. Persons equally knowledgeable of and concerned with employment discrimination hold differing views on the matter. It is not a question which is easily resolved. In true congressional fashion, title I of the bill seeks to accommodate the concerns of both camps.

As drafted, the bill would require the Chief Executive Officer—CEO—to conduct only a "preliminary inquiry" on each individual complaint. After such inquiry, CEO would have the discretion to continue the investigation, to refer the case for arbitration—with the consent of all parties—or to a certified State or local civil rights agency, or to proceed no further, giving the complainant a meaningful opportunity to engage private counsel if additional action is needed.

The bill also authorizes the Commission to initiate its own investigations into systemic discrimination—the bill uses the phrase "pattern or practice." If the CEO determines that a pattern or practice exists, she or he could proceed immediately to court—with the prior approval of the Commission—or file an administrative complaint. By giving the CEO greater discretion with individual complaints and by providing self-initiating authority in pattern or practice cases, it is expected that the Commission would allocate more of its resources attacking systemic discrimination and would resolve individual complaints without expanding them beyond their immediate facts.

PRIVATE REMEDIES

Title I also is designed to strengthen the private enforcement remedies of title VII. The bill removes the existing requirement that an individual must first file a complaint with EEOC before proceeding to court. Second, it lengthens the statute of limitations in which to file court complaints both before and after EEOC has processed the charge. Third, in order to stimulate greater use of private counsel, the bill creates an equal employment opportunity loan fund from which individuals could borrow money to finance title VII litigation. This provision is patterned after the revolving insurance fund presently in the Federal Credit Union Act. See 12 U.S.C. 1783.

EXPANDED COVERAGE

Title I of the bill also amends title VII to cover additional employees and applicants for employment. For the first time, discrimination on the basis of "handicap" is added to the list of prohibitions—"age" is added after 2 years by the transfer of jurisdiction under the Age Discrimination in Employment Act from Labor to EEOC. In the area of Federal employment, title VII is expanded to include members of the uniformed service and employees in the legislative and judicial branches of the Government. The bill exempts personal staffs of elected officials and article III judges, preserving their right to sue under the Constitution as recently interpreted in *Davis* v. *Passman*, —— F.2d —— (5th Cir., 1977).

Title I also seeks to encourage voluntary compliance. To promote the objectives of equal employment opportunity, the bill authorizes the Commission to provide technical and financial assistance to persons desiring to develop or

implement an affirmative action plan, an idea suggested in the Hawkins subcommittee staff report. Assistance under this provision is precluded if the applicant is under a court or agency order involving equal employment opportunity.

TITLE II—HOUSING

It has been almost 9 years since Congress enacted title VIII of the Civil Rights Act of 1968, commonly referred to as the Federal Fair Housing Act. In those years, it has become apparent that the Act needs to be amended to correct deficiencies which have developed in its enforcement. Those inadequacies are detailed in the 1974 report of the Civil Rights Commission entitled "To Provide * * * for Fair Housing," and the recent publication of the Potomac Institute, "Equal Housing Opportunity: The Unfinished Federal Agenda," written by David Falk and Herbert M. Franklin.

CEASE AND DESIST AUTHORITY

The first priority is to give the Department of Housing and Urban Development administrative powers to conduct hearings and issue orders requiring violators to cease and desist from their unlawful practices. As in title I of the bill, this provision in title II is intended to provide a fair, speedy, and inexpensive remedy for victims of housing discrimination. The orders of HUD are to be self-executing. Unlike the National Labor Relations Board, the burden will not be on HUD to seek court enforcement if the order is ignored. Indeed disobeying an administrative order will subject the violator to civil penalties assessed by the Secretary of HUD.

JUSTICE DEPARTMENT

Title II also expands the litigation responsibilities of the Justice Department. Under this bill, it will have the authority to bring suits at the request of the HUD Secretary upon a finding of reasonable cause, upon a violation of an administrative order, or to collect the civil penalties imposed by HUD. In none of these instances would there need to be a pattern or practice of discrimination, the present limitation on Justice law suits. In addition Justice would be permitted to seek monetary damages in its pattern or practice litigation, a remedy which, according to the Fouth Circuit Court of Appeals, Justice does not presently have.

PRIVATE REMEDIES

As in title I, title II of the bill strengthens the private remedies in the statute. The attorney fee provision is improved and a fair housing revolving fund is established to provide loans to private litigators. Furthermore the statute of limitations is extended so that victims of housing discrimination will have a fair opportunity to file administrative and judicial complaints. This provision will also encourage voluntary settlements because complainants will not need to file charges immediately to protect their rights. It will allow greater opportunity for the complainant and the respondent to discuss the matter and seek a resolution.

EXPANDED COVERAGE

Title II also expands the coverage of the Act in two respects. First, as in title I, the fair housing amendments add "handicap" to the list of proscriptions. A few years ago Congress included "sex" in the act; it is now time to include discrimination based on handicap.

Second, the owner-occupied exemption in existing law is modified. Under the present statute, an owner of a dwelling with four or less units may discriminate under title VIII if such owner occupies one of the units—although such discrimination is probably illegal under the Civil War civil rights statutes. To make the remedies under title VIII parallel with these older laws, the bill narrows the exemption to cover only rooms rented in a single family unit. The revision also allows the renter, as well as an owner, to claim the exemption, thus eliminating the artificial distinction between owners and tenants contained in the present statute.

AMBIGUITIES CLARIFIED

Title II also clarifies three ambiguities which exist in title VIII. The first relates to "redlining," the practice of banks and other lenders to deny mortgage loans because of the racial or ethnic composition of the neighborhood in which the dwelling is located. Although the Federal Home Loan Bank Board and the Justice Department—in rare unanimity on fair housing matters—have taken the view that section 805 of existing law prohibits such practices, the coverage is sufficiently uncertain to merit this clarifying change.

A similar amendment is made regarding the writing of insurance in areas of racial concentration. As with mortgage lending redlining, it has been the practice of some insurance underwriters to refuse to enter into contracts of insurance because of the racial or ethnic composition of the neighborhood surrounding the dwelling. While fair housing organizations, such as the National Committee Against Discrimination in Housing, have argued that such refusals are covered under title VIII, it is sound legislative policy to make it perfectly plain and thus this change is also included in title II.

A third area of clarification involves the practice of excluding low- or moderate-income housing from a municipality. The courts have held that local officials may not use their land-use powers to prevent the construction of low- or moderate-income housing. In a landmark case brought by the Justice Department in 1971, the Court of Appeals in St. Louis enjoined municipal officials from excluding lower-income housing because it violated title VIII. United States against City of Black Jack. The Court held that conduct which has a racially discriminatory purpose or effect violates title VIII.

The recent decision of the Supreme Court in Village of Arlington Heights against Metropolitan Housing Development Corp. has clouded the issue. Although that case did not involve title VIII—it was based on the 14th amendment—it has cast a shadow across a uniform string of decisions by the courts of appeals in this area. To clarify the standard of illegality and the burden of proof in exclusionary cases arising under title VIII, this provision is included in title II of the bill.

CONCLUSION

In short, Mr. Speaker, the amendments made by this bill are needed if the goals of equal employment and housing opportunity are to be achieved. It has been suggested that some of these changes can be made by administrative action without any statutory amendments. Undoubtedly some improvement could be made by new personnel at both EEOC and HUD in the processing and resolution of complaints. The Franklin and Falk study, to which I referred earlier, makes a number of worthwhile suggestions for change at the administrative level. Similarly the staff report of the Hawkins subcommittee suggests comparable action at the EEOC. I would hope that administrators at both agencies would study those and other critical reports very carefully to see what might be accomplished at that level.

But we cannot escape the widely held view that certain legislative changes are essential if EEOC and HUD are to perform their tasks with maximum efficiency, fairness, and benefits to the victims of discrimination. The authority to issue cease and desist orders is a critical need for both these agencies; such powers cannot be given by administrative fiat, including reorganization.

Furthermore there is a danger that changes at the administrative level will be undertaken without the opportunity for all affected groups and individuals to participate in the decisionmaking process. The congressional forum is most appropriate for involving a wide range of persons who are concerned with the operations of these agencies.

In this connection I wish to extend my appreciation to persons inside and outside of Congress who, at our request, commented on the initial draft of title I of this bill which was circulated in early December. Since that time a number of changes have been made which improved those sections of the bill. In addition the recent report issued by Representatives Moss' subcommittee entitled, "Federal Regulation and Regulatory Reform," contains a wealth of information and suggestions on sound organization for regulatory agencies. This bill reflects many of those ideas and our appreciation is extended to Chairman Moss.

So that a short description is readily available to all, Congressman EDWARDS of California, and I wish to insert at this point a section-by-section analysis:

CIVIL RIGHTS AMENDMENTS ACT OF 1977—SECTION-BY-SECTION ANALYSIS

TITLE I—EQUAL EMPLOYMENT REORGANIZATION ACT OF 1977

Section 101. Short title of Title I.

Section 102. (a) Removes the present Title VII exemption of employment practices of American companies abroad regarding aliens;

(b) Adds definition of national origin to apply Title VII to employment of resident aliens to overturn Supreme Court decision in *Espinoza* v. *Farah Manufacturing Co.*

Section 103. (a) Handicap is added to Title VII as a prohibited ground for discriminating in employment practices except when the absence of a handicap is a bona fide occupational qualification. The term "handicap" is

defined to reflect the language used in the Rehabilitation Act of 1973 as revised by the 1974 Rehabilitation Act Amendments.

(b) Employment discrimination against persons forty years of age and over is added to the prohibition of Title VII. The Age Discrimination in Employment Act of 1967 which established a similar prohibition enforced by the Labor Department is repealed and the program's personnel and appropriations transferred to EEOC.

Section 104. (a) Eliminates the Title VII provision which allowed different wage scales on the basis of sex if authorized by the Equal Pay Act.

(b) Repeals the Equal Pay Act and transfers the program's personnel and appropriations from the Labor Department to EEOC.

Section 105. (a) Eliminates the pre-eminent status of the Chairman and gives the Commission as a body the authority to appoint hearing examiners and special assistants.

(b) Creates the position of "Chief Executive Officer," (CEO) a presidential appointee, who will exercise exclusive authority to direct EEOC's enforcement activities and eliminates the present Office of General Counsel. The CEO is authorized to appoint all staff other than hearing examiners and special assistants to the Commission. Commission approval would be required prior to litigation by the CEO.

(c) Removes requirement that EEOC litigation in the Supreme Court be conducted by the Attorney General and authorizes EEOC attorneys to represent the agency.

(d) Allows Commission to resolve itself into panels of three to conduct its business.

(e) Authorizes the Commission to submit appropriations requests and legislative recommendations directly to Congress, reserving the right of the President to comment on such submissions.

(f) Deletes intervention provision as redundant with revised authority in section 706.

(g) Provides that the Commission, upon a CEO recommendation, designate funds to monitor compliance agreements.

Section 106. Revises Section 706 of Title VII to reflect the duties assigned to the newly-created Chief Executive Officer (CEO), streamlines the enforcement process, and liberalizes the complainant's right to sue.

(a) The process begins with the filing of a charge by a complainant. After a preliminary inquiry, the CEA may refer the charge to voluntary arbitration or a State or local agency; hold the charge for further investigation; or notify the complainant and respondent that there is an inadequate basis to process the charge. The CEO may give weight to either an arbitral decision or a finding by a State or local agency in the determination whether to process further a charge. In the investigation of any charge, the CEO is given access to any relevant information and is authorized to issue subpeonas to insure the availability of such information or witnesses.

(b) The CEO investigates each charge retained after a preliminary inquiry. In addition, the CEO may on his/her initiative investigate a patern or practice case of violation of this title. After an investigation, the CEO may file either an administrative or judicial complaint, or determine that there is an inadequate basis to process the charge. If the CEO decides to file a complaint, no conciliation is required, but the CEO may settle the complaint at any time in the complaint process.

When an administrative complaint is filed with the Commission, notice is given to the respondent and a hearing date is set before an administrative law judge (hearing examiner). At the conclusion of the hearing, the examiner dismisses the complaint or makes findings of fact and conclusions of law and enters an appropriate order, including a direction to "cease and desist" from the unlawful conduct.

The order is filed with the Commission and becomes final unless, within 20 days, the respondent, the CEO or an aggrieved person makes objections. If objections are filed, the Commission examines the record and makes its decision. Again the losing party or parties may appeal to the Court of Appeals from an adverse decision of the Commission. Thirty days are allowed for such appeals. Again, if no appeal is taken, the Commission's decision becomes its final order. The failure of the respondent to appeal either the decision of the examiner or the Commission immediately subjects the respondent to civil penalties for disobeying that final order. The Commission is not required to go to court to enforce its orders but only, assuming no appeal by the respondent, to impose civil penalties up to $1000.00 per day.

(c) With the approval of the Commission, the CEO may file a judicial complaint which proceeds in the courts as any other civil complaint. Further, the CEO may seek preliminary relief if prompt action is necessary.

(d) The statute of limitations is revised to provide that a charge may be filed with the Commission up to one year (presently 180 days) from the date of the alleged unemployment practice or 180 days after a finding by a State or local agency on the same complaint.

(e) The right to sue by individual victims is altered to permit the complainant to file a civil action within three years from the date of the alleged unlawful employment practice or, if a complaint has been filed with the Commission, at any time up until the CEO files either and administrative or judicial complaint. Suits by the complainant are then precluded although intervention and appeal rights are retained by the individual. In addition, the statute of limitations is lengthened on filing a civil action from 90 days to one year after EEOC action ceases. Furthermore, the CEO may not file a complaint based on the same charge if the individual sues first, although the CEO may intervene if the Commission certifies the case as one of general public importance.

(f) Civil penalties of up to $1000.00 per day are made available for noncompliance with Commission orders. The penalties are assessed by the CEO and may be collected in a civil action.

(g) Additional revisions are made in the scope of remedies available to the court or hearing examiner after a finding of unlawful employment practices including compensatory and punitive damages. A provision is also added to authorize the suspension or termination of Federal funding or contracts after notice to the respondent and appropriate Federal agency, and back pay awards are lengthened from two years to five years. The attorney fee section is amended to provide that both a hearing examiner and the court are authorized to award attorney and expert witness fees at interim stages of the proceeding.

Section 107. (a) Amends present section 707 to clarify existing law and allow the Attorney General to file a self-initiated pattern or practice suit against State or local governments without a referral of a complaint from the Commission.

(b) Provides that the Commission and the Attorney General exercise concurrent jurisdicton over suits against State or local governments although an action by either party against the same defendant on the same charge would preclude the other from initiating litigation. The Attorney General, the Commission or an aggrieved person is authorized to intervene in such a suit. Three years after enactment, the Attorney General's jurisdiction over State and local governments is terminated.

Section 108. (a) Renames Section 709 of Title VII to read "State Agencies, Research and Records."

(b) Empowers the Commission to certify State and local fair employment practice agencies for one year periods. Recertification is not automatic but may be made after an evaluation by the Commission of the performance of the agency. Such certification allows the CEO, a hearing examiner, the Commission and the courts to give appropriate weight to the findings of such agencies.

(c) Eliminates present Section 709(e) on confidentiality of information.

Section 109. Revises present law to authorize the Commission to issue substantive as well as procedural regulations on compliance with this title.

Section 110. (a) The Equal Employment Opportunity coordinating Council is abolished and the Commission is established as the primary Federal agency for developing and enforcing equal employment opportunity standards for the Federal Government's enforcement activities. The Commission is required to prescribe regulations for each agency on its civil rights programs.

(b) The Commission is authorized to bring a civil action against any agency which fails to comply with the regulations developed by EEOC for civil rights enforcement activities.

Section 111. The present Section 717 of Title VII is revised to transfer the monitoring of Federal employment from the Civil Service Commission to EEOC and to expand its coverage to certain employees of the legislative and judicial branches.

(a) The prohibition of discrimination in "Federal Government employment" is amended to include handicap. The prohibition applies to employees or appointees in executive agencies, military departments or the uniformed services. In addition, legislative and judicial branch employees are covered other than persons either on personal staffs of or in policymaking positions with elected officials or judges. Also the Library of Congress and the General Accounting Office are included under the prohibition.

(b) The appointing authority and each superior of the appointing authority for each position is responsible for enforcing compliance with the prohibition of discrimination in Federal employment.

(c) Provides that complaints about executive agencies, military departments and the uniformed services be filed with the relevant agency or unit. EEOC is required to establish rules for the handling of these complaints. Persons with complaints regarding positions in the legislative and judicial branch, the Library of Congress and the General Accounting Office must file a civil action for relief under this title.

(d) An appeal of the final agency action on a complaint may be made within thirty days to the Commission. The Commission will act as an appeals review board and handle the appeals in the same way as those from hearing examiners in administrative complaint.

(e) Provides that a complainant may sue immediately concerning a violation of this title, after the final disposition of a complaint or after the failure to take action on a complaint. Actions under this section will be subject to the same procedures and remedies as those under Section 706.

(f) Transfers to EEOC the review and evaluation of equal employment opportuntiy plans for executive agencies previously conducted by the Civil Service Commission.

(g) Gives to the Librarian of Congress and the Comptroller General the same authority to monitor compliance with this section in the Library of Congress and the General Accounting Office as is exercised by EEOC in Federal employment.

(h) Transfers the personnel, property and

appropriations designated for activities under Section 717 from the Civil Service Commission to EEOC.

(i) Requires continued compliance with existing mandates for nondiscrimination in federal employment.

Section 112. Transfers the functions of the Secretary of Labor in the Federal contract compliance program to EEOC one year after enactment. The transfer does not affect the role of delegate compliance agencies under that program but does require that compliance activities be consistent with standards developed by EEOC.

Section 113. Establishes an equal employment opportunity loan fund in the Treasury Department to be administered by EEOC's Chief Executive Officer. Money from the fund will be available to assist private plaintiffs who are financially unable to litigate Title VII complaints. Such loans must be paid back with interest to the extent costs and fees are recovered through the judicial process. The CEO is given the discretion to cancel loan obligations if the plaintiff loses or if the costs are not sufficient to cover the loan. An authorization of $10 million is made for appropriations to the fund.

Provides that EEOC may furnish technical and financial assistance to persons covered by Title VII in order to implement affirmative action programs. An approved plan will not bar subsequent administrative or judicial action for a violation of this Title but shall be considered in any such proceeding. EEOC is required to promulgate eligibility regulations before approving any such assistance, but persons under court or agency order are not eligible for financial assistance.

Section 114. Repeals obsolete provisions of Title VII concerning numbers of employees required for coverage.

Section 115. Directs the Bureau of Labor Statistics to compile work force data and to make it available to EEOC, other agencies and interested persons.

Section 116. Requires EEOC to submit reports to Congress every six months on the status of pending charges.

Section 117. (a) Provides that the Act with certain exceptions will be effective 180 days after enactment.

(b) The transfer to EEOC of authority for Federal employment and the contract compliance program will take place one year after the effective date. In addition, the amendments regarding age and equal pay will not be in force until two years after the approval of this Act. Finally, the Attorney General's authority over State and local governments is terminated three years after the effective date.

(c) Provides that the President shall appoint the Chief Executive Officer within 60 days after approval of this Act.

(d) Requires the CEO in consultation with the Commission to prepare for transition to new structure created by this Act.

TITLE II—FAIR HOUSING AMENDMENTS ACT OF 1977

Section 201. Provides that the short title of this Act will be the Fair Housing Amendments Act of 1977.

Section 202. Provides in the law that the short title of the 1968 Act (which is being amended) will be the Civil Rights Act of 1968. This simply establishes in the law itself the short title which is usually used when referring to the 1968 Act.

Section 203. Provides that the short title of Title VIII of the 1968 Act shall be the Fair Housing Act. Again, this simply establishes in the law a title normally used when referring to Title VIII.

Section 204. Broadens the definition of "discriminatory housing practice" to include any violation under the Act and not merely those made illegal under Section 804, 805, or 806.

Section 205. Narrows the owner-occupied exemption in present law which allows discrimination generally in the sale or rental, by owners of single family dwellings and in the rental of units in owner-occupied dwellings with four or less independent units. The new exemption, to apply prospectively, would apply only to a single-family, owner-occupied dwelling in which space is being rented.

Section 206. Subsection 206(a) amends the catchline of section 804 of the Act by indicating that other practices, in addition to discrimination in the sale or rental of housing, will be made unlawful in section 804, as amended.

Subsection 206(b) amends section 804 of the Act by providing that the new and narrower owner-occupied exemption, discussed above, exempts certain housing from the section 804 prohibitions dealing with the sale or rental of housing.

Subsection 206(c) amends section 804 of the Act my making it unlawful for insurance companies and their agents to refuse to write home insurance because of the racial composition of the neighborhood or the occupants of the home; and for towns or other communities to exclude low- or moderate-income housing, through restrictive zoning or other land use policies, because of the housing's eligibility for government assistance or because of the racial or economic status of the prospective occupants of the housing.

Subsection 206(d) amends sections 804, 805, and 806 of the Act by making it unlawful to discriminate in the sale or rental of housing on account of handicapped status. That subsection also makes it unlawful to discriminate in the financing of housing and to deny access or membership in multiple listing services, etc. because of the handicapped condition of an applicant. Race, sex and religious discrimination are already prohibited in these housing activities. Subsection 206(d) would simply add "handicap" as another prohibited ground for discriminating in such housing activities.

Subsection 206(e) amends section 805 of the Act by explicitly prohibiting the practice of redlining. Although there is precedent indicating that redlining is already prohibited under Title VIII, this amendment is proposed solely for purposes of clarification.

Section 207. Amends section 808(e)(3) of the Act by giving HUD the authority to provide financial as well as technical assistance to public and private civil rights organizations seeking to remedy housing discrimination.

Section 208. Revises the enforcement mechanisms in the Act. Under present law HUD has only the authority to investigate and conciliate violations and to issue guidelines (but not regulations which have the force of law) interpreting the Fair Housing Act. This section would give HUD the authority to issue cease and desist orders through administrative proceedings and to promulgate substantive rules and regulations.

The new section 810, added by this section of the bill, provides for the filing of housing discrimination charges, with HUD, by the Secretary and by aggrieved persons. HUD is authorized to investigate such charges and when reasonable cause exists to believe that the charge is true, the HUD Secretary must either refer the charge to Justice for suit or file an administrative complaint (based on the charge) on which there shall be notice and opportunity for a hearing.

In determining whether or not reasonable cause exists, the HUD Secretary is authorized, when appropriate, to rely on findings of specially-certified state and local fair housing enforcement agencies.

After the conclusion of any hearing, the Secretary may issue an order awarding appropriate relief. Such relief may include money damages, equitable and declaratory relief, and punitive damages not exceeding $10,000 in the case of each willful violation.

A final order of the HUD Secretary is appealable in an appropriate court of appeals and, in such an appeal, the findings of the Secretary shall be conclusive if supported by substantial evidence.

The Secretary is authorized to assess civil penalties against persons who violate final orders of the Secretary once those orders become unreviewable.

The new section 811, added by this section of the bill, outlines the enforcement role of the Attorney General. The Attorney General is authorized to file, on the Attorney General's own initiative, civil actions intended to remedy pattern or practice violations or to remedy violations against groups of persons when the issues involved are of general public importance.

The Attorney General is required to bring civil actions necessary to enforce the Secretary's final orders, to collect any civil penalties assessed by the Secretary, and to remedy discriminatory housing practices when the Secretary has found reasonable cause and referred the matter to the Department of Justice.

The Attorney General is also authorized to file suits requesting prompt preliminary relief when a HUD investigation indicates that prompt judicial action is necessary.

The new section 812, added by this section of the bill, outlines private judicial enforcement rights. An aggrieved person may file a civil action to remedy a discriminatory housing practice. The statute of limitations is lengthened. However, such a suit may not be filed if the aggrieved person has already filed a charge, dealing with the same actions, with HUD and the Secretary has already commenced proceedings toward the issuance of a remedial order based on that charge.

The court, in cases brought by aggrieved persons, may appoint an attorney and authorize the commencement of actions without fees.

The new section 813, added by this section of the bill, provides that attorney fees may be awarded to prevailing parties in both judicial and administrative proceedings.

The new section 814, added by this section of the bill, authorizes the HUD Secretary, in consultation with the Attorney General, to issue rules and regulations implementing the Fair Housing Act.

Section 209. Amends section 817 of the Act by broadening that section to provide a civil remedy for interferences with or intimidations relating to the exercise of rights granted by the title. Present law technically provides such remedies only for violations of section 803, 804, 805, and 806 of the Act.

Section 210. Adds a new section (Section 818) at the end of the Act. Section 210(a) adds a new section 818 which establishes a fair housing loan fund from which private litigators can borrow money for housing discrimination cases. If the borrower wins the suit, the money must be returned to the extent the court awards fees and costs. Otherwise the Secretary of HUD is authorized to cancel the loan in whole or in part.

If the HUD Secretary determines that such is necessary, the Secretary of the Treasury is required to make loans to the Fair Housing Loan Fund, with such loans not exceeding in the aggregate $1,000,000 at any one time.

Ten million dollars is authorized to be appropriated for the establishment of the fund.

Section 210(b) of the bill redesignates the present sections 818 and 819 of the Act as sections 819 and 820, respectively.

Section 211. Conforms Title IX of the 1968 Act (criminal penalties for intimidations) to add "handicap" as a basis for a criminal violation.

Section 212. Amends Title 28 of the United States Code to provide for judicial review

of HUD Secretary orders in the court of appeals.

GENERAL LEAVE

Mr. BARNARD. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks and to include extraneous material on the subject of the special order today of the gentleman from California (Mr. EDWARDS).

The SPEAKER. Is there objection to the request of the gentleman from Georgia?

There was no objection.

LEGISLATION TO INSURE DEVELOPMENT OF U.S. OCEAN MINING CAPABILITIES AND SUPPORT CONTINUATION OF LAW OF THE SEA CONFERENCE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Minnesota (Mr. FRASER) is recognized for 10 minutes.

Mr. FRASER. Mr. Speaker, today I have introduced, along with several of my distinguished colleagues, a bill to insure the development of American deep sea mining capabilities and to support the work of the Third United Nations Conference on the Law of the Sea. Known as the Ocean Mining Incentive Act of 1977 this bill seeks to make a step toward the realization of deep ocean resource extraction for the benefit of the people of both the United States and the world.

The Law of the Sea Conference has been characterized by Secretary of State Cyrus Vance as "one of the most significant negotiations that this country has ever been involved in * * *." Now, although this conference is a highly significant negotiation involving the establishment of a body of law for more than 70 percent of the surface of the planet, it has been an agonizingly slow process. I am aware, Mr. Speaker, of the great concern which exists as to the future prospects for agreement at the Law of the Sea Conference. It is my view that an effective Carter ocean policy in conjunction with a moderate approach to the deep seabed question on the part of Congress is the best manner in which we can proceed toward a successful treaty.

I support the idea of providing the basic incentives to industry necessary for them to proceed with their ocean mining operations on an interim basis.

I reject the idea of granting large blocks to ocean miners through a licensing system because of the deleterious effects this could have at the United Nations.

Mr. Speaker, we are walking a narrow tightwire with any deepsea mining legislation—between going too far with congressional action and destroying the conference and yet providing industry with what it needs to develop U.S. ocean mining capability.

The Ocean Mining Incentive Act of 1977 is a moderate and balanced approach to a very difficult question. I am confident that moderate ocean mining legislation can be beneficial to the United States and to the international negotiating process. The Law of the Sea is after all, a microcosm of all international relations and a favorable outcome can be highly symbolic and precedent-setting for future cooperation in the international community. This is not to say that American interests should ever be disregarded to our detriment. Rather, the Congress has a rare opportunity to demonstrate its support for our ocean mining industry and its support for a Law of the Sea treaty.

I urge my distinguished colleagues to give their consideration to this important legislation and I look forward to close and constructive cooperation with all those interested in the weeks to come.

VETERANS' BENEFITS PASS-THROUGH BILL

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. FORD) is recognized for 5 minutes.

Mr. FORD of Tennessee. Mr. Speaker, I rise today to reintroduce for the fifth time H.R. 904, the Veterans' Benefits Pass-Through bill. As you know, a general increase in the level of social security benefits a veteran receives results in a decrease in his veterans' pension. Since so many of these people depend on these two forms of fixed income as their sole means of support, the effect of this procedure can be devastating. It assumes that the veteran is somehow immune to the cruel bite of inflation, whose incidence falls most heavily on the person with a fixed income.

I would like to thank my distinguished colleague, Mr. CONTE, for working with me on this bill. Through our joint efforts we have obtained the cosponsorship of more than 120 of our colleagues in the House of Representatives. With such an overwhelming display of support in the House and in the veterans' service community I am confident that this bill will be enacted into law during the 95th Congress.

At this point I want to share with my colleagues a letter from Mr. Harold Say, the legislative director of the Veterans of World War I of the United States, thanking me for getting behind this piece of legislation. It is only one of several such expressions I have received in recent weeks:

VETERANS OF WORLD WAR I,
Alexandria, Va., February 14, 1977.

Hon. HAROLD E. FORD,
House of Representatives,
Longworth House Office Bldg.,
Washington, D.C.

DEAR REPRESENTATIVE FORD: Please know how we appreciate your effort to get Social Security increases eliminated from calculations on income limitations.

In fact our organization has contended for several years that Social Security should not be counted at all in income limitations, and particularly in its increases.

The increases were designed to benefit all the elderly; to up their income. This it did, except in the case of the veteran on pension. He has been kept right where he was on income or had it cut.

Our thanks for your effort.

Sincerely,

HAROLD B. SAY,
Legislative Director.

Mr. Speaker, let me once again urge those Members who have not yet joined us to cosponsor H.R. 904 and help repay those veterans who served their country in its time of need by ending the discriminatory process that causes an increase in their social security benefits to result in a decrease in their veterans' benefits.

CONGRESSIONAL PAY RAISE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Indiana (Mr. EVANS) is recognized for 5 minutes.

Mr. EVANS of Indiana. Mr. Speaker, I urge that the congressional leadership schedule a prompt vote on disapproving the proposed congressional pay increases.

The most troublesome thing is that if we do not act, this pay increase will take effect automatically without a vote on the matter. The Constitution vests the Congress with legislative authority and gives us the power of the purse. This House misuses the powers with which it is entrusted when Members give themselves a pay raise in such an undercover manner.

If we put off a possible pay raise until the start of the next Congress, it would allow a general election to fall between the time of a vote on the pay raise and the time the increase would go into effect. This would allow the public to have its rightful input into the decisionmaking process. The public is entitled to see how their representative votes on this issue. If a pay raise is needed to attract new candidates to consider public office, a guaranteed raise in 2 years will be soon enough.

At a time when so many Americans are out of work, nothing could be less important than for Congress to raise its pay, especially without going on record as favoring or opposing it.

Many Americans are experiencing a severe winter which is inflicting many hardships, both physical and financial. A pay raise now manifests an insensitivity to the public and heaps another burden on the backs of the taxpayers.

LEGISLATION TO CREATE NEW JUDGESHIP POSITIONS IN FEDERAL DISTRICT COURTS AND CIRCUIT COURTS OF APPEALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New Jersey (Mr. RODINO) is recognized for 5 minutes.

Mr. RODINO. Mr. Speaker, at the request of the Administrative Office of the U.S. Courts I am today introducing legislation that would create new judgeship positions in the Federal district courts and the circuit courts of appeals.

This bill was drafted by the Judicial Conference of the United States as a result of its 4-year survey of the needs of the courts. The measure is intended to

address the crucial problems of the Federal courts caused, in large part, by a substantially increased caseload in recent years.

Within the next month, the Judiciary Subcommittee on Monopolies and Commercial Law, which I chair, will conduct hearings on this very important issue. The subcommittee shall examine, not just the current situation, but the very difficult problems that confront the Federal judiciary in the future should the caseload continue to expand at the current rate.

In addition, I know that the gentleman from Wisconsin (Mr. KASTENMEIER), chairman of the Subcommittee on Courts, Civil Liberties and the Administration of Justice, intends to examine the broad issues and problems that confront the Federal courts and which threaten both the interests of justice and the rights of those who come before the courts.

Mr. Speaker, the administration of justice in the United States is of vital importance to us all. It is the system whereby we protect our cherished freedoms and defend the constitutional rights of our citizens. There is no question that more Federal judges must be appointed to handle the existing workload. But there is also no question that we cannot continue to appoint more and more judges indefinitely.

It is to this question of the future, as well as to those of the moment, that we must address ourselves.

Our system of justice has served us well in America for two centuries. I know that all of us who share responsibilities for that system share also the single purpose of improving where possible the already high standards of performance.

HELSINKI COMMISSION HEARINGS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

Mr. FASCELL. Mr. Speaker, the Commission on Security and Cooperation in Europe will begin hearings February 23 and 24 in room 2172 of the Rayburn House Office Building on U.S. policy toward implementation of the 1975 Helsinki accords' provisions on human rights and expanded flow of people and information. The hearings on both days are open to the public. They will begin at 10 o'clock.

On February 23, the Commission will hear the testimony of Mr. Leonard Garment, until recently the U.S. Representative to the United Nations Commission on Human Rights, and Mr. Vladimir Bukovsky, a political prisoner in the Soviet Union for 12 of his 34 years. Mr. Bukovsky, who was released last December and sent to the West in an exchange with imprisoned Chilean Communist Party leader Luis Corvalan, will be making his first public appearance in the United States.

On February 24, the Commission witnesses will be Mr. Tad Szulc, a writer on Eastern European affairs; Mr. Tomas Venclova, a poet who recently left the Soviet Union where he is a member of the Lithuanian Group to Promote Observance of the Helsinki Agreements in the U.S.S.R.; and Dr. Andrew Zvarun, president of the Helsinki Guarantees for Ukraine Committee of Washington, D.C.

These initial hearings will focus on the expectations the Final Act has aroused, the actions private citizens have taken to further implementation of the act and the response they expect of the U.S. Government. The Commission is fortunate to have witnesses with first-hand experience with both the repression of human rights and the struggle against that repression. The hearings will also give Commissioners an opportunity to hear expert advice on the United States and East European approach to compliance with the underlying principles of the accords and the specific provisions that make the application of those principles measurable.

HIGHER EDUCATION FOR THE ECONOMICALLY DISADVANTAGED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. STOKES) is recognized for 60 minutes.

Mr. STOKES. Mr. Speaker, I bring to your attention again today the fact that equal educational opportunity does not yet exist in this society and will not exist so long as there are identifiable groups disadvantaged in regard to participation in postsecondary education. Included among present barriers to postsecondary access and success are race, poverty, inferior preparatory education, rural isolation, limited English speaking ability, and physical handicap. Since the midsixties the Federal Government has spearheaded efforts to expand postsecondary opportunity by utilizing both a coordinated package of student financial aid programs, and a program of supportive and compensatory services at both the secondary and postsecondary levels. The latter effort, special programs for students from disadvantaged backgrounds, commonly referred to as TRIO, is presently authorized under section 124 of the Education Amendments of 1976. TRIO includes four very effective, existing programs—special services for disadvantaged students, talent search, Upward Bound, and educational opportunity centers. Recognizing the critical importance of informational and supportive services, Congress doubled the authorization level for TRIO in the 1976 educational amendments. This increased recognition was well advised: All of us representing our Nation's cities and isolated rural areas know of the need to increase the options available, to point out existing options, and to create new options for our Nation's youth.

LEGISLATIVE HISTORY

A. TALENT SEARCH

The talent search program was created by section 408(a) of the Higher Education Act of 1965 (Public Law 89–329), as a recruiting mechanism to identify students who would be eligible to receive educational opportunity grants authorized by the same legislation. The program ordinarily had three objectives:

(1) to identify qualified youths of exceptional financial need and encourage them to complete secondary school and to undertake postsecondary educational training; (2) to publicize existing forms of student financial aid; and (3) to encourage secondary school or college dropouts of demonstrated aptitude to reenter educational programs, including postsecondary-school programs.

B. UPWARD BOUND

The Upward Bound program traces its origin to pilot projects funded during the summer of 1965 with private moneys from the Carnegie Corp. and research and demonstration funds for experimental programs from the Office of Economic Opportunity. The pilot projects were designed as summer units for low-income students who would enter college the following September, but were in need of intensive college preparatory programs.

As the results were analyzed, the Office of Economic Opportunity decided that a year-round program was needed to meet the special needs of disadvantaged students preparing for college, including both summer and academic year activities. They also extended services to students throughout the 2 or 3 years prior to high school graduation who could be characterized as "academic risks." The new program was subsequently authorized as a national program under the 1966 amendments to the Economic Opportunity Act, becoming a component of the community action programs in the spring of 1966. The Higher Education Amendments of 1968 transferred the Upward Bound program from the Office of Economic Opportunity to the Office of Education where it has remained an integral component of TRIO services.

C. SPECIAL SERVICES FOR DISADVANTAGED STUDENTS

The Higher Education Amendments of 1968 also amended section 408 of the Higher Education Act of 1965, to provide a program of special services for disadvantaged students who were in college. The program was intended to provide remedial and other special services for students with academic potential who are enrolled or accepted for enrollment at higher educational institutions. The 1968 legislation authorized projects to provide: First, counseling, tutorial, or other educational services, including special summer programs, to remedy such students' academic deficiencies; second, career guidance, placement, or other student personnel services to encourage or facilitate such students' continuation or reentrance in a higher education program; or third, identification encouragement, and counseling of any such students with a view to their undertaking a program of graduate or professional education. The program became operational on July 1, 1970.

The Education Amendments of 1972 omitted reference to any specific activities and defined the program as simply "remedial and other special services for students with academic potential" enrolled at host institutions.

D. EDUCATIONAL OPPORTUNITY CENTERS

The Education Amendments of 1972 further amended the Higher Education Act of 1965, to establish educational opportunity centers in areas with major concentrations of low-income populations to provide, in coordination with other applicable programs and services: first, information with respect to financial and academic assistance available for persons residing in such areas desiring to pursue a program of postsecondary education; second, assistance to such persons in applying for admission to institutions at which a program of postsecondary education is offered, including preparing necessary applications for use by admission and financial aid officers; and third, counseling services and tutorial and other necessary assistance to such persons while attending such institutions.

E. NEWLY AUTHORIZED PROGRAMS

In the 1976 Education Amendments two additional programs were created—service learning centers, a postsecondary program similar to special services but open to a broader range of students, and a training authority for personnel employed in educational opportunity programs.

THE NEED FOR TRIO

Today, a student from a family in the bottom income quartile has less than one-third the chance of a student in the top income quartile of completing college. Moreover, minorities continue to be underrepresented among college graduates. For example, while blacks made up 12.1 percent of college aged youth and 9.2 percent of students attending postsecondary institutions, they received only 5.1 percent of the baccalaureate degrees awarded in 1973–74. The TRIO programs are designed to assist in eraddicating these educational inequities. In order to adequately address such disparities, the entire complex of variables affecting choice and success in postsecondary education must be dealt with.

The underrepresentation and disproportionate attrition rates of minorities in postsecondary institutions also exacerbate unemployment among minority youth. According to an October 1975 "Special Labor Report on Unemployment of School Age Youth," minority youth, not in school and without high school diplomas, had a 35.4 percent unemployment rate in 1975, while minority high school graduates had a 24.1 percent unemployment rate, minority students with 1 to 3 years of college education a 20.3 percent unemployment rate, and minority college graduates a 6.2 percent unemployment rate.

The statistics on anticipated earnings also underscore the importance of college completion for this population. According to the U.S. Census Report on Educational Attainment, black males who are high school graduates can expect to increase their income by an average of $388 a year by completing 1 to 3 years of college. By graduating from college, black males gain another $2,040 yearly. The average percentage increase in annual incomes for black females was 13 percent for 1 to 3 years of college and 57.9 percent for 4 years of college.

Further, the TRIO programs also insure an increase in the representation of minority students in graduate and professional programs. While in 1971–72 blacks made up 10.8 percent of the 20–24 age group, black enrollment in professional programs was as follows: law 4.0 percent, medicine 4.5 percent, dentistry 3.6 percent, engineering 2.1 percent, architecture 4.0 percent, communications 2.5 percent, and doctoral programs 1.1 percent. An attack on this problem must include support for college level and precollege level programs directed toward providing the intensive academic assistance necessary to equip underprepared students for success in the most competitive disciplines and institutions.

THE STUDENTS SERVED

In 1975–76, TRIO programs served 284,350 students, 32,000 in upward bound programs, 112,600 through talent search programs, 89,750 in special service programs, and 50,000 students at educational opportunity centers. Fifty percent of the students were black, 23 percent were white, 17 percent were Puerto Rican or Chicano, 7 percent were Native American and 3 percent were of other backgrounds. The majority of students involved in the programs met Federal poverty criteria.

PROGRAM EFFECTIVENESS

The TRIO programs have been shown to be effective in meeting their legislative mandate. Perhaps most surprising of all is information on talent search programs. Based on placement data for midwest programs it appears likely that talent search projects have contact, prior to enrollment, with almost 25 percent of the minority students who enter postsecondary institutions each year.

Upward Bound, too, has been highly successful. This program has been the most widely and most recently studied of the TRIO programs, and the results of these evaluations have been clearly favorable. For example, a recent study commissioned by the Office of Education found that:

(1) The Upward Bound Program is increasing entry into postsecondary education for disadvantaged students. Among high school graduates in the class of 1974, 71% of UB participants entered postsecondary education compared to 47% of the comparison students, and

(2) Rate of entry to postsecondary education was found to be positively related to length of participation in Upward Bound: 78% of the students participating in UB grades 10 through 12 entered postsecondary education, whereas, only 68 to 69% of those who entered UB in grades 11 or 12 entered postsecondary education.

The study also indicated that upward bound increased a student's probability of staying in college once he did enroll.

Special services projects have been less adequately studied but available data on supportive services at the college level is also encouraging. For example, the University of the State of New York conducted a study in 1974 which revealed that disadvantaged students at campuses after the inception of higher education's opportunity programs performed more successfully than their counterparts at the same campuses prior to such programs. The total overall grade point average for HEOP students was 2.33 while that of non-HEOP students was only 1.79; program students exhibited a higher percentage of graduates—51 percent than the non-program group—35 percent, and fewer HEOP students left for academic reasons—15 percent than the non-HEOP students—35 percent.

All four of the TRIO programs insure that financial aid dollars, particularly those invested in the basic grant program, are fully utilized and wisely spent. A 1974 California study indicated that only a quarter of the seniors in Los Angeles high schools serving low-income districts were aware of their eligibility for financial aid. It is the informational services provided by talent search and Upward Bound which alert students to these programs and assist their families in filling out the fairly complicated financial aid application forms. Moreover, it is only the instructional services provided by special services and Upward Bound programs which assist students in strengthening their basic academic skills and accordingly allow them to stay in college once they enroll. Only if students remain through graduation will the investment their country is making in them with the basic grant, the State student incentive grant, and campus based grant and loan programs receive an adequate return.

TRIO programs also provide additional long-term benefits to the Nation in indirect ways. Data tends to suggest that the cost of financing these special programs is more than returned to the Federal Government within one generation. Taxes paid on the anticipated increases in earnings of successful program completers provide sufficient revenue to cover the programs' costs. It has also been pointed out that special programs serve to reduce other Federal costs such as the uncontrollable expense of income maintenance and unemployment compensation programs.

SOME TYPICAL PROGRAMS

Let me mention briefly a few of the TRIO programs with which I am familiar. The handicapped student services program at Wright State University in Dayton, Ohio, is funded by both State funds and a special services grant. The program provides handicapped students physical assistance in the tasks of daily living, personal assistance including vocational counseling and adapted orientation, and academic assistance including proctoring and a taping service. The office also serves as a link to the surrounding community by providing information on architectural accessibility and developing programs to reduce misconceptions of handicapped people which subsequently reduce their chances for employment and independence. Over 500 students—students with hearing losses, speech impediments, epilepsy, heart conditions, mobility and visual handicaps are served by the project. Over 70 percent of the students served have mobility handicaps.

Another project of interest is the Upward Bound program which has been located at the University of Wisconsin at Stevens Point since 1968. For most of that period the program was charged with providing services to the entire northern two-thirds of the State. Upward Bound at Stevens Point is particularly concerned with meeting the needs of American Indian students from the reservations and small towns which dot the area. The project provides an on-campus summer program to help each student learn to feel comfortable in an academic setting, discover his or her own potential, and graduate from high school. All students are encouraged to consider some kind of further education or training, and are assisted in securing suitable placement.

Classes are usually 1 hour in length, and time for supervised study, individual help, and small group instruction is also provided. Upward Bound classes are not intended to duplicate or replace regular high school offerings, but rather to stimulate interest, provide basic skills, and serve as an introduction to a subject. Small classes, individualized and programed instruction, and innovative methods and materials are used to encourage students to become involved in the learning process and to experience academic success. Native American traditions and values are recognized and included within the curriculum.

During the academic year, students are obligated to show good attendance at their own school, work for satisfactory grades, and study outside of school hours. The target schools provide monthly reports on each student and the project staff maintains contact with all students particularly those in need of support or encouragement. A 1974 study of the Stevens Point project indicates that it has been successful in keeping students in high school until graduation and also very successful in placing its graduates in postsecondary programs.

A unique example of a talent search approach is a statewide project operating in Connecticut. That project, Conntac, provides individual counseling to over 1,000 students, and information services to over 4,500 persons annually. In a recent study of the project's 10-year history it was found that 78 percent of Conntac's clients entered postsecondary institutions, and that 68 percent of the students placed completed the program which they entered. This project receives 50 percent of its funding from TRIO and an additional 50 percent from the State.

One should look also at the upward bound program at Marquette University in Milwaukee. That program has three components: general upward bound, prehealth services, and preengineering. The preengineering component, for example, serves 65 students and provides classes, laboratory work, field trips, seminars, and direct exposure to persons teaching or working in the field of engineering. Students aim at developing the skills necessary for success in an engineering curriculum in college and a greater awareness of career options available in this field where the underrepresentation of minority persons is so critical. The preengineering component at Marquette is supported through joint funding from an Upward Bound grant and contributions from 15 local corporations.

There is also a special services program at Cleveland State University serving my own district with which I have been highly impressed. The program enrolls over 1,000 students each year and provides counseling and academic services to assist them in adjusting to college. Prior to enrollment the students' academic needs are diagnosed and special individualized coursework in reading, writing and mathematics is prescribed. Throughout their first year of enrollment, students are required to maintain weekly contact with the project's counseling staff. The Cleveland State program has a retention rate of 70 percent.

Unfortunately, during the past 4 years, TRIO programs have not been given sufficient attention or support. Inflation has severely eroded the resource base first provided. Today Upward Bound, for example, can only serve three-quarters of the students it served in 1973. The dangers in this approach were pointed out by a study commissioned by the California Legislature in 1974. That study concluded that now that substantial attention has been given to using financial aid programs to provide individuals access to colleges, increased attention must also be directed to programs of academic and personal assistance. A further lack of attention to the provision of information, counseling, tutoring, basic skills instruction, and other services for the disadvantaged can only be shortsighted. Such a failure would result in a Federal educational policy at the postsecondary level which, on the one hand, promises to expand opportunity through financial aid programs, and on the other hand, preserves class related distinctions among individuals and groups which insure de facto inequality. Postsecondary education has proven to be a viable vehicle for the attainment of equality for America's underclasses, but postsecondary opportunities will continue to be restricted until the noneconomic as well as the economic barriers to higher education are more fully addressed.

HEARINGS ON U.S. REFUGEE POLICY AND PROGRAMS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. EILBERG) is recognized for 5 minutes.

Mr. EILBERG. Mr. Speaker, I wish to announce that the Subcommittee on Immigration, Citizenship, and International Law of the Committee on the Judiciary will hold a public hearing on Thursday, February 24, 1977.

Subjects to be discussed at the hearing include: U.S. refugee policy; our humanitarian assistance programs for refugees; and my legislation, H.R. 3056, which would amend the Immigration and Nationality Act to revise the procedures for the admission of refugees into the United States.

The hearing will be held in room 2226, Rayburn House Office Building, at 9:30 a.m. and testimony will be received from the Department of State.

THE FEDERAL GOVERNMENT SHOULD COMPENSATE LOCALITIES FOR REVENUES LOST ON FEDERAL AND FOREIGN-OWNED PROPERTY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. KOCH) is recognized for 10 minutes.

Mr. KOCH. Mr. Speaker, I am today introducing legislation which would provide for Federal payment in lieu of taxes on Federal property, on foreign missions and consulates, and on property owned by international organizations. I am doing so because I believe that it is unfair to expect already hard-pressed localities to provide regular services without the revenues that usually accrue from local property taxes.

There are many localities which must bear this burden, but I would like to discuss this matter as it relates to New York City, the most financially hard pressed of localities. At present New York City loses about $52 million annually on tax-exempt property owned by the Federal Government.

Furthermore, an additional $8 million in property tax revenues is lost from foreign diplomatic missions and consulates.

Finally, the tax-exempt property of the United Nations costs the city treasury $2 million per year. No one should view this legislation as simply a bill for the relief of New York City, however. Residents of Oak Ridge, Tenn., for instance, are concerned about the fiscal survival of their city if voluntary Federal payments are not forthcoming on the huge Federal complex there. Towns containing military installations receive some impact aid at present, but I do not believe it approximates the tax revenues that would be recouped if that property were taxable.

There is precedent for such action by the Federal Government, which, I believe, compels us to move forward with this legislation.

Last year Congress enacted, with the unanimous support of the New York State delegation, Public Law 94-565 which provides Federal payment in lieu of taxes from the U.S. Department of the Interior for federally owned park land. This $118.2 million per year program will assist primarily Western States to offset the loss of revenues from vast expanses of federally owned tax-exempt property. Under this program New York City will receive $15,000. At the time that I voted for this legislation, I said that I considered that vote to be "bread upon the waters."

The legislation I introduce today is intended to provide balance to Federal programs in this area. It will help cities such as New York, it will help areas with military installations, and it will help towns in which the Federal Government holds a great amount of property.

Under my legislation localities would apply to the Administrator of the Gen-

eral Services Administration for payment commensurate to revenues lost from certain tax-exempt properties. An independent verification of the appraisal would have to be included in the application. Yearly payments would be made.

This legislation will not solve the fiscal problems of our cities; it is not intended to. It will simply relieve some of the undue financial strain which many localities must currently endure. I hope that Members from urban, suburban, and rural areas will join together in support of this effort.

MARTIN LUIS GUZMAN: 1887–1976

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. DE LA GARZA) is recognized for 5 minutes.

Mr. DE LA GARZA. Mr. Speaker, humanity lost a most rare and precious gem, Mexico lost one of its most illustrious sons, the United States and all democracies of the world lost a true believer in the basic concept of liberty and justice, and I lost a dear friend in the death of Don Martin Luis Guzman on December 22, 1976.

Don Martin was a soldier, a man of letters, legislator, philosopher, good son, loving father, devoted husband, friend—a friend who attached no reservations to his friendship.

There are so many things to say about this great and gentle man that volumes could be written to cover his brilliant career.

On another day, I will be honored to speak at length about this extraordinary man, but today when we have the President of Mexico Lic. Jose Lopez Portillo as our guest. I take these few minutes for a very humble tribute to Don Martin. Somehow I feel Don Martin would be honored, as Mexico and the Mexican people would be honored, if mention were made to all of us about this great man.

Respectfully I ask my colleagues to join with me in extending our sympathy to Dona Ana West de Guzman, his loving wife, and to his sons, Martin Luis, Hernando and Guillermo Guzman West.

THE TORTURE OF NORTHERN IRELAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. WOLFF) is recognized for 5 minutes.

Mr. WOLFF. Mr. Speaker, the practice of torture is repugnant to decent men and women everywhere, regardless of nationality. Unfortunately, the practice of torture is as universal as is our shock and indignation when new cases appear before the eyes of the world.

It is my sad duty today to present for the attention of the House an article from last week's papers noting that our good friend and ally, Great Britain, has confessed before the European Court of Human Rights that she has carried out systematic torture of human beings in Northern Ireland.

In confessing her guilt, after years of charges, including the present case being pressed by the Republic of Ireland, the British represented to the court that the torture had been discontinued and would never occur again.

Certainly we can all join with people of good will on both sides of the Atlantic in issuing a heartfelt sigh that such a horrifying confession has been made by the nation which gave us Magna Carta. We also hope that by publicly confessing her crimes against humanity, Great Britain can help those other nations of the world using torture—be they in the Orient, in South America, in Africa or in the Middle East—to face the shame of their actions and to stop them.

I would note that I have personally visited Northern Ireland to see for myself the horror that is the daily experience for men and women, the children, soldiers, and police—all of those who in the broadest sense are victims of the strife in that troubled land.

I was able to visit the shocking prison camp at Long Kesh, site of so many the allegations of torture which the world now knows to be substantiated. Long Kesh has since been razed, but the scars of that place remain a black mark on British history, and a sorry episode in Western history.

Mr. Speaker, my point is that we in the United States are not powerless to prevent acts of torture by other governments. The critical spotlight of world attention can have a cleansing effect if properly focused—as in the case against Great Britain now before the European Court of Human Rights.

I would note that some 4 years ago I began my fight to hold hearings on allegations of violations of human rights in Northern Ireland. This House has been presented with the results of unofficial hearings I held in New York in the the fall of 1975, after the Department of State successfully blocked Washington hearings.

As in the case of so many matters affecting us, the American people are the last to know what the rest of the world has long known. Certainly the people of Northern Ireland knew the British were torturing their people, and the relatives of the victims who live in our country knew as well.

What did we gain by our silence? Only further disillusionment and cynicism—and several more years of unmonitored torture by our friend and ally.

Mr. Speaker, the interests of millions of Americans in activities against their friends and relatives overseas are clearly not being served by official U.S. Government policies which turn a blind eye to atrocities by our allies.

Our eyes are no longer blinded on Northern Ireland, and I accordingly urge that full hearings now be held so that the full story can be told, in hopes of working toward a peaceful and lasting solution to the political, social and economic problems which prompt the violence in Northern Ireland.

[From the New York Times, Feb. 9, 1977]

BRITAIN CONCEDES USE OF TORTURE IN NORTHERN IRELAND

STRASBOURG, FRANCE, Feb. 8.—The British Government conceded today that it had used five torture techniques on detainees in Northern Ireland, but gave a solemn pledge to the European Court of Human Rights that it would never do so again.

The British Attorney General, Sam Silkin, gave the pledge in an effort to persuade the Irish Government to drop its proceedings against Britain. It is the first case of its kind to come before the court.

Mr. Silkin told the panel of 18 judges that British forces would never again use the so-called "five techniques" of interrogation about which Ireland had complained.

These are hooding a prisoner, harassing him with noise, putting him on a bread and water diet, depriving him of sleep, and making him lean against a wall for long periods, off balance with arms out-stretched.

The preliminary hearing in Strasbourg, which ends tomorrow, is designed to establish the scope of the court's jurisdiction regarding the Irish complaint.

Unless Ireland decides to drop its case against Britain after Mr. Silkin's speech, the court will meet again—probably in April—to discuss specific accusations of ill-treatment.

The Irish Government, in a voluminous dossier submitted to the European Human Rights Commission here in 1971, charged numerous cases of torture and other ill-treatment by British security forces in Northern Ireland in the months after the introduction of internment without trial in August, 1971.

Some of these allegations were upheld by the commission after a four-year investigation in which 119 witnesses were heard, among them senior security officers.

The commission found that in certain cases Britain had violated Article 3 of the Human Rights Convention, which forbids torture or inhuman or degrading treatment as punishment.

Mr. Silkin said today that his Government was not contesting the commission's findings. He said that, after an official inquiry into the conduct of the security forces in Northern Ireland, the use of these five techniques had been halted in 1972 and compensation paid to those who had suffered.

Mr. Silkin referred to a submission to the court by the Irish Attorney General, Declan Costello, that Ireland sought a court order obliging Britain to undertake never again to have recourse to those techniques.

Following his Government's solemn pledge, Mr. Silkin said: "We hope that the court will be enabled to face a situation in which the objective of the applicant government has in fact been accomplished."

"We dare to hope also," he went on, "that in doing so we shall enable the applicant government to agree that there is no longer any adequate reason for them to pursue a course which can only divide us in a situation which cries out for the fullest cooperation between us."

CONGRESSIONAL PAY RAISE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kentucky (Mr. MAZZOLI) is recognized for 5 minutes.

Mr. MAZZOLI. Mr. Speaker, today I directed a letter to you concerning the subject of the congressional pay raise.

In it, I solicit your support for a bill I have introduced which would change the methods and procedures governing pay adjustments for Members of Congress.

Now, these adjustments largely occur automatically—without a public vote. Some have termed this a "back-door" approach.

I believe a public vote on all such questions is essential if Congress is ever

to regain esteem and credibility with the people.

You, Mr. Speaker, have always stood for and voted for openness and accountability for the House. I believe my bill is a furtherance of openness and accountability. I hope my bill will receive your warm support.

I ask permission to include my letter to you, Mr. Speaker, at this point in the RECORD:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 17, 1977.
Hon. THOMAS P. O'NEILL,
Speaker of the House,
U.S. House of Representatives,
Washington, D.C.

DEAR MR. SPEAKER: Much to my chagrin—and the public's—we are about to permit a substantial pay raise for Members of Congress by way of the "back door." That is, without a public vote on the question.

Several of our distinguished colleagues have joined me in a legislative effort to prevent pay raises for Members of Congress unless there is a public vote taken on the question.

We are not all in agreement on the propriety of the pending pay raise. Some support the raise, others oppose it. I tend to support it.

But, we all are agreed on one thing. The current mechanics and procedure for handling pay raise questions is akilter and needs to be changed.

My bill, the Congressional Pay Reform Act of 1977, would (1) divorce pay raises for Members of Congress from those for Executive and Judicial Branch employees; (2) eliminate all automatic cost-of-living increases for Members including those adjustments scheduled for this coming October; and (3) require that all pay raises for Members of Congress be subject to a public vote.

Unfortunately, Mr. Speaker, it appears all but certain that the pending pay raise will become effective this weekend without a hitch—and without a vote. This is too bad.

But, Mr. Speaker, it is never too late to correct a mistake. Pay adjustments will be proposed by future Quadrennial Commissions and future cost-of-living adjustments will be submitted (same as this coming October.)

We must take prompt action on my bill—or on other similar measures pending in the House—so that the wide open "back door" for pay raises is closed once and for all.

I intend to reintroduce my Pay Reform Act of 1977 in the very near future. I shall be seeking and encouraging others to co-sponsor the bill.

I also intend to write the House Post Office and Civil Service Committee urging that it continue its debate on the salary and compensation issue. It is too important a matter to be dropped—even if the pending salary adjustment goes through as now seems certain.

Mr. Speaker, in view of your strong commitment to openness and accountability, your actions in the House, and in line with the changes we have already seen under your leadership, I hope that you will personally support this change.

Sincerely,

ROMANO L. MAZZOLI,
Member of Congress.

RESTORE REBATES FOR ALL TAXPAYERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Virginia (Mr. HARRIS) is recognized for 5 minutes.

Mr. HARRIS. Mr. Speaker, I understand that yesterday, February 16, 1977, the House Ways and Means Committee voted to modify President Carter's economic stimulus program by phasing out rebates to taxpayers in the $25,000 to $30,000 range and eliminating rebates altogether for taxpayers earning more than $30,000. I oppose this action.

A family with two dependents earning $30,000 pays somewhere around $5,000 per year in Federal income taxes. The same family with a $40,000 income pays about $8,000 in Federal income taxes; and, a family earning $50,000 pays about $12,000.

While a $50 rebate is miniscule compared to the Federal income tax liability of these taxpayers, I believe that it is a mistake to assume that these families could not use the assistance or that they would not spend the rebate. Like other families, these people face higher fuel bills due in large part to the severe winter this year. Inflation has cut into their already tight budgets.

To pay for the high cost of housing, medical care, food, utilities, or other basic expenses, in many families both the husband and wife have sought employment. When both spouses work, it is not at all uncommon for their combined income to be in the neighborhood of $30,000. I do not believe that we should eliminate these families from the rebate program.

There is no question that we need real tax reform. Many wealthy individuals and giant corporations pay little or no Federal income tax. We ought to close their loopholes; and, we need a simple, fair tax system. But we will not accomplish that goal by denying rebates to families who pay $5,000 or $8,000 or $12,000 in Federal income taxes.

I hope the Ways and Means Committee will reverse its action. If the committee would like to promote greater tax reform—and save money—I suggest that the rebates to businesses be granted to only those corporations which currently pay a significant portion of their net income in Federal taxes. Corporations, such as Gulf, which paid only 1.9 percent of its $2.6 billion net income in Federal taxes, should not have an additional opportunity to reduce their tax payments. Again, I urge the Ways and Means Committee to restore rebates to families with incomes exceeding $30,000.

PROPOSED PAY INCREASE

Mrs. LLOYD of Tennessee asked and was given permission to extend her remarks at this point in the RECORD and to include extraneous matter.)

Mrs. LLOYD of Tennessee. Mr. Speaker, I commend my good friend, the gentleman from Tennessee, Mr. ALLEN, for his statement. What we have just witnessed is the desire of an overwhelming majority of the Members of this House to face up to the responsibility of voting "yea" or "nay" on the congressional pay raise.

I have opposed this raise since it was first rumored in last December that the Quadrennial Presidential Commission on Executive Legislative and Judicial Salaries would recommend such an exorbitant increase. I was disappointed that former President Ford submitted the recommendation and that President Carter has let it stand.

It is my firm belief that the question of a congressional pay raise should be publicly addressed by the Congress and thereby give our constituents the chance to see where we stand.

Recently public opinion surveys have indicated that the American people generally hold the Congress in very low esteem. We should make every effort to regain the respect for and confidence in the House of Representatives which are essential to the effective operation of our representative form of Government. I suggest we take the first step toward this by facing the responsibility of addressing ourselves publicly on this issue. The American people have a right to demand that their elected officials are accountable for what the Federal Government does. We should comply with their wishes.

At a time when our Nation and its people are beginning to recover from a severe economic recession, I think the question of a pay raise of this amount is highly inappropriate. I have joined with several of my colleagues in calling for disapproval of the raise, in order to demonstrate to the American people our willingness and desire to be prudent with their tax dollars. This is an excellent opportunity for us to prove to our constituents that we are sincere in our desire to hold down Federal spending.

I object to any system which allows Members of Congress to receive a pay hike without first voting on it. I also have serious reservations about the validity of the conclusions drawn by the President's Commission on Executive, Legislative, and Judicial Salaries. For example, the Commission contends that a prime factor in the case for higher pay scales is the excessive dropout rate among executive level Federal employees. But the annual attrition rate last year in executive level jobs was only 2.8 percent. I know of only one Member of Congress who left office for the purpose of increasing his earning power, and less than one-third of 1 percent of all Federal judges left the bench last year to return to private practice. There are an estimated 30 qualified applicants for every vacancy in Federal career executive assignments.

In a similar fashion the argument that Federal workers are underpaid is open to question. The average Congressman received a $700 a year raise upon entering office. In addition, while it is true many Federal employees took a pay reduction upon entering Government service, it should also be pointed out that their lifetime earning potential is increased over their private sector peers as a result of this work. In short, they will make a higher salary upon leaving the Federal Government as a result of their Government service. Finally, no consideration is given to the nonsalary benefits of Federal employees. The chief benefit is the civil service pension plan. Under this retirement plan the average executive level Federal worker receives $400,000 in pension income for which he is eligible at age 57.

Members of Congress and Federal judges receive additional pension benefits. All of these pensions are indexed against the cost of living to prevent any erosion in purchasing power which results from inflation. I believe that taken all together, these benefits constitute a compensation package for the executive level official far above the benefits prevailing in the private sector.

For Members of Congress to permit themselves to accept a substantial pay increase at a time when the majority of our constituents have serious difficulty being able to afford the food, clothing, housing, health care, and other essentials which make their lives tolerable, is unconscionable. We should take the initiative in providing responsible fiscal leadership and now, on this issue, is a very good time to start.

Mr. Speaker, although I am deeply opposed to this pay raise, I recognize that some Members of this Congress support the increase. If this is the will of the majority of the House then the raise should be adopted in open vote, but I also believe that before the raise is effective we ought to give the American people the opportunity to pass judgment on this proposal. I am therefore sponsoring legislation with the gentleman from Ohio (Mr. WHALEN) which would prohibit any pay raise from taking effect until the beginning of the Congress following the session in which the raise was adopted. This would allow the people we represent to judge us on the basis of our vote on a pay raise, and express their will in an election before that raise can be effective.

PRINTING OF RULES OF THE COMMITTEE ON EDUCATION AND LABOR

(Mr. PERKINS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PERKINS. Mr. Speaker, in accordance with rule XI 2. (A), I submit for publication in the CONGRESSIONAL RECORD the rules of the Committee on Education and Labor, U.S. House of Representatives, adopted by the committee February 1, 1977:

RULES OF THE COMMITTEE ON EDUCATION AND LABOR, 95TH CONGRESS

INTRODUCTION

The rules of the Education and Labor Committee of the U.S. House of Representatives have been promulgated and adopted in conformity with House Resolution 5 of the Ninety-fifth Congress, and are consistent with the rules adopted by the Democratic Caucus of the Members of the U.S. House of Representatives for the Ninety-fifth Congress and in other respects preserve those provisions of the rules and reforms governing the Committee for the previous Congress.

Paragraph (k)(2) of clause 2 of rule XI, Rules of the House of Representatives, provides that a copy of the committee rules and clause 2 of rule XI shall be made available to witnesses before the committee.

This print is furnished in accordance with that requirement.

Rule 1. Regular and Special Meetings.—(a) Regular meetings of the committee shall be held on the second and fourth Tuesdays of each month at 9:45 a.m., while the Congress is in session. When the Chairman believes that the committee will not be considering any bill or resolution before the committee and that there is no other business to be transacted at a regular meeting, he will give each member of the committee, as far in advance of the day of the regular meeting as the circumstances makes practicable, a written notice to that effect and no committee meeting shall be held on that day.

(b) The Chairman may call and convene, as he considers necessary, additional meetings of the committee for the consideration of any bill or resolution pending before the committee or for the conduct of other committee business. The committee shall meet for such purpose pursuant to that call of the Chairman.

(c) If at least three members of the committee desire that a special meeting of the committee be called by the Chairman, those members may file in the offices of the committee their written request to the Chairman for that special meeting. Such request shall specify the measure or matter to be considered. Immediately upon the filing of the request, the clerk of the committee shall notify the Chairman of the filing of the request. If, within three calendar days after the filing of the request the Chairman does not call the requested special meeting to be held within seven calendar days after the filing of the request, a majority of the members of the committee may file in the offices of the committee their written notice that a special meeting of the committee will be held, specifying the date and hour thereof, and the measure or matter to be considered at that special meeting. The committee shall meet on that date and hour. Immediately upon the filing of the notice, the clerk of the committee shall notify all members of the committee that such meeting will be held and inform them of its date and hour and the measure or matter to be considered; and only the measure or matter specified in that notice may be considered at that special meeting.

(d) All legislative meetings of the committee and its subcommittees shall be open. No business meeting of the committee, other than regularly scheduled meetings, may be held without each member being given reasonable notice. Such meeting shall be called to order and presided over by the Chairman, or in the absence of the Chairman, by the ranking majority party member of the committee present.

Rule 2. Questioning of Witnesses.—Committee members may question witnesses only when they have been recognized by the Chairman for that purpose, and only for a 5-minute period until all members present have had an opportunity to question a witness. The 5-minute period for questioning a witness can be extended only with the unanimous consent of all members present. The questioning of witnesses in both committee and subcommittee hearings shall be initiated by the Chairman, followed by the ranking minority party member and all other members alternating between the majority and minority party. In recognizing members to question witnesses in this fashion, the Chairman shall take into consideration the ratio of the majority to minority party members present and shall establish the order of recognition for questioning in such a manner as not to place the members of the majority party in a disadvantageous position. The Chairman may accomplish this by recognizing two majority party members for each minority party member recognized.

Rule 3. Records and Rollcalls.—Written records shall be kept of the proceedings of the committee and of each subcommittee, including a record of the votes on any question on which a rollcall is demanded. The result of such rollcall vote shall be made available by the committee or subcommittee for inspection by the public at reasonable times in the offices of the committee or subcommittee. Information so available for public inspection shall include a description of the amendment, motion, order or other proposition and the name of each member voting for and each member voting against such amendment, motion, order, or proposition and whether by proxy or in person, and the names of those members present but not voting. A record vote may be demanded by one-fifth of the members present or, in the apparent absence of a quorum, by any one member.

Rule 4. Subcommittees.—There shall be eight standing subcommittees, the jurisdiction of each shall include the following:

Subcommittee on Elementary, Secondary and Vocational Education.—Education from pre-school through the high school level and vocational education.

Subcommittee on Labor-Management Relations.—Relationships between employers and employees and their representatives.

Subcommittee on Labor Standards.—Wages and hours of labor.

Subcommittee on Employment Opportunities.—Comprehensive employment and training; work incentive and equal employment opportunities.

Subcommittee on Select Education.—Special education programs, handicapped, aging, arts and humanities.

Subcommittee on Postsecondary Education.—Education beyond the high school level.

Subcommittee on Compensation, Health and Safety—Workers compensation and workers health and safety.

Subcommittee on Economic Opportunity.—All matters dealing primarily with the Economic Opportunity Act of 1964, the Juvenile Delinquency Prevention and Control Act of 1968, and agriculture labor and migrant workers, including their dependents.

The majority party members of the committee may provide for such special and select subcommittees as determined to be appropriate.

Rule 5. Ratio of Subcommittees.—(a) On each subcommittee there shall be at least two majority party members for each minority party member, plus one majority party member. The Chairman of the committee and the ranking minority party member of the committee shall be ex officio members of each subcommittee established pursuant to Rule 4. In calculating the ratio of majority party members to minority party members, the ex officio members of the subcommittees shall be included.

Rule 6. Special Assignment of Members.—To facilitate the oversight and other legislative and investigative activities of the committee, the Chairman of the committee may, at the request of a subcommittee chairman, make a temporary assignment of any member of the committee to such subcommittee for the purpose of enabling such member to participate in any public hearing, investigation, or study by such subcommittee to be held outside of Washington. Any member of the committee may attend public hearings of any subcommittee and shall be afforded an opportunity by the subcommittee chairman to question witnesses.

Rule 7. Subcommittee Chairmanship.—The majority party members of the committee shall have the right, in order of full committee seniority, to bid for subcommittee chairmanships. Any such request shall be subject to approval by a majority of those present and voting in the majority party caucus of the committee. Members so elected shall be chairman of their respective subcommittees.

Rule 8. Subcommittee Scheduling.—Subcommittee chairmen shall set meeting dates after consultation with the Chairman and other subcommittee chairmen with a view

toward avoiding simultaneous scheduling of committee and subcommittee meetings or hearings wherever possible. Available dates for subcommittee meetings during the session shall be assigned by the Chairman to the subcommittees as nearly as practicable in rotation and in accordance with their workloads.

Rule 9. Subcommittee Rules.—The rules of the committee shall be the rules of its subcommittees.

Rule 10. Committee Staffs.—Except as provided in Rule XI, clause 5(d) of the Rules of the House of Representatives, the staff of the House Committee on Education and Labor shall be appointed as follows:

A. The subcommittee staff shall be appointed, and may be removed, and their remuneration determined by the subcommittee chairman in consultation with and with the approval of the majority party members of the subcommittee within the budget approved for the subcommittee by the full committee;

B. The staff assigned to the minority shall be appointed and their remuneration determined in such manner as the minority party members of the committee shall determine within the budget approved for such purposes by the committee;

C. The employees of the committee not assigned to a standing subcommittee or to the minority under the above provisions shall be appointed, and may be removed, and their remuneration determined by the Chairman in consultation with and with the approval of the majority party members of the committee within the budget approved for such purposes by the commitee.

Rule 11. Supervision Duties of Committee Staffs.—The staff of a subcommittee shall be under the general supervision and direction of the chairman of that subcommittee. The staff assigned to the minority shall be under the general supervision and direction of the minority party members of the committee who may delegate such authority as they determine appropriate. The staff of the committee not assigned to a subcommittee or to the minority shall be under the general supervision and direction of the Chairman, who shall establish and assign the duties and responsibilities of such staff members and delegate authority as he determines appropriate.

Staff members shall be assigned to committee business and no other duties may be assigned to them.

Rule 12. Hearings Procedure.—(a) The Chairman in the case of hearings to be conducted by the commitee and the appropriate subcommittee chairman, in the case of hearings to be conducted by a subcommittee, shall make public announcement of the date, place, and subject matter of any hearing to be conducted on any measure or matter at least one week before the commencement of that hearing unless the committee or subcommittee determines that there is good cause to begin such hearing at an earlier date. In the latter event the Chairman or the subcommitee chairman whichever the case may be shall make such public announcement at the earliest possible date. The clerk of the committee shall promptly notify the Daily Digest Clerk of the Congressional Record as soon as possible after such public announcement is made.

(b) So far as practicable, each witness who is to appear before the committee or a subcommittee shall file with the clerk of the committee, at least 24 hours in advance of his appearance, a written statement of his proposed testimony and shall limit his oral presentation to a summary of his statement.

(c) When any hearing is conducted by the committee or any subcommittee upon any measure or matter, the minority party members on the committee shall be entitled, upon request to the Chairman by a majority of those minority party members before the completion of such hearing, to call witnesses selected by the minority to testify with respect to that measure or matter during at least one day of hearing thereon.

Rule 13. Meetings—Hearings—Quorums.—(a) Subcommittees are authorized to hold hearings, receive exhibits, hear witnesses, and report to the committee for final action, together with such recommendations as may be agreed upon by the subcommittee. No such meetings or hearings, however, shall be held outside of Washington or during a recess or adjournment of the House without the prior authorization of the committee Chairman or a majority of a quorum of the subcommittee: *Provided*, That where feasible and practicable, 14 days notice will be given of such meeting or hearing.

(b) One-third of the members of the committee or subcommittee shall constitute a quorum for taking any action other than amending committee rules, closing a meeting from the public, reporting a measure or recommendation, or in the case of the committee authorizing a subpoena. For the enumerated actions a majority of the committee or subcommittee shall constitute a quorum. Any two members shall constitute a quorum for the purpose of taking testimony and receiving evidence.

(c) In the absence of the chairman of the committee or a subcommittee, the ranking majority party member present shall preside.

Rule 14. Subpoenas.—A subpoena may be authorized and issued by the Committee or subcommittee in the conduct of any investigation or series of investigations or activities, only when authorized by a majority of the Members of the full Committee voting, a majority being present. Authorized subpoenas shall be signed by the Chairman of the Committee or by any Member designated by the Committee.

Rule 15. Reports of Subcommittees.—(a) Whenever a subcommittee has ordered a bill, resolution, or other matter to be reported to the committee, the chairman of the subcommittee reporting the bill, resolution, or matter to the committee, or any member authorized by the subcommittee to do so, may report such bill, resolution, or matter to the committee. It shall be the duty of the chairman of the subcommittee to report or cause to be reported promptly such bill, resolution, or matter and to take or cause to be taken the necessary steps to bring such bill, resolution, or matter to a vote.

(b) In any event, the report, described in the proviso in paragraph (d) of this rule, of any subcommittee on a measure which has been approved by the subcommittee shall be filed within seven calendar days (exclusive of days on which the House is not in session) after the day on which there has been filed with the clerk of the committee a written request, signed by a majority of the members of the subcommittee, for the reporting of that measure. Upon the filing of any such request, the clerk of the committee shall transmit immediately to the chairman of the subcommittee notice of the filing of that request.

(c) All committee or subcommittee reports printed pursuant to legislative study or investigation and not approved by a majority vote of the committee or subcommittee, as appropriate, shall contain the following disclaimer on the cover of such report:

"This report has not been officially adopted by the Committee on Education and Labor (or pertinent subcommittee thereof) and may not therefore necessarily reflect the views of its members."

(d) Bills, resolutions, or other matters favorably reported by a subcommittee shall automatically be placed upon the agenda of the committee as of the time they are reported and shall be considered by the full committee in the order in which they were reported unless the committee shall by majority vote otherwise direct: *Provided*, That no bill reported by a subcommittee shall be considered by the full committee unless it has been in the hands of all members at least 48 hours prior to the meeting, together with a comparison with present law and a section-by-section analysis of the proposed change.

Rule 16. Proxies.—(a) A vote by any member in the committee or in any subcommittee may be cast by proxy, but such proxy must be in writing and in the hands of the chief clerk of the committee or the clerk of the subcommittee, as the case may be, during each rollcall in which they are to be voted. Each proxy shall designate the member who is to execute the proxy authorization and shall be limited to a specific measure or matter and any amendments or motions pertaining thereto; except that a member may authorize a general proxy only for motions to recess, adjourn or other procedural matters. Each proxy to be effective shall be signed by the member assigning his vote and shall contain the date and time of day that the proxy is signed. Proxies may not be counted for a quorum.

(b) Proxies shall be in the following form:

Hon. _____.
House of Representatives,
Washington, D.C.

DEAR _____: Anticipating that I will be absent on official business/or otherwise unable to be present, I hereby authorize you to vote in my place and stead in the consideration of _____ and any amendments or motions pertaining thereto.

_____,
Member of Congress.

Executed this the _____ day of _____, 19___, at the time of _____ p.m./a.m.

Rule 17. Authorization for Travel.—(a) Consistent with the primary expense resolution and such additional expense resolutions as may have been approved, the provisions of this rule shall govern travel of committee members and staff. Travel to be paid from funds set aside for the full committee for any member or any staff member shall be paid only upon the prior authorization of the Chairman. Travel may be authorized by the Chairman for any member and any staff member in connection with the attendance of hearings conducted by the committee or any subcommittee thereof and meetings, conferences, and investigations which involve activities or subject matter under the general jurisdiction of the committee.

Before such authorization is given there shall be submitted to the Chairman in writing the following:

(1) The purpose of the travel;

(2) The dates during which the travel is to be made and the date or dates of the event for which the travel is being made;

(3) The location of the event for which the travel is to be made;

(4) The names of members and staff seeking authorization.

(b) In the case of travel of members and staff of a subcommittee to hearings, meetings, conferences, and investigations involving activities or subject matter under the legislative assignment of such subcommittee to be paid for out of funds allocated to such subcommittee, prior authorization must be obtained from the subcommittee chairman and the Chairman. Such prior authorization shall be given by the Chairman only upon the representation by the appropriate chairman of the subcommittee in writing setting forth those items enumerated in (1), (2), (3), and (4) of paragraph (a) and in addition thereto setting forth that subcommittee funds are available to cover the expenses of the person or persons being authorized by the subcommittee chairman to undertake the travel and that there has been a compliance where applicable with Rule 12 of the committee.

(c)(1) In the case of travel outside the United States of members and staff of the committee or of a subcommittee for the purpose of conducting hearings, investigations, studies, or attending meetings and conferences involving activities or subject matter under the legislative assignment of the committee or pertinent subcommittees prior authorization must be obtained from the Chairman, or, in the case of a subcommittee, from the subcommittee chairman and the Chairman. Before such authorization is given, there shall be submitted to the Chairman, in writing, a request for such authorization. Each request, which shall be filed in a manner that allows for a reasonable period of time for review before such travel is scheduled to begin, shall include the following:

(A) the purpose of the travel;

(B) the dates during which the travel will occur;

(C) the names of the countries to be visited and the length of time time to be spent in each;

(D) an agenda of anticipated activities for each country for which travel is authorized together with a description of the purpose to be served and the areas of committee jurisdiction involved; and

(E) the names of members and staff for whom authorization is sought.

(2) Requests for travel outside the United States may be initiated by the Chairman or the chairman of a subcommittee (except that individuals may submit a request to the Chairman for the purpose of attending a conference or meeting) and shall be limited to members and permanent employees of the committee.

(3) The Chairman shall not approve a request involving travel outside the United States while the House is in session (except in the case of attendance at meetings and conferences or where circumstances warrant an exception).

(4) At the conclusion of any hearing, investigation, study, meeting or conference for which travel outside the United States has been authorized pursuant to this rule, each subcommittee (or members and staff attending meetings or conferences) shall submit a written report to the Chairman covering the activities of the subcommittee and containing the results of these activities and other pertinent observations or information gained as a result of such travel.

(d) Members and staff of the committee performing authorized travel on official business shall be governed by applicable laws, resolutions, or regulations of the House and of the Committee on House Administration pertaining to such travel.

(e) Prior to the Chairman's authorization for any travel the ranking minority party member shall be given a copy of the written request therefor.

Rule 18. Oversight.—(a) In order to enable the Committee to carry out its responsibilities under Rule X, clause (2) of the Rules of the House of Representatives, each subcommittee shall review and study, on a continuing basis, the application, administration, execution, and effectiveness of those laws, or parts of laws, the subject matter of which is within the jurisdiction of that subcommittee, and the organization and operation of the Federal agencies and entities having responsibilities in or for the administration and execution thereof, in order to determine whether such laws and the programs thereunder are being implemented and carried out in accordance with the intent of the Congress and whether such programs should be continued, curtailed, or eliminated. In addition, each such subcommittee shall review and study any conditions or circumstances which may indicate the necessity or desirability of enacting new or additional legislation within the jurisdiction of that subcommittee (whether or not any bill or resolution has been introduced with respect thereto), and shall on a continuing basis undertake future research and forecasting on matters within the jurisdiction of that subcommittee.

(b) The Chairman of the committee with Rule 4, from time to time in order to fulfill the committee's responsibility under Rule X, clause (3)(c) of the Rules of the House of Representatives, shall assign matters to subcommittees for reviewing, studying, and coordinating, on a continuing basis, all laws, programs, and Government activities dealing with or involving domestic educational programs and institutions, and programs of student assistance, which are within the jurisdiction of other committees.

(c) The Chairman of the committee, consistent with Rule X, clause (2)(d) of the Rules of the House of Representatives, shall from time to time assign matters to subcommittees for reviewing and studying on a continuing basis the impact or probable impact of tax policies affecting subjects within the jurisdiction of the committee.

Rule 19. Referral of Bills, Resolutions, and Other Matters.—(a) Each bill, resolution, or other matter which relates to a subject listed under the jurisdiction of any subcommittee named in Rule 4 referred to the Committee shall be referred to the subcommittee of appropriate jurisdiction within two weeks, unless, by majority vote of the majority party members of the committee, consideration is to be by the full committee.

(b) In carrying out paragraph (a) with respect to any matter, the Chairman may refer the matter simultaneously to two or more subcommittees, consistent with Rule 4, for concurrent consideration or for consideration in sequence (subject to appropriate time limitations in the case of any subcommittee), or divide the matter into two or more parts (reflecting subjects and jurisdictions) and refer each such part to a different subcommittee, or refer the matter, pursuant to Rule 4, to a special ad hoc subcommittee, appointed by the Chairman (from the members of the subcommittees having legislative jurisdiction) for the specific purpose of considering that matter and reporting to the committee thereon, or make such other provisions as may be considered appropriate.

(c) Referral to a subcommittee shall not be made until three days shall have elapsed after written notification of such proposed referral to all subcommittee chairmen, at which time such proposed referral shall be made unless one or more subcommittee chairmen shall have given written notice to the chairman of the full committee and to the chairman of each subcommittee that he intends to question such proposed referral at the next regularly scheduled meeting of the committee, or at a special meeting of the committee called for that purpose at which time referral shall be made by the majority members of the committee. All bills shall be referred under this rule to the subcommittee of proper jurisdiction without regard to whether the author is or is not a member of the subcommittee. A bill, resolution, or other matter referred to a subcommittee in accordance with this rule may be recalled therefrom at any time by a vote of the majority members of the committee for the committee's direct consideration or for reference to another subcommittee.

Rule 20. Committee Reports.—(a) All committee reports on bills or resolutions shall comply with the provisions of clause 2 of Rule XI of the Rules of the House of Representatives.

(b) No such report shall be filed until copies of the proposed report have been available to all members at least 36 hours prior. No material change shall be made in the report distributed to members unless agreed to by a majority vote: *Provided*, That any member or members of the committee may file, as part of the printed report, individual, minority, or dissenting views, without reference to the preceding provisions of this rule.

Rule 21. Budget and Expenses.—The Chairman, in consultation with the majority party members of the committee shall, for each session of the Congress, prepare a preliminary budget. Such budget shall include necessary amounts for staff personnel, for necessary travel, investigation, and other expenses of the committee and after consultation with the minority party membership, the Chairman shall include amounts budgeted to the minority party members for staff personnel to be under the direction and supervision of the minority party, travel expenses of minority members and staff, and minority party office expenses. All travel expenses of minority party members and staff shall be paid for out of the amounts so set aside and budgeted. The chairman of each standing subcommittee, in consultation with the majority party members thereof, shall prepare a supplemental budget to include funds for each additional staff, and for such travel, investigations, etc., as may be required for the work of such subcommittee. Thereafter, the Chairman shall combine such proposals into a consolidated committee budget, and shall present the same to the committee for its approval or other action. The Chairman shall take whatever action is necessary to have the budget as finally approved by the committee duly authorized by the House. After said budget shall have been adopted, no change shall be made in such budget unless approved by the committee. The Chairman or the chairman of any standing subcommittee may initiate necessary travel requests as provided in Rule 16 within the limits of their portion of the consolidated budget as approved by the House, and the Chairman may execute necessary vouchers therefor.

Once monthly, the Chairman shall notify the committee, in writing, that a full and detailed accounting of all expenditures made during the period since the last such accounting from the amount budgeted to the committee is available to every Member in the office of the Clerk of the Committee. Such report shall show the amount and purpose of each expenditure and the budget to which such expenditure is attributed.

Rule 22. Recommendation of Rule for Appointment of Conferees.—Whenever in the legislative process it becomes necessary to appoint conferees, the Chairman shall recommend to the Speaker as conferees the names of those members of the subcommittee which handled the legislation in the order of their seniority upon such subcommittee and such other committee members as the Chairman may designate with the approval of the majority party members. Recommendations of the Chairman to the Speaker shall provide a ratio of majority party members to minority party members no less favorable to the majority party than the ratio of majority members to minority party members on the full committee. In making assignments of minority party members as conferees the Chairman shall consult with the ranking minority party member of the committee.

Rule 23. Broadcasting of Committee Hearings.—(a) When any hearing or meeting of the committee or a subcommittee is open to the public, that hearing or meeting may be covered in whole or in part by television broadcast, radio broadcast; and still photography, or by other such methods of coverage. Such coverage of hearings and meetings is a privilege made available by the House and shall be permitted and conducted only in strict conformity with the purposes, provisions and requirements of clause 3 of Rule XI of the rules of the House of Representatives.

Singh in 1696. Raja Singh is trained in the theological tradition of Sikhism of that time.

He is also a graduate of the Yale Divinity School, concentrating on the synthesis of religion and theology. The Raja is well-known to eminent religious leaders of all major religions of the world. He has travelled the world over, and is able to read the texts of Christian, Moslem, Jewish, Hindu and Buddhist scriptures in the original classical languages. The experiences he lived through in his principality of Patiala and province of Punjab, have strong parallels to the situation South Africa faces today.

STATEMENT

Recently South Africa has evoked much comment, most of it deludedly superficial. There is a greater diversity in South Africa than the world realizes and remarkable qualities in some of its peoples that have not been generally recognized.

For example the Afrikaner are a brave and devout nation, and some people feel, even among my distinguished Christian co-religious of high rank, that the Dutch Reformed Church has been unwisely treated as a pariah through some of the policies of the World Council of Churches and the Vatican toward South Africa. The deep spiritual qualities of the Afrikaner can become an important factor in encouraging the Unity in Diversity in the world's religions and cultures in these critical times.

The Boers and the Zulus are both martial nations of great renown, like the Sikhs known throughout the world over. In common, Afrikaner, Zulu and Sikh fought courageously for a righteous purpose, recognizing their force as they shook the foundations of the British Empire at the height of its power.

The Communist world, where conscientiousness toward religion, nationality and morality are non-existent, is now an imminent threat. Those religious leaders who encourage an escalation of conflict in South Africa—rather than bringing love and harmony as good neighbors in the philosophy of Unity in Diversity—are knowingly or unknowingly, unconscientiously and irreligiously acting detrimentally in regard to universal, fundamental religious values in life, temporal and spiritual.

It would be catastrophic and extremely shameful if South Africa should endure a similar tragedy to that inflicted on the subcontinent of India in general and the Punjab in particular, during this century. One should learn from the lessons of history.

AMENDING THE SOCIAL SECURITY SYSTEM

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. WHITEHURST. Mr. Speaker, although there is a relatively wide divergence of opinion concerning the means by which the social security system should be financed in the future, nearly every knowledgeable observer agrees that the system faces serious difficulties for which solutions must be found. As a result of recent changes in the law and the Nation's poor economic performance in the last few years, the social security trust fund could be depleted in the early 1980's. The long-range outlook for social security is even bleaker as a result of changing demographic conditions and the cumulative effect of ill-conceived provisions in the Social Security Act of 1972. If the current law is not altered, the social security trust fund's deficit in 75 years would be 8 percent of the national payroll subject to social security taxes. The dollar amount of this deficit would be about $4 trillion.

I am introducing legislation which would reduce the long-term deficit by at least 50 percent. In passing the 1972 Social Security Amendments, the Congress made what amounts to a technical error resulting in tremendous increases in benefit levels. The 1972 act provided automatic cost-of-living increases for social security beneficiaries. This was the intent of Congress and it is a reasonable provision. However, the law coupled cost-of-living increases for retirees with increases in future benefit levels for current workers. The problem with this is that future benefit levels are also affected by increases in wage levels—the normal changes that occur in a worker's earnings during his lifetime. As a worker's earnings rise, his future benefits rise. Consequently, under the present law future benefits levels are raised for both increases in prices and wages. Since wage levels normally reflect price increases, future benefits are now being "double indexed" for inflation.

The practical effect of the current law is startling as lower paid workers would actually earn more from social security than they would working. The current replacement rate—that is, the percentage of preretirement income received as social security benefits—is 66 percent for low-paid single workers. If a wife's benefit is counted, the rate will rise to over 178 percent if the law is not changed.

The measure I am introducing today would correct this flaw by "decoupling" the computation of benefits for future beneficiaries from that of current beneficiaries. The bill would retain automatic cost-of-living increases for current beneficiaries. The bill would retain automatic increases for future benefits. Current replacement rates would be maintained and future benefits would increase as average wages increase. This would reinstate the traditional means of determining social security benefit levels and would remove the wholly unwarranted and unintended results of the 1972 law.

My bill would also correct another inequity of the current law. Benefits for a young disabled worker and his family, for example, often exceed the benefits received by a retiree with a long work history. This results from the practice of setting benefit levels based on average monthly earnings. Under my proposed system, a worker's yearly earnings during his working career would be updated and expressed in terms of the earnings levels that prevail just before he retires, becomes disabled, or dies. Thus, if a worker's 1955 wages were $3,000, and wages generally are now 2½ times higher than in 1955, the $3,000 would be updated to $7,500. This wage indexing system would resolve the anamoly of a worker with a relatively short, but recent work history receiving more than a worker with a lengthy work record who has his benefits based largely on outdated, low wages.

I would emphasize that my proposal is a moderate one. Existing replacement rates would be maintained, thereby insuring that no future worker would receive lower benefits than are currently paid. However, by stabilizing the replacement rates, the bill would avoid the enormous increases in benefits resulting in many workers receiving more in social security payments than they did in wages.

This legislation would not entirely solve future social security financing problems, although it would be a major first step by reducing the long term deficit by 50 percent. Aside from the problem caused by combining both wage and price increases in computing future benefit levels, changing demographic conditions are also a major cause of the future difficulties of the social security system. For several years after World War II, the United States had an extremely high birth rate. At the present time, the birth rate is quite low. The result is that shortly after the turn of the century, we will have a relatively small work force paying social security taxes to provide benefits for a relatively large group of retirees. Former Treasury Secretary Simon and others have suggested a slight and gradual increase in the retirement age to resolve this problem. Although I would not support this now, it might well make sense to gradually increase the retirement age to 67 beginning in the year 2000. Other knowledgeable observers have suggested reducing the current replacement rates by 10 percent or more to wipe out the long term deficit. Still others have suggested using general revenues to remove the burden from the social security trust fund. All of these suggestions deserve the serious and immediate consideration of the Congress. However, the most obvious flaw in the current system which would result in the greatest savings over the long term would be corrected by the legislation I am introducing today. I urge my colleagues to act expeditiously on this proposal.

DOUBT AND TORMENT . . . THE AFTERMATH OF ABORTION

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. HYDE. Mr. Speaker, in the 4 years since the Supreme Court decision legalizing abortions, reams of material have been written by opponents and proponents of this ruling.

A facet of the abortion controversy that until recently has been almost totally ignored is the range of complex emotions—uneasiness, bewilderment, remorse and guilt—that lingers in the aftermath of every aborted child. And though the unborn child can be destroyed and discarded, the emotions that linger cannot be so easily cut from the participants' hearts with a physicians scapel, nor washed from their minds with a saline solution. Lingering sorrow and guilt often lives on in the hearts of many who have participated in removing life from the womb.

Joan Beck's column in the Chicago Tribune of January 31, discusses the emotional turmoil surrounding abor-

(b) The general conduct of each hearing or meeting covered under authority of this clause and the personal behavior of committee members, staff, other government officials and personnel, witnesses, television, radio and press media personnel, and the general public at the hearing or other meeting, shall be in strict conformity with and observance of the acceptable standards of dignity, propriety, courtesy, and decorum traditionally observed by the House.

(c) Persons undertaking to cover committee hearings or meetings under authority of this rule shall be governed by the following limitations:

(1) If the television or radio coverage of the hearing or meeting is to be presented to the public as live coverage, that coverage shall be conducted and presented without commercial sponsorship.

(2) No witness served with a subpena by the committee shall be required against his or her will to be photographed at any hearing or to give evidence or testimony while the broadcasting of that hearing, by radio or television, is being conducted. At the request of any such witness who does not wish to be subjected to radio, television, or still photography coverage, all lenses shall be covered and all microphones used for coverage turned off. This subparagraph is supplementary to clause 2(k)(5) of Rule XI of the Rules of the House of Representatives, relating to the protection of the rights of witnesses.

(3) Not more than four television cameras, operating from fixed positions, shall be permitted in a hearing or meeting room. The allocation among the television media of the positions of the number of television cameras permitted in a hearing or meeting room shall be in accordance with fair and equitable procedures devised by the Executive Committee of the Radio and Television Correspondents' Galleries.

(4) Television cameras shall be placed so as not to obstruct in any way the space between any witness giving evidence or testimony and any member of the committee or the visibility of that witness and that member to each other.

(5) Television cameras shall not be placed in positions which obstruct unnecessarily the coverage of the hearing or meeting by the other media.

(6) Equipment necessary for coverage by the television and radio media shall not be installed in, or removed from, the hearing or meeting room while the committee is in session.

(7) Floodlights, spotlights, strobelights, and flashguns shall not be used in providing any method of coverage of the hearing or meeting, except that the television media may install additional lighting in the hearing or meeting room, without cost to the Government, in order to raise the ambient lighting level in the hearing or meeting room to the lowest level necessary to provide adequate television coverage of the hearing or meeting at the then current state of the art of television coverage.

(8) Not more than five press photographers shall be permitted to cover a hearing or meeting by still photography. In the selection of these photographers, preference shall be given to photographers from Associated Press Photos and United Press International Newspictures. If request is made by more than five of the media for coverage of the hearing or meeting by still photography, that coverage shall be made on the basis of a fair and equitable pool arrangement devised by the Standing Committee of Press Photographers.

(9) Photographers shall not position themselves, at any time during the course of the hearing or meeting, between the witness table and the members of the committee.

(10) Photographers shall not place themselves in positions which obstruct unnecessarily the coverage of the hearing by the other media.

(11) Personnel providing coverage by the television and radio media shall be then currently accredited to the Radio and Television Correspondents' Galleries.

(12) Personnel providing coverage by still photography shall be then currently accredited to the Press Photographers' Gallery.

(13) Personnel providing coverage by the television and radio media and by still photography shall conduct themselves and their coverage activities in an orderly and unobtrusive manner.

Rule 24. Changes in Committee Rules.—A proposed change in these Rules shall not be considered by the committe unless the text of such change has been in the hands of all Members at least 48 hours prior to the meeting in which the matter is considered.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to:

Mr. MARRIOTT (at the request of Mr. RHODES), for Wednesday and Thursday, February 16 and 17, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. EDWARDS of Oklahoma) to revise and extend their remarks and include extraneous material:)

Mr. KEMP, for 15 minutes, today.

Mr. GRASSLEY, for 1 hour, on Friday, February 18, 1977.

Mr. MILLER of Ohio, for 15 minutes, today.

Mr. BOB WILSON, for 5 minutes, today.

Mr. MILLER of Ohio, for 15 minutes, on Friday, February 18, 1977.

(The following Members (at the request of Mr. BARNARD) to revise and extend their remarks and include extraneous material:)

Mr. RAHALL, for 5 minutes, today.

Mr. GONZALEZ, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. EDWARDS of California, for 20 minutes, today.

Mr. FRASER, for 10 minutes, today.

Mr. FORD of Tennessee, for 5 minutes, today.

Mr. EVANS of Indiana, for 5 minutes, today.

Mr. RODINO, for 5 minutes, today.

Mr. LAFALCE, for 5 minutes, today.

Mr. FASCELL, for 5 minutes, today.

Mr. STOKES, for 60 minutes, today.

Mr. EILBERG, for 5 minutes, today.

Mr. KOCH, for 10 minutes, today.

Mr. DE LA GARZA, for 5 minutes, today.

Mr. WOLFF, for 5 minutes, today.

Mr. MAZZOLI, for 5 minutes, today.

Mr. HARRIS, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. EDWARDS of Oklahoma) and to include extraneous matter:)

Mr. LAGOMARSINO.

Mr. SARASIN in three instances.

Mr. SHUSTER.

Mr. SEBELIUS.

Mr. RINALDO.

Mr. LOTT.

Mr. WHITEHURST.

Mr. GRADISON.

Mr. STEIGER.

Mr. HAGEDORN in two instances.

Mr. LATTA.

Mr. FORSYTHE.

Mr. ARCHER.

Mrs. SMITH of Nebraska.

Mrs. FENWICK.

Mr. DON H. CLAUSEN.

Mr. COLEMAN.

Mrs. HOLT.

Mr. CARTER in two instances.

(The following Members (at the request of Mr. BARNARD), and to include extraneous matter:)

Mr. GONZALEZ in three instances.

Mr. ANDERSON of California in three instances.

Mr. HAMILTON.

Mr. BINGHAM in five instances.

Mr. MOLLOHAN.

Mr. BRODHEAD in two instances.

Mr. ROSENTHAL in 10 instances.

Mr. VENTO in two instances.

Mr. MURPHY of Illinois.

Mr. LUNDINE in 10 instances.

Mr. SOLARZ in three instances.

Mr. BALDUS in two instances.

Mr. BREAUX.

Mr. MOAKLEY in two instances.

Mr. ANNUNZIO.

Mr. MILFORD.

Mr. FORD of Tennessee in two instances.

Mr. STARK.

Mr. HUCKABY in two instances.

Mr. LAFALCE.

Mr. FASCELL.

Mrs. COLLINS of Illinois.

Mr. WRIGHT.

Mr. ASHLEY.

Ms. OAKAR.

Mr. BLOUIN.

Mr. HANNAFORD.

Mr. KRUEGER.

Mr. HAWKINS in three instances.

Mr. AMBRO.

Mr. KOCH in three instances.

Mr. MCDONALD in three instances.

Mr. RICHMOND in two instances.

Mr. WOLFF in two instances.

Mr. RAHALL in three instances.

Mr. HARRIS.

ENROLLED JOINT RESOLUTIONS SIGNED

Mr. THOMPSON, from the Committee on House Administration, reported that that committee had examined and found truly enrolled joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.J. Res. 240. Joint resolution to give congressional approval to certain governing international fishery agreements negotiated in accordance with the Fishery Conservation and Management Act of 1976, and for other purposes; and

H.J. Res. 239. Joint resolution extending the filing date of the 1977 joint economic report.

ADJOURNMENT

Mr. BARNARD. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 16 minutes p.m.), under its previous order, the House adjourned until Monday, February 21, 1977, at 11:55 o'clock a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

757. A letter from the Assistant Secretary of Defense (Comptroller), transmitting the selected acquisition reports and SAR summary tables for the quarter ended December 31, 1976, pursuant to section 811(a) of Public Law 94–106; to the Committee on Armed Services.

758. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize additional appropriations under title II of the Public Works Employment Act of 1976; to the Committee on Government Operations.

759. A letter from the Deputy Assistant Secretary of Defense (Administration) transmitting notice of two proposed new records systems for the Department of the Navy, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

760. A letter from the Acting Assistant Secretary of the Interior for Administration and Management, transmitting notice of proposed change in one of the Department's records systems, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

761. A letter from the Chairman, Federal Deposit Insurance Corporation, transmitting a report on the Corporation's implementation of the Privacy Act of 1974 during calendar year 1976; to the Committee on Government Operations.

762. A letter from the Comptroller General of the United States, transmitting a summary of open GAO recommendations for legislative action as of December 31, 1976 (OCR–77–1002, February 16, 1977); to the Committee on Government Operations.

763. A letter from the Chairman, Indian Claims Commission, transmitting the Commission's final determination in Docket No. 134, *The S'Klallam Tribe of Indians, Plaintiff,* v. *The United States of America, Defendant,* pursuant to section 21 of the Indian Claims Commission Act; to the Committee on Interior and Insular Affairs.

764. A letter from the Acting Assistant Secretary of State for Congressional Relations, transmitting notice of the intention of the Department of State to consent to a request by the Government of Iran for permission to transfer certain U.S.-origin defense articles to the Government of Jordan, pursuant to section 3(a) of the Arms Export Control Act; to the Committee on International Relations.

765. A letter from the Administrator, Federal Energy Administration, resubmitting the Strategic Petroleum Reserve Plan (Energy Action No. 10), to correct the omission of an energy action identification number from the original transmittal (H. Doc. No. 95–12, pt. II); to the Committee on Interstate and Foreign Commerce and ordered to be printed.

766. A letter from the Administrator of General Services, transmitting a prospectus proposing alterations at the Federal Building-U.S. Courthouse, Providence, R.I., pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

767. A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to provide for a refund of 1976 individual income taxes and other payments, to reduce individual and business income taxes, and to provide tax simplification and reform; to the Committee on Ways and Means.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FLYNT: Committee on Standards of Official Conduct. H. Res. 287. Resolution to amend the Rules of the House of Representatives, and for other purposes; with amendment (Rept. 95–21, pt. I). And ordered to be printed.

Mr. MAHON: Committee on Appropriations. H.R. 3347. A bill to rescind certain budget authority recommended in the message of the President of September 22, 1976 (H. Doc. 94–620), transmitted pursuant to the Impoundment Control Act of 1974. (Rept. No. 95–22). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ANDREWS of North Dakota:

H.R. 3630. A bill to amend the Internal Revenue Code of 1954 to provide that certain income from a nonmember telephone company is not taken into account in determining whether any mutual or cooperative telephone company is exempt from income tax; to the Committee on Ways and Means.

By Mr. BOWEN:

H.R. 3631. A bill appropriating funds for construction of the Natchez Trace Parkway; to the Committee on Appropriations.

By Mr. BREAUX:

H.R. 3632. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. BREAUX (for himself, Mr. OBERSTAR, Mr. SANTINI, Mr. ROE, Mr. CORRADO, Mr. PRICE, Mr. SCHEUER, Mr. DENT, Mr. HUBBARD, Mr. BOWEN, Mr. FORSYTHE, Mr. LEGGETT, Mr. DOWNEY, Mr. TREEN, Mr. HAWKINS, Mr. EMERY, Mr. DUNCAN of Tennessee, and Mr. HOLLAND):

H.R. 3633. A bill to provide additional funds to the States for carrying out restoration projects and programs, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. BRODHEAD (for himself, Mr. BLANCHARD, Mr. PURSELL, Mr. NEDZI, Mr. CEDERBERG, Mr. KILDEE, Mr. DIGGS, and Mr. CARR):

H.R. 3634. A bill to amend the Internal Revenue Code of 1954 to repeal the excise tax on trucks, buses, and tractors and parts and accessories for such vehicles; to the Committee on Ways and Means.

By Mr. BROYHILL (for himself, Mr. FAUNTROY, Mr. NEAL, Mr. JENRETTE, Mr. EDWARDS of California, Mr. SANTINI, Mr. PREYER, Mr. LONG of Louisiana, Mr. GILMAN, Mr. MARTIN, Mr. QUIE, Mr. STARK, Mr. HOWARD, Mr. MURPHY of New York, Mr. LEACH, Mr. MIKVA, Mr. D'AMOURS, Mr. QUILLEN, Ms. COLLINS of Illinois, Mr. HEFNER, and Mr. KRUEGER):

H.R. 3635. A bill to amend title XVIII of the Social Security Act to authorize payment under the supplementary medical insurance program for services furnished by physician extenders; jointly to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. COCHRAN:

H.R. 3636. A bill to amend title II of the Social Security Act so as to liberalize the conditions governing eligibility of blind persons to receive disability insurance benefits thereunder; to the Committee on Ways and Means.

By Mr. COCHRAN (for himself, Mr. BOWEN, Mr. LOTT, Mr. MONTGOMERY, and Mr. WHITTEN):

H.R. 3637. A bill granting the consent of Congress to the Mississippi-Louisiana bridge construction compact; to the Committee on the Judiciary.

By Mr. COCHRAN (for himself, Mr. DORNAN, Mr. EDWARDS of Oklahoma, Mr. MCKINNEY, and Mr. MOORHEAD of California):

H.R. 3638. A bill to amend the Internal Revenue Code of 1954 to provide that the mileage rate used to determine the amount allowable as a deduction for the business use of automobiles shall be the same as the rate used to reimburse Federal employees; to the Committee on Ways and Means.

By Mrs. COLLINS of Illinois:

H.R. 3639. A bill to amend chapter 4 of title 23, United States Code, to authorize the Secretary of Transportation to make incentive grants to any State which uses certain information relating to auto safety devices in its procedure for the issuance of motor vehicle operating permits; to the Committee on Public Works and Transportation.

By Mr. CONABLE (for himself and Mr. WHITEHURST):

H.R. 3640. A bill to repeal the carryover basis provisions added by the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. CONABLE (for himself, Mr. BURGENER, Mr. CAPUTO, Mr. FISH, Mr. MCKINNEY, and Mr. NEDZI):

H.R. 3641. A bill to amend title XVIII of the Social Security Act to establish a program of long-term-care services within the medicare program, to provide for the creation of community long-term-care centers and State long-term-care agencies as part of a new administrative structure for the organization and delivery of long-term-care services, to provide a significant role for persons eligible for long-term-care benefits in the administration of the program, and for other purposes; jointly to the Committees on Ways and Means and Interstate and Foreign Commerce.

By Mr. COUGHLIN (for himself, Mr. BLANCHARD, Mr. BOLAND, Mr. BROWN of Ohio, Mr. BUCHANAN, Mr. BURGENER, Mr. CARTER, Mr. CLEVELAND, Mrs. COLLINS of Illinois, Mr. COLLINS of Texas, Mr. DAN DANIEL, Mr. DICKINSON, Mr. DORNAN, Mr. DUNCAN of Tennessee, Mr. EDGAR, Mr. EDWARDS of Oklahoma, Mr. ENGLISH, Mrs. FENWICK, Mr. FREY, Mr. HARKIN, Mr. HYDE, and Mr. KOSTMAYER):

H.R. 3642. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses incurred in higher education; to the Committee on Ways and Means.

By Mr. COUGHLIN for himself, Mr. LOTT, Mr. LUNDINE, Mr. MAZZOLI, Mr. MONTGOMERY, Mr. MOORHEAD of California, Mr. MOTTL, Mr. MURPHY of New York, Mr. PURSELL, Mr. RAILSBACK, Mr. RINALDO, Mr. SARASIN, Mr. SCHEUER, Mr. SCHULZE, Mr. SOLARZ, Mr. SPENCE, Mr. STANTON, Mr. STOKES, Mr. WHITEHURST, Mr. CHARLES H. WILSON of California, Mr. WON PAT, and Mr. YATRON):

H.R. 3643. A bill to amend the Internal Revenue Code of 1954 to allow a credit against income tax to individuals for certain expenses

incurred in higher education; to the Committee on Ways and Means.

By Mr. CRANE (for himself, Mr. MOORHEAD of California, Mr. DEVINE, Mr. BURGENER, Mr. KINDNESS, Mr. MONTGOMERY, Mr. WHITEHURST, Mr. TRIBLE, Mr. MCDONALD, Mr. LOTT, Mr. WAGGONNER, Mr. BURKE of Florida, Mr. ARCHER, Mr. KETCHUM, Mr. KEMP, Mr. COCHRAN, Mr. SPENCE, Mr. BEVILL, Mr. BARNARD, Mr. SEBELIUS, Mr. MARTIN, and Mr. DAVIS):

H.R. 3644. A bill to limit the U.S. contributions to the United Nations; to the Committee on International Relations.

By Mr. FISHER (for himself, Mr. ANDERSON of Illinois, Mr. BAUCUS, Mr. BEARD of Rhode Island, Mr. BUTLER, Mr. DOWNEY, Mr. EILBERG, Mr. FINDLEY, Mr. FRENZEL, Mr. HAWKINS, Mr. JEFFORDS, Mr. MOAKLEY, Mr. SCHEUER, Mr. SIMON, Mr. WEISS, and Mr. WHITEHURST):

H.R. 3645. A bill to restore to Federal civilian and Postal Service employees their rights to participate voluntarily, as private citizens, in the political processes of State and local governments, to protect such employees from improper political solicitation, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. FISHER (for himself, Mr. LONG of Louisiana, Mr. MURPHY of New York, Mr. STEERS, and Mr. YOUNG of Florida):

H.R. 3646. A bill to provide that individuals who retired on disability before October 1, 1976, shall be entitled to the exclusion for disability payments under section 105(d) of the Internal Revenue Code of 1954 without regard to the income limitation in such section, and for other purposes; to the Committee on Ways and Means.

By Mr. FISHER (for himself, Mr. DUNCAN of Tennessee, Mr. SEIBERLING, Mr. CHARLES WILSON of Texas, and Mr. YOUNG of Florida):

H.R. 3647. A bill to amend the Internal Revenue Code to provide renters with a credit against income tax; to the Committee on Ways and Means.

By Mr. FORD of Tennessee (for himself, Mr. CONTE, Mr. BLOUIN, Mr. BROOMFIELD, Mr. BROWN of Ohio, Mr. BURGENER, Mr. CORCORAN, Mr. DE LUGO, Mr. EVANS of Georgia, Mr. EVANS of Indiana, Mr. FASCELL, Mr. FLORIO, Mr. GLICKMAN, Mr. HUGHES, Mr. HYDE, Ms. KEYS, Mr. MCCLOSKEY, Mr. MARLENEE, Mr. MOTTL, Mr. PRICE, Mr. PRITCHARD, Mr. RAHALL, Mr. SKUBITZ, Mr. THONE, and Mr. VOLKMER):

By Mr. THONE:

H.R. 3703. A bill to repeal the carryover basis provisions added by the Tax Reform Act of 1976; to the Committee on Ways and Means.

By Mr. VANDER JAGT:

H.R. 3704. A bill to amend the Immigration and Nationality Act to facilitate the adoption of more than two children; to the Committee on the Judiciary.

H.R. 3705. A bill to amend the Internal Revenue Code of 1954 to allow taxpayers electing the standard deduction to take a separate deduction for charitable contributions and to allow low- and middle-income taxpayers a deduction of up to 200 percent of such contributions; to the Committee on Ways and Means.

By Mr. VENTO:

H.R. 3706. A bill to exercise the power of the Congress under article IV of the Constitution to declare the effect of certain State judicial proceedings respecting the custody of children; to the Committee on the Judiciary.

By Mr. WYDLER (for himself, Mr. AMBRO, Mr. DOWNEY, Mr. LENT, Mr. PIKE, and Mr. WOLFF):

H.R. 3707. A bill to amend section 112 of title 28 of the United States Code to divide the eastern judicial district of New York into two divisions; to the Committee on the Judiciary.

By Mr. FREY:

H.J. Res. 262. Joint resolution proposing an amendment to the Constitution of the United States to establish a procedure in addition to impeachment for the removal of judges of the Supreme Court of the United States whose conduct is or has been inconsistent with the good behavior required by article III, section 1, of the Constitution; to the Committee on the Judiciary.

By Mr. LAFALCE:

H.J. Res. 263. Joint resolution to provide for the designation of the second Sunday of each December as "Honor Thy Parents Day"; to the Committee on Post Office and Civil Service.

By Mr. WHITEHURST:

H.J. Res. 264. Joint resolution calling for an immediate moratorium on the killing of the eastern timber wolf; to the Committee on International Relations.

H.J. Res. 265. Joint resolution requesting the President to proclaim the second week of May as "Municipal Clerks' Week"; to the Committee on Post Office and Civil Service.

By Mr. FOLEY (for himself and Mr. WAMPLER):

H. Res. 298. Resolution to provide funds for the expenses of the investigations and studies to be conducted by the Committee on Agriculure; to the Committee on House Administration.

By Mr. FRENZEL (for himself, Mr. RHODES, Mr. MICHEL, Mr. ARMSTRONG, Mr. BAUMAN, and Mr. COUGHLIN):

H. Res. 299. Resolution to amend the Rules of the House of Representatives, and for other purposes; divided and referred as follows: title I, section 301, titles IV, V, and VI to the Committee on Rules; title II and section 303 to the Committee on Standards of Official Conduct; section 302 to the Committee on House Administration.

By Mr. MATHIS (for himself, Mr. POAGE, and Mr. MOORE):

H. Res. 300. Resolution expressing the sense of the House relative to foreign palm oil development loans; jointly to the Committees on Agriculture, and Banking, Finance and Urban Affairs.

H. Res. 301. Resolution expressing the sense of the House relative to a study by the Secretary of Agriculture on palm oil imports; jointly, to the Committees on Agriculture, and International Relations.

By Mr. SOLARZ:

H. Res. 302. Resolution to declare a "state of war", against the dreaded disease, Amyotrophic Lateral Sclerosis; to the Committee on Interstate and Foreign Commerce.

By Mr. THONE:

H. Res. 303. Resolution to insure that the quality and quantity of free broadcasting service not be impaired; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FASCELL:

H.R. 3708. A bill for the relief of United Broadcasting Co. of Florida, Inc.; to the Committee on the Judiciary.

By Mr. KEMP:

H.R. 3709. A bill for the relief of Jack R. Misner; to the Committee on the Judiciary.

By Mr. ROGERS (by request):

H.R. 3710. A bill for the relief of Assad Barakat; to the Committee on the Judiciary.

REGULATION OF LOBBYING ACT

In compliance with Public Law 601, 79th Congress, title III, Regulation of Lobbying Act, section 308(b), which provides as follows:

(b) All information required to be filed under the provisions of this section with the Clerk of the House of Representatives and the Secretary of the Senate shall be compiled by said Clerk and Secretary, acting jointly, as soon as practicable after the close of the calendar quarter with respect to which such information is filed and shall be printed in the CONGRESSIONAL RECORD.

The Clerk of the House of Representatives and the Secretary of the Senate jointly submit their report of the compilation required by said law and have included all registrations and quarterly reports received.

REGISTRATIONS*

* All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following registrations were submitted for the fourth calendar quarter 1976:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essental answers are printed, and are indicted by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____ ◄

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.◄

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the fourth calendar quarter 1976:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:

(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)

(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".

(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:

(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.

(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:

1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (*a*) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (*b*) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(*a*) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).

(*b*) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).

(*c*) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (*a*) Short titles of statutes and bills; (*b*) House and Senate numbers of bills, where known; (*c*) citations of statutes, where known; (*d*) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (*a*) Description, (*b*) quantity distributed; (*c*) date of distribution, (*d*) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

[Omitted in printing]

PAGE 1

NOTE ON ITEM "D."—(a) *In General.* The term "contribution" includes *anything of value.* When an organization or individual uses printed or duplicated matter in a campaign attempting to influence legislation, money received by such organization or individual—for such printed or duplicated matter—is a "contribution." "The term 'contribution' includes a gift, subscription, loan, advance, or deposit of money, or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make a contribution"—Section 302(a) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN EMPLOYER.—(i) *In General.* Item "D" is designed for the reporting of all receipts from which expenditures are made, or will be made, in accordance with legislative interests.

(ii) *Receipts of Business Firms and Individuals.*—A business firm (or individual) which is subject to the Lobbying Act by reason of expenditures which it makes in attempting to influence legislation—but which has no funds to expend except those which are available in the ordinary course of operating a business not connected in any way with the influencing of legislation—will have no receipts to report, even though it does have expenditures to report.

(iii) *Receipts of Multipurpose Organizations.*—Some organizations do not receive any funds which are to be expended solely for the purpose of attempting to influence legislation. Such organizations make such expenditures out of a general fund raised by dues, assessments, or other contributions. The percentage of the general fund which is used for such expenditures indicates the percentage of dues, assessments, or other contributions which may be considered to have been paid for that purpose. Therefore, in reporting receipts, such organizations may specify what that percentage is, and report their dues, assessments, and other contributions on that basis. However, each contributor of $500 or more is to be listed, regardless of whether the contribution was made solely for legislative purposes.

(c) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE.—(i) *In General.* In the case of many employees, all receipts will come under Items "D 5" (received for services) and "D 12" (expense money and reimbursements). In the absence of a clear statement to the contrary, it will be presumed that your employer is to reimburse you for all expenditures which you make in connection with legislative interests.

(ii) *Employer as Contributor of $500 or More.*—When your contribution from your employer (in the form of salary, fee, etc.) amounts to $500 or more, it is not necessary to report such contribution under "D 13" and "D 14," since the amount has already been reported under "D 5," and the name of the "employer" has been given under Item "B" on page 1 of this report.

D. RECEIPTS (INCLUDING CONTRIBUTIONS AND LOANS):

Fill in every blank. If the answer to any numbered item is "None," write "None" in the space following the number.

Receipts (other than loans)

1. $_____Dues and assessments
2. $_____Gifts of money or anything of value
3. $_____Printed or duplicated matter received as a gift
4. $_____Receipts from sale of printed or duplicated matter
5. $_____Received for services (e.g., salary, fee, etc.)

6. $_____TOTAL for this Quarter (Add items "1" through "5")
7. $_____Received during previous Quarters of calendar year

8. $_____TOTAL from Jan. 1 through this Quarter (Add "6" and "7")

Loans Received

"The term 'contribution' includes a . . . *loan* . . ."—Sec. 302(a).

9. $_____TOTAL now owed to others on account of loans
10. $_____Borrowed from others during this Quarter
11. $_____Repaid to others during this Quarter

12. $_____"Expense money" and Reimbursements received this Quarter

Contributors of $500 or more
(from Jan. 1 through this Quarter)

13. Have there been such contributors?
Please answer "yes" or "no": _____

14. In the case of each contributor whose contributions (including loans) during the "period" from January 1 through the last days of this Quarter total $500 or more:

Attach hereto plain sheets of paper, approximately the size of this page, tabulate data under the headings "Amount" and "Name and Address of Contributor"; and indicate whether the last day of the period is March 31, June 30, September 30, or December 31. Prepare such tabulation in accordance with the following example:

Amount	*Name and Address of Contributor*
	(*"Period"* from Jan. 1 through _____, 19____)
$1,500.00	John Doe, 1621 Blank Bldg., New York, N.Y.
$1,785.00	The Roe Corporation, 2511 Doe Bldg., Chicago, Ill.
$3,285.00	TOTAL

NOTE ON ITEM "E".—(a) *In General.* "The term 'expenditure' includes a payment, distribution, loan, advance, deposit, or gift of money or anything of value, and includes a contract, promise, or agreement, whether or not legally enforceable, to make an expenditure"—Section 302(b) of the Lobbying Act.

(b) IF THIS REPORT IS FOR AN AGENT OR EMPLOYEE. In the case of many employees, all expenditures will come under telephone and telegraph (Item "E 6") and travel, food, lodging, and entertainment (Item "E 7").

E. EXPENDITURES (INCLUDING LOANS) in connection with legislative interests:

Fill in every blank. If the answer to any numbered item is "None," write "None" in the spaces following the number.

Expenditures (other than loans)

1. $_____Public relations and advertising services
2. $_____Wages, salaries, fees, commissions (other than item "1")
3. $_____Gifts or contributions made during Quarter
4. $_____Printed or duplicated matter, including distribution cost
5. $_____Office overhead (rent, supplies, utilities, etc.)
6. $_____Telephone and telegraph
7. $_____Travel, food, lodging, and entertainment
8. $_____All other expenditures

9. $_____TOTAL for this Quarter (Add "1" through "8")
10. $_____Expended during previous Quarters of calendar year

11. $_____TOTAL from January 1 through this Quarter (Add "9" and "10")

Loans Made to Others

"The term 'expenditure' includes a . . . *loan* . . ."—Sec. 302(b).

12. $_____TOTAL now owed to person filing
13. $_____Lent to others during this Quarter
14. $_____Repayment received during this Quarter

15. Recipients of Expenditures of $10 or More
In the case of expenditures made during this Quarter by, or on behalf of the person filing: Attach plain sheets of paper approximately the size of this page and tabulate data as to expenditures under the following heading: "Amount," "Date or Dates," "Name and Address of Recipient," "Purpose." Prepare such tabulation in accordance with the following example:

Amount	*Date or Dates—Name and Address of Recipient—Purpose*
$1,750.00	7–11: Roe Printing Co., 3214 Blank Ave., St. Louis, Mo.—Printing and mailing circulars on the "Marshbanks Bill."
$2,400.00	7–15, 8–15, 9–15: Britten & Blaten, 3127 Gremlin Bldg., Washington, D.C.—Public relations service at $800.00 per month.
$4,150.00	TOTAL

A. Action for Legal Rights, 2030 M Street NW., Room 300, Washington, D.C. 20037.
E. (9) $41.97.

A. Actors Equity Association, 1500 Broadway, New York, N.Y. 10036.
D. (6) $2,500. E. (9) $2,500.

A. Ad Hoc Committee for Competitive Telecommunications, 520 North Capitol Street No. 800, Washington, D.C. 20001.
D. (6) $99,760. E. (9) $43,065.

A. Bruce Adams, 2030 M Street NW., Washington, D.C. 20036.
B. Common Cause, 2030 M Street NW., Washington, D.C. 20036.
D. (6) $3,999.96.

man needs can be addressed with a spirit of cooperation in the search for imaginative and enlightened domestic policies.

As a citizen and Representative of the Nation's most urbanized State, I believe that one of the most critical needs is to renew the commitment of the Federal Government to help a safe, healthful, and humane living environment for our urban populations. Nearly, three-quarters of us live in urban places in the United States, and yet we have, of late, too often failed to provide the tools needed by our urban States and localities to maintain an environment worth looking at and living in.

Most assuredly, this has not been our intention. In the pellmell growth of metropolitan areas during the 1950's and 1960's we recognized that the quality of life of those caught up in this growth was diminishing rapidly. Among the early responses to this problem was the establishment by Congress in 1958 of the Outdoor Recreation Resources Review Commission. The Commission's report, issued in 1962, helped to bring about the recognition that natural beauty, ecological balance, and the healthful use of leisure time are essential in an urban nation. More specifically, the Commission's report affirmed the right of all Americans—including urban Americans—to the protection of landscape resources which possessed important ecological, scenic, and recreational values. Many new land conservation programs were enacted by Congress as a result of that report, and many programs already in placed were expanded. In effect, the report and the enactments it spawned established the Federal Government as a full partner in the effort to preserve outstanding landscapes during a period of rapid economic growth and urban expansion.

It is worth asking at this juncture—at the beginning of a new Congress and a new administration—whether we are fully living up to the goals and expectations we created 15 years ago. To be sure, the Congress in its last session was able, finally, to increase the Land and Water Conservation Fund. This can help, but even an expanded fund can hardly be expected to reduce the arrears accumulated over the past years of inaction as well as meet the new demands that will be placed upon it.

As a result, State and local governments, lacking resources of their own to preserve large ecological, scenic, and recreational areas, will continue to apply to the Congress for the inclusion of such areas into the National Parks System—itself seriously in arrears in manpower and money.

As the Congress struggles to deal with these demands, it is becoming clear that however hard we try to provide National Parks to serve urban populations, the process is ultimately self-defeating. The enormous cost for land acquisition, development and management, if applied fairly to all urban areas, is simply not sustainable. Even now, the National Park Service is seriously overextended, its capacity to manage existing urban parks as well as natural areas in question. Though we have succeeded in establishing a few urban parks, the effort has not uniformly met urban needs, nor has the distribution of Federal funds for the purpose been fair and equitable. In the end, the effect of such a procedure has been to deny, for lack of funds and manpower, the protection of many crucial landscape resources.

It is my view that Federal policy in this regard is at a turning point. It is becoming obvious that another way must be found to meet the burgeoning demand for the preservation of outstanding landscapes to provide a humane living environment for an urban population. It is essential that all levels of government fully exercise their capabilities in a new kind of cooperative effort to the end that such landscapes can be protected with means other than outright purchase for inclusion in the National Park System. The alternative to national park designation ought to be something other than the relegation of outstanding landscapes to indiscriminate development.

Unless a new kind of Federal policy to deal with this problem can be formulated, it is certain that many treasured landscapes will simply be lost. One such area for which this fear is very real is the Pine Barrens in my home State of New Jersey. The Pine Barrens are, according to a recent report of the Bureau of Outdoor Recreation, among the most outstanding natural areas in the country—a relict biota of the last ice age containing many rare and unusual species of plants and animals in an ecosystem still undergraded by development. The preservation of this 1,500 square mile area, almost miraculously spared from suburban sprawl in the densely populated Northeastern urban corridor, is essential for many reasons.

Ecologically, the Pine Barrens are critical: the area overlies the major part of an aquifer which stores some 17.7 trillion gallons of water—an amount equal to 10 years of rainfall. But because of the highly porous soil and the shallow depth of the aquifer, this giant underground reservoir could be easily polluted should urban sprawl take place, endangering essential water supplies for an expanding population.

Scenically, the Pine Barrens provide a vast open space, laced with waterways—a remote, quiet, unbroken forest of pine and oak, unusual in such an urbanized region. Recreationally, the Pine Barrens provide boating, hunting, fishing, hiking, nature study, and camping to some 50 million people who live within striking distance of the area. There are inherent economic values associated with this landscape, too. The unusual combination of soils, water table, and climate make the Pine Barrens first in the Nation in blueberry production, and third in cranberry production.

Taken together, all these values have persuaded the Bureau of Outdoor Recreation that the Pine Barrens meet Department of Interior criteria for what is called "national significance." This means, in effect, that the area could qualify as an addition to the National Park System either as a "natural area" or as a "national recreational area."

But what would be its chances were this vast resource to be proposed as a national park? Fifteen hundred square miles constitutes nearly 1 million acres of land, land located in an area where per-acre value typically is calculated in the thousands of dollars. The brutal reality is that despite the importance of this place, the cost of acquisition would simply be unsupportable. An alternative might be to isolate a smaller section within the Pine Barrens for a national park designation. But this would fail to provide adequate protection for the ecosystem as a whole, and for the aquifer which this ecosystem so beneficially provides. Moreover, at whatever size, traditional national park management might not be appropriate for an area in which existing communities and the indigenous agriculture, among other land uses, are valued and should be maintained.

It is, therefore, my intention shortly to introduce a bill for the protection of the Pine Barrens, not as a national park, but in a way which calls upon a Federal-State-local partnership to produce a program for preservation of this landscape resource by using the specific capabilities of each level of government for the role each is best suited to play. Under the bill the Federal Government would provide financial and technical support for the delineation of a Pine Barrens ecological reserve and for the development and implementation of an area-wide management plan and program.

The program would be recommended to Congress by a land management commission, similar in structure to the existing Pinelands Environmental Council and broadly representative of all those who have a stake in the conservation of the Pine Barrens. This commission, as a prerequisite for Federal assistance, would be empowered by the State of New Jersey to oversee the regulation of land uses and the control of developments of area-wide significance.

The role of municipal governments within the Pine Barrens would be to help frame, and to lead in the sensitive implementation of, a management plan which while preserving ecological, scenic, and recreational values, nevertheless allows the area to be a "living landscape"—a place where the land is not locked up as though in a museum, but where appropriate growth and change can be accommodated. Finally, my bill would require that all other Federal programs—grants, loans, and direct activities—would have to be consistent with an approved land management plan.

This approach to protecting the resource values of the Pine Barrens in New Jersey represents, I believe, a new and fruitful policy departure of interest and importance to other urban States. It can be a departure which will reestablish the Federal Government in its position as a full partner in the preservation of areas which, though meeting many criteria for national park status, are not best suited for outright acquisition or for traditional national park management. Because there are many areas meeting this description, in many States, I am at work also on a second bill, generic legislation complementary to the Pine Barrens bill.

The generic bill would establish a Federal policy and an ongoing program consistent with the approach I recom-

mend for the Pine Barrens which could be applied to all such areas throughout the Nation. The need for such a program—in fact a "second system" of national parks—has become increasingly evident. Besides the Pine Barrens, two other areas for which roughly similar legislation has been introduced are cases in point: the Nantucket Island area off Cape Cod in Massachusetts and the Santa Monica Mountains near Los Angeles, Calif.

In both these cases, legislation has been proposed which calls for the kind of partnership I believe is necessary, though the details are different in some respects. It seems clear to me that a broadly consistent approach, and a program to support it, is perfectly possible so that these three areas—Nantucket, the Santa Monicas, the Pine Barrens—and many others like these can be assured of protection.

The "second system" I envision would rely on State and local as well as Federal initiative and authority in resource planning and management. The units of this system, which have been called green-line parks by some since they would be delineated by a green line on maps rather than the solid green of parks wholly in public ownership, would contain a mix of public and private land. The public, and quasi-public, land—much of it already in place in the typical potential green-line park—could continue to be managed by individual agencies, but policies would be coordinated to maximize public land values under a comprehensive program of land management.

Federal funding would permit an area-wide management commission, created by State action, to carry out a plan effectively expressing a Federal-State-local conservation objective on both public and private land. Federal support would not be used to compel management commissions to adopt any given land management approach, but rather to insure that they can avail themselves to various approaches to land conservation and can assure landowners and local governments that plan implementation will not cause undue hardship.

Mr. Speaker, I have brought my intentions to light in this way—that is, by offering a description of legislation without attaching the legislation itself—in order that these ideas receive full discussion at the conceptual level before the all-important details are filled in. In my view, a "second system" of national parks—green-line parks, if you will—represents a good deal more than a simple adjustment in existing policy, but rather a new policy departure in the Federal role in landscape preservation.

The fate of the Pine Barrens depends in part on the establishment of a new policy. And, in turn, the establishment of new policy depends in part on initiation of preservation programs for prototype areas such as the Pine Barrens.

It is my belief that a new policy can be framed which can make the Federal expenditure for landscape preservation go farther than it ever has before, which can forge a creative, new partnership among various levels of government, and which can, in the end, do much to protect the natural beauty, the ecological integrity, and the recreational opportunities of many of our remaining landscape resources, so vital to urban populations, in a way that is affordable, fair, and permanent. I would welcome comments from my colleagues on these matters.

PAY FREEZE DRIVES TOP FEDERAL AIDES OUT OF GOVERNMENT

HON. NEWTON I. STEERS, JR.

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, February 8, 1977

Mr. STEERS. Mr. Speaker, over the past 8 years, top grade civil service employees have been held under a pay ceiling that has not permitted them to have any significant salary increase until the pay levels for Members of Congress are raised.

These loyal and able civil servants have been rewarded for their service by a pay increase of only 5 percent over the past 8 years—during which inflation has raised their costs 57 percent. The situation for many of them has become intolerable.

Significant numbers of Federal executives are leaving Government service for higher paying jobs in private industry. Those who remain in Government service often labor at the same salary as lower grade employees although their responsibilities and work loads are much greater.

Although I do not favor an immediate pay hike for Representatives and Senators, I understand the plight of career employees and wish that the Federal system—like that of the State of Maryland—permitted career personnel salaries to be higher than those of elected officials.

An important report on the problem is contained in this Washington Post article "Pay Freeze Drives Top Federal Aides Out of Government":

[From the Washington Post]

PAY FREEZE DRIVES TOP FEDERAL AIDES OUT OF GOVERNMENT

(By Lynn Darling)

Fred J. Cassibry is demoralized. He describes the economic landscape of his life with the kind of despair usually reserved for hurricane survivors returning to the wreckage of their home town.

Patiently he catalogues the humiliations to which his present financial condition has reduced him—the mounting bills, the thousands of dollars in loans he cannot repay, the friends he avoids because he cannot afford tc return their dinner invitations.

"You think you've achieved something in your life," he says. "You work hard. And then to find you really haven't accomplished anything—it's demoralizing."

Cassibry, however, is not an addition to the welfare rolls or the unemployment line. He is, as he has been for the last 11 years, a U.S. District Court Judge in New Orleans, La.

Currently, Cassibry earns an annual salary of $42,000. Barring any unexpected changes by Congress, he and his judicial colleagues, executive level federal officials and the members of Congress themselves will be getting a pay raise on Feb. 20.

With the exception of a 5 per cent cost-of-living increase they received last year, it will be the first pay raise they have received since 1969. During that time, salaries for these officials—as well as for the Civil Service "supergrades," GS levels 16 through 18—have remained frozen, while the cost of living has increased by two-thirds. Salaries in private industry, meanwhile, increased an average of over 50 per cent.

The result, according to the report of the Commission on Executive, Legislative and Judicial salaries that makes quadrennial pay proposals to the President, has been a "crisis" in the higher reaches of the federal bureaucracy where "the rate of good people leaving the government in the upper grades has become a flood."

The frozen salaries have led to a situation where federal judges are leaving the bench and the black robe behind in record numbers, where the average tenure of a presidential appointee below the Cabinet secretary level is about two years, where supergrade Civil Service employees are opting for early retirement with increasing frequency since their retirement benefits include an annual cost-of-living increase denied them if they stay on the job.

According to Social Security Commissioner James B. Cardwell, his agency lost six of its top level employees in 1975 because, he said, "in the face of the frozen salary levels, retirement just became too attractive." In addition, Cardwell said, it took the Social Security Administration over a year to find someone to fill the position of Chief Actuary for the agency—over 30 potential candidates refused the job, he said, because of the low pay.

The man who did take the job said he will probably leave it in about six months because he cannot afford to work at a job that pays half of what he could earn in the private sector.

With the average American earning a salary of approximately $11,000 in 1975, the last year for which figures are available, the travails of a $42,000-a-year federal judge or a $36,500 GS–18 are not likely to produce much sympathy from the majority of those who pay their salaries. In fact, according to a Commission survey of opinions about where government spending should be increased, "even 'welfare,' not traditionally an area in which many Americans want increased spending, fared better in the survey than government salaries."

Nevertheless, the Commission warned, "If we continue down the path of the past eight years, in which the politics of survival have required no pay raises at all, we must accept the implications of a government of only the rich, or only the young and untried. . . ."

Not to mention the demoralized. Judge Cassibry, 58, is one of over 140 federal judges who have joined an unprecedented suit that claims that the eight-year freeze on their salaries has resulted in a constitutionally forbidden decrease in their pay—due to inflation. The suit, filed last year, is currently pending in the U.S. Court of Claims.

The impending raise, Judge Cassibry feels, "doesn't make up for it. I'll never be able to catch up." It is, he said, "incredible that people do this to a group of public servants."

Since he has been a federal judge, Cassibry said, he has had to take out $18,000 in loans "to try and maintain my standard of living." His wife, he said, has had to go to work as a real estate agent to help pay for the college education of three of his children, he has sold a dearly beloved 24-foot inboard motor boat, and given up membership in a country club.

In addition, Cassibry feels that he "can't associate with the friends I used to. I can't have them picking up the check for dinner when I know I can't afford to do the same. It makes me wonder what have I done with my life now."

And as the buying power of his salary has waned, so, said Cassibry, has his incentive. "I used to have a fine record," he said, "I used to work night and day. Now I put in my eight

QUARTERLY REPORTS*

*All alphanumeric characters and monetary amounts refer to receipts and expenditures on page 2, paragraphs D and E of the Quarterly Report Form.

The following quarterly reports were submitted for the first calendar quarter 1977:

(NOTE.—The form used for report is reproduced below. In the interest of economy in the RECORD, questions are not repeated, only the essential answers are printed, and are indicated by their respective letter and number.)

FILE ONE COPY WITH THE SECRETARY OF THE SENATE AND FILE TWO COPIES WITH THE CLERK OF THE HOUSE OF REPRESENTATIVES:

This page (page 1) is designed to supply identifying data; and page 2 (on the back of this page) deals with financial data.

PLACE AN "X" BELOW THE APPROPRIATE LETTER OR FIGURE IN THE BOX AT THE RIGHT OF THE "REPORT" HEADING BELOW:

"PRELIMINARY" REPORT ("Registration"): To "register," place an "X" below the letter "P" and fill out page 1 only.

"QUARTERLY" REPORT: To indicate which one of the four calendar quarters is covered by this Report, place an "X" below the appropriate figure. Fill out both page 1 and page 2 and as many additional pages as may be required. The first additional page should be numbered as page "3," and the rest of such pages should be "4," "5," "6," etc. Preparation and filing in accordance with instructions will accomplish compliance with all quarterly reporting requirements of the Act.

Year: 19_____

REPORT

PURSUANT TO FEDERAL REGULATION OF LOBBYING ACT

P	QUARTER			
	1st	2d	3d	4th
(Mark one square only)				

NOTE ON ITEM "A".—(a) IN GENERAL. This "Report" form may be used by either an organization or an individual, as follows:
(i) "Employee".—To file as an "employee", state (in Item "B") the name, address, and nature of business of the "employer". (If the "employee" is a firm [such as a law firm or public relations firm], partners and salaried staff members of such firm may join in filing a Report as an "employee".)
(ii) "Employer".—To file as an "employer", write "None" in answer to Item "B".
(b) SEPARATE REPORTS. An agent or employee should not attempt to combine his Report with the employer's Report:
(i) Employers subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their agents or employees.
(ii) Employees subject to the Act must file separate Reports and are not relieved of this requirement merely because Reports are filed by their employers.

A. ORGANIZATION OR INDIVIDUAL FILING:
1. State name, address, and nature of business.

2. If this Report is for an Employer, list names of agents or employees who will file Reports for this Quarter.

NOTE ON ITEM "B".—*Reports by Agents or Employees.* An employee is to file, each quarter, as many Reports as he has employers, except that: (a) If a particular undertaking is jointly financed by a group of employers, the group is to be considered as one employer, but all members of the group are to be named, and the contribution of each member is to be specified; (b) if the work is done in the interest of one person but payment therefor is made by another, a single Report—naming both persons as "employers"—is to be filed each quarter.

B. EMPLOYER.—State name, address, and nature of business. If there is no employer, write "None."

NOTE ON ITEM "C".—(a) The expression "in connection with legislative interests," as used in this Report, means "in connection with attempting, directly or indirectly, to influence the passage or defeat of legislation." "The term 'legislation' means bills, resolutions, amendments, nominations, and other matters pending or proposed in either House of Congress, and includes any other matter which may be the subject of action by either House"—§ 302(e).
(b) Before undertaking any activities in connection with legislative interests, organizations and individuals subject to the Lobbying Act are required to file a "Preliminary" Report (Registration).
(c) After beginning such activities, they must file a "Quarterly" Report at the end of each calendar quarter in which they have either received or expended anything of value in connection with legislative interests.

C. LEGISLATIVE INTERESTS, AND PUBLICATIONS in connection therewith:

1. State approximately how long legislative interests are to continue. If receipts and expenditures in connection with legislative interests have terminated, ☐ place an "X" in the box at the left, so that this Office will no longer expect to receive Reports.

2. State the general legislative interests of the person filing and set forth the *specific* legislative interests by reciting: (a) Short titles of statutes and bills; (b) House and Senate numbers of bills, where known; (c) citations of statutes, where known; (d) whether for or against such statutes and bills.

3. In the case of those publications which the person filing has caused to be issued or distributed in connection with legislative interests, set forth: (a) Description, (b) quantity distributed; (c) date of distribution, (d) name of printer or publisher (if publications were paid for by person filing) or name of donor (if publications were received as a gift).

(Answer items 1, 2, and 3 in the space below. Attach additional pages if more space is needed)

4. If this is a "Preliminary" Report (Registration) rather than a "Quarterly" Report, state below what the nature and amount of anticipated expenses will be; and if for an agent or employee, state also what the daily, monthly, or annual rate of compensation is to be. If this is a "Quarterly" Report, disregard this item "C4" and fill out item "D" and "E" on the back of this page. Do not attempt to combine a "Preliminary" Report (Registration) with a "Quarterly" Report.

AFFIDAVIT

EXTENSIONS OF REMARKS

ALL VOLUNTEER FORCE—CURRENT STATUS AND PROSPECTS—III

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. STEIGER. Mr. Speaker, one of the greatest concerns about the All Volunteer Force has been over whether it would be representative of the American public as a whole. The Defense Department's transition document for the Carter administration indicates that the Volunteer Army is remarkably representative.

Four measures were used in reaching this conclusion: income, region, sex, and race. Only in the case of men-women ratio is there a wide disparity with the national average. Even here, the Volunteer Army is a vast improvement over its drafted predecessor, though, as there has been an active effort to recruit women into all services since the end of the draft.

Income comparisons between the services and the American population show very close parallels. In almost every category, from lowest income to highest, there is only a small percentage point difference. Table 8 includes more detailed information on this.

Regionally, the All Volunteer Force is virtually a mirror image of the Nation. The top 10 States in population, with 53 percent of the male youth population, account for 53 percent of accessions. The top 20 States in population, with 75 percent of the male youth population, make up 75 percent of accessions.

From the standpoint of race, we again see a representative military force. The percentage of blacks in the military has grown significantly since fiscal year 1974, a good reflection of the increased opportunities offered minorities in today's military. The number has stabilized in the last couple of years.

Todays' military, then, is very representative of the population from which it is drawn. Chapter 4 of the report bears thoughtful study:

CHAPTER 4—REPRESENTATION

Four relevant measures of whether the AVF is representative of the American population are income, region, sex and race.

INCOME

Table 8 below reveals that previous fears that the AVF would only attract the poor did not materialize. In fact, the AVF is representative of all income groups.

TABLE 8.—PERCENT DISTRIBUTION OF EARNINGS OF PARENTS OF RECRUITS (MAY 1975) COMPARED WITH U.S. FAMILY INCOME (MARCH 1975)

	Army	Navy	Marine Corps	Air Force	All services	U.S. family earnings, March 1975		Army	Navy	Marine Corps	Air Force	All services	U.S. family earnings, March 1975
0 to $2,999	8.7	3.9	8.9	3.6	6.4	5.3	$11,000 to $13,999	15.2	17.8	16.2	19.4	17.0	14.8
$3,000 to $7,999	24.0	17.8	20.6	17.7	20.5	21.0	$14,000 to $19,999	18.7	23.1	23.5	25.2	22.0	22.3
$8,000 to $10,999	19.6	16.3	17.1	17.8	18.1	14.5	$20,000 plus	13.9	21.1	13.6	16.2	16.0	21.8

Source: Preliminary results, May 1975 AFEES Survey; Consumer Income, Families by Total Money Income, Money Income of Families and Persons in the United States, U.S. Department of Commerce, Bureau of Census.

REGION

The AVF also is representative of the American youth regionally. Table 9 indicates that the top ten states in population, which consist of 53% of the male youth population, account for 53 percent of accessions; the top 20 states in population, which consist of 75 percent of the male youth population, account for 75% of accessions.

TABLE 9.—COMPARISON OF STATE DISTRIBUTIONS OF U.S. MALE POPULATIONS (AGES 17 TO 21) AND MALE ENLISTED ACCESSIONS, ALL SERVICES, FISCAL YEAR 1976

State	Percent of total — Population	Army	Navy	Marine Corps	Air Force	All services	State	Percent of total — Population	Army	Navy	Marine Corps	Air Force	All services
California	9.2	9.9	11.0	10.8	9.9	10.3	Indiana	2.6	2.7	2.7	3.4	2.8	2.8
New York	7.9	6.8	7.3	7.9	7.6	7.2	North Carolina	2.6	3.1	2.0	1.7	2.0	2.4

Pennsylvania	5.6	5.0	5.6	4.7	5.6	5.2	Virginia	2.2	2.7	1.8	2.1	1.9	2.3
Illinois	5.3	4.4	4.6	5.6	3.2	4.4	Wisconsin	2.2	1.9	2.0	3.3	2.1	2.2
Cumulative percent	33.9	31.8	34.5	35.2	32.9	33.1	Cumulative percent	64.9	63.9	65.6	66.5	64.9	65.0
Ohio	5.1	5.5	6.0	5.1	6.6	5.8	Missouri	2.2	2.2	2.7	3.0	2.4	2.5
Maine	4.5	4.6	5.2	4.9	4.3	4.8	Tennessee	2.0	2.2	1.7	1.4	1.9	1.9
Florida	3.6	4.2	3.9	3.2	4.6	4.1	Alabama	1.9	2.0	1.6	1.4	1.4	1.7
New Jersey	3.3	2.6	3.1	2.7	2.7	2.8	Minnesota	1.9	1.6	2.1	2.2	1.8	1.9
Massachusetts	2.6	2.0	2.4	3.0	3.1	2.4	Maryland	1.9	1.8	1.7	1.7	1.6	1.7
Cumulative percent	53.0	50.7	55.1	54.1	54.2	53.0	Cumulative percent	74.8	73.7	75.4	76.2	74.0	74.5

WOMEN

The number of women as a percent of enlisted accessions increased substantially from FY 1964 as compared to FY 1974 but has leveled off over the past two year period. Table 10 below presents these trends.

TABLE 10.—WOMEN AS A PERCENT OF ENLISTED ACCESSIONS, FISCAL YEAR 1964 AND 1974-77

Fiscal year	Army	Navy	Marine Corps	Air Force	All services
1964	1.1	2.6	2.4	2.1	1.8
1974	8.3	8.0	2.6	10.6	8.2
1975	9.9	7.9	2.5	13.0	9.0
1976	8.5	6.1	2.5	12.0	7.9
1977 (planned)	9.2	3.7	2.6	13.0	7.6

The number of women as a percent of total strength increased substantially since FY 1964. This increase is projected to continue over the next several years. Table 11 presents these trends.

TABLE 11.—WOMEN AS A PERCENT OF STRENGTH, OFFICER AND ENLISTED, FISCAL YEARS 1964 AND 1974-78

Fiscal year	Army	Navy	Marine Corps	Air Force	All services
1964	1.2	1.1	0.8	1.0	1.1
1974	3.9	3.1	1.5	3.8	3.5
1975	5.4	4.0	1.5	5.0	4.6
1976	6.3	4.4	1.8	5.8	5.3
1977 (planned)	6.7	4.4	1.9	7.0	5.7
1978 (planned)	6.7	4.4	2.0	8.5	6.2

RACE

The number of blacks as a percent of DoD non-prior Service (NPS) enlisted accessions increased significantly from FY 1964 as compared to FY 1974 but has decreased since FY 1974. The proportion of black accessions in the Army is slightly higher, but the fear of a predominantly black Army has not materialized. Table 12 presents these trends in black accessions.

TABLE 12.—BLACKS AS A PERCENT OF NONPRIOR SERVICE ENLISTED ACCESSIONS, MEN AND WOMEN, FISCAL YEARS 1964 AND 1974-76

Fiscal year	Army	Navy	Marine Corps	Air Force	All services
1964 [1]	13.7	4.7	8.5	9.6	10.6
1974	27.4	11.1	21.5	16.6	20.9
1975	23.0	10.6	20.4	14.7	18.2
1976	24.4	8.6	16.0	9.9	16.9

[1] Includes males only, other minorities: Asian Americans and American Indians (Navy only includes blacks), and includes Army inductees.

The number of blacks as a percent of DoD strength also increased significantly from FY 1964 as compared to FY 1974 but it has stabilized in recent years. The Army enlisted black strength shows some growth from FY 1974 as compared to FY 1976 but the rate of growth is quite moderate. Table 13 presents the trends in black strengths. The discrepancy between black officer and enlisted strength is a problem area. All the Services are attempting to increase their black officer content while facing stiff competition from other sectors for black college graduates.

TABLE 13.—BLACKS AS A PERCENT OF STRENGTH, OFFICER AND ENLISTED, MEN AND WOMEN, FISCAL YEARS 1964 AND 1974-76

	Army		Navy		Marine Corps		Air Force		All services	
	Enlisted personnel	Officer personnel	Enlisted personnel	Officer personnel	Enlisted personnel	Officer personnel	Enlisted personnel	Officer personnel	Enlisted personnel	Officer personnel
1964 [1]	11.8	3.3	5.9	0.3	8.7	0.3	10.0	1.5	9.7	1.8
1974	21.3	4.5	8.4	1.3	18.1	2.5	14.2	2.2	15.7	2.8

SEND THE BOYS HOME

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. MILFORD. Mr. Speaker, I have stated my opposition to the Select Committee on Assassinations and outlined my reasons many times.

Rather than add to those statements, I would like to share with my colleagues an editorial which appeared Sunday, February 13, in the Dallas Times Herald—to which I add a hearty "Amen."

SEND THE BOYS HOME

Enough is enough. The present bickering among the House Select Committee on Assassinations, its chairman and its chief counsel have so undermined public confidence in the panel's integrity and competence that it is pointless to continue its work—if, indeed, its work has begun.

The committee, created in the waning days of the last Congress to investigate the assassinations of President Kennedy and Dr. Martin Luther King Jr. and write the definitive report on those crimes, has been more headache than help from the beginning.

Its troubles began with the appointment of Richard A Sprague as its chief counsel. Mr. Sprague may be a competent investigator, but he apparently knows not the first thing about dealing with congressmen.

He shocked Congress by demanding a whopping $13 million to finance the work of a "bare bones" staff of 170 lawyers and investigators over a two-year period. He alarmed many congressmen with his reported plans to use hidden transmitters, polygraphs and voice stress machines in his work. His penchant for pleading his case in the press has gained him a reputation as a headline-seeker.

His behavior and demands almost convinced the present Congress that the committee he was hired to serve should not be re-instituted this year. But the House, apparently reluctant to admit that it made a mistake, finally voted to give the panel two months and $84,000 with which to provide evidence to justify continuing its investigations.

This reprieve has led only to further controversy. The committee chairman, Rep. Henry Gonzalez of Texas, squabbled with Mr. Sprague over the size of his staff, then tried to fire him. The other 11 committee members backed Mr. Sprague. So it appears that the committee and its staff may snipe and backbite all the way to its April 1 deadline.

The value of the committee and its work has been highly questionable from the beginning. It is doubtful that even competent, professional investigators could, so many years after the events they are investigating, find enough new evidence to put dents in the previous work of the Warren Commission and the Justice Department. What few scraps might still be available probably would inspire even more outlandish conspiracy theories, instead of convincing the American public that "the whole truth and nothing but the truth" had surfaced at last. After such an expensive and clamorous fishing expedition, we may be assured that Mr. Sprague and the committee will give us some fish, even if they have to smell more of politics than truth.

The House has little choice now but to allow the committee and its staff to continue along its noisy way until April 1. Then, we hope, it will withdraw the boys' allowance and send them home.

EYEGLASSES SHOULD BE INCLUDED UNDER MEDICARE

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. ANNUNZIO. Mr. Speaker, I rise today in support of a bill I have introduced, H.R. 2020, which would provide urgently needed coverage for optometric and vision care services for the elderly under medicare.

Despite the fact that the medicare program has made a significant contribution to the health of our Nation's aged since its inception 10 years ago, there are still a number of services for which the program fails to provide coverage. One of the most serious gaps is the lack of coverage for vision services for the elderly. For the most part, medicare currently excludes optometrists from the definition of recognized practitioners under the program and prohibits payments for eyeglasses and eye exams. The only exception is for prosthetic lenses furnished by optometrists following cataract surgery if the need for such lenses is certified to by the attending physician.

Vision care represents the most glaring example of both the great need of our Nation's elderly for medical appliances and the inadequacy of the existing pricing and delivery system for meeting that need. And, tragically enough, older Americans comprise the greatest bulk of the population needing vision care. At the present time, over 20 million Americans over 65, or 92 percent of our Nation's elderly require and own eyeglasses or contact lenses. Over 5 million of these people need new corrective lenses, because the ones that they now have either do not help their sight or actually harm it. Countless additional elderly Americans need eyeglasses, but do not have them. This vast need for proper glasses is especially critical, because many eye diseases, such as glaucoma and senile cataracts, can lead to blindness if they are not detected and treated promptly. Since the rate of blindness among Americans over 65 is 8½ times as great as the number in the under-65 population, it becomes more and more apparent that the crucial vision needs of the elderly are largely ignored.

The present delivery system for eyeglasses is full of pitfalls. The New York Department of Consumer Affairs conducted a survey, and fully one out of five eye examinations given to investigators resulted in unnecessary prescriptions for eyeglasses, and faulty prescriptions for glasses were dispensed in a number of other instances. What is an elderly person to do, with limited mobility and limited funds?

Moreover, the Subcommittee on Health and Long-Term Care of the Select Committee on Aging conducted a survey last Congress on costs of eyeglasses in the Washington area. The survey demonstrated a 230-percent variance in the cost of identical eyeglasses with glass lenses and an almost 200 variance in the cost of the identical eyeglasses with plastic lenses.

The situation can become desperate for an elderly person, and one of the most serious gaps in our medicare program is the lack of coverage for vision services for the elderly. I have introduced H.R. 2020 to amend title XVIII of the Social Security Act to include these crucial services. I urge my colleagues to support this bill. We must change medicare to be more responsible to our older Americans, to enable our elderly to live in dignity and security and as comfortably as possible.

STATE OF THE MAILS

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. GLICKMAN. Mr. Speaker, last July, the Postal Subcommittee of the Post Office and Civil Service Committee reported out a resolution that placed a 1-year moratorium on post office closings and other cutbacks in service. Since that time, the U.S. Postal Commission has been holding hearings throughout the country to try to determine the state of the mails.

On February 10, I presented testimony before the Commission on Postal Service at hearing in Atchinson, Kans. My testimony, though brief, outlines what I believe should be the major factors taken into consideration before further decisions are made. While I realize that the Commission's report is due on March 15, and that many of my colleagues have already made their views known on the record, I did want to share what I consider to be some of the more salient issues to which we in Congress as well as the Postal Commission should address ourselves.

Following is that statement I presented to the Commission last week:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 10, 1977.

DEAR FRIENDS: A postal service which allows open and easy communication among the citizens of this nation at rates that are reasonable and with service that is both accessible and effective constitutes a basic support of political, social, and economic freedom. With this in mind, it is with great interest and concern that I address myself to this hearing.

In the three months since my election and the one months since taking office, I have received, both in my Washington office and my District office in Wichita, a large number of inquiries regarding the United States Postal Service. These inquiries have ranged from complaints about late or slow deliveries, the rising costs of postal services, to a large number of people seeking solutions to the increasing problem of the closing of certain postal facilities.

With postal rates rising and threatening to rise even further, citizens have become increasingly concerned that postal service be prompt, reliable, and efficient.

Although constituent complaints about the rising costs of postal services are frequent, an even greater number of citizens have voiced their opposition to changes in postal service and, in some instances, the closing of certain postal facilities.

For example, my offices have begun receiving a large volume of inquiries regarding proposed changes of postal services in the town of Murdock, Kansas. Several of the

citizens of the area served by the Murdock Post Office are concerned about this matter and even more are disturbed at the lack of information from the Post Office regarding the exact nature of the proposed changes in service. Although many of these citizens can understand that, since theirs is a small community, it may be economically wiser for the Postal Service to serve them from another community, they remain concerned about the impact of these changes upon the vitality and the future of their community. For the small community of Murdock, Kansas, the Post Office represents a vital and necessary contact with the rest of the nation.

The impact of the closing of certain Post Offices is not felt solely in the small towns such as Murdock. Numerous citizens have voiced concern and opposition regarding the closing of certain branch stations within the city of Wichita. For these citizens, the problem is not that once their neighborhood Post Office closes will they no longer have any contact with the rest of the nation, but that once these stations are closed, they will suffer the inconvenience and expense of traveling to other facilities in the city. Many of these citizens operate businesses in which they find it necessary to make several trips to the Post Office everyday, so the closing of neighborhood facilities means the problem of traveling to facilities farther away is compounded.

While it is easy to understand the constituents' complaints in regard to the rising costs of postal service, I believe we need to go further and examine these complaints in another light as well. That is, these citizens view the Post Office as a vital public service. The closing of small town Post Offices and branch facilities is, for many citizens, an example of the Federal government's neglect of the development of their towns and their neighborhoods.

I would like to ask the Commissioners this morning to examine and act upon the statements presented not solely in terms of profits and expenses. Although we can not deny the very important aspect of rising costs and the need to keep these costs within reason, we must not also deny the fact that the Post Office is a vital public service.

Sincerely,

DAN GLICKMAN,
Member of Congress.

AMERICAN JEWS THREATENED BY TERRORISTS

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. McDONALD. Mr. Speaker, in a free society threats against the safety of any of our citizens are threats against the safety of all of us. The Terrorist New World Liberation Front has recently threatened the lives of American Jews if the State of Israel institutes the death penalty for terrorists who have taken human life. According to the NWLF, which consists of, among others, remnants of the Symbionese Liberation Army:

If Rabin imposes the death penalty upon Palestinian freedom fighters, this will be met with swift revolutionary justice. We will retaliate against Zionist terrorism against Palestinian freedom fighters with swift action against the Jewish-American ruling class.

These Zionist ruling class pigs will not butcher poor people fighting for a just life without suffering drastic repercussions. The Jewish-American ruling class cannot protect themselves well enough for a sufficient amount of time. They should consider this carefully!

CONSIDER THIS

We will show the Jewish-American ruling class how extremely vulnerable they are, here in the belly of the beast. Their lives will be in grave jeopardy if mad-dog Rabin imposes this massacre on the Palestinian people.

We call on all comrades to move directly against all Jewish-American ruling class bloodsuckers if Rabin moves to massacre freedom fighters! These ruling class dogs are influential both here and in Israel and are extremely vulnerable!

Note that the Communist New World Liberation Front has adopted the old Nazi technique of using Jews and Zionists as synonyms. Many Jews are not Zionists and many Zionists are not Jews. The Castroite terrorists are threatening American citizens with retaliation if a foreign government adopts a policy which they oppose. It is clear from the bombings that have taken place in California, organized by this group, that they are very capable of carrying out their violent threats.

We must not allow these threats against our fellow Americans to be carried out. Our Government has a responsibility to stop terrorist acts. We must have passage of Congressman JOHN ASHBROOK's antiterrorist bill which has been bottled up in the House Judiciary Committee for the past 2 years. We need the reestablishment of the House Committee on Internal Security to investigate and develop additional antiterrorist legislation. The FBI and local police departments must be encouraged to reestablish the units that have previously maintained surveillance of these terrorist groups.

PROPOSED PAY INCREASE

HON. JERRY HUCKABY

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HUCKABY. Mr. Speaker, as a new Member of the House of Representatives, I must express my disappointment, and the disappointment of a majority of my constituents, at the manner in which this Congress has avoided confronting the sensitive issue of Federal pay raises.

We all know that if the citizens of this Nation were allowed to vote on the salary proposals, the increases would be rejected. Simply stated, the majority of Americans do not believe that Federal employees—including some Members of Congress—perform well enough to justify their current salaries.

Despite the failure of this body to address the issue with a record vote, it is obvious that many Members favor the pay raises. Many of them advance the argument that higher salaries are needed to attract the most highly qualified persons to the Federal Government. They say that this is one issue on which the Congress must bite the bullet, by accepting whatever public criticism results from the higher salaries.

But I submit that this Congress is not biting the bullet on this issue. Instead of letting the American people know how each of us feels about the salary increases, parliamentary tactics have been used to prevent Members from having to vote. This course of action reflects no credit on a Congress which is already discredited in the eyes of many Americans.

Indeed, how can the American people be expected to sit still for this raid on the Federal Treasury—which will cost taxpayers an additional $110 million annually—when they are being asked to sacrifice for the good of the Nation? Apparently, this Congress is willing to volunteer their fellow Americans for sacrifices, but the Members are unwilling to sacrifice themselves. This pay increase will grant Members of this body an additional $12,900 each year—an amount equal to the entire annual income of many American families.

Mr. Speaker, if we are ever to restore public confidence in our governmental institutions, we must confront these issues directly, instead of hiding behind automatic provisions and ignoring the wishes of the people.

ANSWERING SAULNIER CRITICISM OF THE FULL EMPLOYMENT BILL

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAWKINS. Mr. Speaker, in the CONGRESSIONAL RECORD of February 10, Senator GOLDWATER inserted a critique of the Humphrey-Hawkins bill by Dr. Raymond J. Saulnier, which also appeared in Business Horizons. Dr. Saulnier served as Chairman of the Council of Economic Advisers during the second term of the Eisenhower administration, and is now at Barnard College of Columbia University. I have no complaint that Dr. Saulnier's economic philosophy and views of national economic policy differ from mine, and will not discuss that matter. Instead, I limit my comments to the gross errors of fact, hard to explain, in Dr. Saulnier's treatment of the Humphrey-Hawkins bill.

First. Dr. Saulnier states that the bill's "approach to unemployment reduction is still to put people in public jobs at market rate of pay, but with nothing done to promote private, self-supporting employment." Entirely to the contrary, the bill concentrates first and foremost upon the expansion of private employment, which it designates as the top priority, and details many approaches toward that end. The bill specifically provides that last-resort public service jobs shall not be undertaken until 2 years after enactment, and then only if the President transmits a finding to the Congress that all the other provisions under the bill are not reducing unemployment in accord with the target of reducing it to 4 per cent within 4 years of enactment. The bill contains many other limitations upon public serv-

ice employment. The many materials issued in connection with the bill have made it clear that the public service employment at its peak would probably be less than 1 million of the 9 million additional jobs needed within 4 years of enactment. Nor does the bill provide that the public service jobs be at market rates of pay. To the contrary, it provides only that people working on these jobs, which they canont obtain if they refuse to accept or voluntarily leave private jobs, shall be paid not less than the minimum wage, and not less than the wage paid by the same employer to those doing the same type of work.

Second. Dr. Saulnier states that it is—

The determination of its [the bill's] authors to launch the federal government into comprehensive national economic planning. . . . And since there is no change in what the bill proposes to spend, and no change in its insistence on ruling out monetary restraint, the strictures introduced in the latest version against allowing inflation to accelerate are a virtual guarantee that the planning would involve early recourse to direct controls.

The above statement by Dr. Saulnier is categorically erroneous. The bill is aimed solely toward improved planning by the Federal Government of those policies and programs which the Government has been undertaking and will continue to undertake in any event. The bill expressly prohibits any planning of the private economy, such as setting goals for private production or employment in specific sectors or allocation of private production. The bill does not propose any levels of Federal spending nor any degree of monetary restraint or expansion, but instead leaves this to be worked out by the President, the Congress, and the Federal Reserve year by year. The bill neither calls for nor contemplates the direct controls. It does set up a more comprehensive group of other specific policies to deal with inflation than have been in any previous legislation except in times of large-scale war.

Third. Dr. Saulnier says that "it is still true that enactment of the bill would preempt the opportunity to attack structural unemployment constructively," and that its proponents would not concede this. We gladly claim, as one of the strong features of the bill that, more than previous effort, it contains a wide range of programs to deal with structural problems through use of microeconomic measures to supplement macroeconomic measures.

Fourth. Dr. Saulnier states that—

The bill would do nothing to correct policies of government, principally those governing taxes and industrial regulation, that are obstacles to the accumulation and investment of capital.

Entirely to the contrary, by promoting full markets for products, the bill removes the main obstacle to adequate investment of capital. The bill contemplates that, under its full employment and balanced growth plan, tax and other measures to promote adequate capital investment would be developed year by year, to the extent necessary, on a parity with measures directed toward other sectors. The bill specifically calls for periodic review of Government regulations, with the purpose of getting rid of unnecessary or hurtful regulation, and modifying necessary regulation to the extent found desirable.

Fifth. Dr. Saulnier states that the start-up cost of the bill would be $48 billion imposed upon the Government in the first year, and half that amount in each succeeding year. This is a wild exaggeration, based upon the errors described above in Dr. Saulnier's analysis of the bill, with a lot of imagination thrown in for good measure. Prospective costs under the legislation, bearing no resemblance to Dr. Saulnier's figures, are discussed fully in the new pamphlet referred to below, and indeed have been discussed in earlier available documents.

Sixth. Dr. Saulnier's contention that operations under the bill would make the direct controls inevitable is based upon an incorrect portrayal of every phase of the bill that Dr. Saulnier discusses.

In the same issue of the CONGRESSIONAL RECORD, immediately following Dr. Saulnier's critique, there appears a summary of the revised Humphrey-Hawkins bill which in itself demonstrates the incorrectness of the major points made by Dr. Saulnier.

For those interested in a more complete discussion of the Humphrey-Hawkins bill, and a more comprehensive refutation of what Dr. Saulnier has had to say, I call attention to the new pamphlet issued in January 1977 on the Humphrey-Hawkins bill, this being a discussion of the issues by Senator HUMPHREY and me. Any Member of the House or the Senate or any concerned staff member may obtain a copy or an additional copy of this pamphlet by contacting my office or Senator HUMPHREY'S office, respectively. Those not in the Congress who desire the pamphlet will be informed as to how it may be obtained if they contact my office.

IT'S JUST BEGINNING

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. FORD of Tennessee. Mr. Speaker, the 95th Congress has already spent a good deal of time considering our Nation's energy crisis. While I enthusiastically supported the Emergency Natural Gas Act of 1977, Public Law 95–2, I realize that it only gives us a breathing spell at best. We are all aware that lasting, long-term solutions must be formulated. Congress and the American people face many hard decisions in setting out a meaningful energy policy.

The problems ahead were perhaps no better summarized than in the Memphis Commercial Appeal on February 8. In this issue Michael Grehl and the editorial staff showed great understanding and insight into the energy crisis. As we deliberate over energy policy I hope my colleagues will refer to this editorial, which I am inserting into the RECORD at this point:

IT'S JUST BEGINNING

The emergency power which Congress gave President Carter to divert natural gas to areas where it is scarce will expire April 30. Carter has promised to put together a comprehensive energy program for America by April 20.

That means that he hopes to do in 10 weeks what the previous two presidents failed to do in eight years—find a way to meet the nation's energy needs for a future in which demand will grow while supplies we now have access to are shrinking.

A lot hinges on how seriously the American people take the energy problem.

If Carter is to make any headway in establishing a blanket policy for energy production and consumption, he has got to win public support for two hard-to-take realities:

Everybody has got to use less energy.

The cost is going to rise.

Convincing people that this is inevitable is difficult. We are a nation of energy wasters. We love it that way. We get mad if somebody tells us the fun has got to stop.

Jimmy Carter had a go at it in his TV chat with the country last week. He told us that to solve the energy problem we're all going to have to make sacrificies. And how. Carter is low-key. He understated the case.

But his chief energy adviser, former Defense Department and CIA chief James Schlesinger, was firmer in an interview with U.S. News & World Report this week:

"We must recognize that we have been burning the candle at both ends as far as energy is concerned . . . Americans have never believed in physical shortages. Many Americans today believe that these shortages somehow or other have been contrived by the industry. That is not true; they are real . . . Once the gasoline lines disappeared after the (1973) embargo, the American public came to believe—in fact, was informed by some political leaders—that the energy crisis was over. It is not over. It is just beginning. And if this particular episode is taken as a warning—as a portent of what is to come—that would be the chief thing that this country could have learned."

The brief period of abundant, cheap energy that has existed since World War I is already over.

But here we are, a nation geared to heating, cooling, driving and running factories on cheap energy.

It's the cheapness of the product that has encouraged waste—and the energy producers have pushed high consumption by the market.

The public skepticism Schlesinger mentioned is understandable. Who made Americans energy addicts? Answer: The big energy companies—and government. Oh, we were willing. But it is no wonder that foreign countries have no sympathy. The Times of London said scornfully last week: "It is the weather that has brought the American energy crisis to the surface. Energy consumption has always, however, been more profligate in the United States than in any other country."

Are the energy companies to blame? Some think that the natural gas shortage this winter would be less severe if some gas were not being held back from the pipelines. Interior Secretary Cecil Andrus takes the allegations seriously enough to have ordered a preliminary investigation. If facts point that way, he will enlarge the inquiry next week. Certainly the people have a right to know if profiteering or hoarding is taking place.

But it's the long-term energy crisis that must be solved. This winter is just another sign of worse to come if the U.S. does not stop its profligacy—and find alternate sources of energy.

Our national concern with protecting the environment means the cost of extracting and burning even so plentiful an energy supply as coal will be expensive. It means rigorous care about offshore oil drilling and deep ports.

But most of all, solving the energy problem means the necessity, as Schlesinger put it,

to "engage the moral enthusiasm of the American people."

If President Carter can deliver a comprehensive program to Congress by April 20, then it will be after the cold has passed and the blossoms of spring will be adorning the parks of Washington.

Only if the public insists, in that gentler climate, on hard, far-reaching decisions and conscientious sacrifices can Carter succeed where others have failed.

In other words, we've got to tell Congress and Carter we want to use less and pay more. We have to believe with Schlesinger that "there is no alternative but to get serious."

GENERAL ACCOUNTING OFFICE SETS STUDY ON COFFEE PRICES

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RICHMOND. Mr. Speaker, we are all too familiar with the downcast and downtrodden of society who searched endlessly for only a nickel for a cup of coffee.

In a few months, millions of coffee drinkers will be searching endlessly for a pound of coffee which costs less than $5.

If present trends continue, consumers will have seen their favorite blends rise from $1.20 a pound just 19 months ago, to today's astronomical prices of between $3.25 and $4 a pound.

The spectacular increase in coffee prices mandates a thorough investigation not only by the Federal Government, but also the dramatic concern demonstrated by State legislators. I applaud my friend, Assemblyman Harvey Strelzin, Democrat, of Brooklyn, for taking the initiative to hold important hearings of his committee on consumer affairs and protection on February 2 to look into coffee prices.

Next week, on February 22 and 23, as chairman of the Agriculture Subcommittee on Domestic Marketing, Consumer Relations and Nutrition, I will join with Congressman BENJAMIN ROSENTHAL, who chairs the Government Operations Subcommittee on Commerce, Consumer and Monetary Affairs, to hold joint coffee hearings into the coffee crisis.

Our broadly representative panels will seek to investigate the entire flow of coffee from the South American plantation to the dining room table. Moreover, we will determine whether there is a real shortage or whether American consumers are in the midst of one of the most machiavellian market manipulations in modern times.

The first question which we will consider is when did the coffee crisis begin? Some say it began in December when my good friend, Commissioner Guggenheimer, correctly articulated the public's outcry and indignation against high coffee prices by calling for a coffee boycott.

Some say it began on a Brazilian coffee field in July 1975, when a killing frost allegedly destroyed almost 60 percent of that nation's coffee crop. Others contend that the earthquake in Guatemala, the unrest in Angola and the inflation in Colombia precipitated the coffee crisis. Yet, I believe as do many experts that these natural and manmade disasters were only the tip of the iceberg. The real answer to why the coffee crisis is amongst us, the answer to why green bean prices have skyrocketed by 300 percent in 19 months, lies in the same region of the world as does the solution to the energy crisis . . . in the oil fields of the Middle East.

Coffee producing nations such as Brazil, Colombia, Mexico, the Ivory Coast and Uganda are all victims of the same energy crisis. That is their international balance of payments continue to deteriorate as they pay off their huge oil based foreign deficits. Hence, these nations decided perhaps individually, perhaps collectively to balance their trade by increasing their coffee prices.

Brazil, the largest coffee producing nation in the world, has raised its coffee export income from $900 million in 1975 to more than $2.3 billion in 1976.

The increase in government revenue was the direct result of an unusually high tariff imposed on each pound of coffee leaving the country. In December, the Brazilian tariff was $80 a bag. A bag of coffee contains 132 pounds of beans. In early January the Brazilians raised their tariff to $100 a bag and last week the Brazilians raised their tax to $103 a bag or 77 cents for every pound of coffee leaving the nations, and most likely they will increase that tax again.

Many people in the coffee industry argue that only coincidentally did Colombia raise this tariff to $1.47 a pound, that at the same time Mexico imposed a 42 cents a pound tariff and that the Ivory Coast, which has experienced neither a natural disaster nor a revolution, inflated its tariff to at least $1.90 a pound. I cannot agree that this is a coincidence. I believe that this is a textbook example of conscience parallelism among the coffee producing nations to milk the American and worldwide coffee consumers in order to pay off the billions of dollars they owe to the OPEC nations. So, in fact, the oil cartel which has terrorized the world's petroleum consumers has, in biblical terms, begat the coffee cartel.

It must be noted that many members of the coffee cartel claim that the high prices of coffee are only a function of supply and demand. However, demand has remained consistent in the United States, 20 million bags annually, while per capita consumption has decreased, to its lowest level in 20 years, to 9 pounds per person per year.

Moreover, we must explode the fairy tale that supplies are low. According to the USDA and other reliable sources there are approximately 59 million bags of coffee in storage with Brazil alone having at least 20 million bags of coffee on hand. The current supplies are sufficient to meet projected worldwide demand, coupled with worldwide production for the coming year expected to reach 70–72 million bags, we certainly have enough coffee.

The central question we should now address is whether we, as consumers, are strong enough to resist the pressures of the new coffee cartel, whose tentacles reach into American coffee cannisters stealing consumers' dollars.

What we can do is reduce our consumption by 50 percent. Instead of having a coffee break in the morning and in the afternoon, I suggest Americans start drinking tea or boullion. Consumer abstinence will send a signal to the coffee cartel that we are not going to tolerate coffee prices which reach $5 a pound.

Moreover, there is another issue which we as New Yorkers cannot tolerate and that is the potential loss of 1,000 jobs. Recently I visited with Mr. Irwin White, president of the White Coffee Co. and the New York Coffee Roasters Association. Mr. White informed me that the 25 small coffee roasters in Metropolitan New York are in danger of going out of business.

The increase in raw coffee and taxes imposed by the International Coffee Producers are forcing these small roasters, who employ an average of 50 workers each, to increase their interest payments and raise their costs of doing business. However, these small firms are unable to pass along their increased expenses to consumers because of their market position and the already outrageous cost of coffee at the supermarket. If these trends continue, small roasters such as the White Coffee Co. will no longer be competitive. They will be unable to borrow sufficient capital to cover their raw material costs and will be forced out of business.

The loss of employment and revenues from these companies will indeed have a profound effect upon the economy of our city in addition to the obvious hardship which would be imposed on the workers in the roasting industry.

Moreover, consumers who rely upon the small companies to provide quality coffee will no longer be able to purchase their favorite blends at reasonable prices.

The General Accounting Office, the investigative arm of the Congress, has agreed to undertake an extensive 6-month study of the international coffee supply and demand situation. The Comptroller General of the United States, Mr. Elmer Staats, has said that the GAO will analyze the International Coffee Agreement; review the marketing policies and procedures of the largest suppliers of coffee to the United States, assess the adequacy of Federal information collection efforts concerning coffee supplies, as well as review the interrelationship of U.S. coffee processors and marketing systems to the international coffee trade. The project has been assigned to the International Division of the GAO and is already underway.

Finally, we should remember that one of the first challenges posed to the consumers of this Nation resulted in a famous victorious event in our history—the Boston Tea Party. In this our third century, concerned consumers can initiate another historical commodity revolt by bringing down the cost of coffee to a reasonable level through a consumer boycott and consumer abstinence.

F–18 AIRCRAFT FOR IRAN

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAMILTON. Mr. Speaker, I would like to bring to the attention of my colleagues correspondence I have had with the Department of State on the possible sale of a land-based version of the Northrop F–18 aircraft to Iran.

This proposal to sell sophisticated aircraft which the U.S. Government does not now intend to buy for its own military services is the latest in our open-ended policy of arms sales to Iran.

Iran ordered 80 F–14 aircraft in 1974 for $2.2 billion, and has received less than a fourth of them. Last October, letters of offer and acceptance were issued to Iran for 160 F–16 aircraft in the amount of $3.8 billion, and there are some indications Iran would like to order more F–16's.

The Government of Iran is now expressing an interest in participating in the development of a land-based version of the F–18 by offering to finance feasibility and developmental studies for this aircraft that could cost under $7 million and therefore not be submitted to Congress. A sale of 250 F–18's desired by Iran could amount to over $4.0 billion.

I am sure my colleagues realize the foreign policy implications of this sale and of foreign participation in the development of a U.S. weapon system at such an early stage.

I urge the Department of State and the Department of Defense to examine this proposed study and sale carefully and consult with Congress on these matters prior to making any decision, even on Iranian participation in a feasibility study.

Our entire arms sales policy to Iran and the Persian Gulf needs scrutiny and definition. Our close military supply relationship with Iran should be based on what is in our interests, on Iran's defense needs and its absorptive capacity and on avoiding excessive arms proliferation in the Persian Gulf region.

In addition, closer scrutiny is needed of the activities of American defense contractors and American technical personnel in the Persian Gulf.

I am inserting copies of the correspondence as well as an article from the New York Times on the matter:

WASHINGTON, D.C.,
November 15, 1976.

Hon. HENRY A. KISSINGER,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: On November 18, 1976, the New York Times reported that the Northrop Corporation is "promoting a $4 billion sale to Iran of a new Navy fighter plane, the F–18". This article also stated Northrop is being supported in its efforts by the U.S. Navy.

Approval of any such transaction or any financial arrangement that might constitute consent to such a sale in the future while Congress is not in session would be counter to the intent and substance of Section 36(b) of the Arms Export Control Act which provides for Congressional review of any sale of major defense equipment amounting to over $7 million.

In my judgment the sale of F–18 aircraft to Iran would have unforeseen consequences on the political and military situation throughout both the Persian Gulf and the Middle East and should not be approved without Congressional review.

I would therefore expect that no action will be taken to issue a letter of offer to sell F–18s to Iran, or otherwise to commit the United States to this transaction in any way until 1977.

In this regard, I would like to know:

1. Does the United States Government approve of the Northrop Corporation's efforts to promote a transaction with Iran?

2. Did the Northrop Corporation have the prior approval of the State Department to undertake talks with the Iranian Government on the possible purchase of F–18s?

3. In the State Department's view, did the Northrop Corporation violate the intent, spirit or the letter of the law by undertaking such discussions?

I would appreciate a prompt answer to this inquiry.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Special Subcommittee on Investigations.

WASHINGTON, D.C.,
December 15, 1976.

Hon. LEE H. HAMILTON,
Chairman, Special Subcommittee on Investigations, Committee on International Relations, House of Representatives.

DEAR MR. CHAIRMAN: The Secretary has asked me to thank you for your letter of November 15, inquiring with regard to a possible sale of F–18 aircraft to Iran. I sincerely regret the delay in this reply.

The Government of Iran, following discussions with representatives of the Northrop Corporation, has requested an offer from the United States for the sale of F–18L aircraft and has offered to help finance the development on this land-based model of the aircraft. We recognize the need for the most careful consideration of the Iranian proposal. You may be assured that before replying to the Iranian Government we will consult with Congress and will comply fully with both the letter and the spirit of the Arms Export Control Act. No action which might be construed as a United States Government commitment to the proposed sale will be taken before Congress convenes in January.

The Northrop Corporation did not request the Department of State's permission before it held discussions with the Government of Iran. Under present regulations, such permission is required for a sales promotion to the extent that it involves the export of an item on the United States Munitions List or related technical data. (An export of technical data occurs whenever such data is conveyed orally, visually, or in written form to a foreign government or foreign national.) We have reminded Northrop personnel of this requirement here in Washington and also through our Embassy in Tehran. In response to inquiries, the corporation has stated that its discussions of technical data with Iranian officials have been limited to those aspects of the F–18L which are common to the earlier "Cobra" (YF–17) aircraft design. The technical data relating to the latter aircraft were provided to Iran pursuant to an authorization granted in 1972; applications from the corporation for licenses to export F–18 technical data to Iran and other countries remain under review. We have no evidence of any violation by the Northrop Corporation in this case.

We are examining our regulations to ensure that our export controls are consistent with our responsibilities under the Arms Export Control Act and with the conduct of a sound foreign policy.

Sincerely,

KEMPTON B. JENKINS,
Acting Assistant Secretary for Congressional Relations.

NAVY AIDS NORTHROP IN BID TO SELL IRAN ON NEW JET MODEL; COST-SAVING DEAL COULD ESTABLISH PRECEDENT—PENTAGON PAUSES BEFORE GIVING APPROVAL

(By John W. Finney)

WASHINGTON, November 7.—With active support from the Navy, the Northrop Corporation, a major defense contractor, is promoting a $4-billion sale to Iran of a land-based version of a new Navy fighter plane, the F–18.

The sale, if approved by the Defense Department, would be mutually beneficial to Northrop and the Navy, which helps explain the partnership that has developed, with Northrop pushing the sale from abroad while the Navy pushes it from within the Pentagon.

At no substantial cost to itself, Northrop would obtain a new plane to replace the F–5, which the Hawthorne, Calif., company has been highly successful in selling overseas. Through the foreign sales, the Navy would be able to hold down the rising costs of the F–18, which was originally sold to Congress as a lightweight, low-cost fighter.

TO BE FINANCED BY IRAN

The proposed arms deal with Iran, however, presents several unusual features, which are causing the Defense Department to pause before approving the transaction.

The projected sale of 250 F–18's to Iran was instigated by Northrop without the express approval of the Defense Department. Iran would be purchasing a weapons model that the Defense Department does not plan to buy for its own military services.

Furthermore, Iran would finance the development of the land-based version of the F–18, thus perhaps setting a precedent for a foreign country to influence weapons developments and foreign military sales programs in the United States.

The proposed sale goes back to a letter Sept. 12 that Gen. Hassan Toufanian, Iran's Vice Minister of War, sent to Defense Secretary Donald H. Rumsfeld, somewhat to the surprise of defense officials. In the letter, General Toufanian said that Iran, starting in 1982, had a requirement to replace its F–4 fighters with more modern aircraft, and "we have determined that Northrop's land-based derivative of the U.S. Navy F–18 will best fulfill this requirement."

In the letter, Iran offered to pay the cost of developing a land-based version of the F–18, at a cost that Northrop estimated at $250 million. According to the latest Pentagon estimates, the F–18, when delivered in the 1980's, will cost $15.8 million per plane, meaning that a fleet of 250 would cost Iran around $4 billion.

NORTHROP'S CHAIRMAN NAMED

The Toufanian letter, according to defense industry sources, was drafted with the assistance of Thomas V. Jones, Northrop's Chairman of the Board, who was in Iran at the time.

As described by a well-placed Pentagon official, "Jones spread the word around Teheran that the sale had been approved by the Defense Department, which was just not true."

In mid-October, members of the Defense Systems Acquisition Review Committee—the top Pentagon group that passes on weapons programs—met to consider the Iranian request. The immediate problem was whether production of the land-based version of the F–18 might interfere with delivery of the plane to the Navy, which plans to buy 800 carrier-based models.

Both the Navy and Northrop have assured

the Defense Department that development of the land-based model would not interfere with production of the F–18 for the Navy and would lower the cost of the carrier-based version.

REVIVAL OF SALES COMPETITION

In some ways, the entry of a land-based version of the F–18 is a revival of the competition between Northrop and General Dynamics to build a new light-weight fighter for the Air Force.

Northrop, with its F–17, lost that competition to General Dynamics, which is building the F–16 for the Air Force.

Despite a Congressional injunction, the Navy refused to accept the F–16 as its new fighter and instead chose a carrier version of Northrop's F–17, which was redesignated the F–18. The F–18, however, will be built by McDonnell Douglas Corporation, with Northrop in the role of principal subcontractor.

If Northrop can find a way to finance development of a land-based version, it will become the principal contractor, with a large potential foreign market for the plane. The Navy and Air Force would then have competing planes to be sold abroad, each anxious to push those sales so as to lower the cost of the plane to itself.

While basically similar to the Navy's F–18, the land-based version would require considerable redesigning, which the Defense Department does not intend to finance because it sees no need for the plane in the American inventory.

STATE DEPARTMENT'S DECISION

In addition to 80 F–14 interceptors, Iran has ordered 160 F–16's at a cost of $3.9 billion. Just why the Shah of Iran should want both the F–16 and the F–18, basically comparable planes, is not clear to Defense officials, but apparently he envisions the use of the single-engined F–16 as a high-altitude dogfighter and the twin-engined F–18 as a close-support tactical fighter-bomber.

Meanwhile, according to Pentagon and industry sources, the Navy command has been but also to recover $300,000 a plane from Iran The sale would permit the Navy not only to lower the unit production cost of the F–18 but also to recover $300,000 a plane from Iran in the basic cost of developing the fighter.

Alan Woods, Assistant Secretary of Defense for Public Affairs, said no decision had been made by the Defense Department to support the proposed sale of F–18's, but he acknowledged that no immediate decision was required of the Pentagon.

Rather, he said, it is up to the State Department to "determine whether as a matter of policy it is in our interest to sell the plane to Iran."

CONGRESSIONAL PAY RAISE

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RAHALL. Mr. Speaker, I oppose, and I hope to have the opportunity to vote against the proposed pay increase for Members of Congress.

I was not a Member of 94th Congress that approved the method for this pay raise, but I am fully aware of the fact that many of the residents in my district of West Virginia do not even come close to earning $13,000 a year, the amount Members of Congress stand to receive from the increase.

I feel it is unfair to my constituents, as well as the rest of the people we serve in this body, to move ahead without a vote and receive more benefits from the taxpayers who are already hard pressed.

I understand the difficulty our Nation has in filling Government positions with qualified individuals. Many of those who are highly qualified, are unable to make the sacrifice to themselves and their families to serve their country. But I feel it is time to draw the line.

The unemployment rate in the United States is between 8 and 11 percent. In my district, many are just barely living on social security or benefits from black lung claims. I believe we at least owe these individuals a vote on the matter of raising our pay.

Therefore, I intend to continue to explore parliamentary procedures to bring the measure to the House floor. If we have to stay in session all week to do so, I intend to stay.

The American people deserve to know where each Member of Congress stands on this issue.

FREE HIGHER EDUCATION FOR SENIOR CITIZENS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SOLARZ. Mr. Speaker, the demise of the extended family in our society has created a host of serious hardships for our country's senior citizens. Among these is the lack of opportunities open to older Americans for meaningful and productive lives after they have left the workforce. While not as dramatic and visible as the problem of material deprivation, the loss of the sense of personal worth and dignity caused by inactivity can be painful and damaging.

The Senior Citizen Higher Education Opportunity Act which I am introducing can help to fill a void that now exists in many senior citizens' lives. If enacted, it would establish a national program of tuition-free college courses for senior citizens, by requiring each institution of higher education with 5,000 or more full-time students to allow older Americans to enroll in classes on a space-available basis. Institutions which failed to comply would lose certain forms of Federal assistance.

As a New York State assemblyman, I helped initiate a similar program at the City University of New York. That program, which is now 3 years old, has been a great success, enrolling nearly 1,000 senior citizens. Like the City University program, the proposed Federal policy can boast of one feature which very few Government programs can claim—it costs practically nothing. This is because the program only allows senior citizens to enroll in classes which regular students have not filled; therefore, no additional teaching, maintenance, or building costs are incurred by the university. The only additional burden is a small administrative cost, which the universities can cover by charging fees to the students.

This legislation does not use a heavy handed approach in enforcement. It deliberately does not involve capitation grants or student loans and grants, because such programs are critical to the financial survival of most colleges and universities. It does, however, make some less critical programs dependent on compliance. An example is the college library resources program, which grants funds to 80 percent of the Nation's 2,500 institutions of higher education, but does not give any one institution more than $5,000 a year.

It is not the purpose of this legislation to coerce the colleges and universities to do something that will adversely affect them. Given the success of the senior citizen program at the City University, I believe that after a few years most institutions of higher learning, realizing now little the program costs and how much senior citizens can add to the entire educational experience, will voluntarily continue this program. However, before these institutions have some first-hand experience with the program, they will have unfounded fears which will deter them from adopting it on their own. It is for this reason that I believe the threat of the withdrawal of certain Federal funds is a necessary part of the legislation.

"Youth," the old saying goes, "is wasted on the young." This is especially true when it comes to education. Too often the competition for grades or the anxieties and diversions of adolescence prevent young college students from really appreciating a liberal arts education. With their wealth of leisure, their maturity, and their freedom from career ambitions, many older Americans will be able to experience the joy of knowledge which may have eluded them in their younger days.

TRIBUTE TO MR. BILL EDGAR

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. STARK. Mr. Speaker, I would like to share with my colleagues my appreciation of Bill Edgar, a dedicated public servant who is leaving his position as city manager in the community of Pleasanton, Calif. In accepting his resignation, the city is losing the services of one who has repeatedly demonstrated his talent in areas both within, and extending beyond, his professional career.

Mr. Edgar chose municipal administration as his life's work in spite of his opportunities for a more financially rewarding career in private industry. After his introduction to city management as administrative assistant in Fresno, Calif., Bill joined the city of Pleasanton as director of finance. He subsequently was promoted to the position of city manager, and in this capacity has made major improvements in the physical condition of the city, as well as the structure of its administrative organization. Both the community and Mr. Edgar himself attribute much of his success to the ease with which he was able to establish and

maintain a working relationship with the Pleasanton City Council.

Mr. Edgar's contributions to the Pleasanton community were not limited to his job with the city. He also held a position as part-time teacher at Chabot College in Hayward, Calif., thus demonstrating his interest in, and respect for, our youth.

Mr. Edgar's resignation marks a great loss to the Pleasanton community. However, I feel assured that in his service to the city of Sacramento as assistant manager, his contributions will continue to be as memorable and valued as they have been thus far in his career.

TESTIMONY BY CONGRESSMAN MARK W. HANNAFORD FOR THE SPECIAL AD HOC SUBCOMMITTEE ON PRESIDENTIAL PAY RECOMMENDATIONS

HON. MARK W. HANNAFORD

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HANNAFORD. Mr. Speaker, under leave to extend my remarks I include my testimony before the Special Ad Hoc Committee on Presidential Pay Recommendations:

Mr. Chairman, thank you for this opportunity to submit for the record my views on the Congressional pay raise proposed by the Commission on Executive, Legislative, and Judicial Salaries and former President Ford and on the Congressional pay raise system in general.

I am against a raise in Congressional salaries at this time. We are currently suffering through a period of economic instability in which, as the elected leaders of this country, we have consistently asked our constituents to tighten their belts and lower their standards of living for the common good. I believe it is hypocritical to request this sacrifice from those we serve when we are unwilling to take steps to make sacrifices ourselves. Furthermore, by including ourselves in the yearly General Schedule employees' pay increase, we have unnecessarily politicized the salaries of other public servants and contributed to the growing credibility gap between Congress and the people.

I believe that three corrective measures are needed to create a Congressional pay raise system that will reflect the inherent integrity of Congress. First, Congressional salary increases should be extricated from the General Schedule salary system and restored to a place in the public forum. Second, we should adopt the policy of having all increases instituted at the beginning of the following Congress. This practice has been used successfully in my home state of California and in several other states to prevent legislators from directly and immediately benefiting from their own generosity. Last, a moratorium should be placed on any Congressional salary increase until a comprehensive and substantive code of ethics has been written and instituted. This code should include provisions for public disclosure of finances, restrictions on outside earned income, a system of accountability for expense allowances, and prevention of conflict of interest investments. I agree with the Commission and Mr. Ford that these are necessary steps toward preventing abuse of Congressional privilege.

I am hopeful that this Congress will enact the proposals I have outlined.

PAY RAISE: CONGRESSIONAL REFORM?

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. SEBELIUS. Mr. Speaker, as a freshman Congressman in 1969, I opposed the recommendations by President Johnson and agreed to by President Nixon that led to a congressional pay increase. I did so, not failing to recognize the need to achieve comparability between the private and Government sectors and the need to attract public servants of the highest quality, because of the way in which this entire business was conducted and the example that was set.

Then our Nation was laboring under conditions of high inflation and taxes and an increasing budget deficit. I felt both the magnitude and the timing of the pay increase were ill advised and made all the more unconscionable by the fact that the leadership of the Congress did not permit Members to vote publicly on the issue.

At that time, I stated publicly I could not support any salary increase for Members of Congress until progress was made in reducing Federal expenditures and putting our fiscal house in order. On one hand, Americans were asked to tighten their belts with a 10-percent surtax, and on the other, the slide was greased for a 41.6-percent salary increase for Senators and Representatives.

Mr. Speaker, my position did not change in 1975 when the Congress engineered a cost-of-living escalator into law and by one vote authorized another pay raise.

My position on congressional salary increases remains unchanged today and the issues have not changed. If anything, our economic problems are worse. We continue to be plagued by huge Federal deficits, high taxes, inflation, and a growing energy crisis. The citizens of my district are experiencing a farm price crisis and tight credit. I believe a salary increase at this time would be counterproductive and create a rippling effect of inflationary wage demands throughout our economy. Perhaps more important is the example that would be set at a time when President Carter is calling for a period of self-sacrifice.

Mr. Speaker, I do not see how Washington can ask the American people to practice self sacrifice without first setting the example.

I noted with interest that the Quadrennial Commission acknowledged a "crisis in confidence" in public office holders. In addition to its unanimous proposal for salary increases, the Commission further recommended adoption of a new "Code of Public Conduct" by the executive, legislative, and judicial branches of our Government. However, Mr. Speaker, it seems to me that some Members of this body support the proposed pay raise as a prerequisite for congressional reform. Simply put, I feel these Members have put the cart before the horse on this issue.

President Lincoln once said:

If you forfeit the confidence of your fellow citizens, you can never regain their respect and esteem.

By allowing the recommended pay increase to take effect without a public vote, I believe this Congress is failing to set the example and will further widen the breach of public confidence and trust in their elected officials.

Mr. Speaker, I urge immediate and favorable consideration of the resolutions of disapproval that I and others have introduced. Such a resolution would not only halt the current pay raise, but could also be the catalyst for action on various pay raise reform measures. I would hope we will soon see the day when Members of Congress will be able to consider congressional pay in an atmosphere of calm and reason by means of a procedure that mandates a public vote, and in such a way that any pay raises would affect Members elected to future sessions of Congress.

IMMEDIATE ACTION NEEDED ON JOBS CREATION ACT

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SHUSTER. Mr. Speaker, rumblings are being heard again from advocates of H.R. 50, the so-called Full Employment and Balanced Growth Act. Appropriately enough, this legislation has the same numerical designation as it had in the 94th Congress and is the same bad idea as it was in the 94th Congress. Direct Government funding for thousands of public service jobs will not only expand an already bloated Federal bureaucracy, but it will once again propel this country toward double-digit inflation.

In order to help combat this "tunnel vision" type of legislation, I added my name as a cosponsor to Congressman JACK KEMP'S Jobs Creation Act of 1977. Embodied in this legislation are the tools to create hundreds of thousands of jobs in the private sector. The major thrust of this bill is for a permanent, across-the-board cut of 10 percent in personal income tax rates, elimination of the double taxation of dividends and an increase in the corporate surtax exemption to $100,000 to help small businesses. With these incentives and others, goods and services will increase in the private sector with a corresponding growth in the number of new jobs created. These jobs will, instead of draining the Treasury, broaden the tax base and contribute toward sustained noninflationary growth.

I strongly urge the House Ways and Means Committee to act expeditiously on this vital legislation. The sooner the American people are given the proper tools to deal with the problem of unem-

ployment the sooner that problem will be solved.

SENIOR CITIZENS SUPPORT H.R. 84, THE TENANTS' TAX JUSTICE BILL

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HARRIS. Mr. Speaker, I am pleased to advise my colleagues that both the National Council of Senior Citizens and the National Association of Retired Federal Employees have announced their support for the tenants' tax justice bill, H.R. 84.

This bill ends the discrimination in our current tax laws against tenants by extending property tax relief to renters. Unlike other taxpayers, tenants are denied the right to claim their property tax payment for Federal income tax purposes. Under H.R. 84, tenants can claim a tax credit of 25 percent of property taxes paid through their rent. For the average taxpayer, a tax credit of 25 percent is approximately equivalent to a full deduction.

Tenants are of all ages and rent all types of dwelling units. Renters are young, middle aged, and elderly; they rent single family homes, townhouses, garden apartments, and high rises. Why should our tax laws discriminate against those who cannot afford to own and maintain a home, or who for strictly personal reasons would prefer to rent. Why should it make any difference whether one pays his property tax directly to the local government or through his landlord? Clearly, our tax laws would be more equitable if we allowed tenants to claim their property tax payment for Federal income tax purposes.

The article which follows appeared in the February 1977 edition of Retirement Life, the official magazine of the National Association of Retired Federal Employees:

TWENTY-FIVE PERCENT TAX CREDIT FOR TENANT RENTS WINNING SUPPORT

Approximately 36 percent of American taxpayers currently live in rental dwellings, and between 20 and 25 percent of their monthly rent goes for local property taxes from which the renter currently receives no tax advantage, according to Virginia's Representative Herbert Harris (D).

So Harris and more than 63 of his House colleagues have joined in sponsoring legislation to grant these tenants a tax credit for local property taxes included in their rents.

The proposed measure, known as the Tenants-Tax-Justice-Bill, would provide renters a tax credit of 25 percent of the proportionate share of local property tax reflected in their rent. The credit would be available to all tenants, regardless of whether they itemize deductions. Harris estimates that under his bill a typical tenant, paying $250 per month in rent, would save about $150 a year in federal income taxes. Harris explains, "For the average tenants a tax credit of 25 percent of the property tax is equivalent to the full property tax deduction which the homeowner now claims."

Harris' bill has the strong support of the National Tenants Association, and early hearings on the legislation are being urged before the Ways and Means Committee of the House. The bill fell short of Senate passage by only 12 votes last year, so passage and enactment during this Congress is not a far-fetched goal.

Enactment of the Tenants Tax Justice Bill would not cause any loss of income or higher taxes to apartment owners since their net taxable income will remain the same regardless of who claims credit for paying the property tax. Who can oppose a bill like this? Certainly NARFE will throw its full support behind this bill for renters. Individual members of the Association could aid its passage by letting their own Representative know of our interest in this pending bill.

The article which follows appeared in the February 1977 edition of the Senior Citizens News. This newspaper is published by the National Council of Senior Citizens:

TENANT TAX EQUITY BILL IS PRESENTED AS CONGRESS OPENS

A bill that would save approximately $150 per year in federal income taxes for the average rent-paying tenant has been introduced in the opening session of the 95th Congress.

The bill, which has the support of the National Tenants Association, was presented by Rep. Herbert E. Harris (D-Va.) Sixty-three House cosponsors have thus far joined Harris in asking for passing of the bill.

Under current law tenants are not allowed to claim a deduction on their federal income tax for local property taxes paid through their rent. The Harris bill, known as the Tenants Tax Justice Bill, would correct this inequity by allowing a tax credit of 25 percent of the proportionate share of local property tax reflected in his rent.

The credit would be available to all tenants, whether or not they itemize deductions.

"Many middle-income tenants and elderly people living on retirement income take a standard deduction because they don't have enough deductions for itemizing," Harris said. "For the average tenant, a tax credit of 25 percent of the property tax is about equivalent to the full property tax deduction which the homeowner now claims."

Harris said that about 36 percent of Americans live in rental dwellings, and "between 20 and 25 percent of their monthly rent goes to local property tax."

Commenting on the Harris bill, the National Tenants Association called it "a positive step in correcting an inequity that has existed between tenants and homeowners for too long."

They also pointed out that passage of the bill "would stimulate the economy by putting money in the hands of consumers who need it most."

A similar bill had been introduced in the last session of Congress, and missed Senate approval by only 12 votes.

"The support we gained in the House and Senate gives us a solid foundation to build on this session," Harris stated, adding that initial House efforts will focus on gaining early hearings, before the tax-writing Ways and Means Committee.

Harris called the legislation, known as H.R. 84, "particularly timely," and noted that it would ease housing problems in several ways.

"Many Americans find that they are unable to buy a home because of constantly rising purchase, maintenance and tax costs; . . . and still others, for strictly personal reasons, have decided that they would prefer to rent. The average citizen in a free society has the right to make such a decision without suffering tax disadvantages. . . . By extending property tax relief to tenants, the bill reduces the federal income tax liability of many average Americans."

Charging that, "Public policy has discriminated against tenants for too long," the Virginia Democrat asked for quick action by Congress on a bill that would "treat the Nation's tenants with fairness and equity."

CONGRESSIONAL PAY RAISE

HON. DELBERT L. LATTA

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. LATTA. Mr. Speaker, I was astounded to learn that you have taken a position which will deny the Members of the House of Representatives an opportunity to vote on the proposed congressional, executive, and judicial salary increases, well knowing that they will become effective on February 20 unless the Congress disapproves of the Salary Commission's recommendations. I was also extremely disappointed that our Republican leader, Mr. RHODES of Arizona, was denied permission on yesterday for the immediate consideration of a resolution of disapproval on the proposed pay increases. The action of your Democrat-controlled Special Civil Service Subcommittee headed by Congressman WILLIAM D. FORD, Democrat of Michigan, killing the 17 separate resolutions—with a total of 54 House sponsors—to disapprove the pay raises on the same day was equally distasteful to me. Having personally introduced one of the resolutions of disapproval, House Resolution 276, which was killed by Congressman FORD's subcommittee, and never having voted for a pay raise for myself during my years of public service, it goes without saying that I would have supported a resolution of disapproval had you given the House the opportunity of voting on the matter. Frankly, I do not know how this 2-to-1 Democrat-controlled Congress would have voted on such a resolution of disapproval had it been given the opportunity to do so, but I am confident that even those Members supporting increased salaries would have stood in a better light with their constituencies had they had an opportunity to vote their convictions.

Mr. Speaker, Congress made a serious mistake in 1967 when it voted to create a Salary Commission and in clothing it with authority to make recommendations on salaries which would become law unless overturned by the President or the Congress. Frankly, I believed then as I do now that such a delegation of legislative authority is unconstitutional and should not be permitted. Needless to say, I am glad that I cast my vote against the creation of the Commission at that time and have since introduced several bills to abolish it.

Certainly, Mr. Speaker, since your Democrat party controls this Congress by more than a 2-to-1 majority, you have the votes and the responsibility to abolish this Commission before it is called upon once again by law to make recommendations for salary adjustments in 4 years.

It matters not how much the cost of living has increased since the present sal-

aries were put in place or how much checks have increased for other Government workers, retirees, or those in the private sector since 1969, salaries for individuals under the Commission's jurisdiction should not be increased as proposed.

It cannot be denied that the proposed salaries are well below increases granted Federal workers, 65 percent; Federal retirees, 72 percent; social security recipients, 84.4 percent; and those in the private sector, 70 percent, since that time, but Members of Congress should not be put in the position of having to defend or oppose the Commission's presidentially reduced recommended 22-percent increase on which they had no vote.

COMMEMORATING 1977 ANNIVERSARY OF LITHUANIAN INDEPENDENCE

HON. MILLICENT FENWICK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mrs. FENWICK. Mr. Speaker, this week, on February 16, we observed the 59th anniversary of the reestablishment of an independent State of Lithuania. On that day also, more than 700 years elapsed since the original founding of Lithuania as an independent nation. I am happy to join Americans of Lithuanian ancestry in commemorating both these anniversaries together with the Lithuanian people. On this occasion, I want to take a little time to express my interest and concern for the Lithuanians. In our modern, interdependent world, events in Lithuania do interest Americans and U.S. reactions to these events do profoundly affect the Lithuanian people.

Lithuania is not a very large country. Her neighbors are larger, stronger, and more powerful and have been big and strong and powerful for centuries. The United States, however, has not recognized the incorporation of Lithuania into a larger U.S.S.R. without the consent of the Lithuanian people and is concerned with what is happening to Lithuanians and other people similarly unfortunately situated.

In 1975 an international agreement was signed at Helsinki involving basic human rights. In Belgrade, in June of this year, there is to be a review conference on the actual workings of the Helsinki agreement. At this time, I should like to join my colleagues in the House of Representatives who have expressed interest in having our representatives to the Belgrade conference diligently pursue full implementation of the basket III provision of the Final Act of the Helsinki European Security and Cooperation Conference, to the end that greater respect for human rights in Lithuania and elsewhere may prevail and peace and stability and full potential development may be assured for our friends abroad and in the long run for the United States and the world community.

REASSURANCES ON ETHICS INQUIRY

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SARASIN. Mr. Speaker, I know many of us in this body are concerned about continuing allegations of impropriety or ethical violations by Members of the Congress, especially with regard to South Korean influence within the legislative branch.

It is essential that the public be assured that these allegations and suspicions be investigated and publicly aired with the thoroughness that their seriousness requires.

I am sure that many of us were heartened by the public statements of one of the newer members of the House Ethics Committee, Mr. CAPUTO, of New York, contained in a recent interview published in the Washington Star. I would like to submit the text of that interview for the consideration of any Members who may have missed it:

A FRESHMAN CONGRESSMAN ON ETHICS

(Rep Bruce F. Caputo is a freshman Republican from New York who actively—and successfully—sought a seat on the House Ethics Committee. He was interviewed by Washington Star Staff Writer Ron Sarro.)

Question: Why would a freshman congressman want to be a member of the Ethics Committee, a committee where you can only make enemies in the House?

Caputo: It was pretty clear to me that members of Congress, on both sides of the aisle, were walking away from their responsibility to do something about the ethics of Congress. They were afraid of making enemies, they were afraid that they'd become unpopular within and without the Congress. It seemed to me there was a need for somebody who was willing to work at it and be objective and fair, but also persistent.

Q: Do you see some political advantage down the road to perhaps doing a good job on cleaning up the House?

A: I think there would be a favorable reception by voters to the notion that somebody in Congress was trying to sort out how members relate to lobbyists, how they receive money, how they spend money, and clarifying what is done. And then there should be an equally good reception, maybe even stronger, in not just disclosing these things but going on to meet the cause and prohibiting them. One of the problems down here is that there's a sense that disclosure somehow cures problems. To my horror and disappointment, people are perfectly prepared to indicate they own stock in banks and then to go ahead and serve on the banking committee; they sell life insurance and serve on committees that deal with that issue. We've got to do more than merely disclose these things. We've got to start prohibiting them.

Q: The committee has a reputation for being something of a pussycat. How did you find it?

A: I never knew the old committee. It's substantially changed. There are three, four or five new members. I had the feeling in the one meeting we've had to date that there was at least a willingness to spending a lot more money, hiring a lot more lawyers, investigating a lot more allegations, and probably with a lot more vigor than had been the case in the past. I certainly feel that way about it. I don't want anyone to get the feeling that this is either partisan or weak or incomplete, or somehow lacking in a desire to let the chips fall where they may. If anyone has done something wrong, then (a) it's going to be disclosed, and (b) it's probably going to be penalized, and (c) I hope we're going to develop legislation that will prevent this kind of thing from happening again.

Q: The Korean situation is an area the committee is going to handle. Do you have any feeling as to how many congressmen might have been involved?

A: If feeling means something upon which I would predicate judgment, then no. All I have is what lawyers call hearsay—what other people have said has happened. But if feelings is a more general term, yes, I have feelings that upwards of 50 members of Congress have received gratuities with some sort of knowledge—maybe not explicit, concrete knowledge—that the donor was an agent of a foreign government, a representative of business or a business enterprise with a matter before the Congress. I have a general feeling that some much smaller number, around 10, had very direct knowledge who the donor was and what was expected of them in return.) So that my feelings in that non-legalistic sense are pretty discouraging.

Q: By letting the chips fall where they may, what is going to happen if investigation leads into the level of the House leadership?

A: Well, that's why I chose that metaphor. I would hope that the leaders would be treated the same way any junior member would, that we would not be influenced by the authority or the personality of an individual member. To me, it is just as wrong for an important senior legislator to receive a gratuity from an agent of a foreign government and extend some sort of promise that he will vote favorably or unfavorably on some specific piece of legislation as it is for a junior member to do the same thing. It is my intent and it is my hope that others have the same intent to be sure that we treat everybody fairly and equally.

Q: What things do you think are grounds for punishment?

A: I think that's a very important question and it's my hope that we all give some thought to that before we get too deep into this. I think convictions on a felony that leads to a sentence of two or more years is explicitly treated in the rules of the House and you have to be expelled if that happens to you. Now what happens for convictions of a felony where the sentence is one to two years? I think you ought to be expelled even though that it is not now in the rules. What happens for a misdemeanor when you get up to a one-year sentence? That's closer because some misdemeanors involve drunk driving and I don't think you want to expell a guy who had too much to drink and drove an automobile. But I would be severe with that.

Q: Much of the allegation thus far has concerned money and gratuities. How do you handle that, short of a conviction?

A: Well, with things like money, travel, an honorary degree, I think you want to look at whether he had knowledge that the offerer was an agent of a foreign government or business or some other person trying to influence Congress. If he had knowledge that's more severe than if he did not. Then you ought to go the next step of was there any implied or explicit reciprocity for the extension of gratuity. And if there was knowledge and reciprocity, then I think you ought to expell. You can't let people buy votes in Congress.

Q: What about sex or, say, a Korean agent throwing a birthday party for somebody?

A: With both of those, I would say that if

the recipient understood that the person offering was a representative, an agent, of a foreign government or a business or some other institution seeking to influence Congress, I would say that is in the censure category. If he not only had knowledge that this person was in that position but he then implied there would be some reciprocity for the extension of those gratuities, then I think you're in the expulsion area. So that where it is, you can make a list of seven or eight kinds of ways to extend a gratuity to a legislator. If he had knowledge, that's in the censure or reprimand zone, if he indicated some reciprocity that's in the expulsion zone.

Q: What can the Ethics Committee do about former congressmen?

A: They have some benefits which presumably we could terminate.

TRIBUTE TO "DICK" SMITH—MAN'S CONSCIENCE WITH NATURE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. LAGOMARSINO. Mr. Speaker, most of us have a common weakness; we take the measure of a man after he is gone.

Wednesday night, February 2, 1977, a vacancy was created in the wilderness world and in the environmental community of California that is not likely to be filled in our lifetime. Richard J. "Dick" Smith, environmentalist, nature counsellor, teacher, artist, newspaperman, craftsman, conservationist, and wise "companero" on the trail, died while tending one of nature's animals he loved so dearly: his horse.

Dick had many interests and they all somehow involved his love of nature and his concern for its well being.

Everyone did not always agree with Dick, but they always listened, for they knew he spoke with authority; if they did not agree, they had better take a second look. More often than not Dick Smith prevailed.

Dick will be missed by prestigious groups and commissions throughout California and by people in every walk of life; by children who listened to his nature talks; by me and my staff who more than once had the benefit of his expertise on legislation pertaining to our environment; and even by those who occasionally found themselves on the receiving end of his always constructive criticism. All of us voice our grievous loss. There is a place, however, where Dick Smith will be mourned and missed in silence—on the high and lonely trails of his beloved back country. He had an understanding of nature rare among men.

Because we are all saddened by the loss of this singular man, and because of his enormous contribution to his fellow man, I ask the Members of the House to join with me and all those who knew him in extending heartfelt condolences to his wife Olive, his four children, and five grandchildren.

AMERICANS SUFFERING FROM CANCER-PHOBIA

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAGEDORN. Mr. Speaker, while Federal regulation in a wide variety of areas is sorely lacking in any sort of cost-benefit analysis, perhaps nowhere is this shortcoming more evident than with respect to Federal regulation of chemical substances. The health and dietary benefits which chemicals, drugs, and pesticides have brought us are commonly taken for granted. At the same time, limitations upon the ability of companies to develop and market chemicals has become increasingly pervasive. The least hint that laboratory rats may be adversely affected by huge doses of a substance has served as justification for excluding it entirely from the marketplace. Dr. Elizabeth Whalen, currently a research associate at Harvard, has argued in a recent issue of the National Hog Farmer that these policies, as well as the overall attitude toward chemicals that these policies express, are not only of limited effectiveness in promoting chemical safety, but that they may also be diverting our attentions from more real threats to our health. Following are excerpts from Dr. Whalan's thoughtful article:

[From National Hog Farmer, January 1977]

AMERICANS SUFFERING FROM CANCER-PHOBIA

(By Dr. Elizabeth M. Whalan)

Americans are in the grip of a new disease. The symptoms of this serious malady include anxiety, distrust, fear and occasional anger, resentment, panic and emotional outbursts, Susceptibility is near universal—old, young, male, female, highly educated or not. This disease is generally transmitted by the misdirected efforts of so-called consumer advocates, unsettling books, articles and newspaper headlines and, most recently, by a series of television specials about ill health in America.

The disease is cancer-phobia.

In October, 1975, CBS Reports presented a one-hour documentary, "The American Way of Cancer." In June of last year, that same network followed up with another special report, "The Politics of Cancer." In September an hour-long NBC news program asked the question, "What Is This Thing Called Food?" After viewing these three shows one could not help but conclude that we are in the midst of an industrially-produced cancer epidemic, surrounded by a sea of carcinogens, at the mercy of an array of noxious chemicals peculiar to the American environment.

The average viewer was probably unaware that these reports, to a greater or lesser degree, contained inaccuracies, served to confuse known cancer risks with hypothetical ones, cleverly used emotionalism and horror stories to establish guilt by association, and throughout transmitted the stinging current of innuendo that we were all the victims, rather than the beneficiaries of advancing industrialization.

It is very possible that media presentations such as these actually promote cancer in America by distracting viewers' attention from serious and widespread cancer threats, increasing pressure to spend limited research moneys on low priority areas and discouraging the type of research which might eventually lead to a major breakthrough in cancer prevention and/or treatment. Media-induced cancer-phobia may be cancer's ally.

INACCURACIES

Correspondent Dan Rather opened "The American Way of Cancer" by stating that the "United States is number one in cancer . . . if you're living in America your chances of getting cancer are higher than anywhere else in the world." These statements are false. According to the American Cancer Society publication, Cancer Facts and Figures, there is significant variation from country to country in age-adjusted cancer mortality, ranging from 163 per 100,000 population in Luxembourg to 21 per 100,000 in Thailand. The United States falls in between with an overall age-adjusted mortality rate of 132.7 per 100,000.

Correspondent Lesley Stahl, in "The Politics of Cancer," referred to this country's "soaring" cancer death rate. Again, this is false. Certainly the mortality rate from various forms of cancer is very much higher today than it was at the turn of the century. But it's essential to take into account that the life expectancy of the average man and woman was rather limited then. For instance, a white male born between 1900 and 1902 could, at the time of birth, expect to live only 48 years. Today the life expectancy for males at birth is nearly 70 years. Men and women born in the early part of this century generally died from scarlet fever, whooping cough, diphtheria, pneumonia, influenza or tuberculosis before cancer had a chance to affect them.

What is more relevant is the recent cancer trend: in mid-September at a Harvard school of public health-sponsored conference on the origins of human cancer, a research team from the National Cancer Institute and the Georgetown University school of medicine reported that the age-adjusted cancer death rate rose from 130.2 to 132.7 between 1968 and 1975. This increase is hardly dramatic enough to use the adjective "soaring."

But even more important, the CBS reference to a generally increasing cancer trend obscured the most important statistical cancer observation: in this seven-year period, respiratory cancer increased over 23 percent in white males and 61 percent in white females. Cancer of other sites either declined (for instance, stomach cancer) or stabilized (for instance, breast cancer). Were it not for the upsurge in respiratory cancer, the overwhelming proportion of which is the direct result of cigarette smoking, the cancer death rate in this country would be declining.

The concern here is not simply that health statistics and trends were misrepresented on the CBS cancer documentaries, but rather that the implicit premise of both shows was that general cancer mortality figures were both staggeringly high and on the increase.

The producers of the NBC show "What Is This Thing Called Food?" are to be complimented for omitting major inaccuracies of this sort. But on the other hand, in addressing the topic of food safety today, there is such a backlog of consumer anxiety about "those chemicals" in food and the role they might play in cancer and other dread diseases, that repetition of the oft-cited disease statistics might have been considered unnecessary.

OVERLOOKING MAIN RISKS

It is somewhat difficult to believe that three major network shows purporting, among other things, to alert the public on high risks of cancer, omitted discussion of the two most important sets of cancer facts which epidemiologists have collected.

Rather, in an evening news segment included in "The Politics of Cancer," informed us that "environmental pollution may account for up to 90 percent of causes of cancer in this country." "Environmental pollution" is a seriously misleading politically loaded term. Actually it is environmentally related causes which most scientists feel play a major role in some 80 to 90 percent of human cancers. But even more important, than the misrepresented terminology, was Rather's failure to note that it is cigarette smoking and imprudent dietary habits which make up the great majority of the 80-90 percent "environmentally related" total.

Estimates on the exact percentages vary, but cancer epidemiologists and statisticians are in general accord that (excluding superficial skin cancers, which are the most common of all cancers) between 30 and 35 percent of all cancer deaths occurring each year in this country are directly induced by cigarette smoking. This includes cigarette-induced cancer of the lung, bladder, oral cavity and other sites.

* * * * *

Another 30 to 35 percent of all American cancer deaths are attributable to an imprudent diet, that is, one which includes excessive amounts of fat and cholesterol. This latter association was recently stressed by Dr. Gio B. Gori, deputy director of the National Cancer Institute's division on cancer cause and prevention, when he testified at hearings before the Senate select committee on nutrition and human needs. Gori went so far as to suggest that imprudent diet is correlated with as many as 50 percent of cancers in American women.

* * * * *

Thus, 80 to 90 percent of the cancer deaths in this country may be the result of environmental causes, but only when you use that term in the broadest sense to include tobacco use and overnutrition. Those two factors alone account for 60 to 70 percent of malignancies. Smaller, but not negligible, portions of other environmentally induced cancers are the results of other factors.

* * * * *

MAGNIFYING HYPOTHETICAL

It would seem logical that if a TV network were to serve the purpose of educating individuals about how they might reduce their chances of developing cancer, it would focus on the dangers of cigarettes and overburdening the body with too much rich food, giving other factors time commensurate with the risk they pose, and noting that the cancer risk of occupational chemicals and certain drugs are relevant only to a small group of individuals who have been, or are, exposed to large doses.

In actuality, however, none of the three special reports elaborated on the known cancer risks. The topics of cigarettes, fatty, cholesterol-rich diets, and other known risks of general interest were mentioned only in passing. Instead the three documentaries focused on purely hypothetical risks and those which are not directly relevant to the population as a whole. In both these latter areas the documentaries bolstered their positions by telling only part of the story.

For instance, CBS stressed the hypothetical by devoting time in "The American Way of Cancer" to the topic of nitrite use in cured products. Correspondent Rather and those whom he interviewed, noted that nitrites under some circumstances can combine with other substances known as amines to form nitrosamines, which are potent animal carcinogens.

It sounded very frightening and it's likely that a number of viewers elected not to have a bacon, lettuce and tomato sandwich after the show. But what was not pointed out was that nitrite, when used in curing meats, is at best a hypothetical health risk. No human cancer deaths, or for that matter no human deaths of any kind, have been linked with the regulated use of nitrite in cured products.

While raising anxieties about nitrite, CBS failed to point out that nitrite is a natural component of human saliva. A person generates approximately as much nitrite in his own salvia in a day as he would from consuming three meals in which cured meats were served as the first course. Nor was it mentioned that the nitrate in vegetables such as spinach or beets converts to nitrite when stored in the refrigerator overnight. The nitrite in saliva and day-old vegetables is the same nitrite used in curing meats and has the same potential for conversion to nitrosamines.

Finally, the benefit-risk ratio in nitrite use was obscured by stressing the hypothetical risk of cancer. The clear danger of botulism in nitrite-free products was considered to be incidental, and perhaps unnecessary, and the ramifications of banning nitrite—namely the devastating impact on the pork industry and possible withdrawal of a major source of protein—was not acknowledged.

Similarly, "The Politics of Cancer" discussed at length the potential dangers of aldrin and dieldrin, two agricultural chemicals which have now been banned by the environmental protection agency.

The implication was that these pesticides played a role in American cancer mortality. No mention was made of the fact that these chemicals were challenged and eventually removed from the market solely on the grounds that they caused liver tumors in mice, and despite the evidence that they were not carcinogenic in dogs or other animals and apparently had no adverse effect on workers who had been exposed for many years to many hundred times the level of the chemical which might appear in the form of residues in foods.

Following the same pattern, NBC planted notes of concern about a yet-to-be approved sweetener aspartame, although the chemical had successfully survived hundreds of laboratory experiments and demonstrates no characteristic which would suggest it would be carcinogenic or in any other way threatening to human health.

In addition to focusing on hypothetical cancer risks, all three shows made use of the technique of wide-reaching generalizations based on small bits of scientific evidence.

"The American Way of Cancer" extensively discussed asbestos, a fiber which is known to increase the probabilities of lung cancer and a rare lung tumor known as mesothelioma among those exposed to large amounts of it. But in reality, asbestos poses no known risk to the overwhelming majority of TV viewers.

Similarly, both "The American Way of Cancer" and "The Politics of Cancer" commented on vinyl chloride, dubbed by CBS in an earlier documentary "the plastic peril." During the late 1940's and 1950's so-called pot cleaners in the plastics industry were exposed to high levels of vinyl chloride monomers (VCM), the raw materials from which plastics are made. Tragically, starting in the early 1970's, a number of cases of an invariably fatal liver malignancy, angiosarcoma, were diagnosed among these men. After establishing this fact, CBS proceeded to raise questions about the safety of plastic food wrap—"No one knows whether they are dangerous or not. There hasn't been adequate testing"—without noting that it was only workers exposed to high levels of the VCM who were affected and that there is no reasonable risk posed to the individuals who use plastic wrap or plastic containers.

At the very most, if one had highly sensitive techniques, one might find trace amounts at the level of parts per billion of the VCM in some of the rigid or semi-rigid plastic food materials. But then, if you tested long and hard enough, you could probably find anything in anything. This level is not of practical significance.

The commentaries on occupational chemicals such as vinyl chloride and asbestos did not note that while there have been deaths associated with these, the very same chemicals have also saved many, many lives. The furor over asbestos in "The American Way of Cancer" did not include mention of the fact that this miracle fiber has for years offered a means of fire protection. In discussing the much maligned plastics, the report overlooked its indispensable use in the medical field, specifically blood bags and medical tubing, which has saved thousands of lives. On another level, it might have noted that the banning of plastic bottles on some hypothetical cancer risk would inevitably lead to more home accidents, some quite serious, from broken glass.

But probably the most extreme example of extrapolation from one bit of information revolves around the case of diethylstilbestrol. Both "The American Way of Cancer" and "What Is This Thing Called Food?" closely examined this subject, the latter show dedicating almost one-fourth of its air time to DES.

DES was used between the late 1940's and early 1960's in an effort to prevent threatened miscarriage, and eventually led to the development of a rare form of vaginal cancer in the daughters of some 4 of every 1,000 treated women. Obviously this drug-induced cancer tragedy is sobering and the implications for future drug testing are clear, especially when the drugs are to be used during pregnancy.

But the question the documentaries were addressing was not the use of DES as a drug, but its use as a cattle growth stimulant. Unfortunately, both presentations equated the use of the drug during pregnancy and the presence of traces of the chemical in a small percentage of beef livers, the implicit message being "look what happened when it was used in pregnancy; maybe contaminated beef products with traces could do the same thing." And again, the documentaries failed to tell the whole story.

First, rather than contributing to cancer risk, the use of DES may actually reduce cancer and other health hazards by promoting more efficient production of leather meat.

Second, there is growing evidence that the alleged "traces of DES" found in some beef livers may not be DES at all, but rather a metabolite of the estrogen which most likely has a lower biological potency than the parent compound.

Third, even if the traces were full strength DES, the fact remains that all estrogens, natural or otherwise, can induce both animal and human cancers when administered at high doses. DES has no known carcinogenic potential that is distinct from its estrogenic property. Wheat germ, unpolished rice, vegetable oils, honey, soybeans and various other legumes have significant amounts of estrogen. Dr. Thomas H. Jukes, of the division of medical physics at the University of California, has noted that in a meal of ground round steak from DES-implanted cattle, whole wheat bread, mashed potatoes, green peas and salad, the food containing the smallest amount of estrogen would be the meat.

Fourth, and even more fundamentally, a woman's body regularly produces estrogen. It has been estimated that it would take 500 pounds of liver containing 2 parts per billion of DES to be equivalent (in terms of DES quantity) to the daily production of estrogen by a reproductive-age woman. Critics are quick to argue "if estrogens are contained naturally in certain foods and are produced by the body, there is no justification for adding more by an artificial method." But this ignores the fact that the amount of estrogens normally in the diet and the quan-

tities of estrogen produced daily by the body are so large that the amounts added to beef and lamb by the use of DES are too small to exert an effect against the background.

Fifth, the doses of DES used as a drug, and the traces which may appear in livers of implanted cattle, are not comparable. A common dosage given to mothers at the time the drug was prescribed in pregnancy corresponded to 100,000 tons of liver from DES-implanted cattle. Prof. Hardin Jones of the University of California estimates that the risk from eating beef liver containing 0.7 parts per billion of DES (the average amount found in the six livers that led to the move to ban DES) to be one case in 1,500 years in the entire U.S. population, assuming current liver consumption rates. Meanwhile, other causes of cancer would kill 525,000,000 Americans during that same period.

Little attempt was made in either "The American Way of Cancer" or "What Is This Thing Called Food?" to weigh this "risk" against the very conservative FDA estimate that a banning of DES will cost consumers $503 million annually.

SENSATIONALISM, INNUENDO

The criticism of the biased reports on occupational cancers and the former drug and current cattle growth stimulant DES is not meant to overshadow the tragedy experienced by the small number of victims and their families. There is no doubt that in the past serious cancer and other health risks have accompanied certain occupational tasks and medical regimens, and certain agricultural chemicals (like kepone) have sometimes been carelessly used, resulting in harm to human beings. There remains a great deal to be done to further promote safety in these areas.

If CBS or NBC were doing a special on occupational diseases or medically-induced cancers the closeup on asbestos, vinyl chloride and DES victims would be more understandable. But in an hour-long special report that has a title suggesting it is going to examine the primary causes of cancer in America, was it necessary to include scenes of the funeral of an asbestos worker? In evaluating the appropriateness of the use of DES as a cattle growth stimulant, was it relevant to include a heart-rending interview with the mother of a vaginal cancer victim? (Both the CBS "American Way of Cancer" and the NBC show had an extensive interview with one Mrs. Grace Malloy, the NBC food show dedicating time to a detailed description of the physical deterioration of her daughter).

The same supportive use was made of innuendo: for example, in "The Politics of Cancer," Lesley Stahl follows up on a discussion of the possible dangers of agricultural chemicals by stating grimly, "Today and every day this year over 1,000 Americans will die of cancer." The implication was there: somehow these pesticides played a role in cancer mortality. One can't help but conclude that these forms of sensationalism were included only to support an editorial position of the documentaries' producers.

But the prize for most questionable form of sensational innuendo to make a point must go to NBC for initiating a discussion of chemicals which can induce hereditary changes or birth defects and then showing pictures of horribly deformed children. The commentator, Betty Furness, offered a disclaimer: "We show these tragic visible forms of birth defects without implying that the cases bear any relation to food . . ." The question to the producers of "What Is This Thing Called Food?" is: If these deformities have no relation to food, why are you showing them?

All three television documentaries masqueraded as unbiased presentations on the topics of cancer causation and food safety, but a highly emotionally-charged message came through loud and clear: we have a cancer epidemic in this country and rapid, uncontrolled industrialization is to blame. "Agribusiness," it is subtly and not subtly suggested, is making money at the expense of American health.

In CBS "The Politics of Cancer," Anthony Mazzochi of the Oil Chemical and Atomic Workers Union summarized this point of view, "Industry is going to go on and get richer and fatter and the only thing we're saying is they can't act like mad bombers. They have to act like the rest of us civilized folk and agree to some restraints. We can't allow the mugging to continue."

* * * * *

What these shows are not doing is educating the public about cancer. If one were to conduct a survey right now on the relationship between food and cancer it is likely that 95 out of 100 people would state that it was red dye No. 2, DES, nitrites and plastic wrap which composed the diet cancer link, being totally unaware of the solid association between various malignancies and excessively rich diets. Furthermore, none of the shows addressed themselves to the two most critical cancer issues which face us today:

First, they overlooked the question of what the term "safe" really means. Instead the correspondents simply expressed shock and outrage that scientists and federal agencies did not "know if something was safe." A simplistic logical deduction should have convinced them that there is no way of proving anything is safe, since in testing one is looking for harmful effects, not for any ultimate proof of safety.

Over a hundred tests may show no problem, and then the 101st may note a tumor. Does that mean the chemical in question is not safe? In considering safety, one must introduce some common sense and be aware that there will always be someone who is screaming for a ban, no matter what the nature of the evidence. This statement holds for scientists with seemingly impeccable credentials, since dissension from the majority opinion is an efficient means of getting attention.

Second, the correspondents neglected to deal with the question of how we should make judgments about the regulation of environmental chemicals. Instead they spoke glibly and frequently about "cancer-causing agents" not pointing out that in most cases that designation was based on a limited number of animal tests.

It was obvious that the producers had swallowed whole the assumption that mice are little men and that a chemical that causes cancer in an animal should be banned without further question. CBS offered labor union leader Mazzochi's comments on this subject: "If mice die from inhaling something or eating something I want something stopped until someone proves to me that the substance they inhaled or ingested is safe."

Obviously, given that ordinary food such as lima beans and potatoes contain significant amounts of hydrogen cyanide and arsenic respectively, that concentrated forms of either would promptly kill the hardiest of laboratory animals, and that the basic natural substances such as vitamin A can, in some circumstances, increase tumor incidence in animals, Mr. Mazzochi's toxicological principles, if applied literally, leave us with nothing to eat or drink.

What is surprising here is that, on this vital and complex issue of how we classify carcinogens, the network correspondents were uncharacteristically uncritical. They seemed more than willing to overlook the reality that as we become more scientifically sophisticated and are able to detect traces of chemicals on the parts per billion level, the zero tolerance principle becomes unrealistic. They were unable or unwilling to deal with the fact that we cannot afford to continue banning substances because a minute trace of something way down the assembly line may have caused a problem among heavily exposed workers, or because one species of animal develops an increased incidence in one type of tumor.

What these special reports are doing is scoffing at the advances of technology, what they sarcastically refer to as "something pretending to be cheese" and "the miracle of science," overlooking, for instance, the major strides the food industry has made in improving health.

* * * * *

What these "health specials" are also doing is alarming people unnecessarily and creating an atmosphere of cancerphobia which serves to distract viewers from real health threats, on the grounds that since "everything causes cancer" they might as well forget about all health warnings. In doing so they are removing responsibility for cancer prevention from the individual and placing it on a collective group known as "industry." For some viewers this is probably very comforting, in that it is so much easier to sit at home and worry about asbestos, vinyl chloride and DES than it is to give up smoking or change one's eating habits.

Further and equally important, shows of this nature might (if they have not already) dampen incentives for corporate research and development. Who would be interested in investing millions of dollars in a new food additive (perhaps one that might inhibit stomach and colon cancer) if later, in an atmosphere of media-induced anxiety, it could be banned at the drop of a rat?

Finally, shows like "The American Way of Cancer," "The Politics of Cancer" and "What Is This Thing Called Food?" only further confuse federal research priorities. As a result of these reports and the understandable public concern which follows, it's likely that even more money will be spent evaluating and re-evaluating food additives, plastic wrap and the like, leaving meager revenue to invest in areas of cancer research where there is a potential payoff in terms of saving human lives.

In these respects, biased media reports such as these may be promoting cancer, not joining in the war against it.

THE HANDICAPPED EMPLOYMENT ACT OF 1977

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. FORD of Tennessee. Mr. Speaker, I rise today to reintroduce, H.R. 905, a bill to provide a tax credit to encourage the employment of handicapped individuals. As stated in the RECORD of January 4, the need for this measure is indeed great. Surveys by the Social Security Administration and the President's Committee on the Employment of Handicapped Individuals show high unemployment—double that of other citizens—and lower education and income levels among the handicapped in comparison to other Americans.

This legislation is modeled after the highly successful work incentive—WIN—tax credit program which according to the Senate Finance Committee, has been responsible for transferring some 300,000 Americans from the welfare rolls to the payrolls.

Mr. Speaker, I am greatly pleased that

since its introduction on January 4, 1977, H.R. 905 has gained broad bipartisan support. I am delighted that my colleague on the Ways and Means Committee, JOHN DUNCAN has agreed to work with me to secure swift enactment of this important measure. To date the bill has more than 50 cosponsors with several other members of the Ways and Means Committee represented.

In addition, this legislation has received the support of several organizations including the American Coalition of Citizens with Disabilities, the American Foundation for the Blind, the Paralyzed Veterans of America, the National Association of the Deaf, and the United Cerebal Palsy Association.

Mr. Speaker, we in Congress have an opportunity and a responsibility to provide the incentives necessary to establish equality of employment opportunity for our handicapped citizens. It is with this in mind that I urge the Members of this body to cosponsor the "Handicapped Employment Act." Only through its adoption can we in Congress truly hope to enable the handicapped American to live independent, dignified and self-sufficient lives.

PAY INCREASE EXTREMELY UNPOPULAR

HON. ALVIN BALDUS

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. BALDUS. Mr. Speaker, most of the people in my district are against a congressional pay increase. Since I have been elected to Congress to represent the views of nearly 500,000 people in western Wisconsin, I will vote against the increase.

I have received more mail on this issue this year than on any other recent issue, including the energy shortage, the drought, or the state of the national economy. The strong feelings against the increase are very understandable. The amount of the increase is more than the median income in Wisconsin. In relation to the average salary, a Congressman's salary already appears to be very high. Most of the people I have talked with do not feel that their taxes should go toward increasing that salary any further.

I have also found that there is some misunderstanding about how the pay increase issue came about. There is a belief, however unfounded, that we simply came back to Washington and voted ourselves more money.

With all of the media attention the issue has received, there seems to be a number of facts that are still not well known by the public.

For instance, it is not generally understood that the pay raise recommendation was made by the independent, nine-member Commission on Executive, Legislative, and Judicial Salaries or that former President Ford approved the recommendation.

It is not well known that it was President Ford who expressed the frustration of trying to fill high positions in the executive and judicial branches of the Government at salaries which could not compete with high positions in private industry. The congressional increase was recommended by the Commission to maintain equity with the higher executive and judicial salaries.

Despite any misunderstandings, the fact remains that the pay increase is extremely unpopular. My vote against it will represent the overwhelming opinion of the people of western Wisconsin.

EQUAL TREATMENT LAW WILL PRODUCE NEW JOBS

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. VENTO. Mr. Speaker, one of the largest and most critical areas of our persistently lagging economy is the building and construction industry.

And that industry has been lagging to an even greater and more tragic extent than other major parts of our economy. It lags, for example, a considerable distance behind industrial production, another major bellwether of economic recovery.

I am completely convinced, Mr. Speaker, that there can be no real or enduring emergence from our 8-year-old recession that does not include the building and construction industry.

This multibillion-dollar industry is afflicted with 27 percent unemployment, a staggering figure, more than three times the national jobless rate for all workers.

I am informed by the U.S. Labor Department that at least 670,000 building and construction workers are unemployed nationally. I am told by sources within the industry, both management and labor, that this 670,000 figure is distinctly low. Let us just assume that the industry's jobless level is about 700,000.

The first thing that must be said about these 700,000 unemployed is the horrendous waste.

It is an appalling double-barreled waste.

First, the American housing shortage is enormous and has been enormous for years. Millions of couples who want to build or buy their own homes cannot do so because of the industry's stagnation. The unmet demand for home construction is so huge that economists cannot agree how huge it is.

The second waste is just as terrible and just as hurtful to the American economy and its recovery. This waste is the loss of purchasing power.

We need to reflect on this. When 700,000 workers—most of them skilled craftsmen—are out on the street year after year the loss of purchasing power goes into the billions of dollars. Yes, billions.

Food stores lose money. Auto dealers lose. Appliance retailers lose. Doctors and dentists lose. Insurance agents lose. Clothing stores lose. Colleges lose. The ripple-effect is incalculable.

What I have said about the national effect of the building and construction industry's stagnation applies only to a slightly lesser extent to the Twin Cities of St. Paul and Minneapolis. We are slightly better off than other sections of the country, but still the figures are depressing.

In fact, in the Twin Cities area the jobless rate for some building and construction crafts is even higher than the 27-percent national rate.

Lathers in our area, for example, are 30 percent unemployed.

Other jobless figures for the Twin Cities include: 25 percent for plumbers; 20 percent for bricklayers; for electricians and electrical workers the rate is nearly 19 percent. And so it goes.

Other Members of this Congress, I know, can cite similar figures from their districts.

The point is that in my district and their districts the economic loss to the local community, to local business, has to be astronomical.

And let us not forget for a moment that such heavy unemployment rates as I have cited mean two other major losses.

First, they mean a large and continuing depletion of unemployment compensation funds at a time when these funds are running into the red by more and more billions of dollars.

And second, these high jobless rates also mean a tremendous loss in taxes for the National, State, and city governments because jobless men and women do not pay taxes.

All this is pertinent to H.R. 3500, a bill to provide equal treatment for craft and industrial workers. This legislation, true enough, corrects an injustice inflicted on the building and construction crafts, but it is also expected to provide a spur to the lagging industry. I feel confident that it can and will.

Mr. Speaker, I will not go into the sorrowful history of this legislation, because I am sure that will be covered by my colleagues who lived through that disappointment in the House as I did not.

It needs only to be said that there will not be a reversal, a betrayal of promise, by the White House this year after both Houses of Congress pass this legislation by substantial majorities as they did last year.

This legislation can serve to bring management and labor in the building and construction industry into a closer and more workable understanding of each other's problems. It can serve to reduce suspicions, resentments, and conflicts.

In doing that, this legislation can create an improved labor-management harmony which in turn will encourage more building, more construction, more jobs.

This prospect of greater harmony and consequently expanded construction is no idle fancy or hope.

I say that because of the highly significant story that appears at the top of page 1 of the Washington Post on February 16. This is a report that every Member should keep in mind when, sometime in the future, he votes on this legislation.

Very briefly the Washington Post story reports that the District of Columbia's building and construction unions have agreed not to strike and have given up other long-held rights and benefits during work on a half-billion-dollar redevelopment of the city's west end neighborhood. This came as an announcement by the unions and a major builder.

The Post report tells us that this precedent-setting agreement in the Nation's Capital came after 4 months of negotiations and "clears the way for construction to begin, possibly this week, on the first phase of the private redevelopment of the neighborhood just east of Georgetown." This huge undertaking, we are informed, "is planned to include residential and commercial construction in an area now filled with old row houses, warehouses and vacant land."

But historical accuracy requires me to point out that the District of Columbia agreement, landmark though it may be, has three notable predecessors in my district which encompasses St. Paul, Minn.

Comparable union-management agreements, containing no-strike stipulations, were negotiated in recent years between the St. Paul Building Trades Council and construction firms for the building of our city's civic center, 18 public schools, and most recently the projected multimillion-dollar transit system to be known as the St. Paul People Mover.

These most auspicious agreements—auspicious because they set precedents that may be followed and adopted elsewhere around the country—should be known to Members of the House following introduction yesterday of the equal treatment for craft and industrial workers bill.

These agreements prove my point that improved labor-management harmony can result in more construction and more jobs, thus helping to lift this nearly paralyzed industry out of its recession.

I believe we may be witnessing the start of a bright new era, a new beginning, for the building and construction industry and for its hundreds of thousands of workers.

LITHUANIAN INDEPENDENCE

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Ms. MIKULSKI. Mr. Speaker, February 16 is a day of great significance for individuals of Lithuanian origin because it marks the 59th anniversary of the reestablishment of an independent Lithuania. The creation of this independent state was unfortunately short lived due to the advent of World War II. In 1940, the Soviet Union occupied her land only 22 years after her people had fought so hard for their freedom.

Since then those who did not flee from their homeland have been subjected to instances of political repression, religious persecution, and a denial of their human rights. A case in point is that of Nijole Sadunaite who has been imprisoned for her participation in the publication of the Chronicle of the Lithuanian Catholic Church. I have joined with Representatives DONALD FRASER and NEWTON STEERS in sending a letter to Leonid Brezhnev citing the violation of human rights to which she is being subjected. Most notably her freedom of expression is being abridged which is guaranteed in the Universal Declaration of Human Rights. Her religious freedom, as set forth in the Helsinki agreement, has also been ignored. It is my hope that cases such as Nijole Sadunaite's will be justly resolved.

EXEMPTION FOR SMALL PRODUCERS OF NATURAL GAS FROM FEDERAL POWER COMMISSION REGULATION

HON. THOMAS L. ASHLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. ASHLEY. Mr. Speaker, I am today introducing, along with 33 of my colleagues, legislation designed to exempt small producers of natural gas from Federal Power Commission regulation, as well as from the requirement of certificates of public convenience and necessity of section 7(c) of the Natural Gas Act.

This much-needed bill would not only provide short-term relief from the current natural gas crisis which has hit my district—and many of yours—so very hard, but it would also offer long-term direction in forging a meaningful, comprehensive national energy policy.

For immediate purposes, there can be little doubt that passage of this bill would generate significantly larger quantities of natural gas, by eliminating the artificially low price ceilings as they affect the small, independent producer. The ceilings have driven many independents from the field, resulting in inevitably slashed production, including in some instances, prematurely capped wells. The initial victim of these unrealistic regulations has obviously been the independent producers themselves; the ultimate victim, however, has been and will continue to be the consumer. This legislation offers us the opportunity to provide short-term relief by rectifying an anomaly in the existing maze of regulations, without debating the queston of regulation per se. We owe the independent producers and the consumers that much.

In a narrow sense it can be argued that this bill is a regional bill. Certainly most of the small, independent producers are concentrated throughout Appalachia, the Midwest and portions of the Eastern United States. Parenthetically, this may help to explain why these regions were the hardest hit by the natural gas crisis, and the bitter cold of this winter. But, in a larger sense, this is a bill which is national in scope, providing long-term benefits. For, by beginning to draw rational distinctions and set realistic priorities in the natural gas field, we point the way toward a comprehensive, meaningful national energy policy.

NATURAL GAS AND LOS ANGELES, CALIFORNIA

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. ANDERSON of California. Mr. Speaker, in yesterday's mail I received a copy of the American Gas Association Monthly magazine for December 1976. On page 27, the mayor of the city of Los Angeles, Tom Bradley, touches on the role natural gas plays in the life of Los Angeles.

Mayor Bradley's remarks follow:

NATURAL GAS IS VITAL TO LOS ANGELES GROWTH

(By Thomas A. Bradley)

I think it is appropriate that the gas industry has come to Los Angeles, Southern California for its Annual Meeting, because the phenomenal growth of this section of the country has been made possible largely through abundant and relatively cheap sources of energy.

We rely on natural gas as one of those major sources of energy. I am told that 27 per cent of the nation's stationary energy needs are met by natural gas. In Los Angeles, over 50 per cent of those needs are met by natural gas. Ninety-five per cent of our water is heated by natural gas, 92 per cent of our space heating is by natural gas, and 75 per cent of our cooking is by natural gas. You can fully understand how much we appreciate your industry, and the great impact it has had on the growth of this community.

This was not always true. In the early history of the United States, this section of the country was really on the frontier, far removed from the natural sources of this kind of energy. We did have one thing going for us. We had a great coastline and through the vision and the wisdom of some of our early settlers we developed a man-made harbor in Los Angeles. We poured wood into that harbor, and then the coal that made generation of natural gas possible in this community was brought from Australia. That gas lighted our streets and heated our homes. Then, in the early part of the twentieth century, natural gas uses expanded beyond any expectations. The rest is history.

What I need to point out, however, is that despite this phenomenal growth, despite this record which I have just capsuled for you, we now face a serious crisis. We are told by experts that within a couple of years we may be faced with such a shortage of natural gas that some of our interruptible customers may have their gas spigots turned off. As serious as that would be in terms of bankruptcy and tragedy for those businesses and industries which rely upon natural gas and have no ability to convert to other forms of fuel, the thousands of jobs which would be lost, the impact upon the economy of this community, would be far more devastating. For this reason, I hope in the course of this conference you can find some of the hard answers to the difficult questions that face us—such as providing the transportation of natural gas from other parts of the world, even from the north slope of Alaska. You are going to deal with the issue of LNG, and I hope that

we are going to find the wisdom and the courage to follow the advice that you give us.

You, I am sure, are going to be concerned with rates. You are going to be concerned about your image, and I must tell you I think the credibility of leaders in every field of human endeavor today is being questioned, whether we are politicians or business people. That cynicism is pervading our society and making it increasingly difficult for you to sell your message. But I must say that you must join with other leaders, including politicians, in trying to communicate the gravity of the problem to the American people. And I pledge to join with you in trying to get this message across. I will help in trying to communicate the need for them to understand that there will have to be some trade-offs. We are going to have to face the fact that we are living in a time of limited energy resources. And unless we face up to it, this nation is going to be in trouble.

In this community, where we rely so heavily upon natural gas, I can tell you that we are going to do all within our power to alert people to that fact, and to the danger that we face. It is my hope that you will meet these difficult questions with the wisdom and courage to find the right solutions.

CONGRESSIONAL PAY RAISE

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HILLIS. Mr. Speaker, the public is aware of what the Congress is doing relative to pay raises and their protest is most understandable. The public is demanding that their elected officials be held accountable for their positions on the pay raise issue. This demand is perfectly reasonable. I, too, must register strong opposition to the mechanism employed in implementing the Peterson Commission's salary recommendations.

Personally, I consider the Commission's salary recommendations for Members of Congress far too high. The real issue before this body is not the Commission's recommended 28.9 percent increase in salary, but the method used to implement this increase. These raises will go into effect automatically without there being any debate on the merits of the proposed increases nor a vote taken on whether or not the increases should be initiated.

I am not surprised that public confidence in Government officials has declined substantially in the last decade given our use of back door methods to implement substantial pay increases—especially at a time when we are asking all to economize. It is most important that the legislative branch be accountable and how can we be accountable on this issue when we are not required to make our positions known? My constituents want the Congress to vote on this issue. I want to represent my constituents by making my position on this issue known through the voting process.

The Constitution requires the Members of Congress to be responsible for setting their own salaries by law. Good conscience requires that we be responsible to our constituents by being open about our views on this issue. We must live up to this responsibility.

NATURAL GAS: THE HIDDEN RESERVES

HON. WILLIAM J. HUGHES

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HUGHES. Mr. Speaker, I call the attention of my colleagues to a very informative article that was reprinted in the Washington Post of Sunday, February 13, 1977, entitled "Natural Gas: The Hidden Reserves." Any who might have doubt as to the value of an independent audit of this Nation's gas reserves should read this informative article by Mr. James Nathan Miller.

Among other facts, Mr. Miller points out that:

Reserve estimates that have declined markedly since 1968 have been manipulated by oil and gas producers making a sham of the arguments of the American Gas Association that its surveys have been precise and independently made.

The year 1968, curiously enough, is also the date that the U.S. Supreme Court ruled that the Federal Power Commission could let producers increase the price of gas whenever AGA figures showed that the rate of new discoveries had decreased.

The House of Representatives' Interstate and Foreign Commerce Subcommittee on Oversight and Investigations uncovered the fact that 153 fields surveyed by that organization and the U.S. Geological Survey produced a variance of 8.8 trillion cubic feet of gas. The lower AGA figure for those 153 fields—2.4 percent of the Nation's 6,300 fields—is more than twice as much as the estimated 3.5 trillion feet of delivery curtailments involved in this winter's gas shortage.

Mr. Speaker, can we afford to delay any longer the creation of a National Commission on Natural Gas Reserves so as to compile a comprehensive audit of this Nation's gas reserves?

The industry should welcome such a probe. If its estimates are accurate, the American people are ready to make sacrifices through conservation and higher prices.

As Members of Congress we must honestly ask ourselves if we can continue to attempt to set national energy policy based on the submission of supply information from an industry which has an inherent conflict of interest in the matter. We have a responsibility to the people we represent to find out just what the facts are.

The 20 cosponsors of my legislation to establish a National Commission on Natural Gas Reserves welcome additional support. Please notify Mr. Jonathan Spear of my staff on extension 56572 should you seek more information or wish to cosponsor this legislation.

At this point, Mr. Speaker, I submit the very enlightening article by Mr. Miller:

[From the Washington Post, Feb. 13, 1977]

NATURAL GAS: THE HIDDEN RESERVES

(By James Nathan Miller)

The companies that supply U.S. energy are trying to convince Congress and the public that the present cold-weather crisis actually does prove that there is a long-term shortage of natural gas. If they succeed, the United States will have a gas deregulation law that's based on data that are at best doubtful and at worst false.

To understand what's involved, it's essential to realize that the deregulation question actually involves two very different kinds of shortage, which press accounts have jumbled together. There is a true, demonstrable shortage in deliveries of gas. The reasons for it are the apparent physical inability of pipelines to satisfy the demand created by the record-breaking cold wave and the unwillingness of producers to meet this emergency demand at a controlled price when they know they can get several times as much if they can force the removal of controls.

The second shortage is something quite different. It is an alleged shrinkage in the country's long-term underground reserves of gas. The companies that own the long-term reserves—and claim that the shortage exists—also claim that the size of their holdings is a trade secret; as a consequence, the figures that could prove or disprove the existence of a reserve shortage are hidden behind a curtain of secrecy that the present cold spell has done nothing to pierce.

For many years the gas industry has claimed that underground stocks of "proved" reserves have been declining at an alarming rate. "Proved" reserves are the only ones that the country can be certain about. They represent gas fields that the producing companies have drilled into, measured with considerable precision and deemed to be economically recoverable. Beyond the "proved" reserves there are others labeled with adjectives representing the spectrum of geological speculation: "probable," "inferred," "possible," etc.

How much does the United States now possess in these various categories? The most recent estimate of the industry's trade association, the American Gas Association (AGA), is that there are 228 trillion cubic feet of proved reserves now in the ground, or about a 10-year supply at the present national consumption rate. But nobody expects us to run out in 10 years, because geologists know that there are huge amounts of the less certain categories waiting to be discovered. Most estimates conclude there are between 700 and 1,200 trillion more cubic feet of gas ultimately available; some go much higher. This means we probably have enough to carry us several decades into the next century if we go out and prospect for it. Which brings us to the industry's main argument for deregulation.

THE INDUSTRY ESTIMATES

The producers say that, because government regulation is holding down the price of gas, they haven't been doing the expensive exploratory work necessary to move the "probable," "possible," etc. fields into the "proved" column. According to AGA's figures, the decline in proved reserves began in 1968. From 1945 to 1968, the gas companies managed to discover a lot more gas each year than the country consumed. So for 22 years our "proved" stockpiles kept increasing, until they reached a peak of 293 trillion feet in 1967. Since then, according to industry figures, new discoveries each year have totaled *less* than consumption, and the "proved" reserves have shrunk from 293 to 228 trillion

feet. At that rate, we will run out of "proved" by the end of this century.

But the "proved" figures come from only one source: the gas producers themselves, who draw them up in complete secrecy. Thus, for the critical set of statistics that underlie the whole deregulation debate, the country depends totally on the chief private participant in the debate. In the last few years several outside investigations have turned up evidence that these figures may be fundamentally incorrect. They may be a statistical delusion—a gross underestimation of the nation's true reserves.

Proved estimates require a large amount of raw data—core samples, pressure readings, voltage measurements, etc.—that can be obtained only by actual drilling into the gas pockets. Acquiring these data for all the country's 6,300-odd gas fields is a colossal physical job, and only the gas industry itself owns the billions of dollars' worth of equipment necessary to do it. The only group to which the producers are willing to confide some of their information is the AGA, for its once-a-year survey of the nation's total reserves. Each year the association assigns 100 industry geologists to its Committee on Natural Gas Reserves. These geologists annually canvass the producers in their assigned areas for the necessary data to form their own estimates.

In 1970, responding to suspicions that had been voiced about the accuracy of the figures, the chairman of the reserves committee described the system in detail to the Federal Power Commission. He said the drawing up of the estimates was a rigorously supervised process specifically designed to eliminate any chance of manipulation by the producing companies. He said the companies gave the 100 geologists all the data they needed and the geologists, regarding themselves as public servants rather than as representatives of their companies, were scrupulous about insulating themselves from company pressure. All the geologists used the same precise AGA estimating formulas, said the official, and the resulting national estimate was "one of the most consistent and reliable series of statistics available anywhere." The FPC, which is known as one of the most supine of regulatory agencies in its relations with the industry it regulates, accepted this testimony at face value, and looked no further.

A DIFFERENT PICTURE

Last year a House Commerce subcommittee headed by Rep. John E. Moss (D-Calif.) conducted an investigation that drew a very different picture of the way the process worked. Moss' picture was based partly on facts turned up by an investigation by the Federal Trade Commission of AGA's estimates in the Gulf of Mexico, and partly on testimony by industry officials, including some of the geologists who had drawn up the AGA estimates for the Gulf.

What Moss found was that the whole estimating process was dominated by a few of the largest gas producing companies. These companies were allowed to choose the geologists who served on the Reserves Committee, and they regarded these geologists not as servants of the public but as their own representatives. AGA made no attempt to make the geologists follow its own estimating rules, and in fact the AGA man in charge of the program admitted that he had no idea of what estimating methods they used.

Under oath, the geologists admitted that they ignored AGA's definition of what constituted "proved" reserves and, in case after case, gave whatever estimates their companies wanted them to give. One admitted that his company drew up all his estimates for him. Another said that, when a company refused to give him information on a gas field, he simply listed the field as "zero"; in one year he listed five such fields. Another geologist said that companies often refused to give him any information at all, and he was forced to make "ballpark" guesses based on scraps of information from the trade press.

Moss turned up one huge field containing 400 billion cubic feet of gas that had been unlisted for two years, even though it had two platforms and 13 wells and its existence was known to the entire industry. If this single field had been included in AGA's figures, it would have increased the AGA's 1974 national estimate of new-field discoveries by 23 per cent.

The FTC's investigators, after a five-year examination of AGA's estimating methods, had recommended taking the association and the companies to court for "concertedly maintaining a deficient reporting system" that produced "serious underreporting." The FTC commissioners rejected this recommendation on what appear to have been political grounds. Moss uncovered a memo in the FTC files recommending against any legal action that might encourage "continued FPC regulation into the distant future." The FTC investigation, now seven years old, drags on.

THE PRICE INCENTIVE

The obvious reason the companies have to give AGA incorrect figures is the propaganda value of proving that a national shortage exists. But there is a more immediately practical reason: The Supreme Court ruled in 1968 that the FPC could let producers increase the price of gas whenever AGA's figures showed that their rate of new discoveries had decreased. Thus, the fewer new discoveries the producers tell AGA about, the more they can charge their customers. Interestingly enough, the first drastic drop in the new-discovery figures appeared in the AGA statistics that were issued a few months after this landmark decision.

The industry claims that AGA's figures are accurate because two national surveys of proved reserves—one by the FPC, the other by the Federal Energy Administration—came up with totals that were only a few percentage points different from AGA's. However, FPC and FEA both have been lobbying for deregulation; and though the two agencies claim their surveys were completely independent of the industry, both surveys actually depended heavily on industry cooperation and in fact couldn't have been carried out without it.

The FPC, in its survey, selected 158 out of the nation's 6,300 gas fields, and asked the industry for the raw data on these fields. On the basis of this information the FPC's geologists projected a national estimate that was only 10 per cent different from AGA's. The FPC's methodology was developed by a "technical advisory task force" whose chairman and cochairman were Exxon geologists and a majority of whose members were industry executives. Three subsequent analyses of the 158-field sample by others all concluded that the sample had been drawn up in such a way as to minimize the possibility of finding underreported fields.

As to FEA's study, its dependence on industry-generated figures was also self-evident. In authorizing the FEA's survey, Congress gave the energy agency power to subpoena whatever raw data it needed from the producers. But FEA chose not to subpoena anything, even when companies refused to provide requested information. Instead, it used only what information the companies were willing to turn over voluntarily. Since this is the same information AGA depends on, it doesn't seem surprising that FEA's and AGA's reserves estimates were almost identical.

SQUIRRELED AWAY

Besides failing to report reserves, the companies are withholding from the market large quantities of gas that they have reported. By law, when companies discover produceable quantities of gas in fields leased from the federal government, they are required to market it at the federally regulated price. But Moss' staff exposed cases in which companies—at the very time they were warning of a gas shortage—had failed to produce very large quantities of gas available in fields in the Gulf of Mexico developed under federal lease.

President Carter's energy chief, James Schlesinger, was quoted last week in Newsweek as saying, "I keep hearing about gas that's been squirreled away, but whenever we get close to it, it becomes evanescent." He should look at Moss' findings; they are not evanescent.

Here is one example of what the Moss subcommittee discovered. By law, companies that lease oil-and gas-producing land from the federal government must turn over all their raw data on these leases to the U.S. Geological Survey. By subpoenaing the AGA's (hitherto secret) estimate of reserves in the Gulf of Mexico (all developed under federal lease) and comparing this to the Geological Survey's own (hitherto secret) estimate of the reserves in the Gulf, the Moss staff was able to make the first direct comparison between the AGA's detailed estimates of reserves in a specific group of fields and another set of estimates for the same fields that were based on the companies' own raw data. Moss found that the Survey estimate was 60 per cent higher than AGA's: 23.5 trillion feet for the Survey, 14.7 trillion for AGA.

Thus, in only 153 fields (2.4 per cent of the nation's 6,300 fields) AGA apparently had missed 8.8 trillion feet of gas. This is a little more than twice as much as the estimated 3.5 trillion feet of delivery curtailments that are involved in this winter's gas crisis.

The AGA insists that to compare its figures with the Survey's is comparing "apples" and "oranges," because the Survey said it was estimating "measured" reserves, while AGA uses the "proved." But the Survey says that the two terms are "essentially synonymous."

From all the above, it seems apparent that the present 3.5-trillion-foot crisis in pipeline deliveries caused by a record cold winter tells us nothing about the more fundamental questions of what the companies' reserves actually are and why they are not making them available in sufficient quantity. The answer to these questions will come when and if Congress uses its subpoena power to conduct a survey of the industry's holdings that is demonstrably and unquestionably independent of the industry's influence. I don't pretend to know what such a survey will prove; perhaps it will confirm the industry's figures. But it is starting to realize that the nation's basic energy policy is being formulated on the basis of a fundamentally important set of statistics supplied by an industry that has every incentive to misrepresent them.

CZECH AND SLOVAK-AMERICAN CELEBRATION

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Ms. OAKAR. Mr. Speaker, on Saturday, February 19, I will be joining with the Czechs and Slovaks of Cleveland in their annual cotillion ball.

It is with great pride that I participate in this event. Cleveland is one of the ethnic capitals of America, and the cotillion ball is a special time for Czech and Slovak-Americans to rejoice in their

own customs and traditions, and in their proud history.

It is also a time that reminds us of our close ties with the people of Czechoslovakia. The passion for freedom in that land is strong today, perhaps stronger than it has ever been. The gallant men and women of Czechoslovakia who are today standing up for their freedom deserve the complete and unhesitating support of the United States, and I hope and will work to see that this Congress does all that it can in their behalf.

CONGRESSMAN ANNUNZIO INTRODUCES THE CONSUMER FOOD LABELING ACT

HON. FRANK ANNUNZIO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. ANNUNZIO. Mr. Speaker, I rise in support of H.R. 2180, a bill I have cosponsored called the Consumer Food Labeling Act.

As the name implies, the Consumer Food Labeling Act calls for expanded labeling on food products to disclose all ingredients and changes in ingredients, nutritional content, open-dating and storage information on perishable and semi-perishable foods, knowledge of manufacturers, packers, and distributors, unit pricing, product grading standards, and prohibition of misleading brand names.

Title I, the Truth in Food Labeling Act, calls for the disclosure of all ingredients on the food package. Consumers need to know what goes into a food item for reasons such as medical and religious. Food allergies are an obvious medical reason. Ingredients such as grains and milk products may be added in minute amounts in processing for consistency and texture. However, a person who must be on a gluten-free diet, must be able to know if the food contains any form of wheat, rye, oat, buckwheat, or barley. This means knowing what is in such foods as ice cream, salad dressings, canned soups, and even cold cuts. Ingestion of gluten would have serious effects on this person's physical well-being.

The passage of this act will insure that unidentified ingredients are not present.

Just as we want to know what ingredients our foods are composed of, another measure of food value is the nutritional content of the product. Title II, the Nutrition Labeling Act requires the label to contain a statement of nutritional value of the commodity, and to appear in conspicuous and easily legible type on the package.

The act covers three basic areas of food composition: analysis of nutritional content, that is fats, vitamins, protein, calories, et cetera; the net weight and drained weight of products which are packaged, such as canned fruits and vegetables; and the major ingredients by percentage weight of combination food items after processing.

Dr. Johanna Dwyer, of the Frances Stern Nutrition Center in Boston, feels that "people want to know how much of the protein in the chicken dinner is chicken, how much is soy, and so forth—for price, if for no other reason."

Among all the regulations which insure the consumer of purchasing fresh products, title III, the Open-Dating of Perishable Food Act is perhaps the most important.

A definition is in order: open-dating merely means to print or stamp the date on the food package, in terms of day; day and month; or day, month, and year, depending on the perishability of the product.

Open-dating is not a new issue. In March 1974, Dr. Margaret L. Ross, consultant for First National Food Stores reported in the Journal of the American Dietetic Association, that consumers want foods to be open-dated.

Very often a commodity will have a closed or coded date, so that only the manufacturer or food store will know when it may no longer be fresh. A study released by the Department of Agriculture in 1973 showed that uncoded dates on perishable foods pleased shoppers and reduced costs due to spoilage or unsold products.

At the present time, open-dating is voluntary, and while many food manufacturers and supermarket chains have instituted it, as well as some State and local governments, we need a law for the entire country to avoid confusion and consumer misinformation.

Also vital in preventing foods from deteriorating is proper storage. This act will require the label to state proper storage conditions to assist the consumer.

Eleven years ago, the French Government enacted a comparable law providing for the labeling of the "date limit for consumption and, if necessary the precautions to be observed for the preservation of the product * * *" Although Italy does not require expiration dates, the country's High Commissioner of Health has the power to order the indication of expiration dates on the labels of food products, if deemed in the interest of public health.

Extensive food legislation was enacted by the Belgian Government when it passed the Law on Commercial Practices in July 1971. One of its articles mandated that the geographic origin of the merchandise must be indicated on the products. We wish to go further with title IV, the Marketing Practices Disclosure Act. In essence, it would require that labels on packaged foods contain the names and places of business of the manufacture, packer, and distributor.

Schoolchildren always want to get an "A", because that shows they have done the best work. But, did you know that in food grading, an "A" may not be the best? Depending on whose standards are being followed, "A" could be the lowest grade of "AAA," "AA," and "A," and "No. 1" may also rank second or third.

Sound confusing? Indeed it does for the majority of shoppers. Title V, the Consumer Food Grading Act would initiate a system of retail quality grade designations for consumer food products expressed in a uniform and understandable way.

Many commodities are graded, such as meat, poultry, fruits, vegetables and grains. However, grade standards are not required by Federal law to be on the merchandise package, even when required by law to be graded. Thus, the consumer may not know what grade he is purchasing. The new requirement would enable the consumer to know the quality of the product and be able to select which grade suits his needs. The highest quality is not always needed, and the consumer should be given the opportunity to choose.

Unit pricing has become an ideal method in choosing food items of similar quality. Often a consumer will look for the unit pricing label on a grocery shelf, only to find to his or her consternation, that the wrong product has been shelved above that label, that the correct product is there, but in the wrong size unit, or the label is missing altogether.

Title VI, the Unit Pricing Act, is designed to assure the consumer easy access to both the unit price and the total selling price of a food commodity.

Though labeled title VII, the New Ingredients Notification Act ties in closely with title I, since they both involve ingredient labeling. When a manufacturer introduces a new ingredient into a product, this act will demand that it must bear a label describing such a change, for a period of 6 months.

Consumers have every right to know if their favorite food item has been changed in any way. A new ingredient may precipitate a price increase or decrease, for that item, and the public should be made aware why it may occur. If the taste or flavor of a certain food has improved, the consumer can know which ingredient has enhanced the product. The manufacturer can also receive more precise feedback on it, rather than having the consumer say merely that the product as a whole is good or bad.

The amount of food advertising is increasing every year, and reaches more and more people. The potential for abuse is astounding, and it is vital to enact controls to insure consumer protection.

Title VIII, the Misleading Brand Names Act, is designed to amend the Federal Trade Commission Act by expanding the meaning of "unfair or deceptive act or practice" to include advertising which inherently misleads the public through misuse of brand names.

It is apparent that the Consumer Food Labeling Act is not without precedent. Several Western European countries have taken action in this regard. American consumers have campaigned for more complete food labeling, and the food industry should be commended for already complying voluntarily with many of the provisions of this act. However, we must view the total spectrum of the food labeling situation and come to grips with the need for uniform standards. I urge the support of my colleagues for H.R. 2180.

BRING IT TO A VOTE

HON. ROBERT H. MOLLOHAN

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. MOLLOHAN. Mr. Speaker, in reiteration of my earlier position, I wish to go on record as being unalterably op-

posed to the tacit approval of the President's pay raise proposals by the refusal of this body to permit a vote on the issue.

I do not question the validity of the findings of the Peterson Commission. I do, most seriously, question the wisdom of increasing our own salaries at a time when this Nation is recovering very sluggishly from a severe economic recession and when the most severe winter on record has left many of our plants idle and our people unemployed.

Of utmost importance to all of us and the Nation is the restoration of public confidence in the integrity of the Congress and the Government. We can promote this confidence and serve the interests of democracy best by affording each and every Member of this body the opportunity to vote directly, openly, and on the record for or against a pay raise for the Members of Congress.

I urge, Mr. Speaker, that my colleagues demonstrate their sincerity on this issue. I urge, as well, that we, as a body, act to bring this matter out in the open and thus remove the impression of subterfuge that has been created.

OPPOSED TO PAY RAISE

HON. MATTHEW J. RINALDO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RINALDO. Mr. Speaker, in a few days, a salary increase is slated to go into effect for Members of Congress. I am opposed to this increase, and I am deeply disturbed that there will be no opportunity for the House to vote openly on the matter.

I have submitted testimony to the Subcommittee on Presidential Pay Recommendations expressing my opposition to the increase and urging the subcommittee to report this issue to the floor. Unfortunately, they have not heeded my recommendation.

I would like at this time to submit that testimony in the RECORD for the benefit of my colleagues.

The testimony follows:

TESTIMONY SUBMITTED BY REPRESENTATIVE MATTHEW J. RINALDO

Mr. Chairman, the Constitution (Article I, Section 6) provides that "Senators and Representatives shall receive a Compensation for their Services, to be ascertained by Law . . ." The Founding Fathers prescribed an equitable and fair procedure for the determination of congressional salaries.

In my judgment, however, they would wash their hands of the current skirmishing and dodging around the issue that has occurred in the House of Representatives. I don't believe they would endorse such an effort, which is designed to prevent an open floor vote on an issue that has enflamed citizens around the country.

If a majority feel the raise is necessary, are they unable to take that position publicly on the House floor? If they feel the public does not understand the job of being a representative, don't they have an obligation to bring a resolution of disapproval to the floor and explain in debate exactly why this raise is necessary?

I believe they do. I have introduced a package of legislation which is designed to accomplish three goals:

1. To make an open vote mandatory in any increase in congressional salaries.

2. To disapprove the proposed pay boost of almost 30%.

3. To provide that pay adjustments for members of Congress may take effect no earlier than the beginning of the Congress next following the Congress in which they are approved.

Our obligation to write the best laws we can extends to ourselves as much as it does to all other citizens. We should not try to circumvent public opinion by keeping silent on this issue; if we do, it will only come back to haunt us and further taint a reputation that has been badly tarnished by the Korean pay scandal and the Wayne Hays affair.

It is clear to me that respect for this body, and for Congress as a whole, will not be restored unless we are willing to do some deliberate soul-searching. How can we expect the American people to believe we are serious about reforming our ethical code when we are afraid to vote openly on our own salaries? We are faced with a ludicrous situation: at the same time the Commission on Administrative Review is handing down its recommendations on higher standards for members of Congress, we are using the old standards to give ourselves a hefty pay boost.

This is unconscionable. I strongly urge the members of this committee to act swiftly to bring this matter to the floor for an open, recorded vote.

This is the very least our constituents deserve.

SALARY SHELL GAME

HON. JEROME A. AMBRO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. AMBRO. Mr. Speaker, in a recent edition of a respected national publication there were two lengthy side-by-side stories with the following headlines: "House Leaders Pave Way for Big Pay Raise" and "Congress Rates Ninth in Poll on Ethics."

There was a subliminal message in the positioning of those two news stories and the newspaper's layout editor is to be congratulated for his perception and creativity.

The $13,000 pay increase that is about to go into effect without ever reaching the House floor for a vote certainly will do nothing to improve the rating of Congress in such polls. Those polls, in turn, explain why the public has reacted so negatively to this pay proposal.

The public does not have a very favorable opinion of the Congress, as an institution, and this parliamentary shell game with a pay raise will do nothing to enhance the image of the House of Representatives. The Senate at least had the character to vote on the recommendations.

I made a statement last week before the ad hoc committee that held 3 days of hearings on these proposals. I would like to take just a little time to repeat some of the points I made in that testimony and ask each of you to consider these remarks:

STATEMENT BY CONGRESSMAN JEROME A. AMBRO BEFORE THE AD HOC SUBCOMMITTEE ON PRESIDENTIAL PAY RECOMMENDATIONS

I will be the first to admit that the subject of Congressional salaries is one that inflames the passions and emotions of the public. Setting those salaries at a level that is both fair and commensurate with the demands of the office, at a level sufficient to attract the highest calibre of person to the job, is no simple task.

I do not claim to have any instant answers to that dilemma, but I nevertheless recognize that the present arrangement is unsatisfactory

One might say that the question of salaries should be taken completely out of the hands of legislative bodies and turned over to an impartial citizen's panel. We, in effect, have a procedure similar to that now, but it is within the jurisdiction of this legislative body, the Congress, to reject the recommendations of the President's Commission on Executive, Judicial and Congressional salaries. Failure to reject these recommendations has the same effect, however, as approving pay increases, at least in the public perception.

On the other hand, if the recommendation of an impartial citizen's panel has the force of law and is not subject to legislative review, then you are removing the accountability factor that is present when elected legislatures at all levels throughout the nation vote on salary increases. Who would answer the public outcry if that citizen's panel found that Congressmen and Senators should earn $100,000 annually?

Practically speaking, the most workable alternative and the one which I endorse is to have salary questions taken up by legislative bodies early in the election year, and if an increase is warranted, then that increase should take effect for the newly elected legislative body after the next election. In that way, no public official would ever be able to raise the pay for the position that he now holds but, both the public and potential candidates would be fully aware of the salary scale.

It is the only approach that both maintains accountability while diminishing to some degree the stigma of a self-serving public official increasing his own salary. The procedure would not totally eliminate controversy. There is none that will.

It would present both candidate and incumbent with a clear idea of the salary for the next term. It would put the salary up for grabs, so to speak, for the man the public deems best suited for the job by electing him.

In the absence of such a procedure, and with the present subterfuge in mind, then I think it is imperative that this salary recommendation which will almost certainly go into effect, be tightly and inexorably tied to a comprehensive Congressional Code of Ethics that incorporates many of the things some of us have insisted upon in the past.

This pay recommendation should be coincidental with a Code of Ethics that includes among other things:

Mandatory annual financial disclosure showing not only debts, assets, all sources of income and a bottom line net worth for both the Member of Congress and his spouse, but one that includes a listing of all real estate transactions and business connections as well.

A strict limit on outside earnings.

A prohibition on mixing campaign and personal funds.

I want to clarify my position on these reform proposals. I do not believe, as a matter of principle, that salary increases should be a condition for approval of such a Code of Ethics. I think such proposals should have been approved long before this and should have been acceptable to this Congress on their own merits. In the absence of that commitment to honesty and integrity in government, I believe such a Code should now be linked to this salary recommendation, since such a connection appears to be the most expeditious way for implementation of these long overdue ethical standards for the House.

I also don't want any misunderstanding about my view of the pay hike. The argu-

ments for the increases are persuasive. There has been no increase in Congressional salaries in almost eight years during which the cost of living rose by two-thirds and salaries in the private sector went up by 70%. Good men and women are leaving government service in droves. More than 50 Congressmen and Senators retired from the last Congress, most of them citing the increasing demands of the job and the financial hardships imposed by public office.

The current salary, established in 1969, meant something far different then than it does now. It would be hypocritical for any, but a few of our wealthier colleagues, to claim that the increase would not be welcomed. With no income other than my Congressional salary, and with two children in college and another about to enter, homes to support on Long Island and an apartment to maintain in Washington and with end-of-session business trips to Long Island coming out of my own pocket because my travel allowance has run out, the financial demands on me are considerable.

Nevertheless, we all earn about $44,000 annually as Congressmen, many times the national average. The proposed increase of $13,000 is more than millions of Americans will earn in a year. We all knew the salary when we ran for this office and we should be prepared to live within that income—the term and the salary represents, in effect, a contract with the people.

During a period of great financial difficulty for the majority of Americans, a period marked by calls for restraints and belt-tightening, it is patently wrong for this Congress to permit such a self-serving maneuver, designed to disguise a whopping 29% salary increase.

Mr. Speaker, I will not take any additional time recounting my statement. But I would caution those in this Chamber that the very persuasive arguments in support of the raises and an honest belief that they are justified do not constitute, by themselves, sound reasons for this Chamber to take the restrictive course of action that it has.

Since we apparently will have no opportunity to defeat these recommendations in a recorded vote, then I ask every Member of the House to insist that we act, and act soon, on a stiff Code of Ethics which includes the restrictions I referred to earlier.

Those editorial writers and "good government" groups who are supporting this pay package have done so in the belief that it will increase honesty and integrity in government. I think we should make a firm, legally-binding commitment toward that end by passing legislation that establishes ethical standards for the Congress. Enforcement of those standards will prevent the type of abuses by the very few that too often have sullied unjustly the image and reputations of every Member of this Chamber.

PRAYER FOR SPRING 1961 AND 1977

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. BRODHEAD. Mr. Speaker, one of my constituents, Mrs. Edith Linderman, has received considerable notice for her fine poetry. Included in her credits is a book of poems, "Once Upon A Teacher, which describes the feelings and experiences of thousands of teachers everywhere.

In 1961, Mrs. Linderman wrote a poem which eloquently expressed the hope and aspirations of our Nation on the occasion of President Kennedy's inauguration. I believe that this poem is equally applicable to the present, and I would like to share it with my colleagues:

PRAYER FOR SPRING, 1961 AND 1977

(By Edith Linderman)

Let more than roots of roses stir this vehement spring.
Let splendor moving up a quickening land
Be more than green unrolling of earth's carpeting.
From south to north let there be summoning
Of all earth's creatures to the sunlit days.
Above the beating rains on desolate mining towns,
On silent factories—let a man listening
Beside his winter doorway, hear a thundering
Isaiah clap of mortal voice again
Piercing the frozen crust of man's concern for man.
That he may lift his head, may thrust with bud and twig
His winter spirits upward to new flourishing.
Let more than roots of roses stir this vehement Spring!

ALL-VOLUNTEER FORCE—CURRENT STATUS AND PROSPECTS—IV

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. STEIGER. Mr. Speaker, a major question which has been raised about the All-Volunteer Force is whether or not we can afford to sustain the size military we need. Critics of the Volunteer Army have repeatedly pointed to the share of the defense budget taken up by military personnel costs.

Their criticism is unfounded, since the percentage of the military budget going to active military personnel has gone down from 31 to 27 percent from fiscal year 1972 to fiscal year 1977. Retiree pay has increased, but this is not attributable to the end of the draft.

A return to the draft, the defense transition report states clearly, would affect personnel costs very little—producing a reduction of only about $300 million. Even if we abandoned pay comparability, a congressional and Defense Department goal well before the advent of the Volunteer Army, we would save only $1.7 billion. Meanwhile, many junior enlisted men at the minimum wage would return to the poverty level conditions they had before we established comparability. Additional welfare and other public assistance costs would virtually negate any savings in the defense budget, not to mention the demoralizing and degrading notion of asking draftees to suffer financial hardship and discrimination because society as a whole would not bear the costs of defense.

I urge your careful attention to chapter 5 of the defense transition document, discussing sustainment issues:

CHAPTER 5—SUSTAINMENT ISSUES

RESERVES

A major AVF problem is the manning of the Reserves. Present strength problems and current trends are serious.

The Total Force policy emphasizes increased reliance on the Reserve Components to augment the active forces in a crises scenario. The Selected Reserve must provide units to augment active force units; the Individual Ready Reserve (IRR) will be the primary source of individuals trained for replacement and augmentation.

Table 14 presents the most recent Selected Reserve strengths. It is worth noting that almost all Reserve Components strengths are below the Congressional Floor. The bulk of the shortfalls occur in the Army Reserve and Army National Guard. These two components currently have a 44,000 shortfall; this is expected to exceed 108,000 by end FY 1978.

TABLE 14.—*Selected reserve strengths* [1]

(As of Oct. 1, 1976)

[In thousands]

	Actual strength	Congressional floor	Shortfall
ARNG	367	390	23
USAR	192	212	20
USNR	98	97	(1)
USMCR	29	33	4
ANG	91	93	2
USAFR	49	52	3
Total DOD	826	878	52

[1] May not add due to rounding.

The projected large reduction in IRR strengths over the next five years is also serious. The IRR is composed of service people who separate and have a remaining Reserve obligation. The total Active/Reserve obligation is 6 years. With the advent of the AVF, longer active duty enlistments have shortened the time remaining out of the 6-year obligation to serve in the IRR. Table 15 presents these declining strength trends.

TABLE 15.—*Enlisted Individual Ready Reserve (IRR) Strength, Actual for FY 1976 and Projections, FY 1977–82**

[In thousands]

IRR Strength:	
Fiscal year 1976	469
Fiscal year 1977	401
Fiscal year 1978	373
Fiscal year 1979	348
Fiscal year 1980	355
Fiscal year 1981	319
Fiscal year 1982	298

* Program Objective Memorandum estimates.

In light of the increasing importance of the IRR as a source of trained manpower in the Total Force policy, this decreasing trend in the IRR must be reversed. To solve these problems, more resources and DoD management attention will be required. With the support of ODASD(RA) the Army has included in their FY 1973 budget both man-

*Unpublished manuscript, Richard D. V. Cooper, *Defense Without the Draft*, RAND Corporation, 1976.

power and funding to place full-time recruiters and trainers in Selected Reserve units. The Reserve Compensation System Study Group is evaluating Reserve pay with a report due by December 1977. Also, the Army Chief of Staff has made the Reserves one of his highest priorities.

PAY COMPARABILITY AND BENEFITS

The Services have expressed concern that failure to achieve and maintain military pay comparability with the civilian sector will negatvely impact on recrutment and retention as well as lead to an increased potential for unionization. The Services believe that their ability to compete with the private sector for new enlistees will be impaired if pay levels for lower grade enlsted personnel do not keep pace with the civilian sector.

However, the RAND Corporation has developed age-adjusted pay comparisons between earnings for year-round, full-time, Caucasian high school graduates and earnings (RMC) for the first two years of military service. These comparisons indicate that the average military pay was 104% of civilian pay in 1972, 101% in 1973, 105% in 1975.* Thus, indications are that current pay available to potential enlistees is competitive for Cucasian high school graduates and would be even more attractive to non-high school graduates and minority group members. It is equally important for recruiting success that the youth market has a keen awareness that pay is comparable.

The Services have recently briefed the Secretary of Defense and the Armed Forces Policy Council on the "Erosion of Benefits" problem. Important benefit issues include changes to commissary subsidies, medical care, clothing allowance, leave sellback, GI bill, modification of Retired pay, and other benefits. Concern about such changes is clearly supported by survey data, and indicate greater concern among career as opposed to new enlistees and first-term enlisted personnel. Future pay and benefit decisions must be carefully considered for their negative impacts on active force morale, and on future retention.

COST OF THE AVF

From FY 1971 through FY 1974 the annual DoD budget cost of the AVF was expressed by Project Volunteer, a special budget category which included recruiting and advertising, administrating programs, special AVF initiatives, e.g. civilianization of KP, special pays and bonuses, and the annual budget cost of the large 1971 pay raise for junior enlisted personnel. The total annual Project Volunteer cost of approximately $3 billion was widely publicized as the cost of the AVF.

Since FY 1974 attention has been directed toward an alternative cost concept—the opportunity cost of the AVF. This opportunity cost is the annual budget savings which would occur if the DoD returned to the draft. When viewed in this light, the annual cost of the AVF was estimated in FY 1974 to be about $\$1\frac{1}{3}$ billion, considerably less than the $3 billion budget cost. This opportunity cost estimate assumed that pay comparability levels would be maintained even if the draft returned. This assumption is reasonable given that pay comparability was a DoD objective years before the draft was eliminated, and that anything less than comparability pay levels appears to be practically and politically infeasible. However, if pay comparability were abandoned in a return to the draft, and if the Federal minimum wage level for junior enlisted personnel were established, manpower costs could be reduced by $1.7 billion in FY 1977.

JUST "A CLOSER LOOK" WITH PHIL

HON. BILL ARCHER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. ARCHER. Mr. Speaker, the Dallas Morning News recently carried a column by William Murchison which discussed a new, but already highly regarded, daily radio program in Houston. The program, which features Phil Nicolaides as its host, is broadcast on KLYX–FM, but is soon expected to be syndicated nationwide.

It is highly unusual for a major daily newspaper in Dallas to devote such attention to a radio program in the largest city in Texas—Houston. Perhaps the quality of the program, and its host, is the impelling reason for such a column. I am sure my colleagues in the House of Representatives will find this item to be of interest to them:

JUST "A CLOSER LOOK" WITH PHIL

(By William Murchison)

Phil Nicolaides—who for some reason always reminds me of Daniel Moynihan; perhaps it is the puckish eyebrows—came to Texas in 1972 to run the near-successful gubernatorial campaign of Republican Hank Grover.

Liking the climate, both physical and political (Phil is an unregenerate conservative), he moved his public relations and advertising business from New York City to Dallas. Then, last winter, to my ineffable regret, he defected to Houston.

But the news from the Gulf Coast is heartening: Not content merely to mastermind the advertising and press relations of candidates like James Buckley, Jesse Helms, John Whittington, Pedro Aguirre, and Philip Gramm, Phil has taken up journalism as a sideline. He is a radio broadcaster. And breathes there, I wonder, a more lucid or invigorating one?

It is not just Phil's personality that is lucid and invigorating. So are his ideas, which are sculpted out of solid conservative marble. He is a fighter. And how eloquently he does fight!

That is, after all, the purpose of his new endeavor—to fight. The Nicolaides program, "A Closer Look," which appears daily on Houston's station KLYX–FM and is designed for syndication, was the idea of a profoundly conservative businessman, much alarmed at the lack of exposure in the media for conservative viewpoints.

The businessman, James E. Lyon, who is chairman and chief executive officer of the River Oaks Bank & Trust Co., argues that "The struggle to save the free market and the values on which this nation rests requires a long-term effort in the arena where this battle is being fought daily—in the media."

"All of us," says Lyon, "are only too familiar with the fact that liberal commentary (often masquerading as 'interpretative reporting') dominates the airwaves. Traditional American values are undermined or openly mocked. Concern for national defense is dismissed as 'cold war hysteria'." Businessmen are routinely portrayed as devoid of social conscience: Despoilers of the environment, indifferent to the real needs of the consumer and caring little for the health and safety of their employes."

What can business do? Plenty, it seems. Already it "spends billions of dollars to promote its products and services. Isn't it time we set aside a modest portion of our advertising budget to promote and defend the values and the system that have made our prosperity possible?"

Enter, at this point, Nicolaides, who for six or eight months has been causing the airwaves to sizzle. Elegantly sizzle, I mean. Phil, an erstwhile philosophy prof at Fordham University, has the audacity to talk of Zoroastrianism by way of refuting the white liberal notion that Americans invented white as a symbol for good and black as a symbol for evil; Phil would have us know that Ahura Mazdah, god of light and goodness, and Ahriman, god of darkness and evil, go back even farther than Americans for Democratic Action.

It will be gathered from such an insight that Phil's commentaries have to do with much more than economics; likewise he talks of bureaucracy, Africa, Red China, the media, abortion, Jimmy Carter and Henry Kissinger.

When last I was in Houston, I heard him take the hide off the bureaucrats who pronounced an all-boy chorus of fifth and sixth graders a mortal sin against Title IX. "All this daffiness," declared Phil, "stems from those who subscribe to a philosophical error—totalitarian egalitarianism. Not satisfied with the essential equality of all human beings in the sight of God, they demand accidental equality as well. Every member of the human race must be identical, indistinguishable, interchangeable—like so many Kleenex tissues."

This is strong talk, of course. How is it going over in Houston? Very well, one gathers. Hardly had Nicolaides made his debut as commentator before popular demand caused Lyon to increase the number of airings from one to two daily. Much of his stuff has been reprinted in the Congressional Record. Bill Buckley himself has praised the program as "fresh, tough, electric, engrossing."

"To my knowledge," says Lyon, "we have not lost a single customer because of the program. Even those who sometimes disagree tell us they enjoy listening to a substantive, issue-oriented conservative commentary."

That is the Nicolaides style all right—substantive, issue-oriented and, I might add, hugely entertaining. What a pity Houston is so far away.

CONFIDENTIAL FUNDS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RAHALL. Mr. Speaker, confidential funds or slush funds with which I am concerned have become of great interest in the recent past. For this reason I am cosponsoring legislation that will amend the Budget and Accounting Act of 1921. The legislation provides the Comptroller General with the power to audit confidential funds.

The use of confidential funds are not at present subject to GAO audit which is a most unhealthy practice. Such funds present a grave potential for abuse. They may conceivably be used by executive officials for illegal surveillance purposes or for entertainment not specifically authorized without fear of an audit by the GAO.

We must begin to improve the pub-

lic's confidence in government and I urge my fellow Congressmen to support this most important piece of legislation.

NUCLEAR POWER—VITAL TO AMERICA'S ENERGY INDEPENDENCE

HON. MORGAN F. MURPHY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. MURPHY of Illinois. Mr. Speaker, in the wake of the natural gas shortage, our country has been forced once again to reexamine its national energy policies.

Tragically, while Americans' consumption of energy continues to grow, domestic energy production continues to decline. America is more dependent on foreign nations for fuel than ever before.

In April 1974, the time when the Arab oil embargo ended, the United States imported 20 percent of its oil. In 1976, imports rose to 33 percent, and then jumped to 40 percent in December. In January 1977, the United States imported more than half of its oil, according to figures compiled by the American Petroleum Institute.

Our increasing dependence on foreign oil is alarming. Unfortunately, this winter's natural gas shortage has stimulated new demands for oil and electricity. Some factories using natural gas have turned to oil, and many homeowners burning gas have switched to electric heat. Consequently, oil imports are on the rise.

If the United States is to halt its ever-increasing dependence on OPEC countries and other foreign nations for fuel, it must further develop alternative sources of energy.

One of those sources is nuclear power. While controversy has swirled around the building of nuclear powerplants, many Americans sense the important role nuclear power can play in meeting our energy needs. Accordingly, in June 1976, Californians rejected by more than 2 to 1 a referendum that would have limited severely the construction or planning of future nuclear powerplants.

I would like to bring to the attention of all House Members an article which shows the importance of nuclear power as an energy source. The article tells how, at a time when coal-fired plants were experiencing problems caused by frozen coal and equipment, nuclear powerplants operated with little or no difficulty. In fact, the article states:

It can probably be said, with only slight exaggeration, that nuclear power bailed the country out of an emergency on the morning of January 17.

Mr. Speaker, I am inserting in the RECORD the article to which I have referred:

[From the Chicago Tribune, Jan. 31, 1977]

NUCLEAR POWER DID MUCH TO SAVE THE UNITED STATES IN FRIGID STATES

(By Frank Starr)

WASHINGTON.—On a cold morning two weeks ago Monday an event of major significance occurred: the whole eastern half of the nation had an electric power emergency.

That it didn't develop into a major blackout like the one in 1965 was partly a result of new procedures instituted after that earlier event to prevent such blackouts. Nonetheless some power companies had to go to their last-resort procedure—cutting off power to customers.

What was especially significant about it was that, whereas such crises had heretofore been summer phenomena, this one occurred in the dead of winter—partly because of record low temperatures. Combined with natural gas [or other fuel] shortages which already threaten, this new problem could mean serious economic and human damage in the future.

What happened was this. Utilities in a band of states from Indiana, Michigan, and Kentucky east to Virginia experienced a record winter demand of 56,200 megawatts that day. But in addition to the 11,000 megawatts of Midwest generating capacity already out on routine maintenance, another 9,000 megawatts was incapacitated because coal piles were frozen, coal was wet, or oil and coal barges were paralyzed in Ohio River ice.

Elsewhere, equipment was crippled by ice deposits, and high winds snapped ice-heavy transmission lines. Across the whole interregional network of power exchanges, the 60-cycle frequency began to sag—a sign the demand was not being met.

Phone calls began between regional power pools and to individual companies. All excess capacity was ordered onto the line in an effort to hold the frequency up. The next step was 5 per cent voltage reductions. Then came appeals to industrial consumers to cut back demand. And finally in Virginia, Georgia, and some parts of Florida, customers, including residential users, suddenly found their power going off for an hour or more at a time.

The New England and New York power pools were exporting electricity to the Midwest and the South. New York, for the first time ever in winter, reduced voltage by 5 per cent in order to be able to export. Even New Brunswick in Canada was putting on extra capacity.

An unusual thing had happened.

Previously the nationwide weekly output had always peaked in the summer. A record of 41.79 billion kilowatt hours set in the summer of 1973 had stood for almost three years until last summer, when it hit 43.8 billion.

But even on the week before that Monday, Jan. 17, the record had been broken once again—with a 45.5 billion total.

But here is the kicker. The East Central states were 90 per cent dependent on coal much of which was locked under mountains of ice or was wet when brought in. Dayton [Ohio] Power and Light, for example, was operating at 50 per cent of capacity.

But the areas that were bailing out the coal-fired generators were largely nuclear powered. In the New England pool, all seven of the nuclear plants were operating and providing 30 per cent of the output. Only one plant there is coal-fired; the rest use oil. Northeast Utilities in Hartford, Conn., is entirely nuclear.

According to the Edison Electric Institute, the utilities' trade association, Chicago's Commonwealth Edison, which is normally 40 per cent nuclear, had coal freezing problems. But with a 5 per cent voltage reduction it met its demand through an increase of nuclear output to 48 per cent. Six of its seven plants were on line with one out for routine maintenance.

The only nuclear-powered plant reported incapacitated by the cold weather was Virginia Electric Power Company's Surrey installation, which failed because ice from the James River clogged its water intakes.

In short, it probably can be said, with only slight exaggeration, that nuclear power bailed the country out of an emergency on the morning of Jan. 17.

The antinuclear lobby won't be pleased about that, but it did happen.

FINANCIAL ETHICS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAMILTON. Mr. Speaker, yesterday I introduced legislation, House Resolution 287, which would implement the recommendations of the House Commission on Administrative Review relating to financial ethics. These recommendations are the result of a number of months of study by the Commission's Task Force on Financial Accountability which I chair, and we believe they constitute a tough and realistic approach to the issue of congressional ethics.

The Commission has no illusions that it can recommend rules which will completely eliminate conflicts of interest, or that regulations can be devised which will assure that power will never be abused. Nor does it believe that public affection for Congress will rise to great heights simply as a result of ethics reform. However, the Commission does believe that to deal with the issue of congressional ethics the Congress itself must take action to minimize avoidable conflicts of interest and provide the public with the information it needs to monitor any potential conflicts.

The Speaker of the House and the Democratic Caucus have directed the Commission to make recommendations to the House concerning ethical practices and financial accountability. The Commission has responded to this mandate by focusing its attention on: First, financial disclosure; second, outside earned income; third, acceptance of gifts; fourth, unofficial office accounts; fifth, certain aspects of the franking privilege; and sixth, travel. Several days of hearings were held on these subjects and the Commission received testimony from Members and officers of the House, State government officials, and public witnesses. The Commission has also conducted surveys of public and congressional attitudes toward many of these issues. The results of these surveys indicate significant support for the Commission's recommendations.

Our job does not end with these recommendations, however. Within the next few months, my task force and other task forces of the Commission will make recommendations to: First, assure that official allowances are appropriate and that expenditures from such allowances are fully disclosed and accounted for; second, improve the administrative practices of the House; and third, deal with the use of time, sources of information, and personnel systems.

Mr. Speaker, it would be too costly to print the full text of the resolution in the RECORD. However, the Commission's report on these recommendations includes not only the full text of House Resolution 287 but also a full discussion of all the issues involved in the resolution. A copy of the Commission's report has been sent to each Member and is available upon re-

quest to anyone else. A summary of each title of the resolution follows:

SECTION-BY-SECTION SUMMARY

TITLE I: FINANCIAL DISCLOSURE

Section 101—Amends House Rule XLIV.

This section amends Rule XLIV, effective July 1, 1977, as follows:

Part A: Procedural rules and definitions

Financial disclosure statements must be filed with the Clerk of the House by April 30 of each year beginning in 1978. The Clerk is directed to transmit a copy of each report to the Committee on Standards of Official Conduct on the same day the report is filed with him, and that Committee must make the reports available for public inspection. A copy of reports filed by Members must also be sent by the Clerk to the secretary of state or equivalent state officer in the state represented by the Member. In addition, the Clerk must compile all Members' disclosure statements as a House document by June 1 of each year.

Part B: Contents of reports

Members, officers, their principal assistants, and professional committee staff must file a financial disclosure statement containing the following information:

(1) *Income*—(including honoraria) sources and amounts aggregating over $100 from any individual source.

(2) *Gifts*—source and value of "gifts" of transportation, lodging, food, or entertainment aggregating $250 or more from one source. Source and value of all other gifts aggregating $100 or more from one source. Exempted from disclosure requirements are:

a. gifts from a relative

b. gifts valued at less than $35

c. gifts of personal hospitality of an individual

(3) *Reimbursements*—Aggregating $250 or more from any individual source.

(4) *Holdings*—The identity and category of value* of any property held, directly or indirectly, in a trade or business or for investment purposes or the production of income and which has a fair market value of at least $1,000 as of the close of the preceding calendar year.

(5) *Debts*—The identity and category of value* of each liability owed, directly or indirectly which is in excess of $2,500 as of the close of the preceding calendar year, excluding mortgages on personal residences.

(6) *Securities Transactions*—The identity, category of value*, and date of any transaction, directly or indirectly, in securities or commodities futures during the preceding calendar year which exceeds $1,000, except for transactions donating such securities to charitable or tax-exempt organizations.

(7) *Real Estate*—The identity and category of value* of any purchase or sale, directly or indirectly, of real property, or of any interest therein, during the preceding calendar year and which exceeds $1,000 in value as of the date of such purchase or sale, excluding personal residences.

The disclosure statements must also include the same information respecting the spouse of the person reporting if such items are under the constructive control of that person. As defined and interpreted by the Committee on Standards of Official Conduct, the financial interests of a spouse are regarded as constructively controlled by the person reporting "if enhancement of those interests would substantially benefit the person reporting."

The first disclosure statement to be filed on April 30, 1978 will be effective for the period from October 1, through December 1, 1977. Securities transactions and capital gains are exempted from the first filing.

This section also provides that any Member who announces in advance of the first filing date that he will not be a candidate for re-election may file a disclosure statement in accordance with the existing disclosure rule, rather than comply with the new disclosure requirements.

TITLE II—CODE OF OFFICIAL CONDUCT AMENDMENTS

Section 201—Amends Clauses 4 and 7 of House Rule XLIII.

This section amends Clause 4 of Rule XLIII by providing that a Member, officer, or employee of the House shall not accept gifts aggregating $100 or more in any calendar year from any person having a direct interest in legislation before the Congress or who is a foreign national. This provision specifies that parties with a direct interest in legislation include any person registered under the Federal Regulation of Lobbying Act of 1946 (or any successor statute), his officer, or director, or any person retained by him for the purpose of influencing legislation. Exempted from this prohibition are gifts of personal hospitality of an individual, gifts from a relative, and gifts of less than $35 in value.

This section also amends Clause 7 of Rule XLIII by striking present language which permits the use of proceeds from fund-raising events for other than campaign purposes if the donors are so advised in advance. This provision thus prohibits the conversion of proceeds from testimonial dinners or other fund-raising events to personal use under any circumstances.

TITLE III—UNOFFICIAL OFFICE ACCOUNTS; OFFICIAL EXPENSE ALLOWANCES

Section 301—Establishes a new House Rule XLV—Prohibition of Unofficial Office Accounts.

This section prohibits any Member from maintaining an "unofficial office account," which is defined as any account maintained to defray otherwise unreimbursed expenses allowable under the IRS Code as ordinary and necessary expenses in the operation of a congressional office, including any newsletter fund. No funds may be paid into any unofficial account after the adoption of this rule, and such accounts must be abolished by the effective date of the increase in the allowance for "official expenses" as provided in the next section.

Section 302—Change in Allowance for Official Expenses.

This section makes two changes in Members' allowances: 1) effective upon enactment, the allowance for "official expenses outside the District of Columbia" is changed to an allowance for "official expenses" incurred anywhere in the United States, thereby ending the artificial distinction between costs incurred in the Member's home district (or other parts of the country) and those incurred in the Capital; 2) effective January 1, 1978, the annual allowance for "official expenses" is increased by $5,000. The need for this increase is demonstrated by the widespread use of unofficial office accounts and political funds to supplement existing allowances for district office operations, travel within the district, newsletters, and other official expenses.

Section 303—Amends Clause 6 of House Rule XLIII.

This section amends Clause 6 of Rule XLIII by striking out "Unless specifically provided by law," thus prohibiting the conversion of campaign funds to personal use.

TITLE IV—LIMITATIONS ON THE USE OF THE FRANK

Section 401—Establishes a new House Rule XLVI—Use of the Frank.

This section imposes the following limitations with respect to postal patron mailings: 1) postal patron mailings must be sent at the most economical rate available, (sending such mailings under 3rd class rates would save an estimated $9.5 million in annual postage costs); 2) beginning January 1, 1978, the total number of postal patron mailings in any calendar year may not exceed the equivalent of six district-wide mailings, (except for mailings which relate solely to a notice of appearance or scheduled itinerary of a Member); 3) a sample or description of any postal patron mailing must be submitted to the Commission on Congressional Mailing Standards for an advisory opinion prior to mailing. This provision would not constitute prior restraint, but rather is designed to protect the Member against unwarranted charges of abuse of the frank and to protect the public against such potential abuses.

This section also provides for the following restrictions on mass mailings: 1) mass mailings shall not be frankable unless the cost of preparing and printing the mailing is paid exclusively from public funds, thereby ending the situation in which a small amount of private funds can level enormous amounts of public funds to pay for postage; 2) any Member who is a candidate for statewide public office may not send any mass mailing under the frank outside his congressional district; 3) a Member may not send a mass mailing under the frank less than 60 days prior to a primary or general election in which he is a candidate.

TITLE V—FOREIGN TRAVEL

Section 501—Amends Clause 2(n) of House Rule XI.

This section amends Clause 2(n) of Rule XI relating to committee travel by providing that if a Member or committee employee is reimbursed for any expenses by other sources, then his per diem allowance may not exceed the amount of the unreimbursed expenses (other than for transportation), up to the maximum per diem rate. In addition, a committee member or employee may not be reimbursed for the cost of transportation outside the United States unless the Member or employee has actually paid for the transportation.

This section specifies that these restrictions concerning foreign travel authorized by committees also apply to travel outside the United States authorized by the Speaker or under any other provision of House Rules.

Sections 502, 503—Amend Clause 5 of House Rule XI and Clause 8 of House Rule I. These two sections prohibit the use of committee funds or the contingent fund to pay for the travel of lame-duck Members. For purposes of this prohibition, a retiring Member becomes a lame-duck after the general election or once the House has adjourned sine die, whichever comes first. A member who is defeated in the general election becomes a lame-duck following that election.

TITLE VI—OUTSIDE EARNED INCOME

Section 601—Establishes a new House Rule XLVII—Limitations on Outside Earned Income.

This section provides that no Member may have outside earned income in excess of 15% of his annual salary as a U.S. Representative, and no Member may accept any honorarium in excess of $750 in value. The effective date for this limitation is January 1, 1979.

Outside income is defined as wages, salaries, professional fees, honoraria, and other amounts received, or to be received, as compensation for personal services actually rendered. Excluded from these limitations are: (1) the salary of the Member as a U.S. Representative; (2) income for services rendered prior to the effective date of the rule, or before becoming a Member; (3) tax-qualified pensions and annuities; and (4) income from a family trade or business, as long as the personal services rendered by the Mem-

*Categories of value; less than $5,000; between $5,000 and $15,000; between $15,000 and $50,000; between $50,000 and $100,000; over $100,000.

ber in such family trade or business do not, in and of themselves, generate any significant income.

TITLE VII—SELECT COMMITTEE ON ETHICS

Section 701—Establishes a Select Committee on Ethics.

This section establishes a Select Committee on Ethics to be composed of thirteen Members appointed by the Speaker. This committee will consider and report legislation which will incorporate into permanent law the recommendations of the Commission on Administrative Reivew which are adopted by House Rule, as well as other items, including the Commission's recommendations which cannot be adopted by House Rule. These recommendations are: (1) imposing a sanction of up to one year in prison and/or a fine of $10,000 for knowing and willful falsification of a financial disclosure statement; (2) applying the same financial disclosure requirements to candidates to Congress as are mandated for incumbent Members of Congress.

The Select Committee is also directed to adopt interpretive regulations respecting the application of Rule XLIII (Code of Official Conduct), Rule XLIV (Financial disclosure), Rule XLVI (Use of the Frank), and Rule XLVII (Outside earned income).

OPPOSITION TO PAY RAISE

HON. TENNYSON GUYER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. GUYER. Mr. Speaker, once again the cries and feelings of outrage by our people have fallen upon deaf ears. One need not read the mail, talk on the phone, scan the newspapers, or listen to the commentaries on radio or television to get the message that the American people do not approve of, nor are they sympathetic to, a raise in the salaries of Members of Congress, judges, or high-level Federal officials at a time when men and women are out of work, families are cold, and in many cases hungry, and the country generally paralyzed with the Arctic weather and energy shortage that has caused havoc, catastrophe, and heartbreak in hundreds of areas.

Ten years ago, a Quadrennial Commission was established by Congress, composed of nine members. Three were appointed by the President, two by the President of the Senate, two by the Speaker of the House of Representatives and two by the Chief Justice of the Supreme Court. The Commission was to meet each 4 years and make recommendations for salary levels of Members of the Congress, the Vice President, Justices of the Supreme Court, Speaker of the House of Representatives, President pro tempore of the Senate, judges, Cabinet members and more than 20,000 other Federal career executives.

The idea was to create an impartial body to make equitable studies and recommendations, and report to the President. He, in turn, was empowered to make his own recommendation, or revisions, and report them to the Congress. In theory, it was lovely. In practice, it was a sham. It became a quiet way by which Members could avoid having to record a vote of "yes" or "no" for all to see. The gimmick was, that if neither the House nor Senate disapproved withing 30 days, the salary recommendations automatically became effective on that date.

The public seldom separates one Congressman from another, so they put us all in one bag and say: "Just as we thought. They did it again. They got themselves a whopping raise, and never took a vote or held a debate."

Some of us who happen to believe that Congress should set a national example in economy, feel that the best place to start is right here at the Capitol, and the best vehicle to prove our sincerity is in the matter of our own salaries. I have voted against all salary increases in the 4 years I have been here, and I wanted the opportunity to once more register my disapproval.

We returned from the Lincoln Day recess with the belief we would surely have the matter on the floor for an open vote.

Myself, along with Congressman CHARLES WHALEN, and 80 other cosponsors, introduced a measure on January 6 called the Congressional Pay Raise Deferral Act.

The Committee on Post Office and Civil Service, instead of hearing testimony on this bill and others, appointed an ad hoc committee which did go through the motions of allowing testimony and witnesses to appear. However, they knew, and we knew, our bill would never reach the floor for a vote.

Our bill, incidentally, simply provides that no pay raise could be authorized by Members of Congress in the term in which they were serving. It could only be applied to the following term of office, and then, only by passing through the normal procedures of committee hearings and final vote by the members.

A poll taken by CBS showed that more than 300 Members of the House favored the right to vote on the pay raise issue, in whatever form. By a series of parliamentary procedures, no opportunity was ever presented for such a vote to be taken.

Our minority leader, JOHN RHODES, asked for unanimous consent to have his resolution (H. Res. 115) considered. His resolution would have disapproved the pay raise recommendation. It takes only one member to object, and, of course, one did.

As a last effort, on February 17, we tried for, and received a record vote on adjournment. The idea being, if we could vote against adjournment, we still held a slim thread of hope of getting action on either Friday or Saturday before the deadline for the pay raise to take effect. Adjournment was defeated by a vote of 109 yea and 224 nay so we were still alive.

However, with a quiet ploy, a voice vote for adjournment was taken—rapidly gaveled, and we were adjourned.

I want to go on record as being opposed to the pay raise, opposed to the manner in which it was achieved, and I want the people of our district to know it was not accomplished by our consent, or our approval.

The actual raise itself is about the amount of the average American family's annual income. With millions of our people on social security, veterans' pensions, small fixed incomes and others disabled, handicapped, up in years, and unsure of their future, I feel we have permitted a great disservice to our people, and one that will come back to haunt us.

I do not dispute the right to review all salaries, and the authority to make changes when conditions justify, but I am equally sure that our people demand "business in the open," and an opportunity for everyone to hear, read, and to know the merits of our actions.

With inflation rampant, goods and services either costly or scarce, and people looking to us for some of the answers, I believe we should if anything, take a good look at reducing, not raising salaries. If we want elimination of extravagant programs, wasteful bureaus, and unnecessary expenditures, and hopefully a balanced budget and nondeficit spending, we should look in the mirror and say "Let it begin with me."

AGRICULTURAL RESEARCH CAN MAKE THE DIFFERENCE

HON. KEITH G. SEBELIUS

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SEBELIUS. Mr. Speaker, despite the best efforts of farmers across this country, 8 or 9 percent of our crops each year are lost to weeds at an estimated value of some $2.5 billion. What can be done about it?

One of our colleagues, WILLIAM C. WAMPLER, of Virginia, ranking Republican member of the House Committee on Agriculture, discusses this in a recent speech to a meeting of the Weed Science Society of America in St. Louis, Mo., on February 8. I commend his speech to your attention. The text of it follows:

SPEECH OF REPRESENTATIVE WILLIAM C. WAMPLER

Thank you, Chester Foy. I am grateful for that warm reception, which is most welcome in this chilly weather. I am pleased to be here . . . with men and women whose interests and concerns I share. I particularly appreciate the support of the WSSA for the National Agricultural Research Policy Act which I introduced last year and reintroduced this year. This time, I am convinced it will be enacted . . . but more about that in a moment.

When Mr. Foy asked me to report on what is happening in Washington and on the outlook for agricultural research, I thought it would be appropriate as part of this report to also bring you the latest on President Carter's brother, Billy, who has made a special hit in the nation's capital.

The other night, I understand the President and Billy were returning to the White House late and their car passed a huge brewery with all its lights on, smoke pouring from its stacks and hundreds of workers streaming in and out. The President pointed to all of this activity and said, "Look at that, Billy. Doesn't that prove something to you? You aren't ever gonna be able to drink up all the beer they can make." Billy thought a moment and said, "Maybe not. But at least I got 'em working two shifts!"

At times, I am sure many of you feel the Federal government is working two shifts, when you come face to face with what I consider government over-regulation . . . whether it be OSHA controls over where outdoor toilet facilities must be located for field workers or EPA regulations banning pesticides or herbicides on farms.

At the present time, Americans spend less of their total income on food than the citizens of any other nation—approximately 17 percent. If EPA is successful in banning the use of pesticides and herbicides and similar weed killers, the U.S. Department of Agriculture estimates the total combined output in this country of crops, livestock and forests would be reduced by at least 25 percent. One result: the price of farm products would rise at least 50 percent and the percentage of income Americans would spend for food would go up to 25 percent or more.

Although we are all concerned about the environment in which we live, I frankly get more than a little perturbed with nonfarmers who have never walked the fields or milked a cow or cut a stalk of sileage trying to tell men and women who depend upon the land for their livelihood how to run their business. I get more than a little dismayed with the dilettantes whose all too casual concern about nature somehow sets them up as instant and respected authorities on how our land and water and air should be used.

Of all the people in this country, farmers are the closest to nature. They have learned to respect the land on which they live and work and the air and water which they need for survival. Sure, they seek better management techniques, better technology and better ways to produce foods, fibers and forest products—for their success depends upon it. But they are nature's true friends and the environment's real defenders.

To me, it seems like the federal bureaucracy is working overtime to solve problems which it too often helped create in the first place . . . problems which either didn't really exist before or which didn't require the overkill used to solve them.

However, there is one problem which is real and which the Congress and the Administration must face up to this year—the need to revise or extend this nation's basic farm laws. This is a problem which will affect not just farmers or ranchers but all Americans whose economic well-being is directly tied into the kind of laws which will replace the Agricultural and Consumer Protection Act of 1973 which expires later this year.

1973 . . . that seems a long time ago, doesn't it? Four years . . . Vietnam . . . Watergate . . . Bicentennial . . . Jerry Ford . . . and now a new President and a new Administration.

And four years is a long time ago, too, for basic farm and food laws.

Let me illustrate this point with some arithmetic from a Congressional point of view.

Four years ago, Bob Bergland was a sophomore Minnesota Congressman serving with me on the Agriculture Committee.

Today, he has a new job, as you know. Incidentally, I understand his father, now in his 80s, told him he should have kept his old job in Congress. Maybe he was right—for the Secretary of Agriculture's job is a thankless one in any administration.

Since the enactment of the '73 Act, some 161 new House Members and 29 new Senators have arrived in Washington. In fact over half the House—229 Members—has been elected since 1972 and nearly two-thirds since 1970. In the Senate, 42 members are in their first term.

In the House there now is:

A new Speaker—"Tip" O'Neill;

A new Minority Leader—John Rhodes;

A new Majority Leader—Jim Wright.

In the Senate, there now is:

A new Majority Leader—Senator Byrd;

A new Minority Leader—Senator Baker.

In the House Agriculture Committee, we now have:

A new Chairman—Tom Foley;

A change in nine out of the 10 Subcommittee Chairmen;

A staff of 55—compared to 20 four years ago.

In fact, only 16 out of the 46 Members on this year's Agriculture Committee were in the House in 1973.

On top of that, we have a new Congressional Budget Office and new Budget Committees in both the House and the Senate, all of which now have a total staff in excess of 350 people.

For those who care about the scope and direction of these important laws, the arithmetic I have recited should be studied because there really is a "new ballgame" in Washington these days.

There are a lot of new players in the White House, in USDA, and in Congress.

But the teams are basically the same as in the past. One set of players wants more government and is willing to spend your money—not their own—to get it. The other, which is much smaller in number, seeks to maximize your decision-making while minimizing the imposition of Washington-based wisdom on the country.

It is my sincere hope that the Carter Administration people won't try to turn the clock back on that basic 1973 farm legislation. I hope they will remember what the present laws have achieved for American agriculture and for this country . . . for it is from this record of achievement that the Carter farm policy must proceed if agriculture is to continue to prosper and grow and it is against this record that the new Administration will be judged four years from now.

The Agriculture and Consumer Protection Act of 1973 moved us away from 40 years of Federal controls and toward a market-oriented system which offered farmers maximum incentives to produce food and fiber.

The results were dramatic: millions of acres of previously idle land were freed up for production, crops hit record levels, rural incomes reached new highs and exports leapfrogged each of the past seven years to set successively higher records.

Since President Carter's party will control both the executive and legislative branches for at least two years, I am hopeful that, before taking precipitous action, they will first take a good look at the agricultural legacy of the past eight years . . . and that it will be used as a base on which to expand and build. Personally, I believe the Congress should seriously consider a four-year extension of present programs.

In the meantime, however, it may well be necessary—until the new people of Peanut Paradise on the Potomac settle into their jobs—for Congress to enact a simple one-year extension of all the expiring parts of the 1973 legislation: Food Stamps, Farm commodity programs, Food for Peace—the P.L. 480 program—and FIFRA.

If nothing else, let's take to heart the advice of the new Director of the Office of Management and Budget when he recently said:

"If it ain't broke, don't fix it!"

The present farm programs aren't broke. They aren't even badly bent. They work. And they should be continued.

There is one area of agricultural activity, however, which needs fixing. I am referring to the urgent need to increase agricultural research into ways to produce cheaper and better food and fiber and forest products. I am referring to the long overdue need to provide better direction, better coordination and better organization to the far-flung agricultural research activities of the Federal government.

For instance, are you aware that there are six different research agencies in the U.S. Department of Agriculture alone, with responsibilities for their activities for their activities split between two Assistant Secretaries of Agriculture? Are you aware that there are 52 different agricultural experimental stations in this country spread out over 50 states, each doing its own thing? Are you aware that the Department of Health, Education and Welfare, the National Science Foundation, the National Institutes of Health, the Environmental Protection Agency and the Energy Research and Development Administration all carry on agricultural-related research of some kind or another?

Lack of effective coordination among these widely-spread efforts hampers our ability to focus on the really high priority research needs of this country—in particular, on developing ways to produce and distribute food, fiber and forest products more efficiently and more effectively—on probing ways and means to better control weeds.

That's why I introduced with bipartisan backing on the opening day of the 95th Congress, the National Agricultural Research Policy Act of 1977—or H.R. 78, as it is designated. This is the same bill which I introduced last year and which passed the House of Representatives by a vote of 373 to 7. So far, more than 30 Members of the House Agriculture Committee have joined as co-sponsors on this bill, including Committee Chairman Foley and Secretary Bergland, when he was still a House Member. Among other things, this bill would:

Substantially increase expenditures for agricultural research, particularly for state agricultural research stations and land grant colleges to carry out graduate study in the food and agricultural sciences.

Establish the post of Assistant Secretary of Agriculture for Research, Education and Extension to coordinate all Federal agricultural-related research.

Create a broad-based 23-member national research policy advisory board to develop and recommend new policies, goals and strategies to the Secretary of Agriculture.

Establish a program of competitive Federal grants to stimulate research into ways to increase agricultural production and improve food nutrition.

With bipartisan backing in the Congress and expected support by the Carter Administration, I feel certain that H.R. 78, perhaps slightly modified, will be enacted early in the first session of this new Congress. This will be a major step forward in restoring agricultural research to its proper role in the Federal Government.

If there's a need to expand agricultural research generally—and there is—there is a particular need for it in the case of weeds. For one thing, we need to develop a better understanding of the effects of pesticides and herbicides and other weed killers on the environment. Although we know these products destroy weeds, we know all too little about their actual impact on human health, plant and animal growth, soils, water and the total environment. So let's find out before we go off half cocked in one direction or another.

We need to determine which herbicides and combination treatments are most effective in reducing tillage to a minimum or even to zero in crop production.

We need to develop the best possible disposal practices for unused pesticides and herbicides and their wastes which could otherwise constitute a threat to the environment.

Having raised these points, however, let me make it plain that I am well aware that we must not only protect the environment against potential hazards of weed control, but we must protect as well this nation's capacity to produce food and fiber from the hazards of weeds themselves. We must, in short, achieve a balance.

The way it is today, despite our best efforts, we still lose eight to nine percent of our crops to weeds each year . . . at a value of more than $2.5 billion. That's far too high.

Nearly a century and a half ago, Alexis de Tocqueville, the famous Frenchman who traveled widely and reported extensively on America, had this to say about agriculture.

"Agriculture," he said, "is perhaps, of all the useful arts, that which improves most slowly among democratic nations."

Although agriculture has come a long way

from de Tocqueville's time, his words still carry the ring of truth. Agriculture does improve more slowly than we'd like. But we can do something about it.

Since the WSSA has supported expanded research in the past, I look to you and your organization for support in the enactment of H.R. 78, the National Agricultural Research Policy Act of 1977.

With your continued support, we'll make research the key to unlocking the best in American agriculture—de Tocqueville not withstanding.

Thank you.

THE NEW SECRETARY OF LABOR, F. RAY MARSHALL

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAWKINS. Mr. Speaker, the article which appears below from Encore magazine, presents a refreshing characterization of Secretary of Labor, F. Ray Marshall. Mr. Marshall is a dedicated public servant, concerned and compassionate to the Nation's unemployment problems, especially as it impacts disadvantaged groups in the country. Mr. Marshall's past record involving research and study of employment and racial discrimination is indeed admirable. I wish to commend him for his past service in this area of equal employment and submit the article, as follows:

[From Encore American & Worldwide News, Jan. 17, 1977]

F. RAY MARSHALL: RUNNING ON THE RIGHT TRACK

(By Gene Berg)

With Black unemployment currently—and traditionally—running twice as high as that of Whites (15–16 percent) and unemployment among Black youths running 45–50 percent, Blacks will be looking to the Carter administration for a top priority: jobs.

Whatever directions Carter takes to stimulate the economy and reduce unemployment, as he pledged in the campaign, he may be influenced by a man who is still relatively unknown to the nation. That man is F. Ray Marshall, the Secretary of Labor-designate.

Marshall is a University of Texas professor who, according to colleagues, has an abiding interest in improving the lot of the disadvantaged—male and female, Black and White—especially those from rural areas. His principal academic interest over the years has involved expansion of employment opportunities for women and members of minority groups, and he has written an impressive number of books and articles on the subject. He has been instrumental in encouraging Blacks to enter apprenticeship programs for skilled trades and in persuading unions to take Blacks into such programs. Most recently he has developed programs to train women for professional positions.

Ernest G. Green, executive director of Recruitment and Training Program (RTP) calls Marshall "an excellent choice" for Secretary of Labor. Green says Marshall is "someone we've had a working relationship with for the past six years." RTP is a national nonprofit human resource development corporation primarily concerned with recruitment, preparation, and placement of minorities, women, and other disadvantaged groups into skilled apprenticeship positions in the construction industry and the private industrial sector.

Says Green of Marshall: "I feel he'll be a strong advocate of affirmative action and anti-discrimination, of training that leads somewhere, for the jobs that exist and will exist in the future. He has a concern about employment being the key rather than tax cuts. He has done a significant amount of research on the causes of unemployment and the various remedies. He's an academician who does sensible research, applicable to today's problems."

AFL-CIO head George Meany, who had supported someone else for Secretary of Labor, also applauded the choice of Marshall. He described him as "a labor economist whose views are liberal, informed, and sensible." Meany once introduced Marshall to Aleksandr I. Solzhenitsyn, the dissident Soviet author, as "one of the few American professors who understands the working people."

Marshall's roots are southern, rural, and poor.

F. (for Freddie) Ray Marshall was born in Oak Grove, La., on Aug. 22, 1928, and shortly thereafter his family moved to Mississippi. His mother died when he was a small child, and he was raised in a Mississippi Baptist orphanage. He used to get up at 3 a.m. to milk the cows and do other chores.

At 15 he ran away from the orphanage, leaving junior high school to work in a dental laboratory in Jackson, Mississippi. After a few months he lied about his age and enlisted in the wartime Navy. He served as a radioman in the Pacific during World War II.

After the war, Marshall married Patricia Williams and decided to finish his education. Although he never completed junior high or attended high school, he was accepted by Hinds Junior College in Raymond, Miss., studying there under the G.I. Bill. Then he transferred to Millsaps College in Jackson, where he received a B.A. degree. He was an outstanding student and from that point on never left the academic life.

He received a master's degree from Louisiana State University in 1950 and a doctorate in economics at the University of California at Berkeley in 1954. He was assisted by a grant from a Rockefeller Foundation program designed to develop college teachers from the rural South, and that reportedly led him to return to the South to teach rather than teach at prestigious universities in the North. Marshall taught at the University of Mississippi and Louisiana University, and at 34 became a full professor at the University of Texas in 1962.

During these years—the late 1950s and early 1960s—Marshall was "an outspoken champion of desegregation when that was not a popular position to take in southern universities," according to one associate.

In 1967 Marshall went to the University of Kentucky to serve as chairman of the economics department, but two years later he returned to the University of Texas, lured back, according to a senior professor, by "an enormously attractive salary." The Marshalls by then had five children, who today range in age from 14 to 19.

At Texas, Marshall served briefly as department chairman, but reportedly did not like the position, especially the social demands that went with it. "He likes to work a lot more than he likes to party," one colleague has said.

Marshall usually puts in a 20-hour day and has been described as "extremely productive" as an academic. In addition to teaching a graduate seminar in labor economic, he is director of the Center for manpower research center at the university. Study of Human Resources, a full-scale manpower research center at the university. He has 94 published books and papers to his credit, the titles of which reflect his specific areas, of concern: *Blacks in Apprenticeship, Employment Discrimination in the South, The Economics of Racial Discrimination, Rural Poverty in the South, The Role of Unions in the American Economy.*

Since 1974 Marshall has been chairman of the Federal Apprentice Commission, which advises the Secretary of Labor on training matters. He is president-elect of the Industrial Relations Research Association, a professional association of labor economists and other manpower specialists. He is also president of the National Rural Center, which sponsors research into the economic needs of rural areas.

"He leads an extremely busy life," said a friend, "but just to talk to him you'd never know it. He never seems harried and rarely loses his temper."

Neither his wife nor his friends could tell interviewers of any hobby or sport that Marshall likes, but he does enjoy spending his weekends at the family's 50-acre farm in Leander, 26 miles northwest of the Austin campus. He describes it as "a real small farm by Texas standards."

Marshall reportedly was initially reluctant to leave the campus and Texas, but then became more and more excited about the possibilities and opportunities of office. "He said he planned to come into Washington with his feet running," said an associate.

Marshall says he has one simple objective: "to put our people back to work" by encouraging jobs in the private sector. But he adds, "Once we've done all we can [in the private sector] I favor public employment as a way to put people back to work."

Ernest Green predicts that Marshall will "really leave his mark on the Labor Department."

FOOD AND POPULATION: II

HON. FREDERICK W. RICHMOND

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RICHMOND. Mr. Speaker, this is the second in a series on population and food statements that I will be making to the House of Representatives.

Recently, a subcommittee of the House Appropriations Committee approved $190 million in emergency economic assistance to Egypt following the worst civil disorders there in the past 25 years. These funds are needed, we are told, to strengthen the government of President Anwar Sadat and as an indication of U.S. support.

The thousands of words that have been written on this matter in the past few weeks have all indicated that Egypt's central problem is an economic one. Most analysts have suggested that the problems can be solved, at least temporarily, by substantial foreign borrowing, anticipating up to a total of $12 billion between now and 1980.

However, none of the suggestions advanced by international economists, government leaders, private businessmen, or editorial writers have dealt with the real crisis in Egypt—overpopulation and the degradation of her agricultural land.

According to the U.N. Food and Agricultural Organization, Egypt has about two-tenths of 1 acre of arable land to support each of its citizens. This represents one quarter of the world average and is less than the arable land per cap-

ita average for the overwhelming majority of the nations of the world. It is obvious that Egypt's population cannot be supported on two-tenths of an acre per person. Thus the need for net imports of 2.9 million metric tons of cereal grains—1974.

Thirty years ago, with a population of approximately 20 million people, Egypt imported only half a million metric tons of grain. Her rice, cotton, and onion exports—her major agricultural products—amounted to $582 million.

But today, her cereal grain net imports have increased fivefold to almost 3 million metric tons annually and her exports of agricultural products have grown to $743 million annually. But this increase has not been nearly enough to pay for the food and fuel needed to support an additional 20 million people.

If the present rate of population growth continues, Egypt's 39 million people will have become 78 million in about 30 years. Instead of having 0.2 of an acre of arable land to support each of its citizens, it will have 0.1 of an acre—if desertification and salination do not further reduce the small amount of land they now have.

Thirty years ago, Egypt could not support its population on four times that amount of land. How can it do so with one-quarter that amount of land in the future? They will have to import, at a minimum, twice as much food as they do today. With a growing world population and with no prospect of a dramatic increase in the world's food reserves, food prices can be expected to rise dramatically—exactly the problem that caused the Egyptian food riots and economic problems currently in the news.

Mr. Speaker, we must ask now, where will all this food come from? Perhaps we will be willing to keep assisting them, but the bill will get stiffer each year and the problem will keep getting worse. When we can no longer maintain this aid, what happens to Egypt then?

There are many who have suggested that Egypt attempt to increase the yields on its available farmland. This is certainly supportable. But today, there are only a few nations—primarily in Europe—with substantially higher yields per acre for cereal grains. These nations grow about 25 percent more grain per acre.

If Egypt grew grain at the same rate as the Netherlands, for example, she would produce about 20 percent more food than she currently does, or close to a total of 10 million metric tons a year. This would not even eliminate the need for current food imports while dramatically increasing the need for fertilizer and other expensive agricultural inputs.

In short, Mr. Speaker, unless Egypt deals with the problem of its exploding population, no amount of economic, food, or technical assistance will ultimately help her. If we in this country and the Congress truly want to help her, and I think we do, should we not admit to ourselves and indicate to the Government of Egypt that her real problem is population growth? The facts indicate that this is her problem.

OUR NATION'S TRANSPORTATION SYSTEM

HON. JIM WRIGHT

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. WRIGHT. Mr. Speaker, I have just read and wish to share with my colleagues an address by Archie L. Wilson, president of Dixie Carriers, Inc., of Houston, Tex.

Mr. Wilson's firm is one of the leaders in water transportation along the gulf coast. As such he is part of an industry which contributes greatly to the prosperity of the region.

What impresses me about Mr. Wilson's remarks is his call for a balanced transportation system involving all modes of transportation. He says:

Standing back from it all, I think the proper tests to be applied are really two: is the transportation system going to have the capacity to handle the business as the economy grows? Will the most efficient means of transportation be available to you? It's no use saying to an industry that needs a pipeline that there are plenty of trucks, or to a man who needs a railroad that there are plenty of pipelines, or to a man who needs a barge line that there are plenty of railroads. All modes are needed, particularly modes that compete with each other because competition is the most effective way of assuring maximum efficiency on the part of everyone.

Mr. Wilson addressed the Rotary Club of Beaumont, Tex., on January 12, 1977, calling on the business leaders of the community to take a much more active interest in transportation issues. He said:

As your Congressman, Jack Brooks, is never tired of reminding us, Rotterdam in the Netherlands dramatically expanded its role in the refining and chemical manufacturing business for Europe because it was the first to build a port capable of handling the supertankers. It began on its port in the 1950's—its new and deeper channel had to be dug out of sight of land into the North Sea. The economic benefits of that foresight were enormous.

Mr. Speaker, I insert the text of Mr. Wilson's speech in the RECORD at this point:

TRANSPORT EFFICIENCY AND FUTURE ECONOMIC GROWTH ON THE GULF COAST

(By Archie L. Wilson)

I appreciate the opportunity of coming over to Beaumont and once again visiting with the Rotary Club. As Peter Wells stated, I was a member of this club for many years and it was one of the most enjoyable relationships that I have ever experienced. I am somewhat at a disadvantage because I have known most of you for many years and you have already heard all of my stories and jokes. So I cannot follow my usual custom of opening my talk with humorous stories. I can say to you this, however, that Beaumont is one of my very favorite places. My family and I were very happy here and often talk about the quality of the people who live in Beaumont.

My main purpose today will be to give to the Rotary Club what I hope will be food for thought on a subject I believe most people take too much for granted, particularly here on the Gulf Coast.

That subject is transportation.

We've had the best of all possible worlds here in the Gulf region: efficient pipelines, competitive barge service, excellent ocean service, competitive trucking, and a half a dozen good railroads.

The Gulf region measures its freight in hundreds of millions of tons. Its chief product is bulk—bulk petroleum and petroleum products, chemicals, grain, iron ore, and then, in Beaumont alone, thousands of tons of steel and scrap.

I looked at the port figures for Beaumont the other day. Waterborne commerce hasn't changed much in the past 10 years—30 to 32,000,000 tons is about it. But changes are on the way. New pipelines, expanded barge service, the impact of the ultra-large tankers at the Seadock facility off Freeport, possible negative changes and possible positive changes in government policy on transportation, and, finally, improvement of the Gulf Canal. In many of these transport changes Beaumont and the Golden Triangle of Beaumont, Port Arthur and Orange could be left behind, by-passed. On the other hand, the opportunities provided by change could have a highly favorable effect on the local economy. That the situation will remain unchanged in the future is unlikely, at least I think so.

And so I would like to suggest that the business leaders of this community begin to take a much more active interest in transportation issues. As your Congressman, Jack Brooks, is never tired of reminding us, Rotterdam in the Netherlands dramatically expanded its role in the refining and chemical manufacturing business for Europe because it was the first to build a port capable of handling the supertankers. It began on its port in the 1950's—its new and deeper channel had to be dug out of sight of land into the North Sea. The economic benefits of that foresight were enormous.

The barge industry is not one of the nation's giants by any means, but our organization, the Water Transport Association, had an idea in the early 1970's which still makes a lot of sense. Transportation, we said, was so crucial to the well-being of the economy that all the different modes should unite behind a common program to develop overall improvement of the efficiency of transportation as a system. Weakness in any part of the system was of great concern to everyone making up the rest of the system. At the time this program—one aspect of which was the Surface Transportation Act—consisted mainly of aid to faltering railroads. The Surface Transportation Act was supported by the Association of American Railroads, Water Transport Association, and the American Trucking Associations. All modes subscribed to the overall goal of improving national transport efficiency. We all knew that providing needed aid to railroads would result in the development of more efficient railroads and that improved rail efficiency would have a competitive impact on barge lines and trucks, but we believed, and we still believe, that improved efficiency in transport is an over-riding national goal worth pursuing, let the chips fall where they may. Improved efficiency and reduced costs benefit the customers and the consumers we all serve, strengthens the economy and therefore, in the long run, is good for everybody.

A lot of progress was made under that philosophy. Programs that at other times might have foundered in controversy passed without dissent. There are many who believe that the railroads would not have been able to achieve their $6.4 billion aid program early last year without that climate of intermodal cooperation. Time and again the Congressional leaders promoting the program were able to say that there was no opposition from other modes of transportation to the multi-billions in rail aid.

When we come to water transportation,

what we're talking about is taking advantage of the fundamental laws of physics that really can't be denied. A ton of freight transported on water requires less effort and less energy than a ton of freight transported on land. The nation has developed as a permanent asset some 25,000 miles of domestic waterways which today carry about 17 per cent of the intercity freight, counting the Great Lakes.

We are naturally most concerned in our area with navigation on the Mississippi-Gulf Canal system because it has had such a profound effect on improving the standard of living, the quality of life, and the efficiency of production and distribution in the midcontinent region. But we should not forget that navigation is only one part of a multifaceted program for assuring adequate water supplies for the southwest, cheap hydroelectric power for the northwest, controlling floods all over the country, as well as satisfying other important national objectives, including improving the quality of the environment.

After all, there is no more water available on our continent today than there was when the Indians were here all alone. Without proper management of our water resources, we simply could not sustain the present population or the present level of economic activity. Water resource management cuts across so many crucial national interests that the federal government is made responsible for developing and carrying out effective programs.

These are all positive programs, looking toward balanced development of the economy. The issue that needs your attention today is a new negativism on transportation that seems to have gained a foothold in recent months.

Now that large amounts of federal aids to railroads have been enacted, the railroad attitude to other modes has changed. They are saying that the efficiency of their competition must be held down.

They are opposing slurry pipelines for coal. The coal industry tells us that there is more than enough western coal for the railroads to handle, more in fact than they will be able to handle. At the same time, the advocates of slurry pipelines say that a pipeline can transport some of the western coal more efficiently than railroads. Instead of allowing the market place to settle that argument, the railroads are opposing eminent domain for the pipelines and preventing any market place test.

Similarly they are opposing more efficient sizes and weights for trucks. And they are opposing navigation projects—except, of course, the ones they need at seaports. They've succeeded, by a spoiling suit, for example, in stopping the reconstruction and modernization of a much-needed new Lock and Dam 26 at Alton, Illinois. If this type of thinking is allowed to prevail, any improvement in the locks and flood gates in the Gulf Intracoastal Canal can be stopped. This could and would drastically affect the economy of the Golden Triangle.

Railroads are also the leading advocates of imposing a special tax on shallow draft navigation to get the barge costs up.

One effect of such increased costs might be to divert present barge traffic to pipelines or railroads. But there is also another dimension which the railroads themselves have candidly announced. There's a lot of profitable traffic which moves on railroads at so-called water competitive rates. Congress has been told in rail testimony that rail freight rates are "lower than they would otherwise be" because of barge competition by $500,000,000 to $750,000,000 a year. If barge rates could be pushed up by imposing a tax, rail rates on the water-competitive traffic—traffic which remains on the railroads, such as wheat brought by rail to Beaumont at good profits to the rails—would go up.

You can see right away these are important issues. Unfortunately they haven't had the attention they deserve. I am urging that you acquaint yourself with the arguments because the future participation of Beaumont in the production, handling, and distribution of the dry and liquid bulk business of the Gulf Coast is very much at stake if the wrong answers emerge from the controversy.

Standing back from it all, I think the proper tests to be applied are really two: is the transportation system going to have the capacity to handle the business as the economy grows? Will the most efficient means of transportation be available to you? It's no use saying to an industry that needs a pipeline that there are plenty of trucks, or to a man who needs a railroad that there are plenty of pipelines, or to a man who needs a barge line that there are plenty of railroads. All modes are needed, particularly modes that compete with each other because competition is the most effective way of assuring maximum efficiency on the part of everyone.

Let me give you some thoughts on the user tax which the railroads would like to see the barge lines and their customers—many of you in this room—pay.

Exponents of waterway user taxes rely on two arguments. They say first that the use of federal funds for navigation improvement adversely affects water competitors and distorts the competitive relationship. Our competitors put it bluntly: it's subsidized competition and therefore unfair.

Any proper analysis of that argument of course would require a full accounting of the use of federal funds for all modes. Indeed, we favor the development of a combined transport account in the Government so that information on aids to all modes will be available in one place. This is not easy to do because one can't just compare the federal outlays. Indirect, as well as direct, aids must be included. We in WTA know something about these indirect aids to railroads because we have been active in supporting many of them over the past decade. They include hundreds of millions in tax incentives. They include relief from hundreds of millions in special burdens whether it is passenger service, railroad retirement expenses, or discriminatory local taxation. They include grants, loans and loan guarantees. The very substantial commitment to the use of federal funds contained in the $6.4 billion rail aid act passed last year is an example.

Federal investment in shallow draft navigation has amounted to about $4.5 to $5 billion since 1824 and currently runs about $400,000,000 a year. A cursory examination of rail aid shows it to be far and away in excess of navigation investment.

So the complaint of subsidized competition, "the railroads pay for their right of way, the barge lines are free-loaders" really doesn't stand analysis. The railroads do own their right of way, but they get billions of dollars of federal aid in other ways. If all the direct and indirect federal benefits to railroads were placed alongside the aids to navigation, and were added up, one would find that the water carriers are behind, not ahead. A tax on navigation would therefore create or aggravate an inequity to water carriers.

The other reason given for imposing a tax on waterways is that there is said to be a national policy which requires that all federal outlays must be recovered. But when one comes to analyze that proposition, one finds that isn't so either. Some federal outlays are recovered; some are not. The Congressional policy is that where the benefits of the federal investment are widely diffused through the economy the costs are not recovered. If everyone benefits, then everyone should pay, is the way it is expressed. Navigation savings are very widely diffused. They include everyone who pays a light bill in the river valleys, all the farmers, and so on.

You haven't had to think about such issues as these in many years. But it is very much to your interest to look at them now.

Let me give you a very concrete issue involving the future of the Golden Triangle. This area, along with all other commercial ports on the Gulf Coast, was given a major economic stimulus by the construction of the Gulf Intracoastal Waterway. Growth of course benefited the railroads among other economic interests. The waterway has resulted in $27 in transport savings for every $1 of investment in construction and maintenance.

For nearly 20 years a program to modernize the canal has been hanging fire. The benefits of modernization of course would far outweigh the costs.

The present canal is too narrow and too shallow. Whereas on the Mississippi River, towboats of 11,000 horsepower push barge tows of up to 40,000 tons, here on the canal the biggest tow is a string of four or five barges, one ahead of the other and the biggest boat is 1,000 to 1,200 horsepower.

Widening the channel to 200 feet would permit tows of ten barges, more than double the present capacity.

The net result of this would be a reduction in costs of something like thirty per cent, an improvement in efficiency well worth achieving in an inflationary world and one that would be particularly helpful to Beaumont.

I have recently made proposals to some of the oil companies participating in Seadock for barging petroleum from Freeport to the Golden Triangle at costs which we feel would be less than the cost of expanding and operating new pipelines, using current technology, and current widths and depths. Improvement of the canal would of course make the barging proposal for supplementing pipelines even more attractive.

But there is a powerful move afoot to frustrate improved efficiency in transportation by water, highway, and pipeline. In the coming months, these questions could be answered unfavorably for the Gulf Coast.

The sound standard to which all reasonable men can repair is one that promotes both adequacy of transport capacity by all modes for the future and optimum efficiency. The right answers are not all that difficult to find; but nothing will more surely guarantee the wrong answers than a policy of neglect. So my message to you today as business leaders in Beaumont is to become involved in understanding the issues and then, through all your various organizations, become involved in acting vigorously in Beaumont's best economic interests.

FAST ROUTE TO NEW JOBS

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAWKINS. Mr. Speaker, on February 8, 1977, the Subcommittee on Employment Opportunities will commence hearings on the comprehensive employment and economic proposals of the President and Members of Congress.

A timely and incisive article by Tom Wicker appeared in the New York Times on Sunday, February 6, 1977, which states the case for increasing the amount of Public Service jobs created under the President's economic stimulus proposals. I would therefore like to share this article with my colleagues.

[From the New York Times, Feb. 6, 1977]

FAST ROUTE TO NEW JOBS

(By Tom Wicker)

Chairman Robert N. Giaimo of the House Budget Committee says there's a "broad consensus" within the committee and the Dem-

ocratic leadership for expanding President Carter's public works program from $1.8 to $3.5 billion this year. The aim is to create more jobs than the Carter economic stimulus proposals would.

Jobs developed through public works projects, however, are costly, in that they also require heavy machinery and building materials and the like. Public works projects take time to get under way although Mr. Giaimo argued that $24 billion worth of approved projects are "sitting on the shelf" awaiting funding.

Congress has insisted, moreover, that public works appropriations be allocated 70 percent to areas with above-average unemployment and 30 percent to areas with below-average unemployment—and this pork-barrel procedure means nearly a third of the money has to go to areas least affected by unemployment.

Taking all that into account, the Carter Administration did not rely too heavily on public works—under Secretary of Commerce Juanita Kreps—for its job creation proposals. Instead, Secretary of Labor Ray Marshall is busily developing a public service jobs program that he and the Administration believe has at least the following advantages over public works:

Public service jobs cost less, because heavy equipment and the like is often not needed.

The jobless can be swiftly put to work on directly targeted projects like national park maintenance.

Other government costs, notably welfare and unemployment compensation can be quickly reduced and income tax revenue enlarged, as the jobless go on public payrolls.

Turning the jobless quickly into consumers has further stimulating impact throughout the economy.

Mr. Marshall originally had hoped for an even bigger public-service jobs program than the Carter proposals permit. Nevertheless, he is planning now to double the existing annual rate of public service employment in only six months—thus quadrupling the program, with further increases next year.

Mr. Marshall is insisting, however, that "we put people to work doing useful things" and that the job training programs he is also expanding "make a better worker." Particularly in the case of young people, he says, giving them "useless work" to do or meaningless training for jobs that don't really exist says to them that they, too, are useless—which all too many of the poor and disadvantaged believe of themselves anyway.

Besides, Mr. Marshall knows, taxpayers must not be given the idea that public service jobs are make-work, or that the Administration is merely "throwing money" at unemployment or conducting income-maintenance programs. That impression, he says, has unfairly discredited many programs of the 1960's, when "the overwhelming evidence is that they helped the people who went into them." Criticism of a 30 percent drop-out rate for the Job Corps, in his view, might more realistically be praise for a 70 percent completion rate.

To the extent possible, Mr. Marshall also intends to keep public service employment concentrated in areas that "relate to other national goals." He is getting a house-weatherizing program under way, for example, as well as national parks and forests maintenance projects, and hopes soon to have units at work on deteriorating railway roadbeds.

The economist Gar Alorovitz has pointed out that 150,000 nurses' aides are needed to lift the lowest-standard hospitals to the national average, and that 500,000 teacher aides would be required just to get national teacher-pupil ratios back to pre-Nixon Administration levels. As Hubert Humphrey put it more than a year ago.

"This country is desperately short on goods and services of the most basic nature. How ironic, how tragic it is that there are millions of idle people on the one hand and so much undone work on the other."

Measured against that gap, the Carter stimulus proposals are limited indeed—with just about a third of the impact, Mr. Alperovitz estimates, of the Johnson Administration's 1965 stimulus, when unemployment was only 4.5 percent instead of today's 7.3 percent. Ray Marshall also said at his confirmation hearings that he had hoped for a bigger stimulus, and one more concentrated on job creation than tax cuts and rebates.

He is an economist who refuses to be spooked by the specter of inflation. "With so much slack in the system," he said the other day, the nation could move vigorously to turn the non-productive jobless into productive workers.

"Don't forget," he added, "if they're consuming but not producing, unemployment is inflation."

TRAILS WEST NATIONAL HISTORICAL PARK

HON. VIRGINIA SMITH

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mrs. SMITH of Nebraska. Mr. Speaker, I have submitted H.R. 1782 to authorize the Secretary of the Interior to establish the Trails West National Historical Park in the States of Nebraska and Wyoming. In view of our renewed commitment to recreation lands, it would be fitting for Congress to authorize the preservation of these unique historical landmarks within the National Park System—an action which has received wide support from my fellow colleagues as well. This proposal would link Ash Hollow State Historical Park, Courthouse and Jail Rocks, Mud Springs Pony Express Station, Chimney Rock National Historic Site, Scott Bluff National Monument, and Fort Laramie National Historic Site to form the Trails West Park. I hasten to add that this park would be very inexpensive since most of the above sites are either present Government property or would be donated by the State.

The milestones of the old Oregon and Mormon trails which comprise this proposal deserve to be preserved and interpreted as a national park because they embody a unique combination of two of the major thematic guidelines developed by the Department of the Interior's National Park Service for preservation of historic areas. First, these natural wonders belonged to the hunting grounds of the original inhabitants of this continent and were the focal point of many of their legends long before the initial explorers ventured into this area. Second, fur traders, gold seekers, and settlers alike poured past these landmarks on the Oregon and Mormon trails to make westward expansion and "manifest destiny" a reality.

It is furthermore noteworthy that the National Park Service major thematic facets relating to the Mormon trail, trappers, and mountainman exploration, fur trade of the 1824 to 1839 era, and the open range cattle industry are not presently represented in the National Park System at all. This indicates the region's national importance and argues strongly for making the area a national park.

Local efforts to muster national attention for the historic resources of the North Platte Valley began years before President Woodrow Wilson signed the proclamation to establish Scotts Bluff National Monument on December 12, 1919. Fort Laramie still sheltered troops in 1890, but later the State of Wyoming obtained title to the property and in 1938 it was transferred to the National Park Service. It has since been honored as a National Historic Site. In 1953 the Secretary of Interior's Advisory Board on National Parks, Historic Sites, Buildings, and Monuments recognized the national historical significance of Chimney Rock and recommended some action to perpetuate its historical values. It has since been designated as a National Historic Site. In 1960 the Advisory Board recommended that Ash Hollow be studied to ascertain its merit for classification with other points of exceptional value. Four years later in 1964, the Advisory Board concurred in the National Park Service recommendation of Registered National Historic Landmark status. I hope now that Congress will act promptly to authorize the Secretary of Interior to acquire and develop the necessary lands, most of which are already government property or will be donated by the State at no cost to the taxpayers.

The North Platte Valley, in which these historical sites and resources lie, has been a human migration corridor for centuries. Various Indian tribes struggled for control of this natural thoroughfare before King Richard let his English crusaders into the Holy Land. Among the first white men to disturb this ancient Indian hunting ground was Robert Stuart who marveled at these same wonders on his way to John Jacob Astor's fur trading post in Oregon. Thirty years later in 1843 the vanguard of a vast pioneer army passed through the valley, soon to be known as the major route of emigrants bound for Oregon or central California. Their course was determined by two objectives: Fort Laramine, which offered supplies and protection, and South Pass, the lowest and broadest break in the Continental Divide.

Four years later Brigham Young led his followers up the valley on the north side of the Platte River. This heroic group had 500 of their most able men drafted for a lengthy march into the Mexican War just weeks before the main camp departed west, but that did not delay their departure. Thousands would follow these forerunners on both the Oregon and Mormon trails, particularly during the California gold rush when over 150,000 adventurers pushed through the valley within 2 years.

Ash Hollow was one of the significant landmarks which characterizes the courage of our westward-bound forefathers. The monotonous miles of prairie expanse were first interrupted by this deep canyon through which the Oregon trail descended in a series of steep and dangerous grades from the plateau to the river bed. Even today a marker indicates where ropes were used to ease wagons down abrupt Windlass Hill. Old diaries

often mention the casualties to men, beasts, and equipment suffered in the descent. An English traveler making the voyage in 1849 reported that riders dismounted, wagon wheels were locked, and the conestogas steadied with ropes. Despite all the precautions, he noted, two mules were killed by a break-away wagon.

In addition to such hazards, there was always the danger of Indian ambush in the narrow ravine. On a grassy slope near the mouth of the hollow are a number of pioneer graves, among them Racheal Patterson, a young girl who was shot by Indians on the path to the spring in 1849.

Ash Hollow was a popular Indian hunting area. And in 1835 it was the scene of a day-long battle between the Pawnee and the Sioux. After all arrows and bullets were spent the two fierce tribes struggled at knifepoint until the Pawnees finally retreated back down the Platte. Twenty years later and a few miles further up the Platte, battle cries were again heard. But this time it was Gen. W. S. Harney leading his cavalry against a band of Sioux who would not respect the relentless march of the pioneers.

Following the Oregon Trail upstream along Highway 26, one passes the grave of Amanda Laman who died of cholera on June 23, 1850. Her husband left his company to return to St. Louis for a gravestone, and he returned with it as a member of a later train.

The next milestone for the westward travelers was Courthouse and Jail Rocks. According to one account, this massive formation of twin cliffs was named by early pioneers from St. Louis who thought it resembled their country buildings. A nearby cliff of the same formation had the words "Post Office" etched on it, and travelers often deposited letters in boxes hewn in the soft stone base hoping that an east-bound trapper would convey them back to civilization.

Mud Springs Pony Express Station, situated a few miles southeast of Courthouse Rock, is not precisely on the route of the trails west, but as a home station for the famed Pony Express riders, it had a major influence on the area. This situation linked Julesburg on the South Platte River with Courthouse Rock's Station.

Chimney Rock was probably the most famous landmark on the trail. It was within view to 19th century voyagers for several days and was a natural wonder for the more than a quarter million emigrants who paused at the base of that milestone. From the center of an eroded plateau, a narrow shaft of stone juts upward approximately 150 feet. Its name was attached by Joshua Pitcher in 1827. The Indians, however, called it "wigwam." This column of stone was the subject of more mentions in pioneer journals than any other point on the overland migration route.

Scotts Bluff was the first butte of dominating height to prophesy of the rugged highlands ahead. Many climbed to the summit to view the great trails 800 feet below. This massive promontory, named for Hugh Scott, a fur trapper who died in the vicinity around 1828, was noted by the earliest tribes whose records have been preserved. To these Indians, Scotts Bluff was Me-a-pa-te or "the-hill-that-is-hard-to-go-around." This area was a particularly choice hunting ground of the Sioux, Cheyenne, and Arapaho, for here vast herds of buffalo came to water. In 1860–61 Pony Express riders galloped through Mitchell Pass. And they were followed shortly by the first transcontinental telegraph. The Overland Mail, Pony Express, Pacific Telegraph, and Overland Stage all built stations near the cliff.

In the late 1870's and 1880's Scotts Bluff was the geographical center of the open-range cattle industry, the last great romantic episode of the frontier. With the arrival of the first homesteaders in 1885, the frontier disappeared and the bluff joined the other landmarks as symbols of the Nation's past.

Fort Laramie has earned its place in our national heritage as well. Two experienced fur traders, William Sublette and Robert Campbell, built the first fort on the Laramie River in 1834. The owners called it William after the senior partner, but it was known to most as "Laramie" after the nearby river, named for a French-Canadian trapper, Jacques La Ramee, killed by Indians on its banks in 1821. The outpost quickly became one of the major trading centers of the Rockies.

Fort Laramie was the most important stop on the westward trek. The plains lay behind; the mountains loomed ahead. Defective wagon parts had to be repaired or replaced, and depleted stores replenished here. Often overanxious travelers would leave the fort too late in the fall only to be trapped by an early snow in one of the mountain passes. Two Mormon handcart companies met this fate in 1856, and one in every four perished before relief arrived.

Besides its role in the westward emigration, the fort was also a key military post. On June 26, 1949, the Army purchased the fort for $4,000. Almost immediately other buildings were erected until Fort Laramie became a sprawling military base—too large to be walled in but strong enough to deter Indian attack.

In 1854 the fort's commander insisted upon the surrender of an Indian accused of stealing a traveler's cow, and sent Lieutenant Grattan with 30 men to enforce his demand. The demand was refused and a dispute followed. In the ensuing engagement Grattan and his entire detachment were killed. This incident marked the beginning of Indian wars which would rage for over 35 years.

It is clear that this area merits the recognition this bill would provide, but I would like to reemphasize one practical matter to which I alluded earlier—the relative inexpense of this proposal. Scotts Bluff National Monument and Fort Laramie National Historic Site are already fully Government owned and have been substantially developed for visitor enjoyment. Ash Hollow, Chimney Rock, and much of the Mud Springs Station are State property and would be donated to the Federal Government. Even those few places, amounting to less than 2,000 acres, where acquisition would be necessary are not expensive irrigation land. This means, Mr. Speaker, that for a very modest cost these areas can be acquired and developed as a national historical park. Preservation of these landmarks would be very successful because they are substantially unmarred, except by time. Appropriate interpretation of these great natural and historic monuments would be an extremely worthwhile addition to our Nation's cultural heritage. Accordingly, I urge the Congress to act promptly on this legislation.

LOCAL PUBLIC WORKS CAPITAL DEVELOPMENT AND INVESTMENT ACT

HON. DALE MILFORD

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. MILFORD. Mr. Speaker, the Committee on Public Works and Transportation has just finished its work on H.R. 11, legislation to extend the Local Public Works Capital Development and Investment Act. During hearings on this bill, many witnesses testified before the Economic Development Subcommittee particularly concerning the inequities which existed in the formula used to distribute funds.

At this time, I would like to place in the RECORD the testimony of the Honorable Roy Orr, county commissioner of Dallas County, regarding the situation of Dallas County relevant to this bill.

TESTIMONY PRESENTED TO THE UNITED STATES HOUSE OF REPRESENTATIVES PUBLIC WORKS SUBCOMMITTEE ON ECONOMIC DEVELOPMENT BY DALLAS COUNTY COMMISSIONER ROY ORR

Mr. Chairman, it is an honor and a privilege to present testimony on a very important subject—the Local Public Works Capital Development and Investment Program of 1976.

First, let me state that I believe in the concept of the Local Public Works Act. This type of economic stimulus program not only provides short-term employment opportunities for individuals currently unemployed but also provides the long-term benefit of construction of needed public facilities for local communities. Furthermore, we should realize that not only economically depressed areas of our nation should be provided with economic stimuli and the benefit of long-term economic planning, but other areas experiencing economic growth should also be provided with selective stimulas and equal planning assistance, if the nation as a whole is to grow and prosper.

It is my intention to note some of the problems that the County of Dallas encountered with the 1976 Local Public Works Act, no doubt our experience is similar to that of many other major urban areas throughout the country.

In November of 1976, the County of Dallas prepared and submitted nine applications for funding under the Local Public Works Employment Act. The requested funding represented not only a new and expanded employment opportunity for numerous unemployed workers residing in the County of Dallas, but also financial support for the construction of needed public facilities. Our projects involved the construction of needed bridges on major thoroughfares within Dallas County.

The existing structures, due to their de-

teriorated conditions, are significantly restricting economic development in these respective areas. The County of Dallas received notification that none of the nine projects submitted for consideration were funded, primarily because of the County's low rate of unemployment and comparatively high per capita income. We had difficulty competing with other areas of smaller size due to the per capita income criteria and larger areas which had more intense concentrations of unemployment. As previously indicated, that low rate of unemployment, now hovering at 4% (almost 20% in the construction trades)—as a function of the size of the County of Dallas—represents almost 25,000 individuals in the County of Dallas who consider themselves to be a part of the work force and are currently out of a job. Our concern is I am sure shared by other urban counties that did not receive project funding under Title I. Because unemployment tends to concentrate itself in urban areas, some adjustment to the way funds are distributed inside the state should be developed. In Texas, 40% of the state's unemployed work force is located in six major urban areas—only 24% of the state's 55 million dollars in funding under Title I was spent in four of those areas.

There are many ways to revise the funding mechanism. I would encourage your consideration of alternatives which would equitably address the unemployment needs of all jurisdictions and certainly those areas that have a low rate of unemployment, but because of their size, have relatively large numbers of unemployed.

We would also recommend that you eliminate any consideration of per capita income from the funding mechanism, and also implement a requirement that any jurisdiction submitting applications for project funding under this Act be required to use only unemployment data from their jurisdiction as a basis for the submission of their application. This would minimize the possibility of an urban area being deprived of funding, as a result of having affluent residents within its jurisdiction.

More importantly, I am suggesting that when additional Title I funds are appropriated, that applicants which were denied funding are considered prior to submission of new applications. In view of the $24 billion in grant requests received by the Commerce Department, I believe it is appropriate to fund those units of government which already exerted considerable time and resources in developing their applications.

Another matter of very grave concern to us in Dallas—and in the State of Texas—is the distribution pattern of the 2 billion dollar appropriation between the states. As you will recall, the Economic Development Administration allocated the appropriation among the states in the following manner:

70% of the appropriation or almost 1.3 billion dollars was distributed to states based upon the state's share of the total national unemployed population;

The remaining 30% of the appropriation was distributed among the states based on the severity of unemployment—rate of unemployment and this is the portion of the mechanism which is the greatest cause for concern to us in Texas.

The result of this financing scheme was most inequitable, Texas, received only $55 million. The total when compared on a statewide unemployed per capita basis to other states dramatically demonstrates the disparity in funding. On an unemployed per capita basis, Texas received $190 per unemployed person, while New Jersey received $391, New York $365, Michigan $459 and California $293. Florida which has an unemployed population of 319,000 people received 136 million dollars while Texas, which has 292,000 persons unemployed, barely 27,000 fewer than Florida, received only 55 million dollars. This funding pattern is, in basic fact, inequitable and suggests that there is some difference, some disparity or circumstance, to being unemployed in Florida rather than Texas. It is our contention that this mechanism used to distribute funds among the states be revised to distribute funds in a more even and equitable manner.

I am, therefore, recommending that each state receive a proportion of the final appropriation for this program based only on its numerical share of the total national unemployed work force.

I believe that adjustments to the funding mechanism for Public Works Projects could result in a more equitable and even distribution of project funds and would allow major urban areas, rural areas and suburban communities a fair opportunity to meet the objectives of the Act:

1. By providing jobs for people currently unemployed

2. Financially supporting the construction of facilities which will have a lasting community-wide benefit.

Please accept my gratitude for this opportunity to present these observations regarding the Local Public Works Act. We, in Dallas County are interested in responding to the needs of those 25,000 people in our County who are unemployed and feel quite strongly that our County and its citizens should not be penalized simply because our community-wide rate of income is relatively high.

CODE OF ETHICS NEEDED BEFORE PAY RAISE

HON. HERBERT E. HARRIS II

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HARRIS. Mr. Speaker, I would like to share with my colleagues in the House a February 10 editorial from the Washington Star in which the newspaper endorses my bill, H.R. 2991, to postpone any pay raise until new ethics requirements are in place.

Nineteen Members have joined me as cosponsors of this legislation, a bill which carries out the call of the December 1976 Commission on Executive, Legislative, and Judicial Salaries that Congress move quickly to enact a strong, new ethics code.

The Obey Commission has now completed its work and made its recommendations to the House. The "pay raise" deadline is February 20. Time is short, but sufficient time remains to show the American people we are serious about ethics reform, that we believe our first priority is tough, new standards of conduct—not salaries.

I hope other Members will join me in putting ethics first.

The Washington Star editorial follows:

HOLD THEIR FEET TO THE FIRE

Once members of Congress get a pay raise, how much incentive will there be to adopt a strict code of ethics? Rep. Herbert Harris of Northern Virginia's 8th district apparently doesn't think there will be much, and he may be right.

A special House task force has recommended a stiff ethics code but its adoption seems unlikely before the big pay hike for congressmen and other top federal servants is scheduled to go into effect February 20. Even when, and if, it is adopted, the effective date of several provisions may be delayed; the task force has recommended, for example, that a proposed restriction on outside income be put off until the 96th Congress takes office in 1978.

A special committee of the Senate also is working on an ethics code but there doesn't seem to be a big hurry on that side of the Capitol to get it on the books.

Mr. Harris has proposed holding Congress' feet to the fire by freezing salaries of congressmen, federal judges and federal appointees until comprehensive ethics standards are established. His legislation, introduced Monday, would allow pay raises for upper echelon Civil Service employes to go into effect as scheduled.

There's a good deal to commend Mr. Harris's approach. The presidential commission that recommended the pay raises, while it didn't precisely say that adoption of an ethics code and approval of the pay raises should be done at the same time, called a code of conduct for legislative, executive and judicial officials an "indispensable prelude to a popular acceptance of a general (pay) increase."

There's also logic in Mr. Harris's contention that freezing congressional salaries would hasten the adoption of ethics standards.

Furthermore, the exemption of Civil Service employees from the freeze would take care of the most critical pay need. Some 20,000 career employees in the top four Civil Service grades, who have had only a 5 per cent increase in eight years, would receive substantial salary increases.

There has been no great rush to support Mr. Harris's bill and probably won't be. But if nothing else, perhaps it will be at least a small spur toward enactment of ethics standards.

A second feature of Mr. Harris's bill also deserves attention. It would repeal the congressional action of 1975 that gives members of Congress automatic increases when Civil Service pay scales are increased under the "comparability" process designed to keep the pay of rank-and-file federal employes on a par with salaries in private business. We agree with Mr. Harris that it is "wrong to politicize the pay of rank-and-file, career federal employes."

Congressional pay should be in a category by itself. Members of the House and Senate should be required to vote proposed increases for themselves up or down; the decisions, which must take into account considerations affecting their political careers, should not affect the fortunes of other federal servants.

SMALL RAILROAD OPERATORS

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. McDADE. Mr. Speaker, I am presenting for introduction today a bill which will benefit many of America's small railroad operators who began operation after conveyance of the bankrupt railroad's property to ConRail. After extensive deliberation, the Congress created a number of legislative solutions to improve rail transportation in America. Unfortunately, due to a number of unforeseen circumstances, the beneficiaries of this legislation have not been able to utilize the benefits intended for them.

The small subsidized line operators, who operate the branch lines which Con-

Rail chose to avoid, were to be provided with a full subsidy for the special costs demanded by ConRail to serve the small branches. Understandably, due to the great administrative tangles which faced ConRail after conveyance day, only the first 3 months of ConRail billing has been forwarded to the States which send these bills to the branch line operators. This requires that the subsidized operator must make decisions on continued future operation without the adequate data Congress intended them to have. The result might be extremely burdensome. The Congress intended to provide small operators with a 100-percent subsidy for 1 year during which all cost data would be made available. The operator would then have sufficient information upon which to base a future shipping decision; that is, rail versus motor freight. Unfortunately, this cannot occur. Consequently, this bill will extend 100 percent funding for 1 more year so that the intent of Congress can be fulfilled.

Additionally, Mr. Speaker, my bill extends for 1 year the Federal subsidy for branch line rehabilitation. As with the operation subsidy, federally financed rail repair cannot be undertaken as Congress intended.

During the summer of 1976, the small branch operators were scrambling to organize, develop financing, and receive operating agreements. Not until the autumn of 1976 were they in a position to request and receive professional information on track rehabilitation. This information could not be acted upon until winter months, and consequently, very few repairs were accomplished.

Coincidental to the application for Federal repair funds from the operators through the States, the Federal Railroad Administration, by counsels' opinion, decided only to fund repair work already completed as differentiated from repair work obligated. Because the vast majority of rehabilitation work remained uncompleted, very little will qualify for the full Federal subsidy. This problem is further compounded by the failure of the FRA to approve the State rail plans which are required before subsidy for any purpose—either operation or repair—may be obtained. Congress did not intend this result. Many miles of track may well remain rated at only 10 miles per hour or less: Exactly the problem that has made rail transportation noncompetitive. Unfortunately, these small operators do not have the financial resources to tackle this rehabilitation project and cannot develop either the debt or equity funding necessary. The moneys intended for this project remain unused and, but for the passage of this bill, are likely to be woefully underutilized.

The costs of this extension of 100 percent funding will be at best minimal. The funds appropriated last year for this use are available until expended. This means that no new moneys need be appropriated either for operation or repair subsidies. Rather, they will be utilized as intended by the Congress.

Mr. Speaker, I urge a speedy hearing on this bill. The construction season will soon be upon us. Potential jobs may well be lost if delays occur. Additionally, many small operators may, without this funding, decide that the costs are too high and abandon their efforts to utilize these branch lines that are so essential to our Nation's transportation system. On this matter, we do not enjoy the luxury of delay.

THE ENERGY CRISIS REVISITED

HON. ROBERT (BOB) KRUEGER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. KRUEGER. Mr. Speaker, Dr. John J. McKetta recently submitted to an interview by Dresser Industries, Inc., regarding his current views on our Nation's energy crisis. Dr. McKetta was one of the first to call attention to the importance of this issue to our national welfare, and his past observations and criticisms were extremely prophetic. I hope that all my colleagues will read his comments as they ponder the right course for America to take in formulating a national energy policy during this session of the 95th Congress:

THE ENERGY CRISIS REVISITED

Q. Dr. McKetta, for more than a decade you have consistently stated that the United States energy situation was growing progressively worse. Is that still your view?

A. In 1971, I termed the circumstances serious. But we have since passed that point. We are now facing disastrous consequences from our inability to meet our energy needs.

Q. What are our chances of rectifying our energy predicament?

A. Unfortunately, since the gravity of our problem was spotlighted by the Arab oil embargo in 1973, almost everything we have done has tended to worsen the situation. Time is running out on us. Even if we could move tomorrow to develop a workable energy policy and were able to implement it at once, we would still experience at least a deterioration in our standard of living in this country by 1985. If we do not move quickly, the situation will become dire.

Q. Would you please elaborate on what you mean by dire?

A. I mean that we will experience deep and painful disruptions in our whole economy. We will have a severe recession by 1985, brought about by shortages of domestic energy. In fact, unless we move immediately, there will be an energy shortage in the United States that we simply cannot imagine at this time. Most of this is, and will be, caused by the vote consciousness and shortsightedness of our government in energy matters.

If we allow our energy programs to drag on as they are today, I predict the government, by 1985, will have on its payrolls a large number of "regulators" who will appear at our homes to make certain that we maintain low temperatures in the winter and high temperatures in the summer, and that our clothes dryers are permanently disconnected. Air conditioners in automobiles will be banned and we will drive on Saturday and Sunday for emergency purposes only.

I further predict that escalator use will be prohibited, elevator use severely limited, that unemployment will be as high as 14 percent, prime interest rates as high as 15 percent and that we will have the worst recession in the history of the country.

Q. Since the oil embargo, the prices of crude oil have gone up substantially; drilling activity has been increasing steadily and the Federal Power Commission recently set a new price ceiling of $1.42 per thousand cubic feet on new interstate natural gas. Haven't these factors brightened the domestic energy outlook?

A. The $1.42 price level has not been fully resolved. If it were, it would improve to a small degree the economics of gas production. Still, all the factors you cite can do little, if anything, to prevent the disasters we face. The increase in drilling activity has been insignificant when weighed against the problem.

In 1974, the U.S. produced 9 million barrels of oil per day. The figure declined to 8.5 million in 1975, and declined again in 1976, even while demand was rising at higher than expected rates. We aren't gaining in production—we are continuing to lose ground. We aren't moving toward energy self-sufficiency; we are moving farther away from it. Just a few years ago, we were importing about 25 percent of the oil used in this country. In 1976, we imported approximately 45 percent, and the figure is still growing. Our increasing dependence on imported oil brings greater risks of another embargo, and more intimidation in the conduct of our foreign policy. This endangers and jeopardizes our nation.

Since 1956, our total energy demand growth rate has outstripped our total energy production growth rate, causing a disturbingly high growth rate in energy imports.

Q. What about energy sources other than oil and gas? Can we count on them to close the gap between our production and demand?

A. Our projection regarding other U.S. energy sources has declined substantially between 1970 and 1975. In 1970, we estimated that all of our energy sources could provide 95 quadrillion British Thermal Units by 1985. Our 1975 estimates show that we were overly optimistic and now we expect only 62 Q's* from all energy sources by 1985.

While our predictions of oil and gas production by 1985 have been revised downward by 3 Q's, predictions of supplies of other energy sources, such as coal, nuclear, geothermal, solar and synthetics, have been revised downward by almost 30 Q's. The outlook now is that coal will be the only energy source other than oil and gas that can make a significant contribution to our energy supplies over the next ten years.

Nuclear energy, for example, will provide only about 9 Q's by 1985, if all planned nuclear plants are actually built.

At the same time, 1975 predictions of 1985 energy demand have been revised upward from the 1970 estimates. The chart shows the supply and demand estimate made in 1970 and the 1975 revisions through 1985. As may be noted, the gap between the supply and demand estimates widens perilously. What's more, in 1976, it appears that we will not be able to produce even at the low level of the 1975 estimates.

Obviously, we must make every effort to develop all energy sources, but oil, gas and coal are the only ones that can make a significant contribution to our needs in the immediate future, or, at least, the next two decades. We have no choice but to concentrate our efforts on hydrocarbons, especially oil and gas, until other sources of energy are able to share the load—probably around the year 2000.

Q. What are the consequences of our rising energy imports?

A. First, we must conclude that our increasing dependence upon imported oil could result in a profound and dangerous weakness in the U.S. position abroad. Today, for ex-

---

* 1 Q equals one quadrillion British Thermal Units. This is the energy in 1 trillion cu. ft. of gas or 46 million tons of coal or 180 million bbls. of oil or 243 million megawatt hours.

ample, we face the dilemma of supporting Israel, with whom we have religious and friendly ties, or supporting the Arab states, whose oil supply is vital to our nation.

Second, there is the specter of economic disaster. In 1976, the U.S. cost of imported energy liquids will be $37 billion. It was only $6 billion in 1973. If we project import trends based on our 1970 production and demand projections, we would need to import 8 billion barrels of oil during the year 2000. The cost of that amount of fuel could be over $200 billion. This is equivalent to 20 million new jobs at $10,000 per person per year. If we use 1975 projections for production and demand, the situation becomes even more disastrous.

We should also keep in mind that our rising bill for energy imports has the same effect as if our tax bill were increasing . . . the result is that industry has less funds to provide new jobs and consumers have less funds available to spend to support employment.

Q. Is our growing dependence on imported oil proof that the United States is running out of oil and gas?

A. No, the tragedy of our problem is that the crisis is developing even though expert scientific studies indicate there are sufficient domestic resources of crude oil and natural gas to last for the foreseeable future, and certainly until other energy sources, such as nuclear power, develop to the point of supplying the greater part of our needs. As of 1975, the U.S. had proved recoverable reserves of about 228 trillion cubic feet of gas and 34 billion barrels of oil. Estimates of undiscovered U.S. recoverable potentials go as high as 750 trillion cubic feet for gas and 104 billion barrels for oil.

Q. You mentioned earlier that in addition to oil and gas, coal must be used more extensively. Why is the use limited now?

A. In 1970 the Mine Safety Act and EPA regulations caused declines in the production and usage of coal. Twenty-two percent of the total mines were closed during 1970–71. Since that time, restrictions on the use of high sulfur coal have decreased usage. Production and usage have risen since 1971, but 1975 levels will have to triple by 1985 if we are to approach self-sufficiency.

Q. What must be done to reverse the energy situation in this country?

A. Simply stated, we must close the gap between supply and demand. More precisely, we must adopt an energy policy that establishes specific objectives and provides the incentives and controls required to achieve them.

Our strategy should be to increase domestic production and reserves of oil and gas over the short term, say to 1990, to gain time for development of our alternate energy resources.

Q. Specifically, what steps should be taken to accomplish this?

A. One of the first steps should be to return to a free market for energy. If we decontrol the price of oil and gas, we will have higher prices. Although basically unpopular higher prices would help correct our energy situation in two ways: first, they would slow demand; second, they would spur domestic exploratory drilling, which would eventually increase both our production and reserves. We know from the experiences of other countries that when gasoline costs more than a dollar a gallon, consumption drops substantially.

Higher prices for oil and gas would also encourage greater recovery of oil and gas from existing wells. Only about 35 percent of known oil deposits is recoverable using present technology. Higher prices would allow technological advances which, in turn, would contribute to improvement in recovery rates of existing oil reserves. Also, there are known natural gas deposits that are not now commercial; higher prices would change the economics, encourage drilling in those fields and help increase our gas production.

In addition, we need to triple the use of coal, because it represents our most abundant and easily accessible source of domestic energy.

Q. Do you have other thoughts about making the problem less severe?

A. In addition to accelerating our production, we need to conserve energy through more efficient use. One area subject to significant improvement is power generation. For example, the conversion of natural gas to electricity results in an energy loss of over 30 percent. Also, we should convert immediately to coal for electrical power generation, especially in states that do not produce large quantities of natural gas.

We should declare a moratorium on automotive catalytic converters and exhaust gas recirculation devices, except in the few cities with special environmental problems, and put lead back into gasoline so that we could return to the more efficient engines for automobiles.

We must become reasonable about environmental demands and establish trade offs between energy development and environmental constraints. We need to review many of the obstructive governmental regulations. We have to take a more rational approach to the prudent use of nuclear energy. Finally, research must be increased to develop every practical energy source as rapidly as possible.

Q. Is it too late to head off our energy shortage?

A. Yes, it is too late to completely eliminate the gap between supply and demand over the next 15 years. Some of the actions we just discussed, however, would decrease oil demand by about 2 million barrels per day and increase the oil supply by some 3 to 4 million barrels per day by 1985.

As I said at the outset, time is running out. No matter what we do, we are going to feel the adverse effect of the energy crisis on our living standards.

America has the resources to solve our energy problem. Our only hope is that the U.S. Congress will put national interests above politics and adopt a comprehensive energy policy that will reduce our energy problem to manageable proportions.

DR. JOHN J. M'KETTA

Dr. John J. McKetta is Professor of Chemical Engineering at the University of Texas and among the country's most qualified spokesmen on the subjects of energy and environment. In 1970–1971, he served as Chairman of the Advisory Committee on Energy to the Secretary of the Interior and, during that period, was among the first authorities to call attention to the serious energy problem facing a then unaware United States. His predictions have been chillingly accurate.

Mr. McKetta is a charter member and a director of the National Council for Environmental Balance. He was Chairman of the Committee on National Air Quality Management for the National Academy of Science and Engineering, 1970–75. In 1976, Dr. McKetta received the coveted Lamme Award from the American Society of Engineering Education, the Joe J. King Professional Engineering Achievement Award and the Triple E Award from the National Environmental Development Association for outstanding contributions to the national issues of energy, environment and economics. He is widely published internationally on these subjects as well as chemical technology, processing and design.

Dr. McKetta's wide scope of interests and accomplishments make him exceptionally well qualified to present a balanced, expert opinion and timely warning about the threatening nature of our country's energy situation today.

THE ITALIAN HERITAGE OF WATERBURY

HON. RONALD A. SARASIN

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SARASIN. Mr. Speaker, on Saturday, February 26, 1977, the Italian Heritage, Inc. of Waterbury, Conn., will be holding its second Carnevale Festival. In celebration of this occasion, I would like to take this opportunity to honor this social organization which has done so much for the city of Waterbury, for Italian-American groups in the area, and for the preservation of the Italian culture.

In April 1975, a group of people from various Italian organizations in Waterbury met together at 30 Center Street to discuss the forming of a new group that would include all Italian-American men, women, and children in the area. Their chief aim would be to promote Italian cultural activities as well as supporting those programs which would benefit the community.

Some of the original members were: Angelo Barbino, Frank Albini, Angela R. Pugliese, Joseph Petino, Charles Lanza, Angelo Izzi, Sal Terenzo, Rosario Costa, Victor Guerrera, John Sarlo, Anthony Mastrantuone, Albert Izzi, Josephine Negaro, Florence Lorusso, Thomas Garrantano, Fred Perugini, Matt Cipaldo, Carmine Gugliotti, Ugo Ciarlo, Frank Porto, Jr., William Bochicchio, Joseph Tramuta, Peter Augelli, Carl Padula, Ed Maglio, Vincent Bruno, Angelina DeAngelis, Sue Calvo, Mary Cappello, Pat Longo, Sal Coppola, Salvatore Perugini, George Testa, Dan Morrelli, and Vincent Onalfo.

These individuals represented such clubs as the Favale-Generali ITAM War Vets, Lega Sicilina, Pontelandolfo Community Club, Ladies of Unico, Ceremaggiore Community Club, Unico National—Waterbury Chapter, Sons of Italy—Leonardo DaVinci Lodge.

The first function of this new united group was a revival of the Italian festival which had not been held for half a century. Lakewood Park was chosen as the site because it was the popular rendezvous place for Italians 50 years ago when Lakewood was a recreation and picnic area with an amusement park and carousel. The festival, held in August 1975, was planned and put together in less than 2 months. Many members felt that the festival should wait until the following year, but the majority ruled that they had waited long enough for this event and that it must go on. The festival turned out to be an outrageous success, drawing over 10,000 people. Seeing all the happy faces of the people in attendance was evidence enough that all the hard work and planning was well worth the effort.

Italian Heritage, Inc., followed up with a carnevale in February 1976. This was patterned after the traditional pre-Lenten celebration. Held in the State armory, the largest hall in the Waterbury

area, it drew 1,200 people which filled the hall to capacity. It was another smashing success. Everyone enjoyed the nostalgia, the renewal of old friendships, the gaiety, the laughter, and the plain, good old-fashioned fun.

After 1 year of existence, the organization had a membership of over 400 people. By 1977, the rolls had increased to over 650. The club branched into other activities. In the spring of 1976, they raised over $2,000 and collected clothing to aid the Italian Earthquake Relief Fund. Monthly meetings are held at the St. Lucy's School auditorium, courtesy of the pastor, Father Thomas Ritucci. The club offers Italian lessons and encourages the learning of Italian ethnic dances. Currently, they are working to establish two music scholarships to send students to Siena, Italy for 6 weeks to study Italian and their music specialty. For this, they will receive college credits from Columbia University.

But Italian Heritage, Inc., has one ultimate dream—to build a large Italian community cultural center. It would be a monument to the community and a source of deep pride to the Italian people, something that would encourage the performance of the arts. Plays, operas, art exhibits, lectures, and other events could be held in this center. The center is a long way into the future, but with determination, leadership, and the willingness of the members to work together toward this goal, it can be done.

I believe that Italian Heritage, Inc., will one day see its cultural center built. If all of their past accomplishments are a good indication, they have the inspiration, the drive, and the strong desire to see that their dreams become reality.

I can only bear witness to the wonderful things they have done for the city of Waterbury, not only in bringing together all the Italian-Americans, but in their vibrant celebration and preservation of the Italian culture. I know that their second carnevale festival will be as big a success as the first, if not bigger, and I want to wish them many more enjoyable festivals in the future.

PAY RAISE HANDLING HURTS CONGRESSIONAL IMAGE

HON. E. THOMAS COLEMAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, February 16, 1977

Mr. COLEMAN. Mr. Speaker, during the past campaign I told my constituents of my intention to oppose automatic pay raises for Members of Congress. I also voiced my opposition to newly established methods of insulating Congressmen from the impact of inflation. Lastly, I promised my constituents I would work to improve the quality of congressional actions and ethics so the image of the legislative body of our Nation might contribute to a new American pride in governmental institutions.

Because of the tactics of the majority in the House of Representatives, the image of the Congress is being hurt instead of helped. By the House's refusal to vote on the pay raise question, the people of this Nation do not know what their elected Representatives believe. And when the people are in doubt, they may decide to blame all of us for something many of us have had no control over and have opposed.

I strongly feel the Congress should be on record as favoring or opposing this pay raise. I feel our constituents have the right to know how we voted on this issue.

Earlier this week, I expressed my views on this issue in a letter to Chairman ROBERT N. C. NIX of the Post Office and Civil Service Committee. Following is the text of that letter:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 16, 1977.

Hon. ROBERT N. C. NIX,
Chairman, House Post Office and Civil Service Committee, Cannon House Office Building, Washington, D.C.

DEAR CHAIRMAN NIX: I would like to express my strong support for H. Res. 115, the Congressional Pay Raise Disapproval Resolution, which is before your Committee. Unless your Committee acts promptly on this resolution, the House of Representatives will not even have the chance to vote on the salary increase which the President has recommended. I do not feel we are being honest with the people we were elected to serve by allowing a scheduled pay raise to take effect automatically without a vote.

I object to the "backdoor" approach which insulates Members from having to publicly register their support for the raise. I strongly support the legislation introduced by Congressman Rhodes to amend the Federal Salary Act of 1967, to require recorded votes on salary proposals. As you know, this resolution would empower any Member to force a recorded vote on salary proposals.

By tying Congressional pay raises to cost-of-living increases, the Congress abdicated its responsibility to combat inflation. What incentive will Congress have to control inflation if its Members are insulated from the effects of inflation? Therefore, I call upon you to hold hearings on the various proposals before your Committee which would repeal the cost-of-living mechanism for Congressional pay raises.

Sincerely,

E. THOMAS COLEMAN,
Member of Congress.

SOLARZ INTRODUCES BILL ON OPIC AND BRIBERY

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SOLARZ. Mr. Speaker, yesterday I reintroduced a bill (H.R. 3603) which passed the House last year to require the termination of investment insurance issued by the Overseas Private Investment Corporation, OPIC, in any case in which the insured investor engages in the bribery of a foreign official for the purpose of influencing the actions of that government in connection with the project for which OPIC insurance has been obtained.

Last year the identical bill, H.R. 14681, passed in both the International Relations Committee and on the floor of the House, only to be stalled in the Senate during the last few weeks of the session. The bill was the only piece of legislation to pass the House which responded in any way to the widespread allegations which have had serious deleterious effects on the conduct of American foreign relations in several foreign countries.

The bill provides one method for dealing with the allegations of bribery. The underlying principle behind the bill is that a U.S. governmental agency such as OPIC should not be insuring investments where the officials or agents of the insured corporation engage in bribery of foreign officials in connection with their investments.

The bill is not an attempt to impose our standards of morality on others. In fact, most countries already prohibit bribery. According to a congressional research study prepared in March 1976, almost all the countries in which OPIC insures investments do have laws against bribery, with about half providing penalties of less than 5 years and half providing penalties of 6 to 10 years.

Moreover, no one need be concerned that the bill would cause a company to be summarily deprived of its insurance. The bill provides full due process procedures in the Administrative Procedures Act to any company accused of illegal payments, including the right to adequate notice, to counsel, and to present evidence. Determinations under the bill can be appealed to the U.S. Court of Appeals.

The problem of bribery has proved to be a serious one with no easy answers. I am concerned not just by the demonstration of shabby morality or the corruption that the bribery feeds but also with the extent to which the conduct of American corporations abroad has damaged American foreign relations. Last year headline after headline appeared concerning some new American multinational company coming forward with an admission of corporate bribery or other foreign payments. And all too often unfortunate political repercussions followed these stories.

In Japan, the government of Takeo Miki was replaced at least in part due to the severe strain resulting from its handling of the alleged Lockheed payoff scandal in the country. At a time of uncertainty due to the shifting balances of power in Asia and uncertainty over our own role in the region, our strongest and most stable ally in the region was undergoing unnecessary turbulence.

In another case, the U.S. ties with a second close ally, the Netherlands, were similarly shaken by the allegations surrounding Prince Bernhard, husband of Queen Juliana and Inspector General of the Armed Forces, suggesting that he received $1.1 million in Lockheed payoffs.

Finally, the payoff scandals involving American corporations and various Italian politicians is a continuing saga in Italian politics, and became an election issue during the parliamentary elections last June. The Communist Party in Italy had many issues to use against the domi-

nant Christian Democratic Party, but the allegations of widespread payoffs only provided an additional strong club to use against past governments.

In short, what is at stake in the bribery scandals is much more than the individual interests of corporations which are competing for a share of foreign markets. What is in fact at stake is the foreign policy and national interest of the United States. It is clearly in our interest to put a stop to these pernicious practices.

At a very minimum a governmental agency such as OPIC should not be insuring contracts where bribery has been used to obtain a contract or to secure advantages. OPIC was, after all, created as an instrument of American foreign policy and is an agency of the United States. That a governmental agency would be in the business of insuring contracts where bribery has been involved is to me contrary to the whole purpose for which OPIC was created.

There are, to be sure, risks and complications in canceling insurance of a company in a case where bribery has been found. But there are even greater risks in continuing to act as before. Revelations of illegal payments have served to embarrass the United States as well as the recipient countries. And the Congress should act to discourage bribery before it creates additional problems for American foreign policy.

Joining me as cosponsors of this legislation are the following 34 Members of Congress:

Daniel K. Akaka, Max Baucus, Berkley Bedell, William M. Brodhead, Yvonne Brathwaite Burke, Shirley Chisholm, William Clay, William S. Cohen.

Baltasar Corrada, Robert F. Drinan, Harold E. Ford, Donald M. Fraser, Sam Gibbons, Augustus F. Hawkins, Elizabeth Holtzman, William J. Hughes.

Andy Ireland, James A. S. Leach, Clarence D. Long, Matthew F. McHugh, Andrew Maguire, Helen S. Meyner, Barbara A. Mikulski, Abner J. Mikva, Norman Y. Mineta.

Robert N. C. Nix, Leon F. Panetta, Robert A. Roe, Edward R. Roybal, James H. Scheuer, Paul Simon, Gladys Noon Spellman, Newton I. Steers, Jr., Charles W. Whalen, Jr.

IMMIGRATION AND JOBS DISPLACEMENT REFORM ACT

HON. TRENT LOTT

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. LOTT. Mr. Speaker, today I have introduced legislation to amend the Immigration and Nationality Act for the dual purposes of strengthening penalties in the law for knowingly employing an illegal alien and to reduce the number of aliens lawfully admitted to the United States during periods of high unemployment. My bill contains many very similar provisions that were included in H.R. 8713, a bill amending the Immigration and Nationality Act, which was ordered reported from the House Committee on the Judiciary on July 30, 1975, but was never considered by the full House of Representatives in the 94th Congress.

A brief summary of my bill follows:

(1) Establishment of a 3-step procedure for imposing sanctions against an employer who knowingly hires an illegal alien:

(a) initial citation;

(b) $1,000 fine per alien for first violation after receipt of a citation;

(c) $5,000 fine and/or one year imprisonment per alien for each additional violation.

(2) Grants amnesty to an illegal alien continuously present in the United States since June 30, 1970, who is a close relative of a United States citizen or permanent residence alien or whose deportation would result in unusual hardship.

(3) Requirement that HEW disclose the name and address of any illegal alien receiving assistance under the Social Security Act.

(4) Provision for deportation of any alien who has become a public charge.

(5) Imposition of a criminal penalty for forging or counterfeiting border crossing cards, alien registration receipt cards, or other entry documents.

(6) Directs the Secretary of State and the Attorney General to proceed to reduce the issuance of immigrant visas whenever the quarterly unemployment rate average exceeds 5 percent. For every percentage point above 5 percent, the number of immigrant visas issued the next quarter would be reduced by 10 percent.

Mr. Speaker, I have been advised that there may be as many as 6.5 million illegal aliens presently in the United States. While it is difficult to find fault with their desire to immigrate to America and while we may have sympathy for them, most of these persons come here seeking employment opportunities to the detriment of the American worker. Upon their arrival, these unlawfully admitted aliens create several problems in our economy: They compete for jobs with low-salaried laborers, depress the wages of U.S. workers, take jobs from Americans causing them to look to various Government agencies for assistance, and contribute to some extent to our balance-of-payments difficulties by sending money earned here to their native countries.

With the national unemployment rate currently hovering around 7.3 percent, I believe it is time that Congress act swiftly, not so much in the direction of temporary public employment, but more toward preventing the displacement of American workers from those jobs that already exist in our economy. My bill would accomplish this goal by placing the U.S. employer on guard against hiring an illegal alien and by reducing the number of legally admitted aliens when our national rate of unemployment exceeds 5 percent.

The three-step penalty procedure in the legislation begins with the service of a citation by the Attorney General on an employer found employing an illegal alien. Should an employer knowingly hire an illegal alien within 2 years after receiving such a citation, he may be fined up to $1,000 per alien. Finally, a subsequent violation by an employer will result in a fine of not more than $5,000 and/or imprisonment of not more than 1 year for each violation.

The second major thrust of this bill is to tie the issuance of immigrant visas with the national rate of unemployment. During periods when the average unemployment rate for a quarter is above 5 percent, the number of immigrant visas for the next quarter is to be reduced. The amount of the reduction is computed by multiplying the average quarterly unemployment percentage in excess of 5 percent times an amount equal to 10 percent of the maximum number of aliens who may be admitted during that quarter.

Mr. Speaker, it is obvious that we have more workers than we have jobs in this country. The legislation which I have introduced today is not intended as a panacea, but in my view it will go a long way toward putting Americans back to work.

AGAINST PAY RAISE

HON. HAROLD E. FORD

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. FORD of Tennessee. Mr. Speaker, I feel compelled to rise today to express dissatisfaction with the way in which the proposed pay raise for the Members of both houses of Congress will go into effect. As a candidate for the office of Representative from Tennessee's Eighth Congressional District, I pledged my personal commitment to oppose congressional pay increases and kept that promise.

As you recall, a similar effort appeared in the 94th Congress. On July 30, 1975, a vote was taken on a measure that would have authorized an automatic cost-of-living increase for high officials of all three branches of Government. President Ford signed the measure into Public Law 94–32 on August 9, 1975. I voted against the bill, objecting not only to the increase but also to the way it was presented—as an amendment to an obscure Senate bill on the Postal Service—thinking then, as now, that the American people should be fully aware of what Congress was doing in this regard. The Senate bill was not the proper vehicle for granting a pay raise. In response I cosponsored H.R. 9364, which would repeal the cost-of-living increases as they applied to Congressmen and Senators. This bill was offered as an amendment to the legislative appropriations bill for 1977, Public Law 94–440, which was signed into law October 1, 1976.

Now the pay raise has reappeared. President Ford included the recommendations of the Commission on Executive, Judicial, and Legislative Salaries in the budget for fiscal year 1978. Thus, the raise was designed to go into effect automatically with no action by the Congress. This is certainly a backwards way of doing things. Most actions are taken by an affirmative vote, but this one will be taken automatically and can be stopped only by a negative vote.

On February 2 the Senate defeated an amendment to the measure reorganizing the Senate committee system which would have disapproved the pay increase. By holding hearings, hopefully the House Committee on Post Office and Civil Service would report a resolution to the full House to give the Members a chance to go on record on this issue. A letter to the

committee chairman, Mr. NIX, expressing this desire now appears:

HOUSE OF REPRESENTATIVES,
Washington, D.C., February 7, 1977.

Hon. ROBERT NIX,
Chairman, House Committee on Post Office and Civil Service, Washington, D.C.

DEAR CHAIRMAN NIX: As you know the Congressional pay increase will go into effect automatically on February 20th, unless the Senate or the House rejects it. The Senate refused to kill the proposed pay increase last Wednesday, February 2, by a vote of 56 to 42.

Because this proposal has been referred to your Committee's jurisdiction without any indication that it will be brought before the House for action, I am writing to you with the hope that this will not be the case. I strongly feel that my colleagues and I should be afforded the opportunity to cast our votes on this important matter. An issue of such a controversial nature should be acted on by the full House and made available for public record.

I am, therefore, requesting that your Committee use its power to insure that this resolution will be considered by the full House. I am convinced that this is the only way.

Sincerely,

HAROLD FORD,
Member of Congress.

As you know, the committee concluded its hearings on February 16 without reporting a resolution to the full House. Many Members deplore this inaction. It is very important for the constituents of the Congress, who ultimately pay the salaries, to know how their Representatives voted on pay increases for themselves.

Mr. Speaker, this is a time of crisis in our Nation's history. Our economy is in a state of stagnation which has only been compounded by the ravages of this winter's cold weather and the resulting energy crisis. President Carter has asked the American people to make great sacrifices for the good of all. How can the Congress of the United States, which is supposed to set an example for the people, justify this exercise of self-indulgence in this time of great need? Only today several long-distance phone calls came in from constituents asking how Congressmen can raise their salaries by an amount greater than the total yearly earnings of many people. Members of Congress are hard pressed to answer this question, but I promised to do all that was possible to stop the pay increase. A short while ago I voted against the motion to adjourn until Monday at noon as a form of protest to the back-door method in which the pay increase is being handled.

Mr. Speaker, the Members of Congress here today should take time to reflect on what has been done, and I thank you for granting the time to express these feelings.

JUDICIAL REVIEW FOR VETERANS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. RAHALL. Mr. Speaker, today I am introducing a bill to amend title 38 of the United States Code to provide for the judicial review of administrative decisions promulgated by the Veterans' Administration, and to allow veterans full access to legal counsel in proceedings before the Veterans' Administration.

The Veterans' Administration differs from other Federal agencies in that its regulations and most of the resulting adjudicated decisions on individual cases are not subject to the scrutiny of the Federal courts. Under title 38, United States Code, section 211(a), the Veterans' Administration is insulated from judicial review, thus denying veterans and their dependents or survivors access to due process of law on decisions of benefit eligibility.

Adjudication of VA benefits falls mainly within two areas: Disability eligibilities and pension eligibilities. In each instance, a local three-member board, made up of VA employees, determines the veteran's eligibility and level of disability payment. The only recourse for a veteran desiring to challenge this determination is an appeal to the Board of Veterans' Appeals, also composed of VA employees in Washington, D.C. The decision of the Board is final and unless new and material evidence is presented, the case is closed. At no point in the process are there provisions for review of VA regulations and adjudicative decisions by persons outside the agency.

Most Federal agencies are subject to the Administrative Procedure Act—title 5, United States Code—which allows judicial review of final administrative actions. Under section 702 of the act, "a person suffering a legal wrong because of agency action, or adversely affected or aggrieved by agency action within the meaning of a relevant statute" can seek judicial recourse. The court can determine whether the agency observed the statutory requirements and adhered to constitutional requirement in its application of administrative procedures.

For example, the Social Security Administration, which uses procedures similar to the Veterans' Administration in establishing disability claims, is covered by the Administrative Procedure Act, and thus its decisions are ultimately subjected to the scrutiny of the Federal courts.

Although veterans may be represented by attorneys in proceedings before the Veterans' Administration, section 3404 (c) of title 38 limits attorneys' fees to $10. The fee limitation, which was implemented more than a century ago in the best interest of the veteran, now imposes a severe burden on veterans seeking just treatment. Less than 2 percent of the claimants appealing to the Board of Veterans' Appeals are represented by legal counsel. Currently, veterans can obtain assistance without charge in the presentation of their claims before the Veterans' Administration from national veterans' service organization representatives and VA counselors. In most cases, the assistance provided by these counselors is of sufficient quality and provides the VA Rating Board with sufficient evidence to render a fair and equitable decision on the claim. However, if a veteran desires the representation of an attorney in these proceedings, the prohibitive fee restriction of $10 places severe restraints on this right.

I believe this de facto prohibition of legal representation may be a denial of the veterans' right to due process as provided by the fifth amendment. Veterans who desire outside legal representation in VA proceedings should be able to exercise that right. In this regard, too, the Social Security Administration offers a far better system. Although it was also once bound to the $10 fee limitation, that agency long ago instituted a sensible formula to determine reasonable attorneys' fees on a case-by-case basis. Legal representation more than doubled as a result. It is time for the VA to follow suit.

Mr. Speaker, opponents of this proposal argue that opening the VA to judicial review would flood the Federal courts with cases. That claim, however, is baseless.

The Veterans' Administration does process tens of thousands of benefit claims annually, but a review of the statistics shows that the Board of Veterans' Appeals, the final reviewing body for disputed claims, handled only 43,000 cases, or a fraction of the original number, in fiscal year 1975. Of these, 26,000 were reversed or remanded to the local rating boards for their reconsideration. This left approximately 17,000 cases which could have been brought before Federal courts for review. This number would likely be even smaller, because of the financial burden of litigation and the refinement of the internal claims adjudication procedures of the VA. It must also be pointed out that the veteran must exhaust all internal administrative remedies and follow the procedure act before a case can be brought before the Federal judiciary.

The real issue, however, is clear. Do we deny the American veteran access to judicial review, because Congress feels justice is too expensive or would increase the workload of our judicial system? I think not.

Some opponents to the concept of judicial review of VA decisions also say that such issues as disability compensation and benefit eligibility are too technical for the courts to review. But that argument ignores the fact that most other agencies such as the Social Security Administration with its complex and technical regulations, are subject to independent review by the courts of their adjudicative procedures. Furthermore, the Federal court, under the guidelines of the Administrative Procedures Act, would only entertain appeals for the review of a final VA action if it is alleged that the final action is first, arbitrary and capricious; second, an abuse of discretion; third, an excess of statutory jurisdiction; fourth, if it failed to observe the procedure as required by law; or fifth, if it was otherwise unlawful.

Still another argument against judicial review is that it would destroy the uniformity of VA decisions. It is my belief that an independent review of VA regulations, under the provisions of the Administrative Procedure Act (title 5, United States Code, sections 556 and 557), and review of individual VA ad-

judicated decisions will only improve the uniformity of the decisionmaking process.

Although the VA now publishes its proposed rules and regulations, which ultimately govern its administrative and adjudicative procedures, it is not required to do so under Federal statute. Once these regulations become final, they are not subject to the scrutiny of the Federal judiciary. Therefore, the VA not only writes its own rules and regulations, but they are immune from the public and judicial review that most other Federal agencies are subject to under law. Once the VA renders a final decision on the case, that decision is final. To the veteran, this means that not only are the administrative decisions which determine his benefit eligibility exempt from court review, but so are the regulations and procedures which shape those decisions. There is no avenue for appeal outside the agency.

Mr. Speaker, this legislation will require the VA to comply with the specific rulemaking procedures set forth in chapter 5 of the Administrative Procedures Act. By placing the VA under the scrutiny of the well-structured rulemaking procedure of that act, veterans and other affected parties will be granted the right to challenge proposed rules. Congress will thereby insure some degree of protection from the tyranny of unrestrained and capricious bureaucratic action.

Mr. Speaker, I believe that a fundamental issue before Congress today is the accountability of Federal agencies. To deny a citizen access to an attorney, and also to isolate a Federal agency from the scrutiny of the Federal courts goes against the very principles of our constitutional system.

OCEAN DUMPING BACKGROUND INFORMATION

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. FORSYTHE. Mr. Speaker, the ocean disposal of sewage sludge has never been accepted as a long-term solution to our sludge disposal problems. Unfortunately, no viable alternatives to dumping have been developed. Consequently, we have been forced to continue a procedure which can be aptly titled an environmental tragedy.

Unfortunately, while sludge dumping is a highly visible contributor to environmental degradation, other factors also produce major effects on our ocean environment. In order to clarify this highly complex situation, I would like to provide for the information of my colleagues in the House some background information on ocean dumping and a recent proposal to shift the present site in the New York Bight to a new site 106-miles off the New Jersey coast:

OCEAN DUMPING

INTRODUCTION

Ocean dumping in the New York Bight area began in 1924, ushering in a host of environmental ills. The deterioration of the dumpsite area, accompanied by a decline in the health of local fish resources, is an environmental tragedy.

Unfortunately, the plummeting quality of New Jersey's and New York's coastal waters can be attributed to a broad spectrum of stresses—not just ocean dumping. The most notable contributor of pollutants to the coastal waters is estuarine input. Each day, streams and rivers carry untold quantities of untreated sewage, industrial wastes, and contaminated sediments into our coastal waters.

This past summer, two environmental disasters occurred in the mid-Atlantic region. Debris, sometimes referred to as "floatables," washed up on the Long Island coast line. These floatables have been traced by scientists to pollutants entering the New York Bight system through the Hudson River-Raritan Bay estuarine system.

The summer of 1976 also witnessed a massive fish kill off New Jersey's coast. Scientists have linked this fish kill to an extensive bloom of algae. This bloom of algae began in January of 1976 along the edge of the Continental Shelf from Cape Cod to Cape May. Scientific monitoring of dumpsite activities indicates that sewage sludge dumping played no role whatsoever in this unusually vast January bloom. As the algae moved towards shore, it decayed—consuming oxygen. Thus, broad expanses of New Jersey's bottom waters became oxygen-depleted. Furthermore, highly abnormal weather conditions in 1976 prevented bottom waters from mixing with oxygen-rich surface waters. Therefore, oxygen-depleted conditions persisted, and bottom-dwelling fish resources, such as surf clams, suffocated. In addition, some of the decayed algae (bearing a resemblance to sewage sludge) washed up on New Jersey's coast line.

While these two environmental disasters have brought the environmental problems of the mid-Atlantic area into a sharp focus they were not caused by the ocean dumping of sewage sludge. This report analyzes the impact of ocean dumping in the mid-Atlantic region. This report examines the logic in moving dumping activities to new dumpsites and summarize the scientific consensus that such a move is likely to cause "more harm than good." In particular, the wisdom of moving large-scale dumping activities to deep-water sites is discussed and the reasons why scientists oppose this move, which would "permanently and adversely change the ecosystem." [1]

A short-sighted and prodigal proposal to move all ocean dumping to a site 106 miles off-shore is discussed in this report. This proposal, announced by New Jersey Commissioner of the Department of Environmental Protection, David Bardin, would permanently degrade the deep-water dumpsite. Mr. Bardin admitted at the time of his recommendation that "pitifully inadequate data on both the biological and physical conditions" exist for the 106-site and that his recommendation is "not based on the firm and solid evidence we would prefer."

I have looked into this proposal and found frightening possibilities. Scientists believe that dumping at the 106-site will "permanently and adversely change the ecosystem." A study conducted by the National Oceanic and Atmospheric Administration determined that dumping at the 106-site could introduce waste materials into areas where important red crab, flounder, butterfish, lobster, squid, and hake fisheries exist.[2]

Furthermore, Mr. Bardin suggests that sewage sludge dumping was an important factor in the summer fish kill and that a shift to the 106-site would reduce the likelihood of future fish kills. The scientific data do not support this claim and, it appears to me, this natural disaster is being used by DEP to justify a fundamentally unsound proposal. All evidence presented during hearings held this summer by the Subcommittee on Fisheries and Wildlife Conservation and the Environment, of which I am the ranking Republican member, and the Oceanography Subcommittee of the House Merchant Marine and Fisheries Committee supports my position. A high official from the National Oceanic and Atmospheric Administration has summarized the scientific consensus, stating on the record: "It is evident from all information available that the dumping of sewage sludge at the existing site had a negligible effect in causing either the wash-up of floatables on Long Island's south shore beaches or the fish kill off the coast of New Jersey. The sewage sludge dumpsite should not be moved." [3]

Furthermore, moving dumping activities to the 106-site away from the present sites will cause potentially great environmental damage at the new site, while offering little relief for the present site. Scientists note that the present dump site would not improve because of the continuing "mass-emission rates of pollutants from shoreline outfalls, rivers and embayments." [4] A NOAA technical report concludes: Available evidence does not indicate any environmental advantages which might result from moving of sludge site. Temporary utilization of a new site is likely to result in more harm than good.' [5] Thus, the proposal to move ocean dumping to the 106-site is scientifically indefensible.

The proposal to move the dumping to the 106-mile site would, according to the New Jersey DEP, cost an extra $24 million a year annually. The $24 million increase does not include increased fuel costs (DEP estimates 9 times as much fuel would be required) and the cost of obtaining additional ocean dumping barges.

I firmly believe in both fiscal and environmental conservation. Squandering millions of dollars of funds, increasing fuel consumption, and risking severe environmental damage in an area adjacent to key fishing grounds is, in my mind, a reckless and irresponsible endeavor.

Finally, this report describes the plan which I have formulated to efficiently and expeditiously end ocean dumping. I plan to introduce amendments to the Marine Protection, Research and Sanctuaries Act as soon as our committee business is underway which would require ocean dumpers, when requesting a permit, to pay a significantly increased permit fee. Under this plan, ocean dumpers would have to pay for the administrative costs involved in processing ocean dumping permit applications, and for research into constructive alternatives for sewage sludge disposal. My plan will increase the costs of ocean dumping to such an extent that existing constructive alternatives will be economically preferable to ocean dumpers. Simultaneously, the costs of these constructive alternatives will be reduced as a result of research funds generated by penalty fees.

I feel that this proposal will induce municipalities such as New York and Philadelphia to turn as quickly as possible to constructive alternatives. These alternative techniques are capable of converting sewage sludge into soil conditioner, sanitary land fill, or energy. At the same time, no additional environmental deterioration of the mid-Atlantic region will result from ocean dumping activities. I am both hopeful and confident that the proposed plan, based on a careful analysis of the existing situation and a thorough assessment of all alternatives, is the best possible way to end the destructive practice of ocean dumping and to encourage and expedite constructive uses of these wastes. I feel strongly that this approach, which makes optimum

---

Footnotes at end of article.

use of our financial and environmental resources, is unquestionably superior to other proposals regarding mid-Atlantic ocean dumping. I particularly oppose suggested recommendations which are based on political expediency—not environmental concern—including the proposal to move all dumping activities to the 106-mile site.

FEASIBILITY OF ALTERNATE DUMPSITES

While scientific studies indicate there is some logic in using either of two dumpsites located 25–30 miles off the New Jersey coast, there is no doubt that wastes containing solids should not be dumped at the 106-mile site. The almost total lack of data regarding the 106-mile site makes any recommendation to dump secondary sewage at this site ill-conceived.

The National Oceanic and Atmospheric Administration has been responsible for studying potential sites for dumping sewage wastes. Much of NOAA's effort has involved examining two sites approximately 25–30 miles off the New Jersey coast. An EPA environmental impact statement on the Ocean Dumping of Sewage Sludge in the New York Bight concluded: "Continued dumping of present volumes of sewage sludge at the existing dumpsite would result in slight additional adverse environmental impact." [6] EPA determined that moving the dumpsite would not significantly improve the water quality of the Bight Apex because the vast majority of pollutants entering the Apex are from other sources. EPA flatly recommended that, "The existing sewage sludge dump site should continue to be used." [7]

EPA summarized its study of the likely consequences of shifting dumping from the existing site to either of the sites 25–30 miles off the New Jersey coast:

"A thorough review of the most recent information, including onsite investigations, indicates that the proposed action, immediate designation and use of an alternate dumpsite, is unjustified. Continued use of the existing dumpsite is not a present threat to public health or to water quality along the beaches of Long Island or New Jersey. Moving the present sludge dumping operations to an alternate dumpsite without adequate justification will result in the unnecessary contamination of a relatively pristine area of the Bight. Moreover, contamination of a new area will not be balanced off by a recovery of the existing dumpsite. The existing site and its surrounding area are not expected to significantly improve even if sludge dumping is terminated because pollution from other sources will continue." [8]

While the scientific community has determined that ocean dumping should not be moved to alternate sites which have been adequately studied, scientists are even more adamant in opposing dumping at a site where the ramifications are not understood—such as the 106-site. Mr. Gerald Hansler, EPA's Region II Administrator, has stated in hearings before our Subcommittee in early 1976 that on-shelf dumping should be considered, "because of the unknown environmental risk associated with off-shelf dumping of solids". [9]

Dr. Wilson Talley, Assistant Administrator for Research and Development of EPA, summarized, during Sept. 1975 hearings before the Committee on Science and Technology, the scientific sentiment about dumping at a deep-water site such as the 106-site: "There is considerable question among the scientific community regarding disposal sites off the Continental Shelf, and monitoring of such sites is both extremely difficult and expensive". [10] Dr. Holger Jannasch of the Woods Hole Oceanographic Institution added that if there must be offshore waste dumping, it should be done in shallow water where the organic material "can be recycled in a more controlled manner". [11] Waters at the 106-site are over one mile deep. It should be noted that liquid wastes, which are currently being dumped at the 106-site to a limited extent, stay near the surface and are recycled. However, when wastes, such as sewage sludge, contain particulates, they tend towards the deeper waters and serious environmental complications occur.

The National Academy of Sciences, in a report submitted to EPA entitled *Disposal in the Marine Environment: An Oceanographic Assessment*, was very forceful in its findings in regard to using a deep-sea dumping site such as the 106-site. The NAS report concluded, "No disposal site should be abandoned in favor of a new site until field data evaluation demonstrates that the new site is less objectionable from an environmental standpoint than the old site." [12] The report continues, "Data supporting the deep sea as a site for waste disposal are lacking; therefore, extreme caution must be applied to any but the most innocuous use of the area." [13]

Scientific objections to dumping wastes containing solids, such as Philadelphia and New York sewage sludge which has undergone secondary treatment, center on three concerns. First, solids dumped at a deep-water site will tend to sink to the bottom. At depths upwards of 9,000 ft., very little decomposition occurs because of the high pressure and low temperature. Thus, solid wastes dumped at deepwater sites will generally not be recycled and will be, for all intents and purposes, a permanent intrusion on the marine environment.

Second, investigating the impact at such depths will be virtually impossible. Scientists cannot effectively monitor the processes which will occur in such deep water; therefore, severe environmental damage may go undetected. Third, currents in this area are not understood. Persistent contaminants could be transported anywhere in the Northwest Atlantic Region. For example, there is evidence that sewage sludge dumped at the 106-site could, over the course of years, partially contaminate rich Northwest Atlantic fishing grounds.

The persistence of solids in deep-water areas had been well-documented. In a paper entitled, "The Oceans as Ultimate Sinks for Wastewaters and Wastewater Residuals," Dr. Richard Barber and Dr. William Kirby-Smith relate the following incident:

"In 1968 the research submersible *Alvin* of the Woods Hole Oceanographic Institution sank in 1540 meters [about 5,000 ft.] of water during a launching accident in which the crew of three escaped safely. A photograph taken eight months after the sinking by USNS *Mizar* showed the submersible lying on its side with the hatch open. After ten months *Alvin* was raised and the crew's lunches were found to be surprisingly well preserved. . . . The Woods Hole group (Jannasch *et al.*, 1971) found that the appearance, taste, smell, consistency and bacteriological condition of several sandwiches and apples indicated that little microbial degradation had occurred." [14]

Dr. Barber and Dr. Kirby-Smith conclude from this incident that—

"The very low turnover rates indicate that organic rich waste would accumulate on the sea bottom if dumped beyond the continental shelf and the organic overload from even a short period of dumping might persist for centuries or longer. Taking togetner the evidence for very slow microbial degradation and the fragile nature of the deep ocean benthic community, we can predict that any significant amount of waste disposal will permanently and adversely change the ecosystem. The evidence upon which we base this prediction is meager but adequate to state with some confidence that organic waste disposal beyond the continental shelf would violate the basic recommendation of the Ocean Dumping Law in that permanent degradation of the deep ocean community will result." [15]

Scientists at Woods Hole have indicated that, along with the greatly decreased decomposition of wastes in deep waters and the greater sensitivity of deep water organisms, monitoring is a major drawback of off-shelf dumping. Since serious environmental degradation cannot be detected, corrective measures cannot be taken.

The fact that sewage wastes dumped at the 106 deepwater site can cause severe environmental damage is complicated by the ocean currents in the area. A NOAA report entitled, "May 1974 Baseline Investigation of Deepwater Dumpsite 106" concluded, "Little is known of the circulation in the area of the deepwater dumpsite, although waters shoreward and seaward of this site have been studied extensively." [16] The NOAA report points to a number of potentially grave consequences of dumping at the 106 site, including contamination of rich fishing grounds.

The report notes:

"Prolonged southerly winds after a dump could quite conceivably cause waste materials to drift onto the upper slope, where the developing red crab fishery would be active or even to the outer shelf where there are several seasonally active fisheries (flounder, porgy, butterfish, lobster [caught] by US. fishermen; squid and butterfish by the Japanese: squid by the Spanish; hakes by the Soviet block)." [17]

Thus, the scientific evidence makes it clear that moving the dumping activities of Philadelphia and New York has little-understood, yet potentially disastrous, consequences. Furthermore, moving dumping activities away from the New York Bight carries little hope for improvement of the Bight area. In hearings before our Committee in early 1976, Dr. Donald Marineau, Deputy Associate Administrator for Marine Resources of NOAA, stated that ". . . moving the dumpsite would not result in any significant overall improvement of the water quality of the Bight apex because the effects of the dumped sewage sludge are masked by the larger mass-emission rates of pollutants from shoreline outfalls, rivers and embayments." [18] The logic seems clear that, in the words of Dr. Martineau, "The sewage sludge dumpsite should not be relocated." [19]

NATURAL GAS PRICES MUST BE DEREGULATED

HON. ROBERT W. KASTEN, JR.

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. KASTEN. Mr. Speaker, several weeks ago we met to pass the Emergency Natural Gas Act of 1977. At that time, no one pretended that this measure was anything more than a stop-gap approach to meet the crisis situation that had developed in several areas of the country. We all knew then that congressional action on the energy issue had only begun and that the real work lay ahead.

We can no longer postpone action to establish a comprehensive national energy policy—a policy that will promote conservation, increase supply and develop new alternative fuels.

With respect to natural gas, I believe we can move quickly. I am, therefore, pleased to join my colleague, Congressman ROBERT KRUEGER, in the introduction of legislation to deregulate the price of natural gas.

Mr. Speaker, I do not believe it is necessary to provide a lengthy discussion of why this legislation must be enacted soon. While confusion may exist as to the accuracy of statistical data on the size of current reserves, we must face up to the broader issues involved in the debate on deregulation.

Since 1945 natural gas moving in the interstate market has been subject to price controls. As a result of such controls on a premium fuel, prices have been artificially depressed supposedly to protect the consumer. Because of its low price, natural gas consumption grew at an average of 6.5 percent annually during the 1950's and 1960's. By 1974 it was providing over 30 percent of our energy needs.

At the same time that demand was increasing, however, exploration and development of new reserves was declining. Since 1968 we have been consuming more natural gas every year than producers have been adding to reserves.

The severity of this winter's shortages underscores the short-sightedness of our policy. The issue is no longer low consumer prices but whether we can get sufficient supplies in the first place.

We cannot continue a policy of artificially depressing prices or this winter's shortages will become the prelude to a constant losing battle every time the weather turns cold. We have lived on borrowed time for too long. No excuse mitigates the stark reality of Americans losing their jobs, missing school or freezing in their homes because of a natural gas shortage.

The legislation we are sponsoring will alleviate that situation by removing the obsolete structure of price controls which has impeded exploration and development of new reserves. It would permit natural gas to reach its market price. Yes, it means that consumers will pay higher prices. But, it also means that we will be providing the necessary incentives to discover new sources of supply.

The bill we are introducing does the following:

Immediately deregulates the price of new onshore production of natural gas at the wellhead;

Phases deregulation of offshore production over a 5-year period;

Prices during that interval would be determined on the basis of prospective costs, capital formation needs, promotion of energy conservation and consumer protection;

Establishes a priority for essential agricultural and industrial use of gas in interstate commerce, subject only to provisions for residential and small commercial use and health and safety requirements;

Grants priority status for natural gas use in the production of fertilizer and essential agricultural chemicals;

Bans the use of natural gas for boiler fuel;

Mandates an FPC study of the natural gas industry with accumulation of information on reserves and usage of current supplies.

Mr. Speaker, I see no reason to engage in a prolonged study of this bill. We have addressed these issues before, most recently in the last Congress. While I have voted consistently to decontrol the price of natural gas, it seems that when the weather gets warm and the pressure is off, decontrol legislation is set aside for further consideration. I sincerely hope that this is not the case this time around.

Deregulation will not solve our energy problems. It is the first essential step that must be taken in the development of a comprehensive national energy policy. The sooner we begin, the better for the American people.

LITHUANIAN INDEPENDENCE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. MOAKLEY. Mr. Speaker, on this day, 59 years ago, an event of extreme significance occurred for those of us who embrace the ideals of freedom and the protection of human rights. February 16, 1918 marks the anniversary of the Lithuanian Declaration of Independence.

A nation whose history can be traced to the 11th century, Lithuania has been thwarted time and time again from functioning as a free and independent nation. After 120 years of cruel subjugation to Czarist Russia, followed by German occupation during World War I, the proud Lithuanian people threw off the yoke of totalitarianism, declared its independence and started on its role as a free nation, full of hope and promise.

Having been held in Communist hands now for so long, recounting their recent history shows the world a people firmly dedicated to freedom and self-determination in the face of overwhelming odds. Within just a few short months of her independence, Lithuania again found herself engaged in a fight for her very survival against the armies of both the White Russians and the Russian Bolsheviks attempting to restore Russian rule. By 1921, though, Lithuania had succeeded in repelling its massive neighbor to the east and had firmly established her independence.

For a time during the post war period, it looked as though Lithuania was finally assured of a separate national identity. She entered into diplomatic relations with the major European powers in a spirit of friendship and cooperation. She experienced the normal domestic growing pains of most new nations but maintained relative political stability.

Adolf Hitler's rise to power signaled danger for Lithuania and her sister states along the Baltic Sea. He had clear designs in Eastern Europe, and those most certainly involved the Baltic States. In addition, the Soviet Union had revived its expansionary hopes with respect to the communizing of Eastern Europe as a natural defense against Germany. Lithuania was, once again, caught between the hammer and the anvil.

The years 1939 and 1940 sealed the little country's fate. In July of 1939, Germany seized Memel and within a month of that occurrence Germany and Soviet Russia signed that now infamous nonaggresion pact. As we now know, this agreement contained secret clauses giving Stalin a free hand in dealing with the Baltic States. Stalin soon proved himself capable of exercising this free hand. Early in 1940, under severe diplomatic pressure from the Russians, the Lithuanians allowed the stationing of Red troops on Lithuanian soil. With no hope of assistance from the Western World, the Lithuanians capitulated to the Soviet demands. With the whole world watching France fall to the Nazi machine, the Baltic States were simply incorporated into the Soviet Union without so much as a nod of disapproval from the West.

Lithuania would not give up resistance. When the Germans invaded Lithuania in 1941, Lithuanian nationalists rose up in righteous indignation and shipped the Soviets back to Russia. Unfortunately, the Reich's policy differed little from that of the Kremlin and 3 years of Nazi oppression began.

Late in 1944, Soviet armies reoccupied Lithuania, and the Communists resumed the reign of terror initiated in 1940.

After the end of the war, news leaked out to the West that a mass deportation of Lithuanians to the Soviet hinterland was occurring while thousands of more fortunate individuals escaped to freedom across the Baltic Sea.

I have mentioned the struggle of the Lithuanian people over the past 70 years in tribute to the silent and subjugated status of 3 million of our fellow human beings. We must offer hope, not despair and faith, not resignation in the Lithuanians' dream of freedom and self-determination.

Soviet domination has endured now for 33 years. Propaganda would assure those of us in the West that the Lithuanian people are delighted with their satellite status: that Soviet methods of farming and industrial techniques have prompted industrial growth never before dreamed of in Lithuanian history. We are told that the Soviet educational systems and social reforms have fostered a cheerful and great people. Obviously, this is a sham. The people of that once proud land are still yearning for freedom. The spirit of Lithuanian freedom is not dead—it does not even lie dormant. It exists in the hearts of all freedom loving Lithuanians throughout the world.

It is clearly understandable as I mentioned at the outset, why Lithuanian Independence Day is a special day in the annuals of man's quest for freedom. Our activities here in this Chamber today, as well as those in Lithuanian communities around the country carry with them a recognition of that fact and a feeling of hope for the future of the captive Lithuanian people.

We must never forget the fight waged by Lithuanians for freedom. As Americans we enjoy the blessings of freedom. Lithuanian-Americans have a special stake in striving for that freedom for all men, for all peoples.

THE PLO'S TERRORIST SUPPORT NETWORKS IN THE UNITED STATES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. McDONALD. Mr. Speaker, the second of two support conferences for the Palestine Liberation Organization will be held at the Maryland 4-H Center in Chevy Chase, Md., this weekend, February 20–22, 1977. The occasion will be the national membership conference of Breira "Alternative" in Hebrew, which pretends to be a Zionist organization but which in fact is a support group for the Soviet-supported terrorist PLO.

The support campaign for the Palestinian terrorist organization has two parallel branches: a "Jewish operation" coordinated in the United States through Breira designed to split away traditional support for Israel; and an "Arab operation" of U.S. revolutionary Marxists long in direct contact with the PLO terrorists such as the Middle East Research and Information Project—MERIP—the Palestine Solidarity Committee—PSC—and other groups.

The two parallel terrorist support campaigns come together in the Institute for Policy Studies—IPS—a Washington-based, internationally active "think tank" which in its many projects and scenarios for revolutionary change has never excluded the role of violence and which has members of terrorist organizations on its domestic and foreign staffs.

Featured at the Breira conference will be Matti Peled, chairman of the Israel Council of Israeli-Palestine Peace, who has been meeting with the PLO terrorists and urging support for PLO demands, particularly that a PLO-run mini-state be set up on the West Bank under the protection of the Soviet and Third World-dominated United Nations which would provide the PLO with the base from which to attack Jordan and Israel. Peled will be joined by Irving Howe, a writer who previously found virtue in the Vietcong cause; and by Arthur Waskow, a founder and senior fellow of the Institute for Policy Studies.

Waskow and Peled were featured this past weekend at another, related PLO support conference also held at the Chevy Chase 4–H Center and sponsored by the American Friends Service Committee—AFSG—in cooperation with the Washington area chapter of Breira which is called Tzedek Tzedek "Justice" in Hebrew, referring to Deuteronomy 16: 20. Tzedek Tzedek is headed by the ubiquitous Arthur Waskow.

On November 15, 1976, at the behest of Art Waskow and other IPS figures, the American Friends Service Committee arranged a meeting between representatives of the Palestine Liberation Organization, Breira, and three leading members of American Jewish organizations. One month later, Waskow described his version of the meeting in an op-ed page essay in the New York Times, December 16, 1976.

The representatives for the PLO terrorists were Sabri Elias Jiryis, named by Waskow as "the PLO's leading expert on Israel and Zionism"; and Dr. Isam Sartawi, "one of the high commanders of Al Fatah and a close aide of Yasir Arafat." Jiryis, an Israel Arab educated at Hebrew University, was expelled from Israel when his membership in Arafat's Al Fatah terrorist group was discovered. Wrote Waskow of the two terrorists, "They or their close associates had met previously with leading Israeli doves and in New York with American-Jewish leaders," attempting to justify the meeting. Waskow omitted the fact that the "leading Israeli doves" are really Peled and his pro-PLO "peace" group, and that the "American-Jewish leaders" were members of Breira.

Those who met with the PLO representatives, in addition to Waskow, were Rabbi Max Ticktin, vice-chairman of Breira and national director of the department of field services and leadership training of B'nai B'rith's Hillel Foundations who has long been a Waskow crony in the radical Fabrangen coffee house and other projects; Olya Margolin, a member of the staff of the National Council of Jewish Women; David Gorin, regional director of the American Jewish Congress in Washington, D.C.; and Herman Edelsberg, the former director of the B'nai B'rith International Council.

Waskow claimed that the PLO representatives "began the conversation by stating that the PLO is prepared to accept the existence of 'two sovereign states on the territory of Palestine—a Palestinian state and a Jewish state.'"

Messers. Gorin and Edelsberg said after reading Waskow's New York Times article that exactly the opposite was true. The PLO speakers said that the PLO was the legitimate government of Jordan and the territory of Israel—the original area of the British Palestine mandate—and that it would accept a "Jewish state in Palestine" but not the State of Israel.

Waskow then constructed an elaborate argument on behalf of "an independent Palestinian state on the West Bank and Gaza." Asserted Waskow, Israeli acceptance of a PLO-run state "would strengthen Palestinian doves" whom he identified as Jiryis, Sartawi and therefore their leader, Arafat. The publicity campaign to present Arafat and the PLO as "moderates" has been underway for several years in the mass media.

As planned, the PLO's U.S. meetings have been a propaganda triumph. As I pointed out to my colleagues on July 2, 1976, the plans for the U.S. meetings were developed by leading members of the Institute for Policy Studies early in 1976. The proposal originated with Saul Landau, a Castroite Comunist who is co-director of IPS's international operation, the Transnational Institute—TNI—the IPS codirectors Richard Barnet and Marcus Raskin, and Samuel Rubin, retired Faberge chairman, Old Left activist, and major source of overt funding for IPS/TNI. It is noted that Arthur Waskow was not part of this early planning cabal.

Rubin was to set up private meetings among PLO representatives, Breira, Israeli "doves" who favor accommodation with the terrorists, several public officials, and members of the American Jewish community.

Even if unsuccessful in establishing a rapport between the PLO terrorists and the Americans, the very fact of the meetings could be used to "legitimize" the terrorist organization and its methods. And this, despite the vehement protests of Messrs. Edelsberg and Gorin, is what has happened: Waskow's PLO meeting is being used to claim a new "neutrality" of attitude toward the PLO.

A brief political background on "moderate" terrorism is in order at this point. In 1974 a split developed in the Palestine Liberation Organization, an umbrella coalition of several terrorist organizations which was taken under the tutelage of the Soviet Union in 1968 after the defeat of the Syrian and Egyptian armies in the six day war. In brief, the PLO majority which included Yasser Arafat's Al Fatah, Naif Hwatmeh's Democratic Popular Front for the Liberation of Palestine—DPFLP—and As Saiq's, guerrilla units which were part of and under the command of the Syrian Army, decided to follow the Soviet Union's sug-

gestion and support U.N. Resolution 242 for a Geneva Middle East Peace Conference and press for any territory on the West Bank, Golan Heights or Gaza Strip to be placed under PLO control. As a tactical tradeoff, the PLO "moderate" majority would restrict its international terror operations, letter bombs, and assassinations and would restrict terroristic activity to Israel where bombings, arson, land mines and similar outrages against civilian noncombatants has continued.

Supported by the "hard-line" countries such as Libya and Iraq, the PLO minority led by the Marxist-Leninist George Habash of the Popular Front for the Liberation of Palestine—PFLP—and Iraq's own Arab Liberation Front—ALF—guerrillas split and became known as the Rejection Front. Both factions are receiving support from the Soviet Union. The Rejection Front receives arms and equipment from the Soviet bloc via Libya and Iraq which redistribute weapons for the Soviets. The July 1976 hijacking of the Air France jet to Entebbe was a Rejection Front operation to gain demands for the PLO and Lebanese leftists in the civil war.

Arafat's reduced PLO split with the Syrians after the PLO, which controlled the southern parts of Lebanon, allied itself with Lebanese Communist and revolutionary groups in an attempt to take over Lebanon in a civil war. The Syrian Army invaded Lebanon in June—"Black June" as the PLO calls it—and eventually defeated the PLO/Lebanese left forces.

In September 1976, a Palestinian commando unit called Black June, linked to both the Rejection Front leadership in Iraq and to Al Fatah, raided the Semiramis Hotel in Damascus killing civilians and taking hostages. Syrian authorities counter-attacked and publicly hanged the captured terrorists. In mid-November, Black June terrorists attacked the International Hotel in Amman, Jordan. Jordanian Army personnel stormed the hotel and killed all but one of the terrorists. The captured terrorist confessed and provided a great deal of information about the new terrorist campaign. He too was later hanged. Early in December, Black June took responsibility for the wounding of the Syrian foreign minister in an attempted assassination in Damascus. The PLO revolutionaries have repeatedly stated that the more moderate Arab governments, particularly Jordan and Saudi Arabia, are their targets for destruction as well as Israel.

Although the regular PLO and the Rejection Front differ on tactical matters, their goals are virtually identical and the two factions remain in close touch.

BAGHDAD SYMPOSIUM

Representatives of both Arafat's PLO and Habash's Rejection Front attended and participated in the November 1976 "International Symposium on Zionism as a Racist Phenomenon" held in Baghdad and organized by the Iraqi Government.

Some 300 pro-PLO activists from the Soviet bloc, Western Europe, Africa, the Middle East, and North America listened to over 40 "research papers" delivered by "scholars" like Roger Garudy, a member of the Politburo of the French Communist Party; Elia T. Zureik of Queens University, Canada—"Consequences of Zionism for Palestinian Class Structure"—Joe Stork of the Institute for Policy Studies and the closely related Middle East Research and Information Project—MERIP—"A Political Analysis of the Economic Dimensions of the Arab Resistance to Zionism"—Alan R. Taylor, professor of International Relations at American University; Prof. Gordon Walter; Lincoln University political science professor Richard P. Stevens; Michael C. Hudson of the Association of Arab American University Graduates—AAUG—and director of Georgetown University's Center for Contemporary Arab Studies; and Abdeen Jabara, a Detroit member of the National Lawyers Guild and past president of the AAUG who is suing the Federal Government on the grounds that he was overheard on 13 national security wiretaps. Jabara's lawyer, John Shattuck of the American Civil Liberties Union, has said he is sure his client would not have been involved with "very many" foreign agents. The question is how many is "very many"—13?

The Baghdad conference, attended by both PLO factions, reaffirmed the terrorists' demand for the destruction of the present Israeli State.

Jabara in the late 1960's and early 1970's was editor of Free Palestine which militantly supported the actions of the terrorist organization. IPS/TNI fellow Eqbal Ahmad, an expert on "counter-counter-insurgency" active in exposing U.S. antiguerrilla plans, has written for the Free Palestine publication. In 1971, with IPS codirectors Richard Barnet and Marcus Raskin among the plaintiffs, Jabara filed suit in Federal court to obtain U.S. "Government studies on contingency plans for U.S. military intervention in the Middle East," a set of documents of immeasurable benefit to the Soviet Union and the PLO.

The Institute for Policy Studies and the AAUG set up by attorney Jabara have worked together and through the Middle East Research and Information Project—MERIP—in which a number of openly pro-PLO IPS staffers have worked, including some now active in Breira.

IPS figures such as Marc Raskin, Sharon Rose, Joe Stork, and Paul Jacobs have been featured speakers at AAUG meetings. Jacobs, who admitted publicly in the early 1960's that he had been a Communist Party, U.S.A. member for 7 years, is a fellow of IPS's international subsidiary, Transnational Institute—TNI. The IPS/TNI codirectors in 1976 were the Castroite Communist Saul Landau and Orlando Letelier, exposed after his murder last September as a paid Cuban intelligence agent, if not a direct KGB operative.

Another TNI employe is Tariq Ali, a Pakistani living in Great Britain who is a leading member of the United Secretariat of the Fourth International, the Trotskyite coordinating body which engages in terrorism itself, and which maintains contacts with dozens of Marxist terrorist organizations. The Fourth International Trotskyites are also on excellent terms with the Cuban Communists, and has coordinated terrorist activities with the Cubans since 1962. The Fourth International has maintained contact with Palestinian terrorists for many years. Tariq Ali's International Marxist Group, the British Fourth International section, is in contact with CIA defector Philip Agee, who openly admits to working with Cuban espionage officials in his attacks on the CIA.

Tariq Ali's salary is in effect paid by IPS trustee Sam Rubin, whose foundation gave more than $1.2 million to TNI in 1973. When Ali was in this country in 1968, he met with the leaders of the U.S. Fourth International section—the Socialist Workers Party—SWP—and addressed the AAUG national convention.

THE AFSC CONFERENCE

In addition to Arthur Waskow's Tzedek Tzedek, cooperating with the American Friends Service Committee in producing the conference on the "New Imperative for Israeli-Palestinian Peace" were the Washington chapter of Clergy and Laity Concerned—CALC—an "anti-imperialist" group formerly active in the Communist-dominated coalitions which organized in support of the Vietnamese Communists; Women's International League for Peace and Freedom—WILPF—which works in cooperation with the Soviet-controlled propaganda and terrorist support organization, the World Peace Council; the War Resisters League—WRL—a militant socialist-pacifist organization whose leadership recently denounced people of conscience concerned over the thousands of political prisoners being held by the Vietnamese Communist regime; the United Church of Christ, United Church Board for World Ministries; SANE, a nuclear disarmament group which follows the World Peace Council line; and the Fellowship of Reconciliation—FOR—which has made faltering attempts to coordinate the efforts of IPS, the Communist Party, U.S.A.'s Committee for a Just Peace in the Middle East, and various New Left and pacifist groups in support of the PLO.

The AFSC leaders decided years ago that the world's problems can be traced to the free enterprise system and free societies. The utopia looked to by the AFSC is socialist, and the use of terrorism and armed violence to attain that "utopia" is not condemned by the AFSC on the grounds that the violence and terrorism is designed to produce a "good" end. AFSC supports the Communist dictatorships in Cuba, Red China, Laos, Vietnam, and Cambodia; and it also supports the Soviet-backed Marxist terrorist groups, euphemized as "national liberation movements," in southern Africa and the Middle East.

Among the better known participants in the conference—a mere 235 persons registered—were Richard A. Falk, a professor of international law at Princeton, a senior fellow at the Institute for World Order, a long associate of IPS; Arthur Waskow, IPS and the Breira executive committee; Rev. Richard Fernandez, now on the staff of the Institute for

World Order and formerly head of Clergy and Laity Concerned; Gail Pressberg, AFSC national office; and Matti Peled. Max Ticktin, the Breira "vice-chairperson" who heads B'nai Brith's Hillel project on the campuses, in the words of one activist attending "bugged out" under pressure.

Matti Peled said he recognized "signals" from the PLO which showed to him that the PLO had gone "far enough" to meet conditions for recognition as the only official representative of the Palestinian people as outlined in campaign speeches of President Carter.

This was stated even more strongly by PLO spokesman Isam Sartawi who addressed the meeting via telephone from Paris. Sabri Jiryis was also scheduled to make a telephone address, but a bad connection in Beirut prevented him from being heard.

Sartawi said that a Middle East peace would be impossible without inclusion of a "duly constituted legitimate and freely chosen Palestinian body," but maintained that the PLO is the "sole legitimate representative of the Palestinian people." No one has elected the PLO to be anyone's representative, but the PLO has carried out a terrorist campaign to intimidate Palestinians.

Sartawi said that the PLO recognized "Israelis' right to exist." But this sounded like the Al Fatah spokesman was merely saying that individual citizens now living in Israel will be permitted to remain alive, not that the country, Israel, will be recognized.

Both Sartawi and Peled emphasized that no Middle East peace agreement is possible without recognition of the "Palestinian people." Certainly no reasonable person would argue against the fact that the Palestinian people living in Gaza and the West Bank have an important role to play in a peace agreement. The question is really whether a revolutionary terrorist group which as a matter of tactics and policy consistently commits atrocities on innocent civilians—both Arab and Jewish—to attain its ends is to be recognized as the legitimate spokesman for all Palentinians. In effect, those who proclaim the PLO the legitimate representative group for all Palestinians undermine responsible leaders who are not terrorists and who can express the interests and grievances of their people without recourse to barbarism and totalitarianism.

The Western constitutional democracies are under a sustained attack from Marxist-Leninist totalitarians. Many areas of the Far East and Africa have fallen to dictatorship. We must not abandon the Palestinian Arabs, whether they live on the West Bank, in Jordan or elsewhere, to the thugs of the PLO.

RATE CONTROLS KEEP OHIO GAS UNDERGROUND

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. GRADISON. Mr. Speaker, I have written and spoken at length of the need to deregulate natural gas prices in order to spur production to meet our long-term energy needs. In my work on this subject I have come across an article which gives eloquent testimony to the contention that price controls keep natural gas in the ground. Written by Philip Greer and Myrun Kandel, this article depicts graphically the impact of natural gas price controls on Ohio, where 1.3 trillion cubic feet of gas await development. According to the authors, the economics of administered price controls militates against development.

I believe this article clearly lays out the overwhelming argument for deregulation of natural gas prices. I include it in the RECORD at this point for the information of my colleagues before we consider any comprehensive energy policy:

[From the Cincinnati Post, Feb. 10, 1977]

RATE CONTROLS KEEP OHIO GAS UNDERGROUND

(By Philip Greer and Myrun Kandel)

There's an ironic twist to the physical and economic suffering brought on by the big freeze. While above ground, factories have been closed, schools shut and stringent conservation measures put into effect to stretch out dwindling supplies of natural gas, under that same ground, in some places, there's enough gas to keep everyone warm and working.

The problem is that under the present price structure for natural gas, it's not profitable enough to get it out.

The Ohio-Pennsylvania-West Virginia triangle, according to oil and gas experts, is one of the best gas-drilling areas in the country. On a national average, about 90 percent of the wells drilled in the United States turn out to be dry, they said. But in that triangle the figures are reversed—about 90 percent bring in producing wells.

What's more, gas wells in Texas, Oklahoma and Louisiana can go down more than 15,000 feet through hard rock before they reach gas, while those in Ohio have produced at 2000 to 3000 feet.

Ohio has 1.3 trillion cubic feet of proven gas reserves. But estimates put the total of "probable" and "undiscovered" reserves at an additional 1.8 trillion cubic feet. That's only a drop in the bucket compared with the total U.S. proven reserves of 705 trillion cubic feet, but it's located in one of the nation's leading industrial states.

Victor D. Alhadeff, chairman of ENI Corp. in Seattle, a major bankroller of independent oil and gas drillers, said wells can be drilled in Ohio in as little as eight days. In contrast, he said, a recently-completed well in Louisiana took seven months to drill. "It's like the difference between putting up a one-family house and a 40-story office building," he observed. However, the accessibility of gas in Ohio and the high success rate of wells drilled there aren't enough to stimulate widespread drilling. The main barrier, oil and gas men contend, is the federal ceiling of $1.42 per thousand cubic feet on interstate sales.

In most producing states, the federal price ceiling doesn't apply to natural gas sold within the state where it's produced. But in Ohio, according to Alhadeff, that doesn't work. "The majority of the acreage is owned by utilities, and they have to abide by the ceiling even if they sell within the states," he explained.

"As a practical matter, it's one of the most exciting areas in the country," Alhadeff said. "There's enough gas there to more than offset the shortages they have now."

Still, he added, of the more than $42 million his company put into drilling programs last year, only $2.5 million went to Ohio. "It's the economics," he said.

Frances Wright, former president of east Ohio Gas Co., who now is a consultant at Prescott, Ball and Turben, a Cleveland-based brokerage house, noted that the production of most natural gas wells drilled in Ohio is sold as soon as they come in. The result, he pointed out, is that most of the gas is committed to large industrial users—Republic Steel, General Motors, Ford and Jones and Laughlin, among others.

In some cases, the corporations that own the land arrange for outside producers to drill the wells, with the provision that they have first call on the gas that's produced.

There have been reports that producers in some parts of the country had capped their wells, holding the gas in reserve in anticipation of higher prices.

"We don't have a situation in Ohio where wells are capped," Wright said. "The individual wells are so small that the producers have to start getting their money back right away." In addition, he said, some fields require a great many wells to be drilled for full development. In Ashtabula County in northeast Ohio, Lone Star Gas Co. had to drill nearly 70 wells to complete a field, he added.

Wright said he had been trying to find eight million cubic feet a day of uncommitted production for a client. "I've only been able to find three million," he said. "I doubt there's much uncommitted gas in the state."

AMYOTROPHIC LATERAL SCLEROSIS

HON. STEPHEN J. SOLARZ

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. SOLARZ. Mr. Speaker, today I introduced in the Congress, a resolution to declare a "state of war" against the dreaded disease, amyotrophic lateral sclerosis. This resolution is a simple statement by which the Congress would declare its resolve to combat relentlessly this killer of thousands of young American men and women.

ALS, popularly known as Lou Gehrig's disease, is a neurological disorder affecting adults, generally in the prime of life. It is characterized by a degeneration of motor cells in the spinal cord and brain. This degeneration leads rapidly to paralysis and ultimately death. Over 10,000 adults are stricken with ALS each year for no apparent reason and with no real hope for recovery.

Like polio, ALS attacks the motor cells of the brain and spinal cord. Initially many patients show problems in speech, swallowing, and chewing while others have loss of strength in an arm or leg. The onset of the disease is slow but after a few weeks the patient is struck with violent twitching and painful cramps. Then he quickly sinks into a near paralysis.

Initial diagnosis is quite difficult and often confused with multiple sclerosis. The expected lifespan for the post-diagnosis patient is a disturbing 3 or 4 years. Over 60 percent of the ALS patients are men who after a comparatively illness-free life suddenly are left useless and unable to move a single muscle.

This severe paralysis is responsible for more than the loss of one man or woman. It is a human problem of staggering magnitude. A simple calculation will demonstrate this clearly. There are at least

10,000 new ALS cases in the United States every year. The patient is typically male, who is the head of a household and in most cases the large expenses associated with ALS depletes both the bank account and the spirit of the family. Based on an average income of only $7,000 per annum, an estimate of the loss of earning power to the economy is at least $200 million a year. In addition, a like amount in Government transfer payments for welfare and aid for dependent children realize a net loss to the economy of $400 million. Clearly a cure for ALS would be one of the great milestones in medical history.

This resolution asks for no money; asks for no special week, day, or hour. This resolution simply asks the Congress to care.

FEDERAL AID IN FISH AND WILDLIFE RESTORATION ACT AMENDMENTS

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. BREAUX. Mr. Speaker, today I am introducing a bill to amend the Federal Aid in Fish and Wildlife Restoration Act of 1937 and provide State wildlife agencies additional funds for their wildlife restoration and hunter education programs. This bill was reported favorably from the Merchant Marine and Fisheries Committee late last year. A rule was granted, but the House did not have an opportunity to consider the proposal before adjournment of the 94th Congress.

The bill I am introducing today would establish an 11-percent manufacturers' excise tax on component parts of handloaded ammunition. The receipts would be added to others in the Federal aid in wildlife restoration program and distributed to the States for wildlife restoration projects and hunter education programs.

Mr. Speaker, let me explain as concisely as I can the Federal aid in wildlife restoration and the effect my bill would have on it.

That program was initiated in 1937 at the request of sportsmen, conservationists, State wildlife agencies, and the sporting firearms industry. It has been funded since that time by an 11-percent manufacturers' excise tax on sporting firearms and factory-made ammunition. The tax is collected at the factory, but it is paid by sportsmen. The program is not supported at all by general tax revenues. The U.S. Fish and Wildlife Service even retains enough of the receipts to pay Federal administrative costs. The act provides for that. The remainder is divided among State wildlife agencies to pay 75 percent of the cost for wildlife projects approved by the service. The State fish and wildlife agencies provide 25 percent of the funding. All the money from the sporting arms and factory-made ammunition tax is invested in wildlife restoration. As of December 31, 1975, that source had provided $670 million solely for wildlife conservation purposes.

The accomplishments of this program are without parallel worldwide. The States have purchased more than 3.2 million acres for wildlife. In addition, 51 million more acres have been placed under State wildlife department management through long-term leasing agreements. Totally, more than 54 million acres, an area larger than the six New England States, Maryland, and Hawaii combined, have been reserved primarily for wildlife. Additionally, a wealth of valuable research important to the conservation of wildlife has been and still is being funded by that program.

In 1970, Congress bolstered the program by redirecting the longstanding—since 1932—10-percent manufacturers' excise tax on handguns from general receipts to the Federal aid in wildlife restoration program. Unlike the excise tax on sporting firearms and factory-made ammunition, which must be used only for wildlife purposes, Congress gave the States the option of using up to one-half of their apportionment from the handgun tax for hunter education and supporting shooting ranges. The other half is for wildlife purposes. That was done in response to the need for hunter education programs conducted by the State agencies.

Fifty States have hunter education programs. In 25 of those States, hunter education programs are mandatory for all first-time hunters. These programs have proven very successful in teaching safe gun handling and many lives have been saved. Safe and responsible firearms use is only a part of the program however. Through other and equally important aspects of the program, sportsmen are becoming more familiar with complex wildlife laws and regulations and the need for such rules. Recreationist-landowner relations are improving through the programs teaching respect for private and public property. The entire science of wildlife management and the sport of hunting is benefiting.

Ranges built under the program are used to support the entire education effort and to provide safe public facilities for millions of skeet and trap shooters. But even here I want to emphasize that in the expenditure of this money the division between education and ranges is controlled by the State wildlife agency.

In 1972, Congress enacted a bill which imposed an 11-percent manufacturers' excise tax on certain items of archery equipment. The receipts are used just like those from handguns.

For those interested, a more detailed description of the Federal aid in wildlife restoration program and its accomplishments can be found in a U.S. Fish and Wildlife publication entitled "Thirty-Five Years of Shared Wildlife Management," released in 1974.

My bill would add the remaining logical items of sporting equipment to those already being taxed for wildlife and hunter education purposes. It would establish an 11-percent excise tax on component parts of handloaded ammunition. It would direct that one-half of the receipts from that source and one-half of those received from the taxes on handguns and archery equipment be used for hunter education and shooting range purposes. The remaining 50 percent would be used for wildlife purposes.

It has been estimated by members of the components industry that at least $6 million would be collected annually through this new tax. Other than adding this new money, the only significant change that my bill would make in present law is to mandate that a full 50 percent of the tax receipts from handguns, archery equipment, and component parts—not sporting arms and factory-made ammunition—be used temporarily by the States for hunter education purposes. This was done to accommodate purchasers of handguns, archery equipment, and component parts, who are largely target shooters and not hunters, and to encourage State agencies to improve their hunter education programs. Both the components purchasers and State agencies support this provision.

There is widespread agreement that hunter education is a socially desirable objective. In time, I have every expectation that its good results will equal those of automobile driver education now in so many high school programs.

I should also point out that the language mandating that a full 50 percent of the tax receipts from handguns, archery equipment, and component parts be used for hunter education programs would not reduce the total amount of money available for wildlife restoration projects. It would, in fact, provide much additional funding for wildlife restoration in the long run.

According to the U.S. Fish and Wildlife Service, $11.8 million in handgun and archery gear taxes were distributed to the States last year. The States used $8.3 million of that for wildlife and $3.5 million for expanding hunter education programs. The percentage of available funds used for hunter education has risen steadily since 1970.

If my bill had been in effect last year, the total receipts from the three sources would have been about $17.8 million. The States would have received $8.9 million for wildlife—$600,000 more than they did—and $8.9 million for hunter education and ranges—$5.4 million more than they did.

Mr. Speaker, the States are in dire need of additional funding to continue and improve their wildlife restoration work and to upgrade their hunter education programs. Inflation takes its toll annually. The agencies are saddled continually with more and more responsibilities. Wildlife management needs grow as human population and associated development increase. And education needs intensify as the number of hunters and other wildlife users multiply.

The bill I am introducing today takes all these things into consideration. It would greatly increase the money available for hunter education and target range programs. It also would increase the overall funding for wildlife restoration efforts. And in the long run, it would add larger and larger amounts to those wildlife programs. One reason for this is the fact that income from the tax will increase each year. Another is because the Merchant Marine and Fisheries Committee realizes that the requirement that 50 percent of the handgun, archery equipment, and ammunition

component taxes be used for hunter education and target ranges may provide for hunter education programs would not provide more funds than the States need for those purposes in future years. Consequently, it has committed itself to a review of the program in 5 years with the idea of removing the mandatory 50 percent language if the States so desire. That commitment was stated in the committee report on the bill last year. In that way the wishes of the purchasers of component parts, who would be paying the tax, and the State wildlife agencies, who would be administering the funds, are satisfied.

I believe this bill is a reasonable compromise for all interested parties. The skeet, trap, and target shooters who would pay the tax support it. So do 48 of the 50 State wildlife agencies. It is rare that Congress receives a request to help fund an important program accompanied by an offer to pay the cost. That is the case with this proposal, however, and I urge my colleagues to support it.

MIKHAIL MAGER

HON. WILLIAM M. BRODHEAD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. BRODHEAD. Mr. Speaker, the harassment and intimidation that often follows a Soviet Jew's request to emigrate from Russia is well known and well documented. Despite the Soviet Union's endorsement of the Helsinki accords, which call for special efforts on the part of signatory nations to facilitate the reunion of divided families, case after case has come to my attention indicating that the Soviet Union does not take its responsibility in this matter seriously.

One such case involves Mikhail Mager of Vinnitsa, Ukrainian SSR. Mager and his family applied for exit visas over 4 years ago. While his family was allowed to emigrate to Israel, Mager was refused permission on the grounds of security, even though he held no sensitive positions in either military or civilian life. Letters I have sent to Soviet officials on Mikhail's behalf have gone unanswered.

As a last resort, Mikhail Mager has begun a hunger strike. Members of Congregation Shaarey Zedek, which is located in the congressional district I represent, have begun a fast in sympathy with Mager, and I wish to share with my colleagues a letter I received from Rabbi Irwin Groner and Synagogue President Harold Berry:

CONGREGATION SHAAREY ZEDEK,
Southfield, Mich., February 11, 1977.

Congressman WILLIAM BRODHEAD,
House Office Building,
Washington, D.C.

DEAR CONGRESSMAN BRODHEAD: In the name of the total membership of our Congregation of over 1700 families, we present to you our plea on behalf of Mikhail Mager of Vinnitsa in the Soviet Union. Mikhail Mager has been forcibly separated from his wife and parents for over four years. On January 15, 1973, when his family applied for permission to emigrate to Israel, all were given permits, except Mikhail who was turned down on grounds of "security," even though he held no sensitive position, either in civilian or army life. At the time the family was assured that Mikhail would be allowed to join them "soon." Since then, his five-year wait for army clearance passed in 1975, and still he has been repeatedly refused an emigration permit. He has been subject to government harassment and intimidation.

In hopeless desperation, Mikhail is now resorting to a hunger strike which will begin Thursday, February 17. His entire family is supporting him by conducting a hunger strike during the same time at the Western Wall in Jerusalem.

Mikhail Mager has been adopted by our Synagogue and our members feel a strong kinship with him. His young wife has addressed our Congregation during her visit in this country and many of our members have been in contact with him by mail and phone, whenever possible.

Congregation Shaarey Zedek and all the citizens of this community unite in expressing their determination that Mikhail Mager be permitted to join his family, as he has been promised. The most basic human rights of this young man are being abused by this cruel separation, and we wish to enlist our government's support for him.

We ask that the Soviet authorities honor the fundamental principles of human decency, which are the very basis of international accord. We hereby request that you forward our deep concern for Mikhail and our continuing solidarity with him to our State Department, as well as to the Soviet Embassy in Washington. The Soviet authorities should be reminded of their responsibilities to human rights under the Helsinki agreement. We believe that the fulfillment of those responsibilities is the indispensible condition for an enduring understanding between the American and Soviet governments.

Sincerely yours,
RABBI IRWIN GRONER,
HAROLD BERRY,
President.

I have written to the President of the United States and to the Soviet Ambassador in an effort to assist Mikhail Mager. His struggle for personal freedom is truly representative of the struggle of thousands of other refusniks in the Soviet Union.

BUDGET CONTROL

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mrs. HOLT. Mr. Speaker, at this point I believe we should reflect on what the Budget and Impoundment Control Act of 1974 did not do. It did not provide any appropriate sense of fiscal discipline to the Congress or to the Budget Committee. We certainly have not been controlling the budget. It is out of control.

Last September we adopted the second budget resolution for the 1977 fiscal year. It established a ceiling on outlays of $413.1 billion, estimated that this would require deficit spending of $50.6 billion, and projected the national debt at $700 billion.

But this is the world of the pork barrel and the dole, so here we are with a third budget resolution for fiscal 1977 that raises the ceiling on outlays to $418.8 billion, increases the deficit to $70.3 billion, and projects the national debt at $720.5 billion. This resolution is designed to accommodate an "economic stimulus" program of higher spending and lower revenues, and I fully expect that we will face a fourth budget resolution for fiscal 1977.

The stimulus provided by the third budget resolution is likely to be inflationary because: First, it comes at a time of general economic advancement; and, second, it swells a deficit that was already outrageously large. I believe we should be very wary of the cumulative effects of deficits that amount to $45 billion for fiscal 1975, $66 billion for fiscal 1976, and now an estimated $70.3 billion for fiscal 1977.

I believe the Budget Committee and the Congress are devoting excessive amounts of time and energy to analyzing economic data from the last month or the last quarter. We should address ourselves to the trend of years, because the effects of what we do today will last for years.

Instead, we find ourselves attempting to fine-tune the economy, breathlessly awaiting the latest reports of economic indicators, asking questions such as how much stimulus is enough, and how much can we provide without igniting inflation, and what can we do about an act of God that caused a 2-month deep freeze. If we continue with this exercise, we will be back here with a new budget for every quarter of the year, with all the usual excuses for increasing spending every time. It is the wrong approach.

There is no way to fine-tune an economy which reacts to millions of decisions made independently of Government by consumers, workers, and businessmen. However, the actions of the Federal Government can have an impact on the longer-range trends of the economy.

The trend that we have experienced in recent years is the rapid growth of Government and the slowing of economic growth in the private sector. The huge and increasing Government drain on earnings and capital, and the inflationary folly that we can achieve prosperity with massive public debt, are the prime causes of our economic ills.

As Government takes more resources, less is available for the private, productive sector of the economy and less wealth is created to sustain the American people. Government cannot spend us to prosperity because more Government means less production, and more Government handouts without increasing production is a sure road to inflation.

The proposed stimulus package authorized by the third budget resolution is a gimmicky and quick-fix kind of thing that offers us no promise of durable, real economic growth. One can only hope that it is modest enough to avoid serious harm to the economy.

If the Congress is really interested in promoting sustained economic expansion that is healthy and noninflationary, then it will enact permanent, across-the-board tax reductions matched by cuts in Federal spending.

This would be the best way to increase spendable income, stimulate production by increasing the rewards of investment and work, and provide new jobs by stimulating investment.

IN MEMORY OF BEN COBER

HON. DON H. CLAUSEN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. DON H. CLAUSEN. Mr. Speaker, northern California recently lost one of its most distinguished citizens when Mr. Ben Cober passed away at the age of 84.

Ben Cober was one of the last of a vanishing breed—the self-made man who started to work at an early age to help his family, and continued working long and hard in a very successful journalistic career culminating as owner and publisher of the Ukiah Daily Journal, one of northern California's outstanding newspapers.

In addition to his journalistic endeavors, Ben had an exceptionally wide range of interests and was very active in civic and community affairs. He sincerely liked and enjoyed people and had a zest for living.

I enjoyed the personal privilege of working very closely with Ben Cober in projects and programs promoted by the Redwood Empire Association. Also, he was extraordinary in his efforts to give me advice and counsel on congressional matters. But, above all, Ben Cober was a champion for the people of Ukiah and Mendocino County. He stood tall in the forest of big men who have dedicated their lives to the benefit of their fellow man. I take great pride in claiming Ben Cober as a close personal friend. We shall all miss him very much.

The high esteem in which he was held in the Redwood Empire is reflected in the following two newspaper articles, which indicate the deep loss felt by his fellow citizens:

JOURNAL PUBLISHER EMERITUS STROKE VICTIM—BEN COBER WRITES "30" TO CAREER

Ben A. Cober, publisher emeritus of the Ukiah Daily Journal, wrote "30" to his long career as a newspaperman Sunday.

Memorial services to pay tribute to a man who had been a guiding influence in Ukiah social, political, civic and business affairs for close to 50 years will be held Wednesday at 2 p.m. at the Ukiah Methodist Church.

Ben Cober, who was born Benjamin Alstot Cober on Dec. 4, 1892 at Ogden, Utah, was 84 years of age at the time of his death here in the community to which he had devoted more than half his life. Although he had been in failing health the past few years, the end came quickly with a sudden stroke at his Burke Hill residence Sunday morning. He was taken immediately by ambulance to Hillside Hospital but was pronounced dead on arrival.

The Rev. Arthur Gafke of the Ukiah Methodist Church, of which Mr. Cober had been a member from his first days here, will officiate at the services in conjunction with Ukiah's Masonic lodge and burial will be in Ukiah Cemetery. Zimmerman Mortuary is in charge of arrangements.

His widow, Mrs. Daisy Cober, has requested that any contributions be made to the Shriner's Crippled Children's Fund, as this was one of her husband's special interests. Nelmes Smith, retired manager of the Ukiah branch of the Bank of America and a longtime friend of the Cober family, will accept remembrances in his friend's name at the Smith's home, 426 W. Church Street.

Ben Cober was a big man, not only in size— family records show that he weighed 12 pounds at birth and stood six feet tall in his prime—but in the breadth of his knowledge and experience in his chosen field and his love of the good life. He was always a participator, never a spectator.

His first contact with the newspaper world was as a child, selling newspapers in Ogden to help his widowed mother keep the family together. He then became a messenger boy for Western Union, learned telegraphy and at the age of 18 became the agent-telegrapher for Union Pacific Railway Company at Island Park, Idaho and, a short time later, also took on the job of postmaster. His "spare," time was devoted to fishing, organizing his own orchestra in which he played saxophone, mandolin and mandola, and correspondence courses in bookkeeping. In later years, he become an ardent golfer.

It was not until he was 35 that he embarked on what was to become his life's work. He bought the Mill City Logue in Mill City, Oregon, on Dec. 6, 1927, sold it the following August and came to Ukiah where he bought a half-interest in the Redwood Journal from Sam Ray Sr. The first issue of the Journal under the new ownership was published Sept. 3, 1929, and, in February, 1931, Ben Cober became full owner of the Journal, which was then a weekly. It later changed to a semi-weekly and then to a daily.

In the interim, he purchased the Ukiah Dispatch Democrat, an opposition weekly established in 1870—the oldest newspaper in Mendocino County—and published both papers from the Redwood Journal's Main and Standley Street plant. He later bought the Sebastopol Times, commuting there twice weekly before he sold that paper to devote all his energies to the Ukiah publication which, when it went daily in 1954, was renamed the Ukiah Daily Journal.

In later years he acquired the Willits paper and entered into a partnership with Robert Gerber, publisher of the Ukiah News, a weekly. In mid-1968 he decided it was time to relax and sold both the Journal and the Willits News to the present ownership, remaining as publisher emeritus until his death.

This man, whose coverage of the news ranged from Charles Lindbergh's solo flight across the Atlantic to man's landing on the moon, managed to pack a lot of living into his 84 years. He was a past president of Ukiah Rotary, member of the state, county and city Chamber of Commerce, past director of the Ukiah Chamber, a charter member of the Ukiah Elks lodge which he helped organize here and served two terms as exalted ruler, past president of the Redwood Empire Association, past Republican Central committeeman, a member of the San Francisco Press Club, the Commonwealth Club, the Playboy Club, the Navy League, a Mendocino County deputy sheriff, former Mendocino State Hospital trustee, member of the American Legion and, as publisher of the Daily Journal, a member of the 100 Year Club which consists of newspapers which have been in publication for the past 100 years.

An active Mason, Mr. Cober was a past master of the Mill City, Ore. Masonic lodge, charter member of the Marilyn chapter, No. 145, Eastern Star, Mill City, was voted into the Ukiah lodge of Royal Arch Masons and given the Master Mark (First Degree) and went from the Royal Arch to Commandery (32nd Degree); thence initiated into the Shrine at Oakland.

During World War I, he was in the service as a radio operator in a field signal battalion and in World War II he served as chairman of the county and city public information committee.

Survivors, in addition to his wife, include Muriel Andrews, a niece from West Los Angeles; his great nephew, Doug Andrews of Los Angeles; and a step-daughter, Marilyn Cowan of Ukiah.

BEN COBER, RETIRED UKIAH PUBLISHER, DIES SUNDAY FOLLOWING STROKE

Ben A. Cober, 84, retired publisher of the Ukiah Daily Journal and past president of the Redwood Empire Assocation, died Sunday following a stroke in a rest home on the Mendocino coast. He is survived by his wife, Daisy, a former deputy county superintendent of schools in Lake County, whom he married in 1963 after the death of his longtime wife and business associate.

Cober was a native of Ogden, Utah. In 1892, and except for World War I signal corps service, he was a railway telegrapher and station agent for both the Union Pacific and Southern Pacific railroads. At Mill City, Oregon, he had also branched out as a newspaperman, running a small weekly paper, as well as corresponding for the Salem Capital-Journal and serving as postmaster.

Late in 1927 he bought a half interest in the then weekly Redwood Journal in Ukiah. Subsequently, he bought out his partner and then purchased the Democrat-Dispatch from the Thurstons, followed by the Ukiah Republican-Press in 1950, out of which he went daily in 1951-52.

Cober was a Royal Arch Mason, a Shriner, and an avid traveler—by rail, air and highway, individually or in groups. Until ill health overtook him ten years ago, he was a bon vivant of the first order and one never knew what day or what hour he would arrive in Fortuna or Eureka for a jolly visit, always with his cameras and a storehouse of wild and funny stories.

Funeral services took place Wednesday from the Ukiah Methodist Church, the same edifice from which Ben and Daisy were married in 1963. The services were concluded, we thought, when the minister dashed down the aisle to ask the happy couple to do it over again. The Journal's society editor had a breakdown with her camera and had missed the picture. Ben had one around his neck and loaned the distraught gal his own camera to do the job.

That day was also Ben Cober's birthday and he couldn't leave on his wedding trip until another ceremony at midnight, the passing of the holy grail to the Forest Lodge bar owner who became the same age at midnight. All of this was accompanied on a violin by an ex-heavyweight wrestler who doubled as a bartender. This made it very difficult to drive home to Fortuna.

ARE THE COURTS GOING TOO FAR?

HON. TOM HAGEDORN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. HAGEDORN. Mr. Speaker, there is growing awareness among Members of the Congress and the public that the Federal executive branch is not the only institution of Government that has steadily taken unto itself new powers and authorities in recent years. A writer for the National Observer recently noted that—

Political commentators have bored us for years with talk of the power struggle between the Legislative and Executive branches of our government, but the real power grab

has been by the Judiciary. The Supreme Court makes more social policy in a month than Congress does in a decade. Executive decisions, especially at the local level, are nothing more than proposals offered up for approval or amendment by the judges of our ruling branch of government."

Under the guise of interpreting the Constitution, Federal courts have increasingly vested in themselves the authority to decide social policy matters of the kind traditionally reserved for the executive and legislative branches of Government. A lawyer and former staff member of the Brookings Institution, Mr. Donald Horowitz, has summarized the problem very well in an article in Commentary magazine. Following are some excerpts from this perceptive analysis:

ARE THE COURTS GOING TOO FAR?

(By Donald L. Horowitz)

The last two decades have been a period of considerable expansion of judicial responsibility in the United States. Although the kinds of cases judges have long handled still occupy most of their time, the scope of judicial business has broadened. The result has been involvement of courts in decisions that would earlier have been thought unfit for adjudication. Judicial activity has extended to welfare administration, prison administration, to education policy and employment policy, to road building and bridge building, to automotive-safety standards, and to natural-resource management.

In just the past few years, courts have struck down laws requiring a period of in-state residence as a condition of eligibility for welfare. They have invalidated presumptions of child support arising from the presence in the home of a "substitute father." Federal district courts have laid down elaborate standards for food handling, hospital operations, recreation facilities, inmate employment and education, sanitation, laundry, painting, lighting, plumbing, and renovation in some prisons; they have ordered other prisons closed. Courts have established equally comprehensive programs of care and treatment for the mentally ill confined in hospitals. They have ordered the equalization of school expenditures on teachers' salaries, established hearing procedures for public-school discipline cases, decided that bilingual education must be provided for Mexican-American children, and suspended the use by school boards of the National Teacher Examination and of comparable tests for school supervisors. They have eliminated a high-school diploma as a requirement for a fireman's job. They have enjoined the construction of roads and bridges on environmental grounds and suspended performance requirements for automobile tires and air bags. They have told the Farmers Home Administration to restore a disaster-loan program, the Forest Service to stop the clear-cutting of timber, and the Corps of Engineers to maintain the nation's non-navigable waterways. They have been, to put it mildly, very busy, laboring in unfamiliar territory.

What the judges have been doing is new in a special sense. Although no single feature of most of this litigation constitutes an abrupt departure, the aggregate of features distinguishes it sharply from the traditional exercise of the judicial function.

First of all, many wholly new areas of adjudication have been opened up. There was, for all practical purposes, no previous judge-made law of housing or welfare rights, for example. To some extent, the new areas of activity respond to invitations from Congress or, to a much lesser extent, from state legislatures. Sometimes these take the form of judicial-review provisions written into new legislation. Sometimes they take the form of new legislation so broad, so vague, so indeterminate, as to pass the problem to the courts. They then have to deal with the inevitable litigation to determine the "intent of Congress," which, in such statutes, is of course nonexistent.

If some such developments result from legislative or even bureaucratic activity (interpretation of regulations, for example), then it is natural to see the expansion of judicial activity as a mere concomitant of the growth of the welfare state. As governmental activity in general expands, so will judicial activity.

But that is not all that is involved. Much judicial activity has occurred quite independently of Congress and the bureaucracy, and sometimes quite contrary to their announced policies. The very idea is sometimes to handle a problem unsatisfactorily resolved by another branch of government. In areas far from traditional development by case law, indeed in areas often covered densely by statutes and regulations, the courts have now seized the initiative in lawmaking. In such areas, the conventional formulation of the judicial role has it that courts are to "legislate" only interstitially. With the important exception of judicial decisions holding legislative or executive action unconstitutional, this conventional formulation of what used to be the judicial role is probably not far from what judges did in fact do. It is no longer an adequate formulation.

What the courts demand in such cases, by way of remedy, also tends to be different. Even building programs have been ordered by courts, and the character of some judicial decrees has made them, *de facto*, exercises of the appropriation power. A district court order rendered in Alabama had the effect of raising the state's annual expenditure on mental institutions from $14 million before suit was filed in 1971 to $58 million in 1973, a year after the decree was rendered. Decisions expanding welfare eligibility or ordering special education for disturbed, retarded, or hyperactive pupils have had similar budgetary effects. "For example, it is estimated that federal court decisions striking down various state restrictions on welfare payments, like residency requirements, made an additional 100,000 people eligible for assistance."* It is no longer even approximately accurate to say that courts exercise only a veto. What is asked and what is awarded is often the doing of something, not just the stopping of something.

To be sure, courts have always had some say in the way public funds were spent. How else could they award damages against the government? But even in the aggregate, decisions ordering a municipality to pay for an injury sustained by someone who trips over a loose manhole cover are not generally important enough to influence the setting of public priorities. The recent decisions that require spending to achieve compliance with a newly articulated policy are something else again.

It is also true that both affirmative and negative relief (orders to do something and orders to stop doing something) have a long history in English equity jurisprudence. The hoary remedies of mandamus and specific performance both require affirmative action—but action of a very circumscribed, precise sort, the limits of which are known in advance of the decree. Mandamus traditionally compels performance of an official duty of a clear and usually trivial sort; generally, compliance is measured by performance of one or two simple acts. Specific performance compels compliance with certain kinds of contractual obligation, the exact nature of the obligation spelled out in the contract. But specific performance is not traditionally awarded to compel performance of a contract for personal services, one significant reason being that the courts would then find themselves deep in the management of a continuing relationship, perhaps a whole business enterprise.

Again, therefore, compelling the performance of certain affirmative acts is nothing new in principle, but it is new in degree. The decree of a federal district judge ordering mental hospitals to adhere to some eighty-four minimum standards of care and treatment represents an extreme in specificity, but it is representative of the trend toward demanding performance that cannot be measured in one or two simple acts but in a whole course of conduct, performance that tends to be open-ended in time and even in the identity of the parties to whom the performance will be owed. Remedies like these are reminiscent of the kinds of programs adopted by legislatures and executives. If they are to be translated into action, remedies of this kind often require the same kinds of supervision as other government programs do.

This leads to still another difference in degree between adjudication as it once was and as it now is. Litigation is now more explicitly problem-solving than grievance-answering. The individual litigant, though still necessary, has tended to fade a bit into the background. Courts sometimes take off from the individual cases before them to the more general problem the cases call up, and indeed they may assume—dubiously—that the litigants before them typify the problem.

Once again, of course, it is all too easy to fabricate an idealized judicial past that consigned judges merely to resolving individual disputes. It has not been that way. In articulating the law of negligence from one case to the next, judges have tried to lay down a standard of care calculated to reduce the incidence of personal injury and property damage without unduly raising the expense of doing so. Many other common-law rules could be described in similar terms, as much efforts to frame behavioral standards as to apply them. Some of the most formidable difficulties faced by common-law judges have arisen in cases that present the judges with an inescapable choice between doing justice in the individual case and doing justice in general.

For all that, however, the individual and his case remained indispensable. Courts paid particular attention to the interplay between the facts of the individual case and the facts of the class of cases they projected from it. Without the particular case, the task of framing standards was devoid of meaning. It is inconceivable, for example, that even a great, innovative common-law court like the New York Court of Appeals early in this century would have countenanced deciding a case that had become moot. That some issues might forever escape judicial scrutiny because of the doctrine that a moot case is not a case at all would have struck even bold judges of a few decades ago as entirely natural.

Today it is repellent to many judges. For the view has gained ground that the judicial power is, by and large, coterminous with the governmental power. One test of this is the withering of the mootness doctrine in the federal courts. The old prohibition on the decision of moot cases is now so riddled with exceptions that it is almost a matter of discretion whether to hear a moot case. The argument for deciding a case that has become moot is often the distinctly recent one that there is a public interest in the judicial resolution of important issues. In contrast, the earlier view was that there was a public interest in avoiding litigation. By the same token, dismissal for mootness has become a practice reserved for invocation when it is unimportant, inconvenient, or impolitic to decide the issues a case raises.

What this shift signifies is the increasing subordination of the individual case in judicial policymaking, as well as the expansion of

judicial responsibility more nearly to overlap the responsibilities of other governmental institutions. The individual case and its peculiar facts have on occasion become mere vehicles for an exposition of more general policy problems. Consequently, somewhat less care can be devoted, by lawyers and judges alike, to the appropriateness of particular plaintiffs and to the details of their grievances.

At the same time, the courts have tended to move from the byways onto the highways of policy-making. Alexander M. Bickel has captured, albeit with hyperbole, the thrust of the new judicial ventures into social policy. "All too many federal judges," he has written, "have been induced to view themselves as holding roving commissions as problem solvers, and as charged with a duty to act when majoritarian institutions do not." The hyperbole is itself significant: many federal judges regard themselves as holding no such commission, yet even they have embarked on "problem-solving" ventures. This is the surest sign that the tendency is not idosyncratic but systemic: it transcends, in some measure, individual judicial preference and calls for systematic explanation. . . .

The appropriate scope of judicial power in the American system of government has periodically been debated, often intensely. For the most part, what has been challenged has been the power to declare legislative and executive action unconstitutional. Accordingly, the debate has been cast in terms of legitimacy. A policy accustomed to question unchecked power views with unease judicial authority to strike down laws enacted by democratically elected legislatures. Where, after all, is the accountability of life-tenured judges? This question of democratic theory has been raised insistently, especially in times of constitutional crisis, notably in the 1930's and again in the 1950's.

The last word has not been heard in these debates, and it will not soon be heard. The structure of American government guarantees the issue a long life. But, for the moment, the debate seems to have waned with the growing recognition that there are elements of overstatement in the case against judicial review. The courts are more democratically accountable, through a variety of formal and informal mechanisms, than they have been accused of being. Equally important, the other branches are in many ways less democratically accountable than they in turn were said to be by those who emphasized the special disabilities under which judges labor. Hence the many academic discussions of the need for "representative bureaucracy," for a less insular Presidency, and for reform of the procedures and devices that make Congress undemocratic internally and unrepresentative externally. (That students of any single institution often tend to see that institution as the flawed one is a useful indication of the limited perspective that comes from single-minded attention to any one institution. It should properly make us chary of drawing inferences about the courts without an institutionally comparative frame of reference.)

As the debate over the democratic character of judicial review wanes, there is another set of issues in the offing. It relates not to legitimacy but to capacity, not to whether the courts *should* perform certain tasks but to whether they *can* perform them competently.

Of course, legitimacy and capacity are related. A court wholly without capacity may forfeit its claim to legitimacy. A court wholly without legitimacy will soon suffer from diminished capacity. The cases for and against judicial review have always rested in part on assessments of judicial capacity: on the one hand, the presumably superior ability of the courts "to build up a body of coherent and intelligible constitutional principle"; on the other, the presumably inferior ability of courts to make the political judgments on which exercises of the power of judicial review so often turn. If the separation of powers reflects a division of labor according to expertise, then relative institutional capacity becomes relevant to defining spheres of power and particular exercises of power.

The recent developments that I have described necessarily raise the previously subsidiary issue of capacity to a more prominent place. Although the assumption of new responsibilities can, as I have observed, be traced to exercises of the traditional power to declare laws unconstitutional, they now transcend that power. Traditional judicial review meant forbidding action, saying "no" to the other branches. Now the judicial function often means requiring action, and there is a difference between foreclosing an alternative and choosing one, between constraining and commanding. Among other things, it is this difference, and the problematic character of judicial resources to manage the task of commanding, that make the question of capacity so important.

Yet judicial intervention in matters of social policy has greatly increased and will not soon decrease. This expansion of judicial responsibility means, first, a broadening of the sphere of judge-made law, into areas that might once have been called "social welfare" and were not considered "legal" at all. It also means an expansion of the scope for judicial initiative within these areas. Courts are no longer as confined to the interstices of legislation as they once were—now the statute is often a mere point of departure—and they are no longer as inhibited as they once were from delving into supervisory or administrative responsibilities in connection with the remedies they award. They are more often found requiring detailed, affirmative, and specific action than previously. They are less constrained, too, by the limitations of the cases and the litigants before them. More openly, self-consciously, and broadly than before, the courts are engaged in efforts to shape or control the behavior of identifiable social groups, groups not necessarily before the court: welfare administrators, employers, school officials, policemen.

What that means is that there is somewhat less institutional differentiation today than two decades ago. There is now more overlap between the courts and Congress in formulating policy and between the courts and the executive in both formulating and carrying out programs. That is, the types of decisions being made by the various institutions—their scope and level of generality—seem to be converging somewhat, though the processes by which the decisions are made and the outcomes of those processes may be quite different—as different as the groups who maneuver to place an issue before one set of decision-makers rather than another, or who, defeated in one forum, turn hopefully to the next, believe them to be. Thus, to say that there is convergence in the business of courts and other institutions is not tantamount to saying that it makes no difference who decides a question. On the contrary, it matters a good deal, for the institutions are differently composed and organized. The real possibility of overlapping responsibilities but opposite outcomes makes the policy process a more complex and drawn-out affair than it once was.

The recency, the incompleteness, and the incremental history of these developments should not obscure their portentousness. It is just possible that these modifications in the scope of judicial power will one day amount to a major structural change. We regard as quaintly and unduly restrictive the medieval conception of legislation as mere restatement of customary law. Future generations may likewise view our distinctive association of adjudication with the grievances of individual litigants as an equally curious affectation.

It may be, of course, that something much less significant than this is in the offing. For the purposes of this discussion, it makes little difference. The changes of degree that are already visible are quite enough to raise important questions about the consequences of using the judicial process for the resolution of social-policy issues.

Many of the most serious questions relate to the way in which courts get their information. Consider the position of the judge. His formal function is to decide a dispute between two parties, a role for which his training and experience generally equip him well. The legal rules and machinery through which the judge works are also geared to the controversy between the parties. Virtually all of the conventions of litigation leave the initiative to the parties. What they elicit, the judge hears. What they neglect, he neglects. The rules of evidence are also designed with the litigants' case, and that alone, in mind. Evidence about their relationship, their characteristics, their transactions, is generally relevant and admissible. Evidence about more general conditions is often inadmissible and, when admissible, is treated far more circumspectly, both by the law and by the judges who apply it.

Most of the time these rules and conventions are well adapted to the business of the courts. Focusing on litigants and their controversy is perfectly appropriate when their own controversy is all that is at stake. But when questions of social policy arise in the guise of a lawsuit, that is another matter. Then the controversy between the litigants is really secondary to the larger questions that their lawsuit raises. The judge can learn all there is to learn about the parties and their dispute without bieng very much wiser about the general problem their case is said to reflect.

As a matter of fact, the judge may be seriously misled if he pays close attention to the facts of the case before him, for that case is almost surely unrepresentative of the general class of cases it is supposed to represent. Enough is known about when and why people bring suit to know that the average plaintiff is not just like everybody else with a similar problem. No lawyer who seeks a favorable decision in welfare rights or prison reform or any other field will, if given a choice, be content to bring just a run-of-the-mill case to court. Instead, he will choose the worst case, the most extreme case, that comes his way.

So the cases that come to court are by no means typical, and a judge who masters the facts of the case before him has at best a very rough—and sometimes stereotyped—idea of the dimensions of his policy problem. How the courts are to inform themselves of the diverse social conditions that are increasingly relevant to decision is a question that insistently demands an answer.

The judge's difficulties, however, only begins there. After he is convinced that some unlawfulness has been identified, a remedy has to be devised. At this point, the judge, like all other policy-makers, has gone into the prediction business. He has to sense what is required to get the results he aims at, and he must forecast the consequences of various alternative decrees that might be formulated.

Yet the same rules, conventions, and procedure that focus the judge's attention on the litigants and the history of their controversy also focus the judge on the past more than the future. Since court decisions declare rights and duties arising out of previous transactions, the framing of the decree usually gets far less meticulous attention than does proof of the "wrongs" which give rise to the decree. Litigation tends to be backward-looking, and orienting it toward forecasting is no simple matter.

Questions also remain about the way in which court orders are carried out. Accustomed to thinking in terms of "compliance" or "noncompliance," judges do not necessarily sense the scope that exists for effectuating a judicial decree in one way rather than another. Yet what happens to a decree after it leaves the courthouse is every bit as important as what has gone before.

In fact, the accessibility and rationality of the judicial process may lead the participants to think that the problem of implementation is more straightforward than it is. One reason the policy issue is in court at all may be that action on it has been thwarted in the other branches of government by the myriad influences and interests that are represented there. In court, fewer interests are represented, and fewer still are in a position to thwart action. Hence the attractiveness of the judicial forum for groups that find it hard to get their way in the other branches.

The judicial process thus reduces the number of participants and makes it possible to cut through to an apparent solution. But the courts cannot make the complex pattern of interests disappear altogether. If all the parties who have some stake in a policy decision one way or the other are not fully represented in court, they may nonetheless reappear and make their influence felt at the implementation stage. And so the judge who decrees this or orders that may later find that he has in fact produced something rather different from what he had in mind. The simplification of social and political complexity that occurs in the courtroom is only temporary.

After a number of such experiences, sensitive judges may well wonder whether the institution over which they preside, admirably suited as it is to processing individual cases, is really the right setting in which to thrash out the perplexing social-policy questions that increasingly come to court. Some judges may begin to think of ways to augment their capacity; others may prefer to emphasize the venerable canons of judicial restraint. And some may ultimately come to embrace Jeremy Bentham's blunt assertion that "amendment from the judgment seat is confusion."

RELIGIOUS BROADCASTS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. WHITEHURST. Mr. Speaker, I am sure that many of my colleagues have received a great deal of mail regarding the rumor that the FCC is considering banning religious broadcasts. I have received numerous letters on the subject from constituents who are gravely concerned about such a possibility.

It is for this reason that I would like to share the article by Ms. Janis Johnson which appeared in the Thursday, February 17, 1977, edition of the Washington Post. I hope that it will help lay the unfortunate rumor to rest and reassure the many people who have been distressed by the story.

The article follows:

MAIL PROTESTS ALLEGED RELIGIOUS BROADCASTS BAN

(By Janis Johnson)

During the past 18 months, the Federal Communications Commission has been inundated with more than 5 million letters sent by Americans who erroneously believe the commission is considering a petition to ban religious broadcasting.

An average of 8,000 letters each day have been arriving in the commission's mailroom at 1919 M St. NW. The FCC has hired two extra employees and temporarily rented additional space to handle the letters. Last fall, the commission destroyed about 4 million letters after it got permission to do so from the General Services Administration.

Practically all the mail is a form letter. The letter claims that atheist Madalyn Murray O'Hair, who got the Supreme Court to ban prayers and bible readings in public schools, is behind an effort to get religious broadcasts banned from the airwaves.

"We don't know what's behind it," said Roscoe E. Long, chief of the policy and rules division of the FCC's broadcast bureau.

"It seems to be some kind of organized effort by well-meaning people who are afraid something is happening, and there is a certain appeal in writing their government about a very sensitive issue in this country: government and religion," he said.

Long said the commission is hesitant about putting out appeals to people to stop writing over radio and TV stations because as licensees these stations might consider such a request for air time "coercive."

Lately, Long said, he has even had indications that nonreligious groups such as the American Association of University Women and the American Farm Bureau are becoming involved in the mass mailing to the FCC.

FCC officials say they have tried everything they can think of to dispel the rumor that a petition aimed at ending religious broadcasting exists or that O'Hair, president of American Atheists, is involved in such an attempt.

They have given media interviews, made personal appearances, sent letters to editors, telephoned letter writters, developed lengthy press releases and form letters and sought the cooperation of groups like the National Religious Broadcasters and major religious denominations to inform the public of the truth.

Last July, TV Guide—which reaches 46 million adults each week—carried a cover story called, "The Rumor the FCC Can't Kill," and still the mail comes in. In fact, it is increasing, and no one can explain why, said Long.

O'Hair who lives in Austin, Tex., also is being deluged. "You don't know how many Bibles . . . tape cassettes . . . records and record sets I get from religious nuts who think I'm involved with this," she said.

"I get rosaries in the mail, telephone calls. Just last week we had to physically extrude a protestor from our office. I'm running for City Council and they're trying to inject this into the campaign. I'm starting to make more TV appearances just to say my hands are clean on this issue."

The FCC did consider a petition two years ago that sought some curbs on fundamentalist religious broadcasts. It was vigorously opposed and generated 700,000 comments, more mail than any other subject in FCC history.

The petition filed in December, 1974, by Jeremy D. Lansman and Lorenzo W. Milam, broadcast consultants in California, asked the FCC to "freeze" applications by religious institutions for TV or FM channels that are reserved for educational stations.

The case did not involve religious programming on any commercial network or station, where the preponderance of religious shows exist. Immediately, however, it was misinterpreted, and the deluge of mail began.

The FCC unanimously denied the petition on Aug. 1, 1975, declaring that the First Amendment requires government agencies to be neutral toward religion.

About the same time, the rumor got started that O'Hair was involved, and since then, some of the protesting petitions to the FCC have contained as many as 10,000 signatures.

The form letters charge that "if her (O'Hair's) attempt is successful, all Sunday worship services, currently being broadcast either by radio or television would cease. Many elderly people and shut-ins, as well as those recuperating from illness or hospital visits, depend on radio and television to fulfill their worship needs every week."

It also warns against O'Hair's effort to stop astronauts from praying and reading the Bible in outer space, an attempt that died in the courts in 1971.

Long's staff does not answer the mail, except for the hundreds of congressional inquiries about the nonexistent petition, and he said he has no estimate of the cost to taxpayers in staff time devoted to the imaginary issue.

He has computed that postage on the mail received has cost $650,000. "Just think of all the work which could have been done in the churches with that money," he mused.

NBC'S 3-HOUR SMEAR OF SENATOR JOSEPH McCARTHY—PART II

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, February 17, 1977

Mr. McDONALD. Mr. Speaker, on February 9 I shared with my colleagues some preliminary observations on the NBC fictionalized 3-hour diatribe against Senator Joseph McCarthy. Since that time, my office has received numerous phone calls and letters from people who have known and worked with the Senator. They were unanimous in their condemnation of the unfair television presentation. They were able to advise my staff of additional sources of information to refute the allegations made by NBC.

The TV program used every technique of skillful propaganda. The most effective of these was the use of fictional statements put in the mouths of real individuals as well as those attributed to nonexistent characters. The most vicious anti-McCarthy statements were those made by fictional characters invented by the author.

Throughout the program, Senator McCarthy was shown drinking in the office and offering drinks to newsmen and other visitors. This helped create the image of Senator McCarthy as an irresponsible person and a drunkard. My staff has talked to Mrs. Larry Lent who, under her maiden name, Larry Lawrence, worked as Senator McCarthy's secretary. She told us that in all the years that she worked closely with Senator McCarthy she never saw him take a drink in the office and never saw him offer a drink to anyone else in the office. In fact, he did not have liquor available in his office.

The NBC TV show made much of the reputation of Senator McCarthy's charges of communism in the State Department by the Tydings committee. The Tydings investigation could really be the subject of a book, but I will confine myself to a view observations based on a careful reading of the transcript and

other relevant documents. The Tydings committee star witness was Earl Browder, former secretary general of the Communist Party, USA. In this capacity, he would have had knowledge of contact between State Department officials and the Communist Party, or Soviet officials. While Browder answered some questions which indicated that he had no knowledge of certain persons' Communist membership, he refused to answer questions which might show contact between State Department officials and Tung Pi Wu, a Chinese Communist leader.

The unanswered questions had been asked by Senator Hickenlooper on behalf of the Republican minority. He further refused to answer the Senator's questions on whether certain persons were known to him to be members of the Communist Party. Browder was cited for contempt of Congress. At his trial Browder argued that he was not in contempt of the committee but only of the Republican minority. He implied that the purpose of the committee was not to find Communists in the State Department but to disprove McCarthy's charges.

Browder stated in his own defense, "The committee was sharply divided, irreconcilably divided, hopelessly divided into a majority and a minority; and Senator Hickenlooper was a member of the minority and could not possibly speak for the committee as a whole." According to Browder, "these two committees, acting under the name of one, were directing their efforts toward completely different and irreconcilable aims."

The court was convinced by Browder's argument and granted the defendant's motion for a judgment of acquittal. For an extremely interesting discussion of the case and the reproduction of the relevant documents, including the trial transcript, see "Contempt of Congress, the Trial of Earl Browder," privately published by Earl Browder, circa 1951, Yonkers, N.Y.

In 1960 Browder boasted of the power that the Communist Party had had during his years as leader from the early 1930's to the middle 1940's. He said:

Entering the 1930's as a small ultra-left sect of some 7,000 members, remnant of the fratricidal factional struggle of the 1920's that had wiped out the old "left wing" of American socialism, the CP rose to become a national political influence far beyond its numbers (at its height it never exceeded 100,000 members), on a scale never before reached by a socialist movement claiming the Marxist tradition. It became a practical power in organized labour, its influence became strong in some state organizations of the Democratic Party (even dominant in a few for some years), and even some Republicans solicited its support. It guided the anti-Hitler movement of the American League for Peace and Democracy that united a cross-section of some five million organized Americans (a list of its sponsors and speakers would include almost a majority of Roosevelt's Cabinet, the most prominent intellectuals, judges of all grades up to State Supreme Courts, church leaders, labour leaders, etc.). Right-wing intellectuals complained that it exercised an effective veto in almost all publishing houses against their books, and it is at least certain that those right-wingers had extreme difficulty getting published. (Socialism in America, by Earl Browder, privately reprinted from St. Anthony's Papers, London, by Earl Browder, Yonkers, New York, 1960, page 101.)

The television program made much of an incident involving the late J. B. Matthews which had been used so effectively by the Eisenhower administration to attack Senator McCarthy. The Senator had appointed Dr. Matthews who had formerly been the Research Director of the Special Committee on Un-American Activities from 1938–45 as the staff director of the McCarthy committee. The enemies of McCarthy used an article written by Dr. Matthews prior to his appointment in an effort to discredit Senator McCarthy. Matthews was quoted as saying:

The largest single group supporting the Communist apparatus in the United States today is composed of Protestant clergymen.

They neglected to quote further where Matthews said:

It hardly needs to be said that the vast majority of American Protestant clergymen are loyal to the free institutions of this country, as well as loyal to their solemn trust as ministers of the Gospel. In a sense, this overwhelming majority is embarrassed by the participation of the minority in the activities of the most sinister conspiracy in the history of the world.

The international Communist conspiracy aims at the total obliteration of Judeo-Christian civilization. Communist dogma is diametrically opposed to every tenet of Judeo-Christian theology and philosophy.

Matthews had talked about 7,000 out of some 250,000 ministers who had been enticed into Communists fronts. As J. B. Matthews, the Nation's leading expert on Communist fronts, had said over and over again the purpose of the Communist in using fronts was to ensnare unsuspecting dupes. The enemies of McCarthy turned Matthews statement on its head by implying that he was saying that the majority of clergymen had joined Communist fronts. It would be like saying, "the majority of those implicated in the Watergate scandal were attorneys," and being accused of saying that the majority of attorneys were implicated in the Watergate scandal. The first would be true, the second would be nonsense. Senator McCarthy wanted to fight back, but Dr. Matthews, being a man of principles, would not allow him to bear the brunt of the attack and insisted on resigning. Then the affair took a strange turn as the cabal around President Eisenhower got into the act. As Roy Cohn described it in his book, "McCarthy":

Matthews insisted on resigning, but before he could do so the affair took a new turn.

On July 9, President Eisenhower received a telegram from three leading clergymen urging him to speak out against "the sweeping attack on the loyalty of Protestant churchmen."

The message was signed by the Reverend John A. O'Brien of the University of Notre Dame, Rabbi Maurice N. Eisendrath, the president of the Union of American Hebrew Congregations, and the Reverend Dr. John Sutherland Bonnell, pastor of the Fifth Avenue Presbyterian Church. As national co-chairmen of the Commission on Religious Organization of the National Conference of Christians and Jews, they represented a combined force that could not be ignored.

A group of Eisenhower advisers, including Sherman Adams, James Hagerty, and Emmet John Hughes, drafted a presidential reply which gave full support to the churchmen's protest. In angry terms, the White House message charged that "generalized and irresponsible attacks that sweepingly condemn the whole of any group of citizens are alien to America. Such attacks betray contempt for the principle of freedom and decency and condemn such a vast portion of the churches or clergy as to create doubt in the loyalty of all. The damage to our nation is multiplied."

The press, viewing the statement as a direct presidential slap at McCarthy, made headlines of it. Thus, when McCarthy reluctantly accepted Matthews' resignation later that same day, it was generally regarded as a move forced on the Senator by White House censure.

But the clergymen's protest and the presidential reply turned out to be a prearranged affair, cynically stage-managed by the White House staff to injure McCarthy. The full story of the goings-on within the Executive Mansion was confirmed in 1963, when Hughes published *The Ordeal of Power*, a revealing chronicle of his years as one of Eisenhower's speech writers. Recalling the Matthews incident, Hughes said he and other aides watched with fascination as, "defying the instant public outcry" over the article, "McCarthy seemed to stand by Matthews' side."

"Suddenly," Hughes said, "the Wisconsin Senator was vulnerable to direct attack on an unclouded issue."

Hughes then recounted how he, Deputy Attorney General William Rogers, and other staff members working with colleagues in New York who were safely unconnected with the White House, "decided to encourage a telegram of protest to the President from the National Conference of Christians and Jews in New York."

"We also agreed on the need to move swiftly," said Hughes, "since McCarthy was too astute not to realize at almost any hour that Matthews had become a dangerous liability who would have to be dismissed.

"Accordingly, while our mutual friends outside government spurred the National Conference in New York, I hastened the same day to get the agreement of Sherman Adams to our plan *and to draft the President's reply to the message we still awaited.*" [my italics]

In other words, this presidential message that rang with indignation was actually worked up before receipt of the protest to which it was supposed to reply.

The stage was set, but the stage managers neglected to let the President in on their strategy. This omission almost wrecked the scheme. When they finally succeeded in provoking a protest from the church leaders, they were unable to reach Eisenhower to get him to sign the prepared reply.

"By the time the signals were at last cleared," Hughes recalled, "afternoon was upon us; the President, not yet even advised of what was afoot, was closeted with important visitors; and the rumor was raging across Capitol Hill that McCarthy was about to dismiss Matthews and publicly invite applause for his own fair-mindedness. Soon I began to get increasingly frantic phone calls from Rogers on the Hill: 'For God's sake, we have to get that message out fast, or McCarthy will beat us to the draw.'"

Adams suggested taking the reply to the President alone, Hughes said, adding somewhat sheepishly, "since the President tended by now to discount the heat of my own feelings about McCarthy."

At last they got the President to affix his signature—not a moment too soon, for while the stencil for the mimeographed press release was being recut for minor changes, word came from Rogers that Senators McCarthy and Mundt had just finished conferring and were on their way to the Hill, probably with Matthew's resignation.

At this point the Vice President, according to Hughes, buttonholed McCarthy in the Senate Office Building and kept him in conversation until Hughes could telephone the "all clear" signifying that the presidential statement was in the hands of the press.

Thus were the clergymen's protest and the presidentail reply maneuvered by the group of Eisenhower aides who, as Hughes freely admits, had long been awaiting an opportunity to get Senator McCarthy over a barrel. (McCarthy, By Roy Cohn, New York, 1968, Pages 61–63.)

Here we had Richard Nixon, Vice President of the United States, deliberately delaying Senator McCarthy so that the maximum propaganda affect could be obtained from President Eisonhower's unfair attack on Senator McCarthy.

An obscure west coast television reporter wrote a review praising the TV program. His review was entitled "Worse Than Hitler." This, of course, is the kind of hysterical nonsense that the television program was designed to create. One interesting thing in the review though was a quotation of a statement that the author claimed Edward R. Murrow had made to him. Murrow, who did the first TV smear of Senator Joseph McCarthy, was quoted as saying:

What I think about McCarthy or what he thinks of me is not the important thing. The last few days have proved to us all that TV is a potent force. The big question now is—who controls it?

Twenty-three years later that question is still important. Do a small group of men with a bias against the views of the majority of Americans have the right to present only their views in a monopoly controlled medium? I believe they do not. The first amendment rights of the majority of the American people require that the free flow of ideas be presented on television, not just the views of the liberal idealogues.

I have written to NBC requesting 1½ hours of prime Sunday evening television time to answer the charges made against Senator McCarthy who is no longer here to defend himself. This is only half of the time used by NBC to make the charges. I will keep my colleagues informed about whether NBC sees fit to act fairly in this matter.

SENATE—*Monday, February 21, 1977*

(Legislative day of Tuesday, February 1, 1977)

The Senate met at 12 meridian, on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

We shall pray today in the words of President George Washington's prayer for his country.

Let us pray—

"Almighty God: We make our earnest prayer that Thou wilt keep the United States in Thy holy protection; that Thou wilt incline the hearts of the citizens to cultivate a spirit of subordination and obedience to government; and entertain a brotherly affection and love for one another and for their fellow citizens of the United States at large. And finally that Thou wilt most graciously be pleased to dispose us all to do justice, to love mercy and to demean ourselves with that charity, humility, and pacific temper of mind which were the characteristics of the Divine Author of our blessed religion, and without a humble imitation of whose example in these things we can never hope to be a happy nation. Grant our supplication, we beseech Thee, through Jesus Christ our Lord." Amen.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Friday, February 11, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that all committees may be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

JOINT REFERRAL OF NOMINATION

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the nomination of Samuel Winfred Brown, Jr., of Colorado, to be Director of the ACTION Agency, be jointly referred to the Committees on Human Resources and Foreign Relations, it being my understanding that this request has been cleared with the chairmen of both committees.

The ACTING PRESIDENT pro tempore. As in executive session, without objection, it is so ordered.

EXECUTIVE D, 95TH CONGRESS, 1ST SESSION—REMOVAL OF INJUNCTION OF SECRECY

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask unanimous consent that the injunction of secrecy be removed from a treaty with Mexico on the execution of penal sentences which was signed in Mexico City on November 25, 1976 (Ex. D, 95th Cong., 1st sess.), which was transmitted to the Senate during the recess on February 15, 1977, by the President of the United States. I ask that the treaty with accompanying papers be referred to the Committee on Foreign Relations and ordered to be printed, and that the President's message be printed in the RECORD.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

The message of the President is as follows:

To the Senate of the United States:

With a view to receiving the advice and consent of the Senate to ratification, I transmit herewith the Treaty between the United States of America and the United Mexican States on the Execution of Penal Sentences which was signed in Mexico City on November 25, 1976.

I transmit also, for the information of the Senate, the report by the Department of State with respect to the Treaty.

The Treaty would permit citizens of either nation who had been convicted in the courts of the other country to serve their sentences in their home country; in each case the consent of the offender as well as the approval of the authorities of the two governments would be required.

This Treaty is significant because it represents an attempt to resolve a situation which has inflicted substantial hardships on a number of citizens of each country and has caused considerable concern to both governments. It received the approval of the Senate of the United Mexican States on December 30, 1976. I recommend that the Senate give favorable consideration to this Treaty at an early date.

JIMMY CARTER.

THE WHITE HOUSE, *February 15, 1977.*

NOMINATION OF LAURENCE N. WOODWORTH TO BE ASSISTANT SECRETARY OF THE TREASURY

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I send to the desk the nomination of Laurence N. Woodworth, of Maryland, to be Assistant Secretary of the Treasury, vice Charles M. Walker, resigned.

Mr. President, I also send to the desk a communication from the chairman of the Committee on Finance indicating that the committee recommended that when this nomination is received by the Senate that it be confirmed immediately without referral to committee. I ask unanimous consent that the letter may be printed in the RECORD.

There being no objection, the communication was ordered to be printed in the RECORD, as follows:

COMMITTEE ON FINANCE,
Washington, D.C., January 18, 1977.

ROBERT C. BYRD,
Majority Leader, U.S. Senate,
Washington, D.C.

DEAR SENATOR BYRD: The Committee on Finance last week held hearings on the anticipated nominations of W. Michael Blumenthal to be Secretary of the Treasury, Joseph A. Califano, Jr. to be Secretary of Health, Education, and Welfare, and Laurence Woodworth to be Assistant Secretary of the Treasury.

This morning the Committee met in executive session and voted to recommend that when these nominations are received by the Senate, they be confirmed by the

Senate without being referred to the Committee on Finance.

I have received written communications from each of the anticipated nominees stating that if confirmed by the Senate, they will respond to requests to appear and testify before any duly constituted committee of the Senate.

With every good wish, I am

Sincerely,

RUSSELL B. LONG,
Chairman.

Mr. ROBERT C. BYRD. Mr. President, this has been cleared with the minority side, I believe, and I ask unanimous consent that the Senate proceed to the immediate consideration of the nomination, as in executive session.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. The nomination will be stated.

The second assistant legislative clerk read the nomination of Laurence N. Woodworth, of Maryland, to be Assistant Secretary of the Treasury.

The ACTING PRESIDENT pro tempore. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, as in executive session, I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Does the Senator from Tennessee desire recognition?

Mr. BAKER. I do, Mr. President.

NOMINATION OF ADM. STANSFIELD TURNER

Mr. BAKER. Mr. President, on February 10, 1977, the President forwarded to the Senate the nomination of Adm. Stansfield Turner as Director of Central Intelligence with the stipulation that he so serve in the grade of admiral. Today, on the eve of confirmation hearings by the Senate Select Committee on Intelligence, I would like to express my personal concern over that aspect of the nomination that would press a ranking commissioned officer on active duty status into service as the Director of Central Intelligence.

While active military service is neither technically disqualifying for this position nor without historical precedent, it is noteworthy that one has to reach back 24 years to the postwar infancy of the Central Intelligence Agency to find such a precedent. Furthermore, the stipulation of service in grade is without precedent in the history of the Central Intelligence Agency.

The Director of Central Intelligence has never been perceived as a coveted duty assignment for the military careerist. Quite to the contrary, the Director of Central Intelligence has a unique position as principal intelligence adviser to the President, head of the U.S. intelligence community, and Director of the Central Intelligence Agency. Our history has demonstrated the wisdom of insuring that the Director of Central Intelligence retain a large measure of real and apparent independence from other elements of the intelligence community in discharging these responsibilities. Any perceived limitations on the arms length deliberations of the Director of Central Intelligence would threaten to impair both the Director's effectiveness and the credibility of the intelligence community at home and abroad. To risk such a perception at a time when our intelligence community is making great strides to restore an impaired credibility is, in my opinion, both unnecessary and unwise.

I express these reservations without any intention of impugning the qualifications of the Director-designate. On the contrary, I have met with Admiral Turner and am most impressed with him as an individual. I salute his outstanding record of achievement. The reservations I today express are solely with a concept—with the symbolism apparent in that concept.

I have personally urged Admiral Turner to resign his commission, an action that would avoid this unnecessary problem and enable him to serve his country in civilian ranks as nobly as he has in military service. I believe it timely and appropriate that I share these reservations with my colleagues in the Senate.

SENATE JOINT RESOLUTION 23—THE MARIGOLD AS NATIONAL FLORAL EMBLEM

Mr. BAKER. Mr. President, I suspect that some of our colleagues who have served a number of years in this body would feel that something was missing in the Senate if a new Congress convened without the introduction of a resolution to designate the marigold as our national flower.

Well, I certainly would not want to disappoint them or the many Americans devoted to this beautiful flower, and I am today introducing a joint resolution providing for the adoption of the American marigold as the national floral emblem of the United States.

I might point out, for the information of some of our junior colleagues, that my late father-in-law, Senator Everett M. Dirksen, introduced this resolution in four successive Congresses. After his death in 1969, Senator Mansfield, the former majority leader, and I carried on Senator Dirksen's effort; and I am pleased and proud to again propose legislation to fulfill his longtime dream.

Senator Dirksen devoted some of his most colorful rhetoric to extolling the virtues of his favorite flower:

I can think of nothing greater or more inspiring—

He said—

than a field of blooming marigolds tossing their heads in the sunshine and giving a glow to the entire landscape. The marigold beguiles the senses and ennobles the spirit of man.

His introduction of legislation making the marigold the national flower created a good deal of controversy. Other Members of Congress offered measures to confer the honor upon their own States' flowers, including the rose, the iris, and the carnation. The daisy, dandelion, and even the corn tassel were suggested as candidates. In the midst of the storm, however, Senator Dirksen stood firm; and I feel that his arguments in favor of the marigold outweigh those which have been advanced on behalf of any other flower.

The marigold is possessed of a history rich in folklore. Cultivated by the Aztecs for its beauty and because it was thought to have medicinal value, the marigold was carried to Spain by Hernando Cortez, from whence its popularity spread throughout Europe and Northern Africa. I understand that monks and nuns, in dedicating the flower to the Virgin Mary, called it "Mary's gold," giving rise to the common name "marigold" and making the marigold a symbol of religious faith.

The marigold was later brought to North America by European colonists; and it soon became a favorite in gardens throughout the Colonies, including that of George Washington at Mount Vernon. Since that time, the marigold has been improved through the efforts of American seed growers so that it has attained greater hardiness, a wider variety of colors and larger flowers.

It is now easily grown from seed and can be found in great profusion throughout all 50 States. It is loved by millions of Americans for its great beauty and embodies, more than any other flower I can think of, the quality of the American spirit—humility, strength of character, endurance, and hope.

The United States is the only major "free" country in the world which lacks a national floral emblem. Whereas the rose is the national flower of seven nations, the marigold is not the national flower of any foreign nation, nor is it the State flower of any of our States. It grows well in every State, however; and the legislatures of three of our States, Georgia, Illinois, and Indiana, have approved resolutions recommending that the marigold be adopted as our national flower.

Mr. President, I hope that the 95th Congress will make it possible, by approving this resolution, for the marigold, a flower which belongs to America and all Americans, to take its place beside the American eagle and the American flag as a symbol of the United States.

Mr. President, I ask unanimous consent that the text of the resolution be printed in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, knowing full well that there was no possibility that I could rise to the grandeur of the occasion and the precedent that has been established by Senator Dirksen on such occasions in the past, I will refrain from trying.

But, Mr. President, I send to the desk a joint resolution to that effect and ask for its appropriate referral.

The ACTING PRESIDENT pro tempore. The resolution will be received and appropriately referred.

S.J. RES. 23

Whereas the peoples of the world have from time immemorial adopted emblems—flags, birds, flowers—for their countries, representatives of their national virtues; and

Whereas the people of the United States have similarly adopted emblems—the American flag and the American eagle—to represent the virtues of this country; and

Whereas each of the fifty sovereign States of the United States, in addition to its State flag, has a floral emblem which it cherishes as its own; and

Whereas the United States is the only major "free" country in the world without a floral emblem; and

Whereas the American marigold represents the character of the United States more appropriately as an emblem than does any other flower in that it is an American native and native of nowhere else in the world; grown in abundance in the home gardens of every State in the Union yet not the floral emblem of any State in the Union; grown easily and quickly from seed; already acknowledged as a symbol of religious faith; a flower in its very appearance representing not just beauty but a rugged humility of character; and, like the American eagle and the American flag, an exclusively American emblem, unclaimed by any foreign nation: Therefore be it.

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the flower commonly known as the American marigold is hereby designated and adopted as the national floral emblem of the United States, and the President is requested to declare such fact by proclamation.

Mr. RANDOLPH. Mr. President, will the minority leader yield?

Mr. BAKER. I am happy to yield to the distinguished senior Senator from West Virginia.

Mr. RANDOLPH. Mr. President, on many occasions in the past, the able Senator who occupied your chair, your father-in-law, Everett Dirksen of Illinois, pleaded eloquently for the marigold. Somewhere along the way we must find some appropriate manner in which to remember him in just one of the many crusades that he began and fought for during his extraordinary service in this body. Everett and I came to the Congress in 1933 being sworn in together on March 4 of that critical year in our Nation's history.

Mr. BAKER. Mr. President, I thank the Senator from West Virginia who served long and diligently with Senator Dirksen and who I know from personal experience shared my esteem and respect for him.

FEDERAL SALARY INCREASE

Mr. BAKER. Mr. President, the salary increase for Members of Congress, the Cabinet, the Federal judiciary, and other high-ranking Federal officials has now gone into effect, both Houses of Congress having failed to disapprove it. I believe that the Congress has made the right decision in this matter; and, as I have stated before, I endorsed the salary recommendations of the Commission on Executive, Legislative, and Judicial Salaries.

The difficulties surrounding implementation of this pay raise lie not, in my view, with the Peterson Commission's recommendations, but with the mechanism which the Congress has established in order to carry out its constitutional mandate to set its own salary. I believe we must modify that mechanism, and I would support, at the minimum, changes requiring that salary increases could not become effective until after a congressional election has intervened.

In the meantime, however, it is incumbent upon us to act promptly upon the report of the Special Committee To Propose a Code of Conduct for Members and Employees of the Senate. This committee, established under Senate Resolution 36, will report to the Senate on March 1; and, under the terms of the resolution, the report will automatically become the pending business of the Senate at that time. I assure my colleagues of my firm commitment to passage of a code of conduct for the Senate next month.

Mr. President, the distinguished majority leader and I have conferred at some length about this matter; and I look forward now to the completion of the undertaking which he and I described when we first stated that we intended, as the joint leadership, to support this proposal for a pay increase. The completion of the cycle to which I refer is the consideration promptly of the recommendation for a code of ethics.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. BAKER. I yield the floor.

Mr. ROBERT C. BYRD. Mr. President, I share the viewpoint expressed by the distinguished minority leader regarding an official code of conduct for Senators and officers and employees of the Senate.

Mr. BAKER and I today prepared a letter which is being distributed to each of the 15 members of the Special Committee on Official Conduct, expressing our strong support for a code of ethics that will be perceived by the American people as a strong, clear, and strict code of conduct.

At the time the Republican leader and I introduced the resolution creating the Special Committee on Official Conduct, we stated clearly that regardless of whether or not the President's pay raise proposal went into effect, the Senate would enact a strong code of ethics. The pay raise has now become effective. The Senate now has a high duty to enact a strong code of ethics that will reflect well upon the Senate and that will restore the respect of the people for the Senate as an institution, a respect that it deserves.

Mr. BAKER. Mr. President, I thank the distinguished majority leader, and I commend him for his leadership in this effort. It was my pleasure to join him in the original statement, and it will be my pleasure to join him in a further effort to see that an appropriate code of ethics is adopted.

Mr. President, I reserve the remainder of my time.

READING OF WASHINGTON'S FAREWELL ADDRESS

The ACTING PRESIDENT pro tempore. Under the order of the Senate of January 24, 1901, as modified on February 4, 1977, the Senator from California (Mr. HAYAKAWA) has been appointed by the Vice President to read Washington's Farewell Address.

Mr. HAYAKAWA. It is my honor and privilege to read, under appointment of the Vice President of the United States and in observance of George Washington's Birthday, the text of his Farewell Address, as delivered at the close of his Presidency on September 17, 1796.

Mr. HAYAKAWA, at the rostrum, read the Farewell Address, as follows:

To the people of the United States.

FRIENDS AND FELLOW CITIZENS: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those, out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured, that this resolution has not been taken, without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country; and that, in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest; no deficiency of grateful respect for your past kindness; but am supported by a full conviction that the step is compatible with both.

The acceptance of, and continuance hitherto in the office to which our suffrages have twice called me, have been a uniform sacrifice of inclination to the opinion of duty, and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this, previous to the last election, had even led to the preparation of an address to declare it to you; but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety; and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country, you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust, were explained on the proper occasion. In the discharge of this trust, I will only say that I have, with good intentions, contributed towards the organization and administration of the government, the best exertions of which a very fallible judgment was capable. Not unconscious in the outset, of the inferiority of my

qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself; and, every day, the increasing weight of years admonishes me more and more, that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services they were temporary, I have the consolation to believe that, while choice and prudence invite me to quit the political scene, patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgement of that debt of gratitude which I owe to my beloved country, for the many honors it has conferred upon me; still more for the steadfast confidence with which it has supported me; and for the opportunities I have thence enjoyed of manifesting my inviolable attachment, by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which not unfrequently, want of success has countenanced the spirit of criticism,—the constancy of your support was the essential prop of the efforts, and a guarantee of the plans, by which they were effected. Profoundly penetrated with this idea, I shall carry it with me to my grave, as a strong incitement to unceasing vows that heaven may continue to you the choicest tokens of its beneficence—that your union and brotherly affection may be perpetual—that the free constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue—that, in fine, the happiness of the people of these states, under the auspices of liberty, may be made complete by so careful a preservation, and so prudent a use of this blessing, as will acquire to them the glory of recommending it to the applause, the affection and adoption of every nation which is yet a stranger to it.

Here, perhaps I ought to stop. But a solicitude for your welfare, which cannot end but with my life, and the apprehension of danger, natural to that solicitude, urge me, on an occasion like the present, to offer to your solemn contemplation, and to recommend to your frequent review, some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom, as you can only see in them the disinterested warnings of a parting friend, who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people, is also now dear to to you. It is justly so; for it is a main pillar in the edifice of your real independence; the support of your tranquility at home: your peace abroad; of your safety; of your prosperity; of that very liberty which you so highly prize. But, as it is easy to foresee that, from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth; as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively (though often covertly and insidiously) directed; it is of infinite movement, that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it: accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity; watching for its preservation with jealous anxiety; discountenancing whatever may suggest even a suspicion that it can, in any event, be abandoned; and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest, or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth, or choice, of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism, more than any appellation derived from local discriminations. With slight shades of difference, you have the same religion, manners, habits, and political principles. You have, in a common cause, fought and triumphed together; the independence and liberty you possess, are the work of joint counsels, and joint efforts, of common dangers, sufferings and successes.

But these considerations, however powerfully they address themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest.—Here, every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The *north*, in an unrestrained intercourse with the *south*, protected by the equal laws of a common government, finds in the productions of the latter, great additional resources of maritime and commercial enterprise, and precious materials of manufacturing industry.—The *south*, in the same intercourse, benefiting by the same agency of the *north*, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the *north*, it finds its particular navigation invigorated; and while it contributes, in different ways, to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength, to which itself is unequally adapted. The *east*, in a like intercourse with the *west*, already finds, and in the progressive improvement of interior communications by land and water, will more and more find a valuable vent for the commodities which it brings from abroad, or manufactures at home. The *west* derives from the *east* supplies requisite to its growth and comfort—and what is perhaps of still greater consequence, it must of necessity owe the *secure* enjoyment of indispensable *outlets* for its own productions, to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as *one nation*. Any other tenure by which the *west* can hold this essential advantage, whether derived from its own separate strength; or from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While then every part of our country thus feels an immediate and particular interest in union, all the parts combined cannot fail to find in the united mass of means and efforts, greater strength, greater resource proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations; and, what is of inestimable value, they must derive from union, an exemption from those broils and wars between themselves, which so frequently afflict neighboring countries not tied together by the same government; which their own rivalship alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues, would stimulate and embitter.—Hence likewise, they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty, and which are to be regarded as particularly hostile to republican liberty. In this sense it is, that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind, and exhibit the continuance of the union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who, in any quarter, may endeavor to weaken its hands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern, that any ground should have been furnished for charac-

terizing parties by *geographical* discriminations,—*northern and southern—Atlantic* and *western;* whence designing men may endeavor to excite a belief that there is a real difference of local interests and views. One of the expedients of party to acquire influence within particular districts, is to misrepresent the opinions and aims of other districts. You cannot shield yourselves too much against the jealousies and heart burnings which spring from these misrepresentations: they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head: they have seen, in the negotiation by the executive, and in the unanimous ratification by the senate of the treaty with Spain, and in the universal satisfaction at the event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the general government and in the Atlantic states, unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties, that with Great Britain and that with Spain, which secure to them everything they could desire, in respect to our foreign relations, towards confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union, a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances, in all times, have experienced. Sensible of this momentous truth, you have improved upon your first essay, by the adoption of a constitution of government, better calculated than your former, for an intimate union, and for the efficacious management of your common concerns. This government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and containing within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government.—But the constitution which at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power, and the right of the people to establish government, presupposes the duty of every individual to obey the established government.

All obstructions to the execution of the laws, all combinations and associations under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle, and of fatal tendency.—They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the nation the will of party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reigns of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Towards the preservation of your government and the permanency of your present happy state, it is requisite, not only that you steadily discountenance irregular opposition to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the constitution, alterations which will impair the energy of the system; and thus to undermine what cannot be directly overthrown. In all the changes to which you may be invited, remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions:—that experience is the surest standard by which to test the real tendency of the existing constitution of a country:—that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion: and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed, little else than a name, where the government is too feeble to withstand the enterprises of fraction, to confine each member of the society within the limits prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the state, with particular references to the founding them on geographical discrimination. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind.—It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful depotism.—But this leads at length to a more formal and permanent despotism. The disorders and miseries which result, gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purpose of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind, (which nevertheless ought not to be entirely out of sight) the common and continual mischiefs of the spirit of party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils, and enfeeble the public administration. It agitates the community with ill founded jealousies and false alarms; kindles the animosity of one part against another; forments occasional riot and insurrection. It opens the door to foreign influence and corruption, which finds a facilitated access to the government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This within certain limits is probably true; and in governments of a monarchical cast, patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency, it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent it bursting into a flame, lest instead of warming, it should consume.

It is important likewise, that the habits of thinking in a free country should inspire caution in those intrusted with its administration, to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department, to encroach upon another, The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human heart, is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power,

by dividing and distributing it into different depositories, and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments ancient and modern: some of them in our country and under our own eyes.—To preserve them must be as necessary as to institute them. If, in the opinion of the people, the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the constitution designates.—But let there be no change by usurpation; for through this, in one instance, may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil, and partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, where is the security for property, for reputation, for life, if the sense of religious obligation *desert* the oaths which are the instruments of investigation in courts of justice? and let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect, that national morality can prevail in exclusion of religious principle.

It is substantially true, that virtue or morality is a necessary spring of popular government. The rule, indeed, extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion, it should be enlightened.

As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should co-operate. To facilitate to them the performance of their duty, it is essential that you should practically bear in mind, that towards the payment of debts there must be revenue; that to have revenue there must be taxes; that no taxes can be devised which are not more or less inconvenient and unpleasant; that the intrinsic embarrassment inseparable from the selection of the proper object (which is always a choice of difficulties,) ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice towards all nations; cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and, at no distant period, a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas? Is it rendered impossible by its vices?

In the execution of such a plan, nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachment for others, should be excluded; and that, in place of them, just and amicable feelings towards all should be cultivated. The nation which indulges towards another an habitual hatred, or an habitual fondness, is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another, disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity, and adopts through passion what reason would reject; at other times, it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

So likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions, to the favorite nation, of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils!—Such an attachment of a small or weak, towards a great and powerful nation, dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence, (I conjure you to believe me fellow citizens,) the jealousy of a free people ought to be *constantly* awake; since history and experience prove, that foreign influence is one of the most baneful foes of republican government. But that jealousy, to be useful, must be impartial, else it becomes the instrument of the very influence to be avoided, instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another, cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious; while its tools and dupes usurp the applause and confidence of the people, to surrender their interests.

The great rule of conduct for us, in regard to foreign nations, is, in extending our commercial relations, to have with them as little *political* connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith:—Here let us stop.

Europe has a set of primary interests, which to us have none, or a very remote relation. Hence, she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence, therefore, it must be unwise in us to implicate ourselves, by artificial ties, in the ordinary vicissitudes of her politics, or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve

upon, to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us, will not lightly hazard the giving us provocation, when we may choose peace or war, as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign world; so far, I mean, as we are now at liberty to do it; for let me not be understood as capable of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than private affairs, that honesty is always the best policy. I repeat it, therefore, let those engagements be observed in their genuine sense. But in my opinion, it is unnecessary, and would be unwise to extend them.

Taking care always to keep ourselves by suitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony, and a liberal intercourse with all nations, are recommended by policy, humanity, and interest. But even our commercial policy should hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences; consulting the natural course of things; diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary, and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view, that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance, it may place itself in the condition of having given equivalents for nominal favors, and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect, or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish; that they will control the usual current of the passions, or prevent our nation from running the course which has hitherto marked the destiny of nations, but if I may even flatter myself that they may be productive of some partial benefit, some occasional good; that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism; this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself, the assurance of my own conscience is, that I have, at least, believed myself to be guided by them.

In relation to the still subsisting war in Europe, my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice, and by that of your representatives in both houses of congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take, and was bound, in duty and interest, to take a neutral position. Having taken it, I determined, as far as should depend upon me, to maintain it with moderation, perseverance and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without any thing more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity towards other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me, a predominant motive has been to endeavor to gain time to our country to settle and mature its yet recent institutions, and to progress, without interruption, to that degree of strength, and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration, I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope that my country will never cease to view them with indulgence; and that, after forty-five years of my life dedicated to its service, with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things, and actuated by that fervent love towards it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations; I anticipate with pleasing expectation that retreat in which I promise myself to realize, without alloy, the sweet enjoyment of partaking, in the midst of my fellow citizens, the benign influence of good laws under a free government—the ever favorite object of my heart, and the happy reward, as I trust, of our mutual cares, labors and dangers.

GEO. WASHINGTON.

UNITED STATES, *17th September, 1796.*

The ACTING PRESIDENT pro tempore (Mr. METCALF). If the Senate will indulge the Presiding Officer completely out of order for half a minute, the Senator from Montana has been privileged and honored to read this message twice, which is two more times than George Washington ever read it.

I know from experience how hard it is to read, Despite the nobility of the sentiments, the long sentences and the complex clauses make it a very difficult message.

I, therefore, offer my sincere congratulations to the Senator from California and congratulate him and honor him for the splendid presentation. It has never been better read in this Chamber.

Mr. RANDOLPH. Mr. President, I add my commendation to that of the Presiding Officer for the understanding manner in which the Senator from California (Mr. HAYAKAWA) has read the Washington Farewell Address.

I had the privilege of reading the address in 1962 and 1970.

Washington's words were first read in the Senate of the United States in 1888. It has been read each year beginning in 1896. We have had the 81st reading of the address this afternoon.

(At this point, Mr. MORGAN assumed the Chair.)

Mr. RANDOLPH. Mr. President, I join the Senator from Montana, who has just left the Chair, in indicating that many of the sentences are lengthy and involved. Some are very long—in fact, almost 90 words in a sentence. But the constant truths, regardless of the brevity or length of the structure of the address, continue, at least in part, to be worthy of guides for those of us who are living in 1977.

I ask unanimous consent, Mr. President, to have the Introduction, as prepared by the Legislative Reference Service of the Library of Congress, printed at this point in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

INTRODUCTION

Washington's Farewell Address was not an address in the sense in which we customarily use the term; that is, it was never publicly read by Washington before an audience, but was first published in the Philadelphia *Daily American Advertiser* of September 19, 1796.

Washington's main purpose in making public his Farewell Address was to eliminate his name from the third presidential election. In 1792 he had hoped to avoid a second term and had asked Madison to prepare a draft of a valedictory address but friends had prevailed upon him to accept another term.

The first part of the Farewell Address gives Washington's reasons for retiring from public office; the second part, perhaps the most

important, presents his thoughts on the desirability of a strong union and the principles upon which domestic tranquility could be maintained and foreign respect induced; the third part justified his policy of nutrality toward France and England and connected that justification with the other principles of the address, which were based on his personal experiences in leading a revolutionary army and directing an untried republican government.

There has been controversy over the authorship of the Farewell Address, particularly to the extent to which Hamilton and Madison participated in its drafting. It is not possible here to recount in detail the arguments and counter-arguments on the subject. Victor Hugo Paltsits, who has examined carefully the related documents, has this to say in his book, *Washington's Farewell Address:* "* * * He [Washington] drew upon each source and altered or introduced words at will, even words that were in no anterior draft. In the final analysis he was his own editor; and the Farewell Address, in the final form for publication, was all in his own handwriting. It was then in content and form what he had chosen to make it by processes of adoption and adaptation in fulfillment of what he desired. By this procedure every idea became his own without equivocation."

The reading of the Farewell Address on Washington's Birthday, or, if that falls on Sunday, on the following day, has become an established custom in both Houses of Congress. It was read in the Senate as early as 1888, and has been read annually since 1896. In the House of Representatives it was read in 1899, in most of the years from 1909 to 1928, and annually since 1934. Thus each year we recall Washington's sincere and unselfish counsel to his own and future generations.

Mr. RANDOLPH. Mr. President, few persons have knowledge of the background of the address as Mr. HAYAKAWA set forth in this preface. September 17, as the Senator has stated, was the date when George Washington signed his name but it was first published in the Daily American Advertiser in Philadelphia on September 19, 1796.

I quote from the words as read today, and as they have been read in this Chamber annually for 81 years:

> Citizens by birth, or choice, of a common country, that country has a right to concentrate your affections.

It is noteworthy that President Washington recognized there would be those citizens who would have their birth in this good country, but there would be those men and women who would come to our country to live from literally all parts of the world. We have his counsel across the years in these further words:

> You have, in a common cause, fought and triumphed together; the independence and liberty you possess, are the work of joint counsels, and joint efforts, of common dangers, sufferings and successes.

Washington then, and hopefully we now, must recognize that in this problem plagued world in which we labor there is a need, perhaps more than ever before, for not alone tolerance for another nation or the peoples who live there. Beyond the tolerance, hopefully, we need an understanding, if we can bring it into focus, which will provide us the great joy of living as neighbors in a world of peace.

So it is with that faith that I conclude.

Mr. DOLE. Mr. President, I would like to take this opportunity to congratulate Senator HAYAKAWA for his excellent rendition of Washington's Farwell Address. I found myself truly inspired by this presentation, and wish to thank the Senator for it.

Washington's words ring as true today as they did in 1796. The value of his advice remains at a premium and the course which he charted for America's destiny has served our Nation well these many years. Of particular note in these debt-ridden days of our Federal Government are these words: "As a very important source of strength and security, cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering, also, that timely disbursements, to prepare for danger, frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions, in time of peace, to discharge the debts which unavoidable wars may have occasioned, not ingenerously throwing upon posterity the burden which we ourselves ought to bear."

Another excellent example of the value of his advice are these comments on the subject of religion and morality. "Of all the dispositions and habits which lead to political prosperty, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism, who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them.

Washington still serves all Americans as a source of inspiration. I would like to congratulate the Senator from California on his presentation which properly drew our attention to the words of General Washington.

Mr. BAKER. Mr. President, let me simply say that I wish to express my personal gratitude to the Senator from California for his eloquent delivery of the traditional farewell address.

I noted with interest the enthusiasm and the obvious feeling that the Senator from California had in making that presentation to the Senate on this occasion. I express my thanks to him and that of our other Republican colleagues for his effort on this occasion today.

Mr. SCOTT. Mr. President, I add my word of commendation to our distinguished colleague from California on his reading of Washington's Farewell Address.

We are rather proud of the fact that our first President was a Virginian. I had the opportunity 10 years ago during my first year in the House of Representatives of reading the Farewell Address. I believe it is a custom that has existed in both bodies over the years. I think it is a custom that should continue to be observed.

I am sorry that Washington was born on the third Monday of February rather than the 22d of February.

We are so anxious to have long weekends that we observe the anniversary of the birth of our first President on a day that was not actually his birthday. But that should not detract from our observance of the birth of our first President, President's birthday, as it is known at this time.

Mr. President, a Boy Scout group from Yorktown is in the Capitol. My grandson is one of those Scouts, and I am very pleased that they can be with us.

Yorktown, of course, is the place where Cornwallis surrendered to General Washington. This particular troop happens to be sponsored by the Crooks Memorial United Methodist Church, which my daughter and son-in-law and their family attend.

I mention this as a very appropriate time for this group of Boy Scouts, with all they represent, to visit the Capitol, coming as they do from Yorktown, where some would say America won its independence.

TIME LIMITATION AGREEMENT—SENATE CONCURRENT RESOLUTION 10

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Senate Concurrent Resolution 10, the concurrent resolution revising the congressional budget for the U.S. Government for the fiscal year 1977, is made the pending business before the Senate, there be a time limitation thereon of 5 hours, with the understanding that not to exceed 4 hours would be carried over until tomorrow.

The PRESIDING OFFICER (Mr. MORGAN). Is there objection

Mr. JAVITS. What bill is this?

Mr. BAKER. Mr. President, if the Senator will yield, this is a time limitation on the concurrent resolution revising the congressional budget.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, with respect to the concurrent resolution, I understand that there is a limit of 5 hours, by unanimous consent.

Mr. ROBERT C. BYRD. Yes.

Mr. JAVITS. And any amendment may take not more than 2 hours.

Mr. ROBERT C. BYRD. Yes.

Mr. JAVITS. Suppose there are amendments, and the time is crowded. Does the Senator intend that there shall be no debate on them, that they simply shall be voted on at the end, or does he intend to give any time to amendments, even a brief time? It seems that when we do that, we get into trouble. I will not object, because the business has to be expedited, but I think the leader should think about that and allow perhaps 10 minutes.

Mr. ROBERT C. BYRD. I think that could be done. If we should get into that situation, I would attempt to so arrange it.

Mr. JAVITS. I thank the Senator.

THE PRESIDENT'S COMMITMENT TO HUMAN RIGHTS

Mr. ROBERT C. BYRD. Mr. President, during the current controversy over con-

tacts between American citizens and Soviet "prisoners of conscience"—dissidents—the whole world has been able to recognize clearly the most basic difference between our form of government and the government of the Communist dictatorships.

Whether he is an ordinary tourist, an Associated Press reporter, or the President of the United States, an American citizen finds it impossible to accept the proposition that a free expression of his beliefs and opinions is wrong.

I am sure that Mr. Carter spoke for many Americans as well as for himself when he responded to a letter from Andrei Sakharov, expressing his firm commitment to the promotion of human rights. This open communication between a Soviet scientist and the President of the United States is more surprising to Soviet citizens and to the Soviet Government than it is to the average American. We are quite used to the free and frequent use of first amendment rights. They are a basic foundation for our Democratic government.

The Soviet Union, of course, has signed several treaties, both in the United Nations and at Helsinki, which give lip service to freedom of expression and human rights. This has not, however, made freedom of expression acceptable or possible in their country. It is not acceptable or possible in many places in the world today.

That fact must never be allowed to restrict our own freedom of expression—on the contrary, we can hope that our responsible use of our own freedom will encourage others to continue to struggle for theirs.

I am sure that the American President will continue to use his office to emphasize the commitment of his administration and this Nation to the principles of human rights and full freedom of thought, speech, and action. In that effort he will have my support, and the support of the American people.

MESSAGES FROM THE PRESIDENT RECEIVED DURING ADJOURNMENT

Under authority of the order of February 11, 1977, messages submitting sundry nominations and withdrawing certain nominations were received on February 14, 15, 16, and 18, 1977, from the President of the United States.

(The nominations and withdrawals received during the adjournment are printed in today's RECORD at the end of the Senate proceedings.)

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Heiting, one of his secretaries.

APPROVAL OF BILL AND JOINT RESOLUTION

A message from the President of the United States announced that he had approved and signed the following:

On February 16, 1977:

S. 649. An act to authorize payment of salaries of certain members of Senate committee staffs at the rates paid to them on January 4, 1977.

On February 17, 1977:

S.J. Res. 10. Joint resolution to extend the period of time in which the American Indian Policy Review Commission must submit its final report and to increase the authorization of appropriations for such Commission.

INTERNATIONAL FISHERY AGREEMENTS—MESSAGES FROM THE PRESIDENT—PM-36, PM-37, PM-38, AND PM-39

The PRESIDING OFFICER laid before the Senate the following messages from the President of the United States:

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and the Republic of Korea, signed at Washington on January 4, 1977.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider issuance of a joint resolution in order to bring this Agreement into force by that date.

JIMMY CARTER.

THE WHITE HOUSE, *February 21, 1977.*

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement for 1977 between the United States and Japan, signed at Washington on February 10, 1977.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider amendment of the "Fishery Conservation Zone Transition Act" in order to incorporate this Agreement within its overall provisions.

Also transmitted for the information of the Congress is a governing international fishery agreement between the United States and Japan for 1978–1982 initialled at Washington on February 10, 1977. This Agreement will be resubmitted for favorable consideration following its signature by the United States and Japan later this year.

JIMMY CARTER.

THE WHITE HOUSE, *February 21, 1977.*

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and the European Economic Community, signed at Washington on February 15, 1977.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider amendment of the "Fishery Conservation Zone Transition Act" in order to incorporate this Agreement within its overall provisions.

JIMMY CARTER.

THE WHITE HOUSE, *February 21, 1977.*

To the Congress of the United States:

In accordance with the Fishery Conservation and Management Act of 1976 (P.L. 94-265; 16 U.S.C. 1801), I transmit herewith a governing international fishery agreement between the United States and Spain, signed at Washington on February 16, 1977.

This Agreement is significant because it is one of a series to be negotiated in accordance with that legislation. I urge that the Congress give favorable consideration to this Agreement at an early date. Since 60 calendar days of continuous session as required by the legislation are not available before March 1, 1977, I strongly recommend that the Congress consider amendment of the "Fishery Conservation Zone Transition Act" in order to incorporate this Agreement within its overall provisions.

JIMMY CARTER.

THE WHITE HOUSE, *February 21, 1977.*

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the messages from the President of the United States, pursuant to Public Law 94-265, transmitting governing international fishery agreements between the United States and the European Economic Community, Spain, Japan, and the Republic of Korea be jointly referred to the Committee on Commerce, Science and Transportation and the Committee on Foreign Relations.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE HOUSE

ENROLLED JOINT RESOLUTIONS SIGNED

Under authority of the order of February 11, 1977, a message from the House of Representatives was received on February 16, 1977, stating that the Speaker had signed the following enrolled joint resolutions:

H.J. Res. 239. Joint resolution extending the filing date of the 1977 Joint Economic Report.

H.J. Res. 240. Joint resolution to give congressional approval to certain governing international fishery agreements negotiated in accordance with the Fishery Conservation and Management Act of 1976, and for other purposes.

The joint resolutions were signed on February 16, 1977, by the Vice President.

EXECUTIVE MESSAGE REFERRED

As in executive session, the Presiding Officer laid before the Senate a message from the President of the United States submitting the nomination of R. James Woolsey, of Maryland, to be Under Secretary of the Navy, which was referred to the Committee on Armed Services.

COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The PRESIDING OFFICER laid before the Senate the following communications which were referred as indicated:

EC–661. A letter from the Secretary of Defense transmitting, pursuant to law, a report of approvals under section 407(a) of the annual compensation of any officer or employee of a Federal Contract Research Center in excess of $45,000 from Federal funds (with an accompanying report); to the Committee on Armed Services.

EC–662. A letter from the Secretary of Labor transmitting, pursuant to law, a report on exemplary rehabilitation certificates for the calendar year 1976 (with an accompanying report); to the Committee on Armed Services.

EC–663. A letter from the Director of the Office of Management and Budget, Executive Office of the President, transmitting, pursuant to law, notice that the appropriations to the Department of the Treasury for the Internal Revenue Service—"Salaries and expenses," "Accounts, Collection and Taxpayer Service," and "Compliance"—for the fiscal year 1977, have been reapportioned on a basis which indicates the necessity for a supplemental estimate of appropriations; to the Committee on Appropriations.

EC–664. A letter from the Rear Admiral, U.S. Navy Chairman and Contracting Officer Navy Claims Settlement Board transmitting, pursuant to law, notice that the Newport News Shipbuilding and Dry Dock Co., Newport News, Va., has submitted claims under contract N00024–68–C–0355, requesting an increase in ceiling price of over $150 million; to the Committee on Appropriations.

EC 665. A letter from the President of the Export-Import Bank of the United States transmitting, pursuant to law, a report of the actions taken by the Export-Import Bank of the United States during the quarter ended December 31, 1976 (with an accompanying report); to the Committee on Banking, Housing, and Urban Affairs.

EC 666. A letter from the Secretary of the Interior transmitting, pursuant to law, a National Park Service study of the Sawtooth National Recreation Area (with an accompanying report); to the Committee on Energy and Natural Resources.

EC 667. A letter from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Speed Limit 55, Is it Achievable?" (with an accompanying report); to the Committee on Governmental Affairs.

EC 668. A letter from the Auditor of the District of Columbia transmitting, pursuant to law, a copy of the letter report concerning "D.C. General Fee Setting Procedures" (with an accompanying report); to the Committee on Governmental Affairs.

EC 669. A letter from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, copies of two orders in the cases of aliens who have been found admissible to the United States (with accompanying papers); to the Committee on the Judiciary.

EC 670. A letter from the Comptroller of the International Boundary and Water Commission, United States and Mexico, transmitting pursuant to law, the report of the International Boundary and Water Commission for the Calendar year 1976 (with an accompanying report); to the Committee on the Judiciary.

EC 671. A letter from the Commissioner of the Immigration and Naturalization Service transmitting, pursuant to law, copies of orders entered in 507 cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of such aliens (with accompanying papers); to the Committee on the Judiciary).

SPECIAL REPORT SUBMITTED DURING ADJOURNMENT—REPT. NO. 95–20

Under authority of the order of February 11, 1977, Mr. EASTLAND, from the Committee on the Judiciary, submitted the annual report of the Subcommittee on Internal Security on February 17, 1977.

REPORT OF THE COMMITTEE ON FOREIGN RELATIONS—REPT. NO. 95–21

Mr. SPARKMAN, from the Committee on Foreign Relations, submitted a report entitled "Legislative Activities Report of the Committee on Foreign Relations," which was ordered to be printed.

SPECIAL REPORT OF THE CRIMINAL LAWS AND PROCEDURES SUBCOMMITTEE—REPT. NO. 95–22

Mr. McCLELLAN, from the Committee on the Judiciary, submitted a special report entitled "Special Report of the Criminal Laws and Procedures Subcommittee," which was ordered to be printed.

SPECIAL REPORT OF THE SUBCOMMITTEE ON PATENTS, TRADEMARKS, AND COPYRIGHTS—REPT. NO. 95–23

Mr. McCLELLAN, from the Committee on the Judiciary, submitted a report entitled "Special Report of the Subcommittee on Patents, Trademarks, and Copyrights," which was ordered to be printed.

MEASURES REREFERRED PURSUANT TO SENATE RESOLUTION 4

Under the authority and direction of the provisions of Senate Resolution 4, agreed to by the Senate Friday, February 4, 1977 (legislative day, February 1), the following measures are rereferred as indicated:

Referred from Post Office and Civil Service to Governmental Affairs:

S. Resolutions 50, 52, 66; Senate bills 10, 75, 80, 94, 168, 201, 224, 245, 295, 298, 303, 313, 320, 359 386, 408, 413, 444, 518, 546, 565, 599, 646.

Referred from Commerce to Energy and Natural Resources:

Senate bills 19, 109, 110, 112, 197, 256, 271, 273, 325, 357, 420, 428, 542, 743.

Referred from Joint Committee on Atomic Energy to Energy and Natural Resources:

Senate bills 63, 266.

Referred from Public Works to Commerce, Science, and Transportation:

Senate bills 114, 564.

Referred from Interior and Insular Affairs to Commerce, Science, and Transportation:

Senate bill 550.

Referred from Aeronautical and Space Sciences to Commerce, Science, and Transportation:

Senate bills 365, 657.

Referred from Interior and Insular Affairs to Select Committee on Indian Affairs:

Senate joint resolution 10; Senate bills 103, 115, 202, 214, 468, 470, 471, 482.

Referred from Commerce to Environment and Public Works:

Senate bills 212, 363, 415.

Referred from Interior and Insular Affairs to Environment and Public Works:

Senate bill 367.

Referred from the Joint Committee on Atomic Energy to Environment and Public Works:

Senate bill 495.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. BARTLETT (for himself and Mr. BELLMON):

S. 744. A bill to restore public accountability for decisions affecting the compensation of Members of Congress and other Federal officials; to the Committee on Governmental Affairs.

By Mr. TALMADGE:

S. 745. A bill to provide a priority system for certain agricultural uses of natural gas; to the Committee on Energy and Natural Resources.

By Mr. McGOVERN:

S. 746. A bill to provide emergency price and income protection for farmers for the 1977 crops, to assure consumers an abundance of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. JAVITS:

S. 747. A bill to amend the Federal Aviation Act of 1958 and the Airport and Airway Development Act of 1970 to establish a program for the reduction of aircraft noise, and for other purposes; to the Committee on Commerce, Science, and Transportation.

By Mr. PELL:

S. 748. A bill to encourage the conservation of energy by requiring that certain buildings financed with Federal funds are so designed and constructed that the windows in such buildings can be opened and closed manually; to the Committee on Banking, Housing and Urban Affairs.

By Mr. ANDERSON (for himself, Mr. HUMPHREY and Mr. HEINZ):

S. 749. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expense allocable to the use of any portion of a dwelling unit in the trade or business of providing day care services whether or not such portion is exclusively used in such trade or business; to the Committee on Finance.

By Mr. JAVITS:

S. 750. A bill to amend the Internal Revenue Code of 1954 to provide for the reduction of certain excise taxes on the transportation of persons and property by air, and for other purposes; to the Committee on Finance.

By Mr. GRIFFIN:

S. 751. A bill to authorize the Secretary of Agriculture to make financial assistance available to agricultural producers who suffer losses as the result of having their agricultural commodities or livestock contaminated by toxic chemicals dangerous to the public health, or whose agricultural commodities or livestock have been contaminated so as to adversely affect the economic viability of the

farming operation; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. BAKER:

S.J. Res. 23. A joint resolution providing for the designation and adoption of the American marigold as the national floral emblem of the United States; to the Committee on the Judiciary.

By Mr. RANDOLPH:

S.J. Res. 24. A joint resolution to authorize and request the President to issue annually a proclamation designating the first Sunday of September after Labor Day of each year as "National Grandparents Day"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. BARTLETT (for himself and Mr. BELLMON):

S. 744. A bill to restore public accountability for decisions affecting the compensation of Members of Congress and other Federal officials; to the Committee on Governmental Affairs.

REFORMING THE CONGRESSIONAL PAY SYSTEM

Mr. BARTLETT. Mr. President, the recent increase in pay for Members of Congress has prompted more intense public criticism of Congress than any other development I have observed recently. Our constituents are objecting not only to the size of the raise which we received, but also to the manner in which the raise was approved. I fully share the sentiments of those who object to the size of this raise and to the backdoor manner in which it was approved.

In response to this situation, I am sending to the desk a bill which I offer for myself and Mr. BELLMON. This measure would do two things. First, it would require that pay increase proposals made by the Commission on Executive, Legislative, and Judicial Salaries be voted on by each House of Congress. The vote would have to occur within 60 calendar days of the date on which the recommendations were submitted and would be by a recorded vote reflecting the views of each Member. Second, this bill would repeal the recent salary increases so as to subject this most recent increase and any future increases to the procedure I have just described.

Under the present law, pay adjustments for selected members of the legislative, judicial, and executive branches are proposed by the Commission on Executive, Legislative, and Judicial Salaries every fourth fiscal year.

The Commission's recommendations are submitted to the President, who then submits such of them as he approves to the Congress. Unless Congress disapproves the recommendations through legislation, they go into effect automatically.

It is this automatic increase feature which is the most obnoxious part of the whole system. The recent pay increase went into effect because efforts to pass a disapproval resolution were opposed or ignored. Congress avoided efforts to force a direct vote on the pay raise question. It is my opinion that the increase would have been defeated in a record vote.

The size of the pay increase was almost as unreasonable as the way we got it. At a time when the state of our economy is forcing all Americans to tighten their belts, we have no business indirectly approving a $13,000 salary increase for ourselves. It is an unfair system indeed that allows the Congress to cause inflation by its wild spending practices, then to turn around and insulate itself from the effects of that inflation by giving itself a backdoor pay increase of $13,000.

Senator BELLMON and I believe that Members of Congress should be prepared to stand and be counted when the issue of their own pay arises. Congress should not be allowed to hide behind the cloak of anonymity that is afforded by the present system. The bill which I now offer for Senator BELLMON and myself will once again put pay decisions in the public eye just like every other piece of legislation we vote on. It repeals the recent pay increase and forces public votes on future pay increases.

This change in pay determinations for Federal officials will bring a new sense of responsibility to pay increase decisions. Each Member of Congress will be required to take a public stand on these important decisions. Such a requirement is wholly proper and in keeping with a system of government where representatives are accountable to the people who elect them. I believe that this proposal will significantly improve the process for making pay decisions. I urge that the Senate give prompt and favorable consideration to this bill.

By Mr. TALMADGE:

S. 745. A bill to provide a priority system for certain agricultural uses of natural gas; to the Committee on Energy and Natural Resources.

Mr. TALMADGE. Mr. President, today, I am introducing a bill to amend the Natural Gas Act to provide for a priority allocation system for essential agricultural uses of natural gas. Similar priorities were included in natural gas legislation which passed both the House and Senate during the 94th Congress.

The Federal Energy Administration has long recognized the unique energy requirements of agriculture by guaranteeing essential inputs, production, and processing with 100 percent of their current refined petroleum product needs. The purpose of this legislation is to extend this priority to essential food and fiber sector uses of natural gas.

The bill provides for the following:

First. A natural gas priority for essential agricultural purposes second only to the needs of existing residential and small commercial users. The priority would include but is not limited to fertilizer and agricultural chemical production, food and fiber processing and packaging, crop drying, and irrigation.

Second. The priority would apply to these activities as it relates to plant protection, process, and feedstock requirements. It would also include boiler fuel requirements insofar as alternate fuels are not available, except propane.

Third. The priority would apply to meeting the natural gas requirements of existing plants—for present or expanded capacity and to meet requirements that would be involved in new plants.

Fourth. The priority system would apply to both interstate and intrastate gas supplies. State regulatory agencies having jurisdiction over intrastate natural gas supplies would be given 90 days to adopt rules for implementing the above mentioned agricultural priority system. In the event any State fails to adopt such rules within that period, the Federal Power Commission is required to do so for each State.

Agriculture is America's largest industry. It is literally the lifeblood and the cornerstone of this Nation's economy. The production of food and fiber is important not only for obvious domestic needs but also because of the energy crisis. Our dependence on oil imports makes the $22 billion in agricultural exports vital to this Nation's balance of payments.

To achieve this high level of food and fiber production, U.S. agriculture has substituted fossil fuel energy for human and animal energy. Over the last three decades, on-farm employment declined by 6.5 million persons while the U.S. population increased by 60 percent—tractor horsepower rose sixfold and on-farm fuel consumption rose fourfold.

This phenomenally low manpower requirement and high degree of efficiency is made possible by the fact that U.S. agriculture is the most energy intensive in the world. Unfortunately, heavy dependence on energy from fossil fuel makes agriculture more vulnerable to fuel shortages than the Nation as a whole.

The most critical need farmers have for energy is assurance of its constant availability. Agriculture is not an industry that can withstand cutbacks or curtailments of energy. It is different from other industries in that lost production cannot be made up.

The fuel needs of agriculture are unique. Specific fuels are needed at specific times for specific purposes. Many farm products are not in a form desirable for human consumption and must be processed to be edible. Other products are highly perishable in the raw state and must be canned, frozen, or dried to make them storable. This takes fuel.

Direct and indirect uses of most natural gas in agriculture are special because substitutes are difficult under current technology. Input manufacturing, such as anyhdrous ammonia plants—source of nitrogen fertilizers—and petrochemical plants—source of herbicides, pesticides, plastic wrappings for food processing—designed to use natural gas as the source of feedstock, cannot convert to other feedstocks because they are not designed or built to do so. At the same time, technological problems of purity, odor, taste, and appearance prevent use of alternate fuels such as fuel oil in some types of food processing.

Enactment of my bill, in my judgment, is essential to the maintenance of current levels of food and fiber production. I hope, for the sake of 215 million Americans and the hundreds of millions of people elsewhere in the world who depend upon us for their food, that Congress will recognize this problem and take expeditiously the necessary legislative action.

By Mr. McGOVERN:

S. 746. A bill to provide emergency price and income protection for farmers for the 1977 crops, to assure consumers an abundance of food and fiber at reasonable prices, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

EMERGENCY FOOD AND AGRICULTURE ACT OF 1977

Mr. McGOVERN. Mr. President, I send to the desk for appropriate reference the Emergency Food and Agriculture Act of 1977. The distinguished chairman of the Senate Committee on Agriculture and Forestry (Mr. TALMADGE) has introduced with cosponsorship of other committee members as well as other Members of the Senate the Food and Agriculture Act of 1977 commonly referred to as the 1977 farm bill. It is the product of endless hours of research by members of the able staff of the Agriculture Committee and is truly an omnibus bill in that it provides for a 5-year commodity program, addresses itself to agriculture research, pesticides, foodstamps. Food for Peace, and other singularly important matters of a viable farm program. I commend the distinguished chairman for his diligence and leadership in assembling this intricate piece of legislation. I also commend him for the extensive schedule of hearings he has announced on this bill.

For the purposes of my own constituency the committee bill fell short of some of my expectations in that it failed to address itself to the matter of disaster legislation—"disaster reform." We in the Upper Great Plains have just experienced the worst drought in this century. Present disaster legislation is in the words of Secretary Bergland, "a disaster in itself." I thus shall propose a disaster bill so that the committee can consider it during the hearings.

The committee failed in its bill to deal with expanded Federal crop insurance. I think that we must move in this direction and I have earlier in the session introduced a bill to expand this principle for deliberation by the committee.

The commodity section of the committee bill failed to live up to the expectations of my constituents in that they were led to believe during the recent Presidential campaign that "cost of production" would be the magic panacea for target prices and loan levels. They are not at all convinced that the target price for wheat in the committee bill of $2.91 represents a fair assessment of the cost of producing a bushel of wheat. They are further not convinced that $2.18 represents the cost of producing a bushel of corn. Needless to say they are disappointed in the minimum loan levels of $2.18 for wheat and $1.71 for corn.

No one can question the diligence of the Committee staff in arriving at these figures. We can, however, differ with the approach used in the formula. The committee in computing the land factor in cost of production used a 35-year land cost average. Farmers in my State feel this to be a mistake and insist that the use of "current land values" is the only responsible approach in computing cost of production.

Fortunately the Economic Research Service of the U.S. Department of Agriculture has recently completed a study on cost of production. Their conclusions are contained in a committee print dated January 21, 1977. Under this study and using current land values the cost of production per bushel for the 1977 wheat crop is $3.55. The cost of production for corn per bushel is determined to be $2.52. Other basic crops are computed in similar fashion. My constituents feel that loan rates should be at a minimum of 85 percent of the cost of production.

The legislation I send to the desk today carries forth these figures and applies them only for the 1977 crops. The committee bill is a 5-year bill. Permit me to suggest that we not be too hasty in committing ourselves to a 5-year program based on cost of production concepts that are relatively new to us. Certainly we have no experience record in this field. Perhaps it would be more prudent to adopt only a 1-year extension on the commodity programs, see how it works, and make necessary adjustments next year. Let me make it perfectly clear, however, that I do not irrevocably commit myself to this concept. I do feel, however, that it is a prudent suggestion and an option that the committee should have as a viable alternative in committee deliberations. It is for that reason that I consider the legislation I introduce today to be important. I also feel that I am striking a blow for the views of my own constituents in offering this alternative.

Critics of this bill will be quick to point out the negative implications it might have on the world market. To these critics I want to first of all point out a table indicating the support farmers receive in other producing nations for wheat translated into American dollars, compiled by the National Farmers Union:

COMPARATIVE PRICE SUPPORT LEVELS—WHEAT

Beginning this week and continuing for the next several weeks, this Newsletter will publish data on comparative price support levels on some major commodities in a number of the producing nations. While there are many variations in price support measures and in the techniques by which they are implemented, the price floors will be shown in U.S. dollars and measures and will be generally comparable in purpose and effect. The weekly tabulations will show that the U.S. is consistently on the low side in its support of farm commodity price levels. Today's table deals with the domestic support level for wheat and is reported in U.S. dollars per bushel:

United States (1976-77)	$2.25
Chile (1976-77)	4.50
Japan (1976)	10.20
European Community * (1976)	4.24
Brazil (1976)	4.80
India (1976)	3.24
Canada (1976)	3.00
Australia (1976)	2.98

* France, West Germany, Holland, Belgium, Luxemburg, Italy, Great Britain, Ireland, Denmark.

Should we not be equally solicitous of our own farmers?

It is true that the support prices at the loan level I have suggested tend to exceed world prices. This, of course, chills the bones of the grain traders. On the other hand, let us remember that the United States and Canada control 80 percent of the world wheat export market. Might it be appropriate for Mr. Bergland and Mr. Vance to dispatch their envoys to Canada and elsewhere and negotiate a world wheat price that takes into consideration the cost involved in producing a bushel of wheat by the American farmer? A recent statement by Senator Hagen Argue, chairman of the Standing Committee on Agriculture in the Canadian Parliament, suggests that the Canadians would be receptive. Senator Argue in a press release dated November 8, 1976, says—

Action must be taken now. The United States and Canada are the dominant wheat exporting countries. They should take the lead now to place a just and reasonable floor under wheat prices. International wheat stabilization is possible if our two countries will act.

The world trembles when the OPEC countries meet and they wait hopefully for only a 10- or 15-percent increase in the price of crude oil. I doubt that there would be even a tremor among the Europeans if the United States and Canada proposed the stabilization of world wheat prices above the figures I am suggesting for loan rates.

Mr. President, I ask unanimous consent that the text of the Emergency Food and Agriculture Act of 1977 be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 746

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Emergency Food and Agriculture Act of 1977".

TITLE I—PAYMENT LIMITATIONS FOR WHEAT, FEED GRAINS, AND UPLAND COTTON

SEC. 101. Section 101 (1) of the Agricultural Act of 1970, as amended, is amended by striking out "$20,000" and inserting in lieu thereof, "$30,000".

TITLE II—DAIRY

DAIRY PRICE SUPPORT

SEC. 201. Section 201 of the Agricultural Act of 1949, as amended, is amended by adding at the end thereof a new subsection as follows:

"(d) Notwithstanding the foregoing provisions of this section, effective for the period beginning with the date of enactment of this subsection and ending on March 31, 1978, the support price of milk shall be established at no less than 90 per centum of the parity price therefor, on the date of enactment, and the support price shall be adjusted thereafter by the Secretary at the beginning of each quarter, beginning with the second quarter of the calendar year 1977, to reflect any estimated change during the immediately preceding quarter in the index of prices paid by farmers for producton items, interest, taxes, and wage rates. Such support prices shall be announced by the Secretary not later than thirty days prior to the beginning of each quarter.".

PRODUCER HANDLERS

SEC. 202. Section 206 of the Agricultural Act of 1970, as amended, is amended by inserting after "Agriculture and Consumer Protection Act of 1973" the following: "and the Food and Agriculture Act of 1977".

TITLE III—WOOL PROGRAM

SEC. 301. The National Wool Act of 1954, as amended, is amended by adding at the end thereof a new section as follows:

"SEC. 711. Notwithstanding any other provision of this Act, in 1977 wool and mohair shall be supported at not less than 90 per centum of the parity price therefor." .

TITLE IV—WHEAT PROGRAM

LOAN RATE AND TARGET PRICE

SEC. 401. Effectve for the 1977 crop, section 107 of the Agricultural Act of 1949, as it appears in section 401 of the Agricultural Act of 1970, as amended by the Agriculture and Consumer Protection Act of 1973, is amended to read as follows:

"SEC. 107. Notwithstanding any other provision of law—

"(a) Loans and purchases on each crop of wheat shall be made available at not less than 85 per centum of the cost of production per bushel.

"(b) If a set-aside progrm is in effect for any crop of wheat under section 379b(c) of the Agricultural Adjustment Act of 1938, as amended, payments, loans and purchases shall be made available on such crop only to producers who comply with the provisions of such program.

"(c) Payments shall be made for each crop of wheat to the producers on each farm in an amount determined by multiplying (i) the amount by which the higher of—

"(1) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(2) the loan level determined under subsection (a) for such crop.

is less than the cost of production per bushel, times in each case (ii) the allotment for the farm for such crop, times (iii) the projected yield established for the farm with such adjustments as the Secretary determines necessary to provide a fair and equitable yield. The cost of production per bushel for the 1977 crop of wheat is determined to be $3.55. If the Secretary determines that the producers are prevented from planting any portion of the farm acreage allotment to wheat or other nonconserving crop, because of drought, flood, or other natural disaster or condition beyond the control of the producer, the rate of payment on such portion shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production. If the Secretary determines that, because of such a disaster or condition, the total quantity of wheat (or of cotton, corn, grain sorghums, or barley planted in lieu of wheat) which the producers are able to harvest on any farm is less than 66⅔ per centum of the farm acreage allotment times the projected yield of wheat (or of cotton, corn, grain sorghums or barley planted in lieu of wheat) for the farm, the rate of payment for the deficiency in production below 100 per centum shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production. The Secretary shall provide for the sharing of payments made under this subsection for any farm among the producers on the farm on a fair and equitable basis.".

TITLE V—FEED GRAIN PROGRAM

LOAN RATE AND TARGET PRICE

SEC. 501. (a) Effective only with respect to the 1977 crop of feed grains, section 501 of the Agricultural Act of 1970, as amended by the Agriculture and Consumer Protection Act of 1973, is amended by—

(1) amending section 105 (a) (1) of the Agricultural Act of 1949, as it appears therein, to read as follows:

"(a) (1) The Secretary shall make available to producers loans and purchases on the 1977 crop of corn at not less than 85 per centum of the cost of production, and

(2) amending section 105(b)(1) of the Agricultural Act of 1949, as it appears therein, to read as follows:

"(b)(1) In addition, the Secretary shall make available to producers payments for the 1977 crop of corn, grain sorghums, and, if designated by the Secretary, barley, computed by multiplying (i) the payment rate, times (ii) the allotment for the farm for such crop, times (iii) the yield established for the farm for the preceding crop wtih such adjustments as the Secretary determines necessary to provide a fair and equitable yield. The payment rate for corn shall be the amount by which the higher of—

"(A) the national weighted average market price received by farmers during the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under subsection (a) for such crop

is less than the cost of production per bushel. The cost of production per bushel for the 1978 crop of corn is determined to be $2.52. The payment rate for grain sorghums and, if designated by the Secretary, barley, shall be such rate as the Secretary determines fair and reasonable in relation to the rate at which payments are made available for corn. If the Secretary determines that the producers on a farm are prevented from planting any portion of the farm acreage allotment to feed grains or other nonconserving crop, because of drought, flood, or other natural disaster or condition beyond the control of the producer, the rate of payment on such portion shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production. If the Secretary determines that, because of such a disaster or condition, the total quantity of feed grains (or of wheat, or cotton planted in lieu of the allotted crop) which the producers are able to harvest on any farm is less than 66⅔ per centum of the farm acreage allotment times the yield of feed grains (or of wheat, or cotton planted in lieu of the allotted crop) established for the farm, the rate of payment for the deficiency in production below 100 per centum shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production.".

TITLE VI—UPLAND COTTON PROGRAM

COTTON PRODUCTION INCENTIVES; LOAN RATE AND TARGET PRICE

SEC. 601. Effective only for the 1977 crop of upland cotton, paragraphs (1) and (2) of section 103 (e) of the Agricultural Act of 1949 as they appear in section 602 of the Agricultural Act of 1970, as amended by the Agriculture and Consumer Protection Act of 1973, are amended to read as follows:

"(1) The Secretary shall upon presentation of warehouse receipts reflecting accrued storage charges of not more than 60 days make available for the 1977 crop of upland cotton to cooperators nonrecourse loans for a term of 10 months from the first day of the month in which the lion is made a such level as will reflect for Middling one-inch upland cotton (micronaire 3.5 through 4.9) at average location in the United States not less than 85 per centum of the cost of production, except that if the loan rate so calculated is higher than the estimated average world price for American cotton of such quality for the marketing year for which the loan determination is made, the Secretary may adjust the loan rate for upland cotton to not less than 90 per centum of the estimated world price. The loan level for the 1977 crop of upland cotton shall be determined and announced within 30 days after the enactment of the Emergency Food and Agriculture Act of 1977. Notwithstanding the foregoing, if the carryover of upland cotton as of the beginning of the marketing year for the 1977 crops exceeds 7.2 million bales, producers on any farm harvesting cotton of such crop from an acreage in excess of the base acreage allotment for such farm shall be entitled to loans and purchases only on an amount of the cotton of such crop produced on such farm determined by multiplying the yield used in computing payments for such farm by the base acreage allotment for such farm.

"(2) Payments shall be made for each crop of cotton to the producers on each farm at a rate equal to the amount by which the higher of—

"(A) the average market price received by farmers for upland cotton during the calendar year which includes the first five months of the marketing year for such crop, as determined by the Secretary, or

"(B) the loan level determined under paragraph (1) for such crop

is less than the cost of production per pound. The cost of production per pound for the 1977 crop is determined to be 57.95 cents per pound. If the Secretary determines that the producers on a farm are prevented from planting any portion of the allotment to cotton because of drought, flood, or other natural disaster, or condition beyond the control of the producer, the rate of payment for such portion shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production. If the Secretary determines that, because of such a disaster or condition, the total quantity of cotton which the producers are able to harvest on any farm is less than 66⅔ per centum of the farm base acreage allotment times the average yield established for the farm, the rate of payment for the deficiency in production below 100 per centum shall be the larger of (A) the foregoing rate, or (B) one-third of the cost of production. The payment rate with respect to any producer who (i) is on a small farm (that is, a farm on which the base acreage allotment is ten acres or less, or on which the yield used in making payments times the farm base acreage allotment is five thousand pounds or less, and for which the base acreage allotment has not been reduced under section 350(f)), (ii) resides on such farm, and (iii) derives his principal income from cotton produced on such farm, shall be increased by 30 per centum; but, notwithstanding paragraph (3), such increase shall be made only with respect to his share of cotton actually harvested on such farm within the quantity specified in paragraph (3).".

By Mr. JAVITS:

S. 747. A bill to amend the Federal Aviation Act of 1958 and the Airport and Airway Development Act of 1970 to establish a program for the reduction of aircraft noise, and for other purposes; to the Committee on Commerce, Science, and Transportation.

Mr. JAVITS. Mr. President, I introduce a bill entitled "The Aircraft Noise Reduction Act of 1977," and I ask unanimous consent that an explanation of the bill be printed at this point in the RECORD.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

EXPLANATION OF AMENDMENTS

Section 1 of the draft bill cites it as the Aircraft Noise Reduction Act of 1977.

Section 2 of the draft bill inserts a new section into title IV of the Federal Aviation Act of 1958 directing the Civil Aeronautics Board to establish a program for the reduction of aircraft noise to meet standards established by the Federal Aviation Administrator. The Board would be required to establish the program within one year

after receiving a petition. The Board, upon petition, would be empowered to establish, after notice and hearing, a noise reduction surcharge and a method for distributing the revenues received from that surcharge. The bill contemplates that the revenues would be placed in trust and disbursed by a Board-appointed trustee or trustees to individual carriers in accordance with the Board's guidelines. Intrastate carriers would be eligible to participate in the program as well as interstate carriers.

Section 3 of the bill amends section 14(f) of the Airport and Airway Development Act to ensure that any funds unused under an agreement approved by the CAB and deposited in the general fund of the Treasury or, if it is in operation, the Airport and Airway Trust Fund, will be used solely for noise reduction projects at airports.

Section 4 of the bill establishes under the Airport and Airway Development Act of 1970 a new grant-in-aid program for aircraft noise reduction. It authorizes the Secretary of Transportation to make grants to interstate and intrastate air carriers and commercial operators to finance the retrofitting of such categories of two-, three-, and four-engine subsonic turbojet-powered airplanes as are designated by the Secretary in order to comply with regulations issued by the FAA Administrator under section 611 of the Federal Aviation Act establishing noise levels for aircraft. This provision would allow, but not require, the Secretary to make grants for the modification of about 50 Boeing 747's, and about 75 stretched DC-8s if he determines that replacement of these aircraft is not feasible or if the replacement fund that would be established by the Board is not available for this purpose. The total amount of the grants could not exceed $300 million and would be financed from the surplus existing in the Airport and Airway Trust Fund (currently $1.5 billion).

Section 5 of the bill amends the definition of the term "airport development" in section 11(3) of the Airport and Airway Development Act of 1970 to permit airport development grants-in-aid to be used by airport sponsors for the acquisition and installation of equipment for monitoring aircraft noise.

By Mr. PELL:

S. 748. A bill to encourage the conservation of energy by requiring that certain buildings financed with Federal funds are so designed and constructed that the windows in such buildings can be opened and closed manually; to the Committee on Banking, Housing and Urban Affairs.

OPEN WINDOWS IN BUILDINGS—A PART OF OUR ENEGRY CONSERVATION EFFORT

Mr. PELL. Mr. President, I am today introducing legislation which would require that certain Federal buildings or those financed with Federal funds be designed in such a way that windows can be opened and closed manually.

This measure was introduced during the 94th Congress and accepted as an amendment with certain modifications during Senate debate on the Emergency Housing Act of 1975. Unfortunately, title III of the act relating to the establishment of energy conservation performance standards for new residential and commercial buildings which included my amendment was dropped during the conference on the emergency housing legislation.

In reintroducing this legislation, I recognize that last August Congress enacted the Energy Conservation and Production Act which provides for Federal energy conservation performance standards for new residential and commercial buildings. I was, indeed, proud to have joined Senator KENNEDY as one of the principle cosponsors of this measure, now Public Law 94-385.

My purpose in calling attention to this legislation again is to emphasize my concern over the tremendous present waste of energy associated with both residential and commercial buildings and to further emphasize that it is not necessary in my opinion, to wait for further study or the establishment of design criteria to achieve meaningful thermal energy savings.

To underscore this point, one of the most remarkable evidences of such waste in my opinion, is the fact that most modern office and commercial buildings are constructed so that it is impossible to open a window. These buildings are designed to provide a completely controlled artificial environment—heat in the winter and air-conditioning in the summer without regard for the weather outside. The result is a substantial waste of energy resources on many days when reasonable comfort could be achieved by opening the windows.

As a step toward reducing this waste and move more quickly toward our thermal efficiency goals, my bill would require all buildings constructed or financed by the Federal Government in the future, be designed and constructed so the windows can be opened and closed manually.

The potential for energy savings should not be underestimated. Air conditioning in residential and commercial buildings now consumes about 3 percent of the total energy used each year in the United States. That comparison, however, understates the impact of air-conditioning demands on our national energy supply. For example, at a time when we have realized belatedly the need for a long-term and continuing energy conservation program, energy use for air-conditioning is growing at a rapid rate—about 15 percent each year.

In addition, the demand for electricity for air-conditioning obviously is not spread evenly through the year. It is concentrated into a few short months. To meet the relatively brief peak demand for electricity for air-conditioning requires the use of relatively inefficient and costly peakload electrical generating equipment.

Mr. President, as I have remarked earlier, it is not necessary to wait for further study or the establishment of design criteria to achieve meaningful thermal energy savings. We could reduce our growing use of energy for air-conditioning simply by constructing buildings so our offices and shops would be opened to the natural environment. Such a step along with other energy conservation measures that have been easy to implement and have proved very successful during the past few years, especially the 55-mile-per-hour speed limit and the daylight savings time extension, could greatly reduce the need for measures which would result in further economic disruptions and unnecessary sacrifices for Americans.

By Mr. ANDERSON (for himself, Mr. HUMPHREY and Mr. HEINZ):

S. 749. A bill to amend the Internal Revenue Code of 1954 to allow a deduction for expense allocable to the use of any portion of a dwelling unit in the trade or business of providing day care services whether or not such portion is exclusively used in such trade or business; to the Committee on Finance.

Mr. ANDERSON. Mr. President, I am pleased to introduce today with my colleague from Minnesota, Senator HUMPHREY, and Senator HEINZ, legislation to allow families who provide day care services in their homes to continue to take reasonable tax deductions for their business expenses.

Under the Tax Reform Act enacted last year, expense deductions for businesses operated within homes were restricted by a new "exclusive use test." In other words, business expenses incurred within a home are now deductible only if the area or room in question is used solely for business purposes.

This provision is an important, valuable reform. It has, however, presented serious problems for family day care providers. Since the children served by home day care are generally not confined to certain rooms or areas, legitimate deductions for depreciation, rent and utilities routinely occur throughout the home. Disallowing these deductions places severe burdens on taxpayers providing this unique service, and could cause many of them to go out of business. By placing unworkable requirements on home day care providers, the Government could cause needless difficulty to them and the families they serve.

The legislation I am introducing today would exempt providers of home day care to children and other individuals—such as the elderly—from the exclusive use test. I am hopeful that it will address the problems described in the following letter written by a family day care provider in New Brighton, Minn.:

I . . . have a modest 2-bedroom home and care for 5 or 6 children. They use most of my home, bedrooms for naps, kitchen for eating and TV, other rooms and a nice big yard for play. Considering the need for child care, I have felt good about caring for these children. Most of them are without a father in their home, their mother having a difficult time making ends meet . . . I have kept my prices down, trying to be a part of the answer. (I averaged just under $4 a day per child.) Now I will have to borrow the money to pay my income taxes.

Considering the deductions granted to many businessmen for good meals, travel expenses to conventions, etc., I feel it is a sad situation when I can make so few deductions for things (oil, electricity, etc.) that I share with these children. I'm sure this situation would cause many child care mothers to quit. Please do all you can to change this situation as soon as possible.

Mr. President, I ask unanimous consent that the legislation be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 749

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (c) of section 280A of the Internal

Revenue Code of 1954 (relating to exceptions for certain business or rental use; limitation on deductions for such use) is amended by redesignating paragraph (4) as paragraph (5) and by inserting after paragraph (3) the following new paragraph:

"(4) Use in providing day care services.—Subsection (a) shall not apply to any item to the extent that such item is allocable to the use of any portion of the dwelling unit on a regular basis in the taxpayer's trade or business of providing day care services to individuals."

(b) Paragraph (5) of section 280A(c) of such Code (as redesignated by subsection (a)) is amended by striking out "paragraph (1) or (2)" and inserting in lieu thereof "paragraph (1), (2), or (4)".

(c) The amendments made by this section shall apply to taxable years beginning after December 31, 1975.

By Mr. JAVITS:

S. 750. A bill to amend the Internal Revenue Code of 1954 to provide for the reduction of certain excise taxes on the transportation of persons and property by air, and for other purposes; to the Committee on Finance.

Mr. JAVITS. Mr. President, I introduce a bill to amend the Internal Revenue Code, and I ask unanimous consent that an explanation of the bill be printed in the RECORD.

There being no objection, the explanation was ordered to be printed in the RECORD, as follows:

EXPLANATION OF AMENDMENTS

Section 1 of the draft bill reduces the rate of the airline ticket tax from 8 percent to 6 percent upon the effective date of the imposition of an aircraft noise reduction surcharge approved by the Civil Aeronautics Board (CAB) under a proposed amendment to title IV of the Federal Aviation Act of 1958 contained in the proposed Aircraft Noise Reduction Act of 1977.

This section preserves the provisions of existing law which (1) reduce the ticket tax to 5 percent after June 30, 1980, and (2) terminate the international enplanement fee after June 30, 1980.

Section 2 of the bill reduces the rate of the airline waybill tax from 5 percent to 3 percent upon the effective date of the imposition of a noise reduction surcharge approved by the CAB under the proposed amendment to the Federal Aviation Act of 1958. Again, this section preserves the provision of existing law which terminates the airline waybill tax after June 30, 1980.

Section 3 of the bill amends section 208(f) of the Airport and Airway Revenue Act of 1970 (relating to permissible expenditures from the Airport and Airway Trust Fund) to allow Trust Fund monies to be used for the following two new purposes provided for in amendments to the Airport and Airway Development Act of 1970 contained in the proposed Aircraft Noise Reduction Act of 1977—

(1) grants to aircraft operators for the purpose of retrofitting aircraft for noise reduction purposes; and

(2) grants to airports under the Airport Development Aid Program for the purchase and installation of noise monitoring equipment.

By Mr. BAKER:

Senate Joint Resolution 23. A joint resolution providing for the designation and adoption of the American marigold as the national floral emblem of the United States; to the Committee on the Judiciary.

(The remarks of Mr. BAKER when he introduced the joint resolution appear earlier in today's RECORD.)

By Mr. RANDOLPH:

Senate Joint Resolution 24. A joint resolution to authorize and request the President to issue annually a proclamation designating the first Sunday of September after Labor Day of each year as "National Grandparents Day"; to the Committee on the Judiciary.

NATIONAL GRANDPARENTS DAY

Mr. RANDOLPH. Mr. President, today I introduce a joint resolution to authorize and request the President to issue annually a proclamation designating the Sunday following Labor Day of each year as "National Grandparents Day."

I have sponsored similar measures in the 93d and 94th Congresses. The Senate approved such a legislation during the 93d Congress. But, the House was unable to act on it. Unfortunately no action was taken on Senate Joint Resolution 211 during the 94th Congress. I believe by designating the Sunday following Labor Day more people will be able to visit and honor their grandparents. The summer vacations should be over and the weather will still be pleasant enough to visit our grandparents and those citizens residing in nursing and care homes.

Mr. President, a West Virginian, Mrs. Marian McQuade, Oak Hill, has spearheaded this movement for the past 5 years to create the nationwide observance. Mrs. McQuade has spent many hours urging the Governors of the 50 States to proclaim such a day. She is now working closely with the appropriate aging commissions and agencies in the country for their support and their help in earning public support.

Mrs. McQuade, mother of 15 and a grandmother, got the idea working at a nursing home for the elderly. "So many of these people are shut up and neglected, even though they have grandchildren living, Mrs. McQuade said, "I thought maybe if we had a Grandparents Day some of these people would get the love and attention they need so badly."

Mr. President, I do hope we can proclaim such a day to honor our loving grandparents.

ADDITIONAL COSPONSORS

S. 4

At the request of Mr. DOLE, the Senator from Rhode Island (Mr. PELL), the Senator from Oregon (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from South Dakota (Mr. MCGOVERN), and the Senator from North Carolina (Mr. HELMS) were added as cosponsors of S. 4, a bill to amend the Internal Revenue Code.

S. 197

At the request of Mr. GRIFFIN, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 197, the Conservation Gas Act.

S. 198

At the request of Mr. GRIFFIN, the Senator from New York (Mr. JAVITS) and the Senator from Pennsylvania (Mr. HEINZ) were added as cosponsors of S. 198, the Residential Insulation Credit Act.

S. 199

At the request of Mr. GRIFFIN, the Senator from Pennsylvania (Mr. HEINZ) was added as a cosponsor of S. 199, the Conservation Gas and Residential Insulation Credit Act.

S. 256

At the request of Mr. PEARSON, the Senator from Virginia (Mr. WILLIAM L. SCOTT), the Senator from North Dakota (Mr. YOUNG), and the Senator from Michigan (Mr. GRIFFIN) were added as cosponsors of S. 256, the Natural Gas Act Amendments of 1977.

S. 418

At the request of Mr. BAYH, the Senator from Montana (Mr. METCALF), the Senator from Vermont (Mr. LEAHY), the Senator from Oregon (Mr. HATFIELD), the Senator from Rhode Island (Mr. PELL), the Senator from South Dakota (Mr. ABOUREZK), the Senator from Michigan (Mr. RIEGLE), and the Senator from Maryland (Mr. SARBANES) were added as cosponsors of S. 418, the Displaced Homemakers Act.

S. 484

At the request of Mr. PEARSON, the Senator from Iowa (Mr. CLARK) was added as a cosponsor of S. 484, to amend title XVIII of the Social Security Act.

S. RES. 81

At the request of Mr. BAYH, the Senator from Rhode Island (Mr. PELL), the Senator from Maryland (Mr. SARBANES), the Senator from New York (Mr. JAVITS), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Resolution 81, a resolution relating to the expulsion of George Krimsky by the Soviet Government.

AMENDMENT NO. 40

At the request of Mr. MCCLELLAN, the Senator from North Dakota (Mr. ABOUREZK) was added as a cosponsor of amendment No. 40, intended to be proposed to S. 11, a bill to provide for the appointment of additional district court judges.

SENATE RESOLUTION 89—SUBMISSION OF A RESOLUTION TO ESTABLISH A SELECT COMMITTEE OF THE SENATE

(Referred to the Committee on Human Resources.)

Mr. GRIFFIN submitted the following resolution:

S. RES. 89

Resolved, That there is hereby established a select committee of the Senate, which may be called, for convenience of expression, the Select Committee on Improper Activities in the Labor Management Field, to conduct an investigation and study of the extent, if any, to which criminal or other illegal, improper, or unethical activities are engaged in by any

persons, acting individually or in combination with others in the field of labor-management relations or in related groups, organizations, insurance, pension, or other programs established for the interest, benefit, participation, or welfare of employees or employers to the detriment of the interests of the public, employees, or employers, and to determine whether in its judgment any occurrence which may be revealed by the investigation and study indicate the necessity or desirability of the enactment of new legislation to safeguard and/or strengthen the integrity of labor-management relations and the collective-bargaining system.

SEC. 2. (a) The select committee created by this resolution shall consist of eight Members of the Senate, four of whom shall be appointed by the President of the Senate from the majority Members of the Senate upon the recommendation of the majority leader of the Senate, and four of whom shall be appointed by the President of the Senate from the minority Members of the Senate upon the recommendation of the minority leader of the Senate. For the purposes of paragraph 6 of rule XXV of the Standing Rules of the Senate, service of a Senator as a member, chairman, or vice chairman of the select committee shall not be taken into account.

(b) The select committee shall select a chairman and vice chairman from among its members, and adopt rules of procedure to govern its proceedings. The vice chairman shall preside over meetings of the select committee during the absence of the chairman, and discharge such other responsibilities as may be assigned to him by the select committee or the chairman. Vacancies in the membership of the select committee shall not affect the authority of the remaining members to execute the functions of the select committee and shall be filled in the same manner as original appointments to it are made.

(c) A majority of the members of the select committee shall constitute a quorum for the transaction of business, but the select committee may fix a lesser number as a quorum for the purpose of taking testimony or depositions.

SEC. 3. That the select committee is authorized and directed to do everything necessary or appropriate to make the investigation and study specified in the first section. Without abridging or limiting in any way the authority conferred upon the select committee by the preceding sentence, the Senate further expressly authorizes and directs the select committee to make a complete investigation and study of the activities of any and all persons or groups of persons or organizations of any kind which have any tendency to reveal the full facts in respect to the following matters or questions:

(a) the disappearance of James R. Hoffa, former International President of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America, hereinafter identified as IBT;

(b) any and all agreements, promises, commitments, pledges, surity arrangements or agreements or financial transactions of any nature entered into between any person or group of persons representing, or authorized to represent, acting as consultants or authorized to act as consultants in any capacity to and/or for the IBT or any of the IBT pension funds or other welfare and/or benefit funds associated with, employed by, directed by or controlled by the IBT or IBT pension or welfare funds and any other person, group of persons, associations, partnerships, or corporations, the purpose of which is, was, or would be to secure or resecure, finance or refinance the development, construction, or improvement of any real estate or real property of any nature;

(c) any and all transactions, agreements, loans of money, or any other item of value or commitments to loan money or any other item of value, entered into between any person or group of persons representing or authorized to represent, acting as consultants or authorized to act as consultants in any capacity to and/or for the IBT or any of the IBT pension funds or other welfare and/or benefit funds associated with, employed by, directed by, or controlled by the IBT or IBT pension or welfare funds and any person or group of persons, association, partnership, or corporation engaged in business venture of any nature established for or engaged in gambling or gaming enterprises of any nature, or any business venture of any nature established to or engaged in the manufacture and/or supply of gambling or gaming paraphernalia;

(d) any and all group health and/or accident insurance policies, or insurance policies or agreements of any nature entered into by or between any person or persons with any insurance or reinsurance company for the benefit of any or all members of the International Brotherhood of Teamsters, Chauffeurs, Warehousemen, and Helpers of America;

(e) any and all allegations of influence, control, or domination exercised by any person or group of persons alleged to be involved in or associated with organized criminal syndicate activity over the affairs, agreements, administration, or day-to-day activity or operations of any person or groups of persons associated together for the benefit of labor and management organizations;

(f) whether the integrity of labor and management relations is inadequately safeguarded, because of a lack of appropriate legislation, or because the existing laws of the United States are inadequate, either in their provision or manner of enforcement, and if so, whether new legislation should be enacted.

SEC. 4. (A) To enable the select committee to make the investigation and study authorized and directed by this resolution, the Senate hereby empowers the select committee as an agency of the Senate—

(a) to employ and fix the compensation of such clerical, investigatory, legal, technical, and other assistants as it deems necessary or appropriate;

(b) to sit and act at any time or place during sessions, recesses, and adjournment period of the Senate;

(c) to hold meetings for taking testimony on oath or to receive documentary or physical evidence relating to the matters and questions it is authorized to investigate or study;

(d) to require by subpena or otherwise the attendance as witnesses of any persons who the select committee believes have knowledge or information concerning any of the matters or questions it is authorized to investigate and study;

(e) to require by subpena or order any department, agency, officer, or employee of the executive branch of the United States Government, or any private person, firm, or corporation, or any officer or former officer or employee of such firm or corporation to produce for its consideration or for use as evidence in its investigation and study any books, checks, canceled checks, correspondence, communications, documents, papers, physical evidence, records, recordings, tapes, or materials relating to any of the matters or questions it is authorized to investigate and study which they or any of them may have in their custody or under their control;

(f) to make to the Senate any recommendations it deems appropriate in respect to the willful failure or refusal of any person to appear before it in obedience to a subpena or order, or in respect to the willful failure or refusal of any person to answer questions or give testimony in his character as a witness during his appearance before it, or in respect to the willful failure or refusal of any officer or employee of the executive branch of the United States Government or any person, firm, or corporation, or any officer or former officer of same, to produce before the committee any books, checks, canceled checks, correspondence, communications, documents, financial records, papers, physical evidence, records, recordings, tapes, or materials in obedience to any subpena or order;

(g) to take depositions and other testimony on oath anywhere within the United States or in any other country;

(h) to procure the temporary or intermittent services of individual consultants, or organizations thereof, in the same manner and under the same conditions as a standing committee of the Senate may procure such services under section 202(i) of the Legislative Reorganization Act of 1946;

(i) to use on a reimbursable basis, with the prior consent of the United States Government department or agency concerned and the Committee on Rules and Administration, the services of personnel of any such department or agency;

(j) to use on a reimbursable basis or otherwise with the prior consent of the chairman of any other of the Senate committees or the chairman of any subcommittee of any committee of the United States Senate the facilities or services of any members of the staffs of such other Senate committees or any subcommittees of such other Senate committees whenever the select committee or its chairman deems that such action is necessary or appropriate to enable the select committee to make the investigation and study authorized and directed by this resolution;

(k) to have direct access through the agency of any members of the select committee, chief majority counsel, minority counsel, or any of its investigatory assistants jointly designed by the chairman and the ranking minority member to any date, evidence, information, report, analysis, or document or papers relating to any of the matters or questions which it is authorized and directed to investigate and study in the custody and under the control of any department, agency, officer, or employee of the executive branch of the United States Government, having the power under the laws of the United States to investigate any alleged criminal activities or to prosecute persons charged with crimes against the United States which will aid the select committee to prepare or conduct the investigation and study authorized and directed by this resolution;

(l) to procure either through assignment by the Rules Committee or by renting such offices and other space as may be necessary to enable it and its staff to make and conduct the investigation and study authorized and directed by this resolution;

(m) to expend to the extent it determines necessary or appropriate any moneys made available to it by the Senate to perform the duties and exercise the powers conferred upon it by this resolution and to make the investigation and study it is authorized by this resolution to make.

(B) Subpenas may be issued by the select committee acting through the chairman or any other member designated by him and may be served by any person designated by such chairman or other member anywhere within the borders of the United States. The chairman of the select committee, or any

otner member thereof, is hereby authorized to administer oaths to any witnesses appearing before the committee.

(C) In preparing for or conducting the investigation and study authorized and directed by this resolution, the select committee shall be empowered to exercise the powers conferred upon committees of the Senate by section 6002 of title 18 of the United States Code or any other Act of Congress regulating the granting of immunity to witnesses.

SEC. 5. The select committee shall have authority to recommend the enactment of any new congressional legislation which its investigation considers it is necessary or desirable to safeguard the integrity and purity of labor-management relations.

SEC. 6. The select committee shall make a final report of the results of the investigation and study conducted by it pursuant to this resolution, together with its findings and its recommendations as to new congressional legislation it deems necessary or desirable to the Senate and at the earliest practicable date, but no later than December 31, 1976. The select committee may also submit to the Senate such interim reports as it considers appropriate. After submission of its final report, the select committee shall have four calendar months to close its affairs, and on the expiration of such four calendar months shall cease to exist.

SEC. 7. The expenses of the select committee through December 31, 1977, under this resolution shall not exceed $1,250,000, of which amount not to exceed $250,000, shall be available for the procurement of the services of individual consultants or organizations thereof. Such expenses shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the select committee.

AMENDMENTS SUBMITTED FOR PRINTING

REORGANIZATION OF GOVERNMENT AGENCIES—S. 626

AMENDMENT NO. 41

(Ordered to be printed and referred to the Committee on Governmental Affairs.)

Mr. HARRY F. BYRD, JR. Mr. President, I applaud President Carter's commitment to bring about a reorganization of the executive branch of the Federal Government.

Just a few days ago, the Senate approved a measure to bring about some reorganization and consolidation of the operations of this body. This was a step in the right direction—although it did not go nearly far enough.

Likewise, I feel strongly that the hard-working American taxpayers want a more efficient, responsive, and less costly Federal bureaucracy.

To achieve this, the President has asked Congress to restore to him the powers granted under the Executive Reorganization Act. He has asked for additional modifications to the act to give him greater flexibility to amend and improve his reorganization plans once submitted to the Congress, and authority to submit more than one plan at a time to speed the reorganization process.

The President has also indicated his intention to provide information regarding the improvements in management, efficiency, and delivery of Federal services which his proposed plan would produce.

These are all steps in the right direction, and I want to support the President in this regard.

However, his plan as embodied in S. 626 has a serious omission.

The Executive Reorganization Act, as currently written, would require the President to submit, with any reorganization plan, information on the reduction of expenditures which such plan would bring about. S. 626 eliminates this requirement.

I recognize that providing such cost reduction data would be a sometimes difficult task for the Executive. But, Mr. President, if Government reorganization is in fact going to benefit the American people, there must be some reduction in the expenditure of the taxpayers' hard-earned dollars.

In evaluating any reorganization plan, the Congress and the public must and should know what costs are involved. More and more of our people recognize that we will not get the cost of living under control until we get the cost of Government under control.

I will offer an amendment which will retain the requirement that any reorganization plan submitted by the President contain information about the reduction of expenditures resulting from such plan.

Mr. President, I submit my amendment to S. 626, which is pending in the Senate Committee on Governmental Affairs.

The PRESIDING OFFICER. The amendment will be received and printed.

APPOINTMENT OF ADDITIONAL JUDGESHIPS—S. 11

AMENDMENT NO. 42

(Ordered to be printed and referred to the Committee on the Judiciary.)

Mr. CRANSTON. Mr. President, today I submit an amendment on behalf of myself and Senator METCALF to the omnibus district judgeship bill (S. 11) to implement the recommendation of the Judicial Conference for the addition of 25 new judgeships on various circuit courts of appeals. I greatly welcome the coauthorship of the distinguished Senator from Montana (Mr. METCALF), who has worked hard over the years for the good of the Ninth Circuit Court of Appeals.

Our purpose is to bring the circuit judgeship bill before the full Judiciary Committee for consideration along with S. 11 and amendment No. 40 to S. 11 introduced by Senator MCCLELLAN on February 10.

Nearly 9 years have passed since Congress last enacted legislation to create additional judgeships for the U.S. courts of appeals. It is a tribute to the hard-working Federal judiciary that the Federal appellate courts have been able to keep up with an ever-increasing workload. But the situation in the ninth circuit, which includes California, Arizona, Nevada, Hawaii, Oregon, Washington, Idaho, Montana, Alaska, and Guam, has reached crisis proportions.

Federal appellate justice in the ninth circuit is subject to inordinate delays. In 1968 with 13 judges, the circuit terminated 919 appeals; in 1975, still with 13 judges, the circuit terminated 2,450 appeals but the backlog numbered 2,636. Delays of 2 years are not unusual.

Virtually everyone agrees on the need for more judges in the ninth circuit. As the report of the Senate Judiciary Committee on S. 729 observed last September:

> The history of the Ninth Circuit demonstrates that there is a compelling need for additional manpower and resources to meet the problems which have resulted from this phenomenal rise in caseload.

The Judicial Conference in its legislative proposal recommends 10 new judgships for the ninth circuit, a number which I fully support.

The ninth circuit has other problems. The large number of judges, the vast territory encompassed by the circuit and the huge caseload have eroded the effectiveness of the court over the years. There are several proposals to solve these problems—all of them having merit.

We believe it to be of utmost importance, however, to keep the issue of reorganization of the ninth circuit separate from the need to add more judges to the circuit.

We strongly urge the Committee on the Judiciary to act first on adding more judges to the circuit bench.

If we can supply the circuit with the judicial man and womanpower it needs, I am confident that a reasonable and satisfactory answer can be found to the question of realinement and reorganization of the circuit.

Our amendment, I believe, offers this option to the committee.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the RECORD together with a statement by Circuit Judge John D. Butzner, Jr., of the fourth circuit on the judgeship requirements of the U.S. courts of appeals submitted this morning to the Judiciary Committee.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 42

At the appropriate place in the bill, insert the following new section:

SEC. —. (a) The President shall appoint, by and with the advice and consent of the Senate, one additional circuit judgeship for the first circuit, two additional circuit judgeships for the second circuit, one additional circuit judgeship for the third circuit, three additional circuit judgeships for the fourth circuit, two additional circuit judgeships for the sixth circuit, one additional circuit judgeship for the seventh circuit, one additional circuit judgeship for the eighth circuit, ten additional circuit judgeships for the ninth circuit, one additional circuit judgeship for the tenth circuit, and three additional circuit judgeships for the District of Columbia.

(b) In order that the table contained in section 44(a) of Title 28, United States Code, will, with respect to each circuit therein, reflect the changes in the number of judgeships made by section 2 of this act, such table is amended to read as follows:

Circuits:	Number of judges
District of Columbia	12
First	4
Second	11
Third	10
Fourth	10
Fifth	15
Sixth	11
Seventh	9
Eighth	9
Ninth	23
Tenth	8

JUDGESHIP REQUIREMENTS OF THE UNITED STATES COURTS OF APPEALS

Nearly nine years have passed since the U.S. Congress last enacted legislation to create additional judgeships for the United States Courts of Appeals. That legislation was enacted on June 18, 1968 and included nine additional judgeships in five courts of appeals. The basis for that law was a comprehensive study conducted by the Judicial Conference of the United States in 1966 and early 1967.

Since 1968, the Judicial Conference has conducted two quadrennial surveys of the judgeship need of the eleven courts of appeals. The first of these was completed in 1971 when the Conference recommended the creation of 10 additional judgeships in six courts of appeals. This recommendation was updated in 1972 to include eleven judgeships in seven courts.

In March 1974, the Judicial Conference decided that the survey scheduled for that year should be underaken even though the legislative proposal growing from the previous study had not been enacted by the Congress. As a result of that action the 1974 survey was completed in September 1974 when the Conference recommended 13 additional judgeships in eight courts of appeals. Eleven of these 13 judgeships were the same as those previously recommended in 1972.

In September 1976, the Judicial Conference recommended that 16 additional judgeships be created for the U.S. Courts of Appeals. This figure included the 13 previously recommended plus three additional judgeships for the U.S. Court of Appeals for the District of Columbia. Of the 16 judgeships recommended at that time, only the three for the District of Columbia were recommended after a review of the current workload situation. The remaining 13 were not reviewed even though some of those recommendations were originally made on the basis of the 1970 quadrennial survey. However, in January of this year the Committee on Court Administration conducted a complete review of the workload situation in all courts of appeals. This review was the basis for the current Judicial Conference recommendation of 25 additional judgeships which is under consideration here today.

The Committee on Court Administration conducted its review in order to provide Congress with the most current Judiciary assessment of the judgeship requirements of the U.S. Courts of Appeals. If Congress were to act on legislation without these current requirements, it would be basing its action on Judicial Conference recommendations, which for some courts were, initially made nearly six years ago when the need for additional judgeships was not as great.

In conducting its current review the Committee on Court Administration developed its recommendations by interpreting and updating with 1976 data the analysis contained in your committee's report on S–286 in the last Congress. This procedure was used because a specific statistical standard which can be applied to all courts of appeals has yet to be established by either the Judiciary or the Congress.

While the Congress has not enacted legislation for additional judgeships in the courts of appeals in nearly nine years, we were pleased that the Senate did pass an Omnibus Circuit Judgeship Bill, S–286, during the second session of the 94th Congress. However, the seven additional judgeships included in that bill would not meet even the minimum requirements of the 11 U.S. Courts of Appeals. Just since the passage of S–286 in 1976, the workload of the courts of appeals has increased by more than 10%. Data compiled since July 1976 indicate that the increasing trend in workload is continuing. Since the enactment of the last judgeship bill in 1968, the filings in these courts have more than doubled while the number of authorized judgeships has remained constant at 97.

During this same nine-year period a number of measures have been taken to improve the productivity of the judges of the courts of appeals and prevent an astronomical increase in the backlog. A review of the statistics shows that these efforts have been successful in increasing the termination rate. Since 1968 the disposition rate in the courts of appeals has nearly doubled, rising from 8,264 cases terminated in 1968 to 16,426 in 1976. However, even with this increase in terminations the pending caseload has grown from 6,615 at the end of 1968 to 14,110 at the end of 1976, an increase of 113%.

In maintaining the impressive disposition rate the judges of the courts of appeals are working harder than ever before. The courts are continuing to look for methods and procedures which will aid in improving on this disposition rate. In order to handle the tremendous caseload most of the courts have found it necessary to limit the number of cases which can be permitted oral argument. In addition, time limits for argument in these selected cases have been shortened and the number of places of holding court reduced to save judge time. The courts have also adopted opinion publication plans which reduce the percentage of cases which will be decided by time consuming signed opinions. Senior judges and visiting judges are also making significant contributions in the courts of appeals. In 1976 these judges participated in more than 20% of the cases decided after oral argument or submission on briefs.

I realize that many of the operational changes have been beneficial and the courts, like all other institutions, must be open to more effective and efficient procedures, and I believe we are. However, there is a limit to the amount of change that can be tolerated while still maintaining the effective system of justice which we have today. In my opinion we have reached that limit. It is indeed questionable whether the current standard of productivity can be maintained unless we are provided with the necessary judgeships. The alternative is to downgrade the quality of our work to a greater degree than anyone, especially the appellate bench, would seriously consider.

NOTICES OF HEARINGS

REVIEW OF PROGRAMS FOR THE HANDICAPPED AND EXTENSION OF THE EDUCATION OF THE HANDICAPPED ACT

Mr. RANDOLPH. Mr. President, as chairman of the Subcommittee on the Handicapped, I announce that our subcommittee has scheduled hearings on review of programs for the handicapped and the extension of the Education of the Handicapped Act. The hearings will be held on Monday, February 28, 1977, and Wednesday, Mach 2, 1977, in room 4232, Dirksen Senate Office Building starting at 9:30 a.m.

Persons wishing to testify should contact Mrs. Patria Forsythe, professional staff member, 10–B Russell Senate Office Building (202) 224–9075.

SUBCOMMITTEE ON HOUSING AND URBAN AFFAIRS

Mr. SPARKMAN. Mr. President, I should like to announce that the Subcommittee on Housing and Urban Affairs of the Committee on Banking, Housing and Urban Affairs, will hold a 3-day hearing—February 23, 24, and 25, 1977—on S. 208, the National Transportation Assistance Act of 1977.

The hearing will be held in room 5302, Dirksen Office Building, and will begin at 10 each morning.

The subcommittee would welcome statements for inclusion in the record of hearings.

NOMINATION OF MAX CLELAND TO BE ADMINISTRATOR OF VETERANS' AFFAIRS

Mr. CRANSTON. Mr. President, as chairman of the Senate Committee on Veterans' Affairs, I announce that the committee will hold hearings on the nomination of Mr. Max Cleland as Administrator of Veterans' Affairs at 9:30 a.m., February 25, 1977, in room 318 of the Russell Office Building. At that time the committee will take testimony from the nominee and representatives of veterans organizations and any other interested members of the public wishing to testify. Persons wishing to testify or submit statements should contact Michael Burns, program director of the committee, at 224–9126.

ADDITIONAL STATEMENTS

LIFE IN ISRAEL

Mr. RIBICOFF. Mr. President, I have frequently spoken about the difficult problems facing those wanting to emigrate from the Soviet Union. Today, tens of thousands of people are trying to decide whether to emigrate. Their decision is a painful one. They have learned the high cost of emigration. Often it means being harassed and intimidated by the authorities, being isolated from friends and fellow workers, enduring lengthy delays and bureaucratic foulups, and sometimes imprisonment. Even after going through the anxiety and the suffering, they know there is only a faint hope of actually receiving permission to leave the Soviet Union.

Unhappily, most people facing the emigration dilemma know very little about the life they will lead if they are finally allowed to emigrate. The lack of information, of realistic expectations about life in a new country, only complicates the already overwhelming decision of whether or not to leave the country they have spent their lives in. So a person facing this decision knows that if he applies for an exit visa he will very likely lose his job and his friends, be shadowed by the KGB and have to fight his way through the maze of emigrations

rules and regulations. All for the vague promise of a life in another country about which he knows nothing. As I said, it is almost an impossible decision for a person to make.

Moshe Giterman is one man who faced this decision and was lucky enough to receive permission to emigrate. Mr. Giterman went to Israel, where he has been living for 2 years. After adjusting to his new life, Moshe Giterman wrote a letter to those in the Soviet Union who are wrestling with the emigration decision now. Based on his observations and experiences in Israel, Mr. Giterman has tried to answer some of the major questions about life in Israel for those who may want to leave Russia. He writes about the economy and the chances of finding work, the threat of war in the Middle East, and social problems like adjusting to a new culture, speaking a different language, and a new relationship between Government and the individual.

Mr. Giterman's analysis of life in Israel is perceptive and informative. Mr. Giterman's letter was written in Russian, and it combines the perspective of a foreigner experiencing life in a new and different society with a native sensitivity and understanding of that new life. My feeling is that his letter will help remove some of the doubts and uncertainties about life in Israel, and in the West as a whole, for many of those deciding whether to emigrate. Mr. President, I ask unanimous consent that a translation of Moshe Giterman's letter be printed in the RECORD.

There being no objection, the translation was ordered to be printed in the RECORD, as follows:

TRANSLATION FROM THE RUSSIAN

(By Sandra Byrd)

DEAR FRIENDS: After having lived in Israel I want to tell you about this country. In Russia, we had very scant knowledge about Israel and I thought that soon after my arrival here I will be able to tell you all about it. However, each time I decided to write, I realized that my impressions were still too superficial. Now, I believe it is time to give you a full report.

I can imagine the conflicting information you are receiving from Israel—ranging from enthusiasm down to pessimism. As an eyewitness I want to help you to understand all the complexities of life here. All the complaints which I have heard, revolve around a few subjects: "bureaucracy" ("they are not concerned with us"; "they dont like us"); life is provincial, the state is a religious state, the language completely strange, difficult economic conditions, constant threat of war, difficulties in finding a job, etc. The enthusiasm is essentially based on the fact that the country is "Jewish" that "all are one family", there are many interesting people and "this is a land of the future".

Actually, all our conceptions of Israel were misconceptions of this country which is aware of its special role after 4000 years of Jewish history, replete with greatness and heroism but also with humiliation and great suffering. But, for a better explanation, I want to remind you of the more recent historical facts. In 1948, when Israel was born 600,000 Jews lived there. This groups guaranteed the leadership of economic and political life and a portion of these people became professional politicians. Another group worked the land and made the desert land bloom. Many came to Israel after their liberation from Nazi death camps and remained sensitive to human suffering. All these people were preoccupied with their efforts and too busy to notice the radical changes which took place and the growing up of a new generation. This, then, is connected with the difficulties which arose.

A disproportionately large part of population emerged, which was not engaged in productive work. The flow of American money so badly needed by the country did nothing to stimulate the entrance of a majority of employable people into the labor force. These difficulties multiplied greatly in 1951–1952 when the country absorbed within a couple of years over 800,000 Arab Jews which lent considerable strength to the country, but added to the number of people having no skill.

The native Israeli had no feeling of unbroken attachment to the Jews of the whole world and this led to the conception of "Jew" and "Israeli". Suffice it to say that many young Israelis got to know about the tragedy and the heroism of the Jews during the holocaust only after the Eichman trial.

Israel is a democracy and, perhaps, more of a democracy than many so-called "democratic countries". The older generation which created and strengthened the state is being replaced by a new generation, more educated, more dynamic, and more talented for solving the internal and external problems of Israel. I believe that the most important factor is that we have a large percentage of idealists rather than fanatics, for whom financial gains are not a decisive matter.

Starting with the complaint against "bureaucracy" in Israel: For us, who are used to life in the Soviet Union, it becomes difficult to let go of the idea that "they are against us and that we must fight "them". In the USSR, the individual plays a dual role in two spheres of existence. One sphere is his relationship to the official authorities, society at large, professional associations and the party, while the other micro-structure encompasses the family friends and close associates. In a democratic society, as a rule, there is no division between the larger and the smaller structure and there is no necessities for playing a dual role. By arriving in Canada or the United States, you become a Canadian or American Jew and you have to adapt to the specific life of the Jew in a non-Jewish, albeit, democratic country. This, too, entails certain dualities as you and your family live in the non-Jewish world while your feelings and heart is with the Jewish people and with Israel, especially when the latter is threatened by danger. Only by coming to Israel can anyone arriving from the USSR immediately acquire all rights of a citizen, plus a lot of advantages and benefits of a formal and informal nature which facilitate life in a new country. Therefore, though fully aware of the responsibility I am assuming, I want to advise each of you that everyone of you will find a place in this country and that you will certainly be taken care of in a material as well as in a moral sense. The results will, of course, depend on the character of the individual. The possibilities vary but, let me say, that "repatriation to Israeli indeed constitutes the only true solution."

Now to the misgivings expressed concerning "provincialism": The fact is that all serious literature and art requires the knowledge of Hebrew. There are some Russian newspapers and magazines but these are, for the most part unprofessional, or cater to a low taste, stressing primitive sex, etc. Persons of high education or secondary education who have a specialty, attend a network of Ulpans where they study Hebrew, but the fact is that at the end of the first half of the study (2½ months) less than half of those who started remain at the Ulpan and at the end of the course, there are only a handful. Although almost all immigrants know conversational, "everyday" Hebrew, but the literally Hebrew, including the language of the press, radio and television, cannot be understood by the new citizen of Israel which, naturally, results in his frustration. This relates also to the movies which are, as a rule, played in the English language and to the theater which is in Hebrew. Needless to say, there are family tragedies when the children, who learn Hebrew quickly, are ashamed of their parents in front of their friends when the parents make mistakes. You are familiar with this problem; in the USSR, the children were frequently ashamed of the parents "Jewishness." Thus, Israel's "provincialism" is fiction....

Let me tell you something about the economic and military situations. It is necessary to mention, at this point, the matter of the Jews emigrating from Russia but not going to Israel. This action on the part of the Soviet Jew constitutes in the opinion of many, a certain immorality with respect to those who fought for the possibility to emigrate to Israel and who are now behind Soviet bars. The immigration of the Soviet Jew to other countries than Israel also makes it harder for the Jews who are still in Russia to get permission to leave. There are a few cases where emigration to the West appears more appropriate. But in the majority of cases to leave Russia for another country to be dispersed there, is a grave mistake.

To name just some of the difficulties: 1. Instead of having your status regulated by the Government, as in Israel, in Canada or the United States you depend solely on local Jewish communities and, in this sense, you prolong your status of "not being a free person". 2. In Israel, in contrast to other countries, you will continue to work in your special field. 3. The process of being absorbed in your new country is much more difficult and, in fact, never ends, after you settle in a land where the Jews are a minority. 4. Finally, you are exposing yourself and your children to a future emigration . . . i.e. to Israel and will disturb, once more, your still unsettled life. Let us return to the economy; from the viewpoint of stand of living, Israel has a normal economy, where you figure ¼ to ⅓ of your income for food, ¼ to ⅓ for rent and from ¼ to ⅓ for other needs, transportation, entertainment and the rest, if there is any, for savings. Until recently this was possible but now, in analogy with the world-wide inflation, this standard can be kept up only when two people work in one family. Compared to your standard, you will immediately discover that you spend 80% of your income for food. Besides, there are no lines to stand in when shopping, the service is quite different, your children eat all kinds of fruit the whole year, not to mention the many automobiles owned by Jews from the USSR who never even dreamed about owning a car before their emigration.

However, in connection with the great defense expenditures, the standard of living in Israel is still lower than in some Western countries, where your apartment may have one more room or your car be half a meter longer. So that the question of the economy cannot be dominant in your decision "where to immigrate".

The military (defense) situation in Israel is a much more serious matter. Israel fought five wars with the Arabs, during its short existence. Although there is must hope now for peace, another war is not impossible. During the times when no fighting takes place, all young men and women join the army, after graduating from school. They serve about two to three years and all reserve personnel serve about 2 months a year. All this is due to the fact that Israel cannot maintain a large permanent army. As far as terrorist activities are concerned, they produce much less victims than does the crime going on in Western countries. A lot of people are killed in Israel in automobile accidents. However, we have almost no crime and my 16 year old daughter can walk at any time, day or night, with her girl friends

through the streets of Tel Aviv without fear. . . . Today Israel is strong, we have our own country, arms, and are ready to accept all Jews. Therefore, for obvious (or perhaps, not so obvious reasons) the Jews of Israel feel more secure than, for example, the Jews of South America, where the antisemitism grows before your eyes, or the Jews of the USSR about their futures, if and when a political upheaval occurs there. The placid life of the Jews in the USA may turn out to be an illusion and the need to emigrate may occur anywhere within one generation. Many American Jews are aware of that and, for this reason, they consider Israel their other homeland. The question arises whether it pays for the Jew emigrating from the USSR, to spend time at a "transfer station", knowing that he will have to go on, anyway.

As regards the immigrant children, they adjust much quicker to the new life than their parents and learn Hebrew much faster. Children are of great concern in Israel. A kindergarten teacher is a highly respected person and spends much time preparing for the profession. The children in Israel have no complexes about being Jewish and proudly call each other by their Hebrew names, Chaim, Shlomo, Sara . . . The educational system in Israel is based on the American method. School starts when the child is 6 and lasts for 12 years, with the last two years spent in studying special subjects such as, e.g. biology, literature, sociology, and so on. The teacher's salaries are rather high and they are highly respected. They are entitled to a paid sabbatical year every 7 years. Two foreign languages are part of the curriculum and may be selected (such as Arabaic, English, French, Spanish or Italian). Acceptance to a University is a relatively simple matter, with the exception of medicine where competition is stiff. The University education, as well as the scientific work are at a high level. The last three classes of high school as well as the college education must be paid for. However, there are many stipends and scholarships for those unable to pay or for families with many children. But, none of the aforedescribed can reproduce for you the atmosphere in which the children of Israel study. There are excursions, debates, recreational and educational activities. During all the years of Israel's existence, the highest attention was, and is being, paid to the needs of the children. For example, the design for housing begins with the childrens' facilities. As a result of all this, the children grow up normal, secure, without any "hangups", perhaps even a little too self-confident!

I believe that many of us are uneasy about the question regarding the role played by religion in the life of Israeli society. Contrary to popular belief religion is separated from the state in almost all matters. Only in three circumstances will you be affected by, or associated with, religious practices: with the exception of Haifa, there are no buses or trains on Saturday, although taxis are available. You will be in contact with religion in the matter of marriage and divorce (that is, depending on your temperament, once, twice or more, in your lifetime) and one time for all of us, at your funeral. The religious party in Parliament is repesented only at 17%. On Yom Kippur no one drives a car, and a considerable number of the population attends synagogue on holidays. Thus, you have all the chances you want to participate in religious activities, but nobody forces you to do it. At the same time, many of the Jews escaping from the aetheism of Russia who immigrate to Canada or the USA and depend on Jewish charitable organizations, pretend to be religious in order to please their benefactors.

Many of you will be interested to know about job possibilities in Israel and the opportunity to continue in your own professions.

During the last few years a goodly number of people came to Israel who have a higher education, so to speak, an academic education. The work difficulties exist almost exclusively among this group. However, every third or fourth physician or engineer working now in Israel came here from the USSR, during the past four or five years. This shows how much Israel has gained by the arrival of these new citizens. At the same time, it is clear that difficulties occur in finding work to fit one's particular specialty.

In Russia, we have specific needs for specialists which have no counterpart in Israel, and the people having such professions will doubtlessly have to change their qualifications. I am thinking here about engineers in the field of coal mining, and water transport (we simply have no rivers), lawyers and some other professionals. For these and other professionals, we have a developcd system of "re-education", courses of the most varied type which take two years during which time you will be completely supported by the Government. In the year 1975, alone, about 2000 newcomers studied new, and improved old skills in 80 courses (for example, in bookkeeping, kindergarten teaching, nursing, social work, dentistry, etc.) Furthermore, there are special absorbtion centers for engineers and physicians where, right after coming to Israel, together with the study of Hebrew, they will study their own specialty as it applies to Israel and the terminology in Hebrew relating to their profession. Another example concerns music teachers and musicians which arrived in Israel within the past few years. Music schools were opened in many places throughout the country. These were created primarily with the thought in mind of finding work for the newcomers, but the schools found such enthusiastic reception that the idea worked out to the satisfaction of all concerned. The more Jews will come here from the USSR, the faster the questions of employment will be solved. There is no contradiction in this.

I already expressed the thought that the difficulties of adjustment are in proportion with the Jewish awareness of the individual. Therefore, in preparing to come to Israel, it is important to acquaint yourself with Jewish history, religion, language and to educate your children in this respect. The Jew thinks independently and cannot remain a follower in a herd of sheep. Therefore, the Jew always strives to better himself whether it be in the Galuth or in his own country. In this sense, the phrase "we came to Israel" is not complete and ought to supplemented: "we came to Israel in order to . . . ."

The obcene resolution passed by the United Nations, branding Zionism a racist ideology, again proved that we cannot rely on general principles of morality and on no one but ourselves. To be a Jew when you are truly saturated with your heritage, is a great blessing. It is my full conviction that only here, in Israel, is it possible to really know and feel what it means to be Jewish.

I repeat again and again—please come here. Your future, the future of your children and their children is connected with Israel. We need Israel as much as Israel needs you. The part being played by the present newcomers is as important to the future of Israel and was the part played by the Russian Jews of a past generation—who were the architects of Israel.

Don't postpone your arrival here. To delay may mean foregoing a unique opportunity to return to Judaism and to secure a normal existence for future generations of our people.

Till we meet again . . . we are awaiting you!

LITHUANIAN INDEPENDENCE DAY

Mr. CASE. Mr. President, I wish to congratulate Lithuanians throughout the world on the occasion of the 59th anniversary on February 16, of the declaration of independence of Lithuania. The origins of the Lithuanian State go back to the 12th century and her cultural traditions continue to flourish—despite the heavy hand of Soviet rule.

As a member of the Helsinki Commission, I especially welcome the recent formation of a Lithuanian group to monitor compliance with the Helsinki accords in the U.S.S.R. On December 1, 1976, in Moscow, five Lithuanians—Viktoras Petkus, a religious activist, Etian Finkelstein, a jewish activist and physicist, Father Karolis Garuckas, a priest in an eastern Lithuanian village, Tomas Venclova, a noted poet, and Ona Lujanskaite-Poskiene, a writer and veteran of Soviet labor camps—announced the formation of a Lithuanian Helsinki group and denounced repressive measures against the Lithuanian Catholic Church—the banishing of two bishops, Julijonas Steponavicius and Vincentas Sladkevicius, to small villages outside their dioceses. Further repressive measures against religion in Lithuania were outlined in a new Soviet law subjecting religious societies to strict control by secular authorities, thereby violating the Helsinki accord.

Hoping to diminish the effectiveness of the group, the Soviet authorities "requested" that Tomas Venclova leave the Soviet Union.

In the near future, Mr. Venclova will appear before our Helsinki Commission as a witness and I look forward to his testimony to provide information on the newest developments in civil liberties and culture in Lithuania.

Once again, let me extend my best wishes today to all Lithuanian Americans and let us all work together so that Lithuanians wherever they are, will be free to practice their religious, cultural, and political rights as they see fit.

NEW YORK TIMES ON AG-LAND TRUST

Mr. McGOVERN. Mr. President, the February 16, 1977, edition of the New York Times has taken a thoughtful look at the Ag-Land trust proposal of the Continental Illinois National Bank in conjunction with the brokerage house of Merrill, Lynch, Pierce, Fenner & Smith.

It is a reasoned approach touching on both the social implications and the investment aspects of the plan. I commend the Times for the restraint and the careful approach it recommends. For the benefit of Senators interested and concerned with the issue, I ask unanimous consent that the editorial I have referred to be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE GREENING OF THE PENSION FUNDS

It should come as no surprise that imaginative marketers are about to sell a mutual fund whose assets are not stocks and bonds but farm land. The value of good farm land has easily tripled in the last six years, while the Dow Jones Average has remained soggy. Now Merrill Lynch and the Continental Illinois Bank are proposing Ag-Land I, a fund which would buy $50 million in farm land and lease it back to farmer

tenants. The units of Ag-Land I would be sold to pension funds, which already are the nation's largest investors.

This alarms Bob Bergland, the Secretary of Agriculture, who says that such land speculation "could drive the cost of land so high we won't be able to eat." Mr. Bergland feels that Ag-Land farms would compete unfairly with family farms. And obviously, if Ag-Land I is successful sold, there will be an Ag-Land II and an Ag-Land III, and still more marketers will arrive to tap the flow of pension-fund money, which is $12 billion a year.

Mr. Bergland's objections touch upon the larger issue of absentee corporate ownership and operation of farms. Several states have now passed restrictions on absentee corporate operations to try to protect their family farms. But while a number of large American corporations have made farm investments, so far the $300 billion pool of pension money has remained outside the area.

Normally pension funds are passive investors. They receive their dividends and interest without tax liability. If they are active investors, the businesses they own must pay the same taxes as competing businesses. A pension fund which owned a Chinese laundry would pay taxes on its operating income. Continental Illinois is asking that the taxes on the operating income on its Ag-Land farms be tax-exempt, or tax-deferred to the retiring pensioner, Ag-Land proposes to hold its farms at least five years, but if it wins the traditional tax exemption it could sell a farm and buy another without paying a capital gains tax on an appreciated farm. It is these distinctions from ordinary farming that have led Mr. Bergland to bring up the charge of unfair competition.

There are no restrictions on the types of business in which a pension fund may invest, as long as the investments are proper, prudent and consistent with Internal Revenue. So Mr. Bergland can only appeal to the I.R.S. to test the exemption of the proposed funds, and to the Congress, which will begin hearings on Friday. He is apparently responding to the emotional reaction of farm organizations.

We would like to see the Secretary develop his arguments. The Ag-Lands, and imitators no doubt even now on the drawing boards, might indeed provide capital to a capital-hungry sector, as their sponsors argue. They might also lead in less desirable directions. Five years ago, aggressive marketers brought out and sold $20 billion in real estate investment trusts. That relatively sudden infusion produced a flash boom-and-bust in the real estate markets. American agriculture is a major export and a sensitive part of the economy. Beyond the standard fears of the family farmer, we would like to know what the implications are.

THE NOMINATION OF PAUL C. WARNKE

Mr. SPARKMAN. Mr. President, at its meeting tomorrow, the Committee on Foreign Relations will consider the nomination of the Honorable Paul C. Warnke to be director of the Arms Control and Disarmament Agency, and to have the rank of ambassador during his tenure of service as director of the Arms Control and Disarmament Agency. Mr. Warnke is being nominated as an ambassador so that he can be chairman of the U.S. strategic arms limitation talks—SALT—delegation.

In view of the considerable interest in the Warnke nominations, I wish to share several letters and other material with my fellow Members.

The first item is a letter to Senator HUMPHREY from the Honorable Gerard C. Smith, a former Director of the Arms Control and Disarmament Agency and chief negotiator of SALT. I find one of Mr. Smith's comments of particular interest:

When one of my hats was temporarily donned by a White House aide, a result was that because of "executive privilege" the Congress was unable to receive testimony from that negotiator. I wonder if the proponents of severance of the two hats have considered that a repetition of that situation might be one result if their effort is successful.

Mr. Smith refers, of course, to former Secretary of State Kissinger, who, at the time of SALT I was national security adviser to President Nixon. Mr. Kissinger was heavily involved in the 1972 summit meeting which put into final form the SALT I Treaty on the Limitation of Anti-Ballistic Missile Systems and the interim agreement limiting strategic offensive arms.

Although the Committee on Foreign Relations made a strong effort to have Dr. Kissinger appear in open session in regard to the agreement, he never did so. "Executive privilege" was cited as the reason. Although Committee Members had a chance to pose a few questions to Dr. Kissinger at a large briefing for Members of Congress at the White House, and further chances to talk to him privately without a transcript, there never was comprehensive detailed questioning in public.

In retrospect, I very strongly believe that it is critically important that all persons involved in such negotiations should be available, without question or quibble, to the Congress for full questioning and exploration of the issues at stake. There is no question of Mr. Warnke's availability to the Congress if he serves as director of the Arms Control and Disarmament Agency and chairman of the SALT delegation.

The second item I am sharing with my fellow members is a staff memorandum prepared for me on the precedents for an Arms Control and Disarmament Agency Director also conducting negotiations. The memorandum proves that the dual responsibilities have been the rule, rather than the exception.

The third item is a letter of opposition to Mr. Warnke written by the Honorable Paul Nitze, a former representative of the Secretary of Defense on the SALT team and a former Deputy Secretary of Defense. Mr. Nitze also appeared before the Committee in opposition to Mr. Warnke. Members may be interested in knowing that, in the two hearings held on these nominations, the Committee on Foreign Relations spent more time hearing Mr. Warnke's critics than hearing Mr. Warnke himself.

I hope that Members will read Mr. Nitze's letter together with a response to Mr. Nitze's comments by Mr. Warnke.

One very important ingredient in reaching a decision on a nominee is the attitude toward him held by those he served. Accordingly, I am including a letter from the Honorable Robert M. McNamara and the Honorable Clark M. Clifford, both of whom performed distinguished service as secretaries of defense. Mr. Warnke served both men as Assistant Secretary of Defense for International Security Affairs.

Finally, I submit a letter to me from Carl Marcy on behalf of the American Committee on United States-Soviet Relations in support of Mr. Warnke. Included with the letter in a statement by the American Committee on United States-Soviet Relations in regard to the new administration's "proper concern with the great issues of disarmament, peace, and human rights." Also included is a list of the members of the committee.

Mr. President, I ask unanimous consent that these materials be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

WILMER, CUTLER & PICKERING,
Washington, D.C., February 14, 1977.

Hon. HUBERT HUMPHREY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HUMPHREY: Here are a few thoughts about the Warnke flap.

Having once worn the two hats of the ACDA Director and the SALT negotiator, I feel with special keenness the thrust of the suggested doctrine—one man, one hat.

I thought that Congress had solved that problem long ago. Section 2 of the Arms Control and Disarmament Act says: "The formulation and implementation of United States arms control and disarmament policy in a manner which will promote the national security can best be insured by a central organization charged by statute with primary responsibility for this field . . . It must be able to carry out the following primary functions . . . b) the preparation for and management of United States participation in international negotiations in the arms control and disarmament field." Section 22 says that the Director shall "under the direction of the Secretary of State have primary responsibility within the government for arms control and disarmament matters as defined in this act." The definition is: "The identification, verification, inspection, limitation, control, reduction or elimination of armed forces and armaments of all kinds under international agreement. . . ."

Section 34 provides that under the direction of the Secretary of State the Director "for the purpose of conducting negotiations concerning arms control and disarmament . . . may 1) consult and communicate with or direct the consultation of and communication with representatives of other nations or of international organization and 2) communicate in the name of the Secretary with diplomatic representatives of the United States in this country and abroad."

As I understand it, the President in designating Warnke to be Director and negotiator is merely trying to carry out the law. In addition to this legal interpretation it seems to me that the record shows that the two hat procedure produced results, witness Bill Foster's success with the NPT and my work on the ABM Treaty.

When one of my hats was temporarily donned by a White House aide, a result was that because of "executive privilege" the Congress was unable to receive testimony from that negotiator. I wonder if the proponents of severance of the two hats have considered that a repetition of that situation might be one result if their effort is successful.

Warm regards,

GERARD C. SMITH.

FEBRUARY 18, 1977.

[U.S. Senate Committee on Foreign Relations]

STAFF MEMORANDUM

ROLE OF DIRECTORS OF THE ARMS CONTROL AND DISARMAMENT AGENCY IN ARMS CONTROL NEGOTIATIONS

Directors of the Arms Control and Disarmament Agency (ACDA) have played key roles in the negotiation of significant arms control agreements since the Limited Test Ban Treaty of 1963.

The first Director of the ACDA, William G. Foster, who served from October 6, 1961, until December 31, 1968, was also the United States representative to what was then known as the Eighteen-Nation Disarmament Conference, now known as the Conference of the Committee on Disarmament. In that capacity, Mr. Foster laid the groundwork for the Limited Test Ban Treaty of 1963, and played the primary role until the final breakthrough when Averill Harriman was sent as President Kennedy's representative to Moscow to iron out details within a matter of days.

In the mid-60's, Mr. Foster and Adrian Fisher, his deputy, negotiated at the Eighteen-Nation Disarmament Conference the Non-Proliferation Treaty. Later the Assistant Director of the ACDA, James Leonard, who was United States representative at the Conference of the Committee on Disarmament from 1969 to 1971, negotiated the Seabed Arms Control Treaty and the Biological Weapons Convention.

Since the SALT process had not started while Mr. Foster was in office, he did not head a SALT delegation. However, his successor, Gerard C. Smith, was both Director of the ACDA and chief negotiator at SALT. The SALT negotiating team carried the process to the final point of the Moscow summit meeting in 1972.

When the SALT II process began in 1973, the Executive Branch decided to have a foreign service officer as the chief SALT negotiator. Accordingly, the Senate was asked to confirm U. Alexis Johnson as Ambassador-at-Large to serve as the SALT negotiator. This was the exception to the rule of ACDA involvement in negotiation of arms control agreements.

A subsequent arms control treaty, the proposed treaty on the limitation of nuclear peaceful explosions, was negotiated by Walter Stoessel who was also United States Ambassador to the Soviet Union. However, the operating chief of the delegation, which worked out the PNE Treaty, was Robert W. Buchheim of ACDA. The Standing Consultative Commission created by the SALT I ABM Treaty and interim agreement has had as chief commisoner an ACDA employee since its inception.

Congress specified in section 2(b) of the Arms Control and Disarmament Act that ACDA's authority includes "the preparation for and management of United States participation in international negotiations in the arms control and disarmament field." Similarly, section 34 refers to the Director's consultation and communication with other governments and international organizations "for the purpose of conducting negotiations concerning arms control and disarmament."

ARLINGTON, VA.,
February 7, 1977.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: When, some ten years ago, it became increasingly clear that the United States had become strategically and politically overcommitted in Vietnam, two schools of thought began to emerge as to the proper future direction of our national security policy. In one view, U.S. foreign and defense problems would continue, indeed might become more serious as a result of Vietnam, and could well call for even more emphasis and greater prudence than had been devoted to them in the past. In the contrasting view, the problems of the past had arisen largely from our own errors springing from over-emphasis on foreign policy, and particularly its defense aspects. Those taking the latter view believed our true strategic interests were limited to Western Europe, Japan and Israel; that the USSR presented our only military threat and that that threat could be deterred with forces less capable than those that had already been authorized. Therefore—so the argument ran—significant cuts could and should be made in a wide range of defense programs requested by the Executive Branch. It was hoped that the Soviet Union would agree to make certain parallel cuts, or at least reciprocate by restraining the pace of its own programs.

There can be no question that Mr. Paul Warnke, who has now been nominated to be both Director of ACDA and head of the U.S. SALT Delegation, has been one of the most active, vocal and persistent advocates of the second point of view.

In the last year or so, an important debate has arisen over the current state and future trends of the defense situation of the United States and of those countries whose interests are important to us and generally parallel to our own. I believe there is now a wide consensus that the evidence indicates that the situation could become serious at some time in the future, given a continuation of current trends. There are, however, differences of opinion as to how soon this may occur.

It is in this context that I suggest the nomination of Mr. Warnke be considered. I believe that his testimony before the Senate Committee on the Budget, given on March 9, 1976, is relevant; particularly the last few pages thereof. He there makes it clear that he regards the principal deterrent protecting Europe, the Middle East and Japan to be the probability that the U.S. would initiate, if necessary, the use of tactical nuclear weapons against the Soviet Union, with the further probability that this would escalate to the nuclear destruction of everything he considers worth caring for and planning about in the United States. He appears to advocate this policy concurrently with taking a highly cavalier attitude concerning significant cuts, not only in almost all elements of those U.S. conventional capabilities but also in those improved U.S. nuclear capabilities that might make such escalation less likely. In listening to his testimony at the time, I was reminded of Secretary John Foster Dulles and his short-lived doctrine of massive nuclear retaliation; in 1953, however, there was the critical difference that we then still had a virtual nuclear monopoly.

I am concerned that Mr. Warnke, who has spoken with such certainty on matters of military requirements, weapons capabilities, and strategy, may nevertheless not be a qualified student or competent judge of any of these matters. It is claimed that he is a superb negotiator. I am unfamiliar with his successes in this area. I recognize that he has certain abilities as an advocate, but at least with respect to defense matters, these do not include clarity or consistency of logic. I doubt that such advocacy has much chance of success against the strategy and tactics of the highly serious and competent Soviet negotiators.

It is proper that the President's nominations be supported unless there are strong reasons for not doing so. In this instance, however, I cannot bring myself to believe that the Senate would be well advised to give its consent to Mr. Warnke's appointment. This view is reinforced by the consideration that if confirmed, Mr. Warnke would serve not only as Director of ACDA, but also as head of the U.S. SALT Delegation, charged with the basic and detailed negotiations with the Soviet SALT Delegation at Geneva. I do not believe that, in today's circumstances, it is wise to have one man doing both jobs.

Sincerely yours,

PAUL H. NITZE.

CLIFFORD, WARNKE, GLASS, MCILWAIN & FINNEY, ATTORNEYS AND COUNSELORS AT LAW,
Washington, D.C., February 11, 1977.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: At the hearing on February 8th, I was given a copy of the letter written to you by Paul H. Nitze, dated February 7, 1977. The Committee asked that I provide a response.

Mr. Nitze has failed to understand my position with respect to national security policy. Nor do I believe that his letter adequately portrays the complexity of today's defense debate.

Initially, he states that two schools of thought began to emerge about 10 years ago as to the proper future direction of our national security policy. One view, he asserts, is that our foreign and defense problems would continue and might call for even more emphasis and greater prudence. He describes the other as holding that "the problems of the past had arisen largely from our own errors springing from overemphasis on foreign policy, and particularly its defense aspects." He states that I have been "one of the most active, vocal and persistent advocates of the second point of view."

Mr. Nitze premises are incorrect. He cites no evidence to prove any such polarization among those who have studied and commented about national security policy. I do not agree that he has correctly described prevailing trends of thought. If such a division were to exist, moreover, I would fall in the first group and not the second, because I agree that U.S. foreign and defense problems have continued and will continue and that they do indeed call for even more emphasis and greater prudence.

With respect to the corollary beliefs that he associates with the second purported point of view, I do not believe and do not maintain that our strategic interests are limited to Western Europe, Japan and Israel. I do believe, however, that these are the areas in which military threats to our interests are the least unlikely and that, accordingly, our military capability should be optimized to deal with such contingencies. I would think it quite apparent that the military threat to our interests is posed currently by the Soviet Union and certainly I do not contend that this Soviet threat could be deterred with forces less capable than those that have been authorized. I have, however, questioned the past years whether we were spending more money than necessary for weapons and forces that were not the best designed to cope with realistic defense needs.

Nor have I maintained that we should reduce our military capability in the mere hope that the Soviet Union would make parallel cuts or reciprocate by restraints in the pace of its own programs. What I have suggested is that, in the strategic arms field, we might endeavor to initiate a series of reciprocal restraints, whereby any initiative we might take would be abandoned if there were not a prompt and matching Soviet response.

I can only conclude that Mr. Nitze listened to and thereafter read my testimony of March 9, 1976 before the Senate Committee on the Budget with something less than his usual meticulous attention. Nothing in this testimony remotely suggested that I regard

the prospect of our first use of tactical nuclear weapons against the Soviet Union as constituting the principal deterrent protecting Europe, the Middle East and Japan. Nor do I advocate any such policy. Instead, (p. 203), I expressed my agreement with Mr. Nitze that what best stops the Soviet Union is that we have a conventional war capability. I stated that my belief that deterrence of an all-out attack on Western Europe is strengthened by the existence of our tactical nuclear weapons and the Soviet recognition that we would use them if needed to protect our vital interests. I submit that this view is completely consistent with established NATO doctrine and that, if it is incorrect, then our tactical nuclear weapons in Europe serve no purpose and should all be removed. I do not believe that they should all be removed because, though not the principal deterrent, these weapons constitute, as I stated in my testimony (p. 204), a part of "the spectrum of deterrents."

My recognition of the essentiality of U.S. conventional capabilities was further emphasized in my suggestion that a greater risk than an all-out attack might be a "quick Soviet strike" for a limited objective and that "we should review our defense structure and make sure we have the capability to respond to that kind of contingency." (pp. 204, 206). I believe that similar concern about the adequacy of our conventional forces in Europe was recently expressed in a report by Senators Nunn and Bartlett. My firmly held and expressed position, therefore, is premised on the need for a flexible response capability and is the antithesis of the doctrine of massive nuclear retaliation.

My testimony of March 9, 1976 did state my opinion that an intensive protracted conventional war in Europe would present a substantial prospect of the use of tactical nuclear weapons and that, if the war were to continue beyond that stage, it could escalate into a strategic exchange. I did not and do not present this danger in advocacy of any massive retaliation policy. In this regard, my testimony cited the necessity for being able to continue a conventional conflict. I would find it hard, however, to believe that anyone could maintain that a major war between NATO and the Warsaw Pact forces is certain to remain conventional indefinitely or that the NATO forces would be willing to accept defeat without resort to tactical nuclear weapons. Advocacy of that position is, in my opinion, inconsistent with effective deterrence and inconsistent with our national security. Surely Mr. Nitze does not intend to imply any such defeatist philosophy.

If you or other members of the Committee have any further questions, I will of course be happy to respond to them.

Very truly yours,

PAUL C. WARNKE.

FEBRUARY 14, 1977.

Hon. JOHN J. SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: During the recent confirmation hearings before the Foreign Relations Committee on the nomination of Mr. Paul C. Warnke, our names were mentioned and linked, and some question was raised as to whether Mr. Warnke had been directly responsible to us when we were Secretary of Defense and he was Assistant Secretary of Defense for International Security Affairs. The implication of the question thus raised was that others were better placed than we to assess Mr. Warnke's character, judgment, and abilities.

He was of course directly responsible to us during his period of service at the Pentagon, and we affirm without reservation that he is a man of impeccable character and integrity, intellectual force, and exceptional ability. He was a wise and thoughtful counselor, and he demonstrated efficiency and stamina in carrying a wide range of heavy responsibilities. In particular, the Senate should understand that the position filled by Mr. Warnke at the Pentagon is charged with advising the Secretary of Defense on the full range of political-military affairs and on the arms control problem in particular. Rarely, if ever, therefore has a nominee for the role of U.S. arms negotiator had a better grounding in the perspectives and problems of both defense and foreign affairs.

In the same hearings, one witness alleged that the arms negotiator has great latitude in determining the substance of the negotiations. While the quality of the negotiator and his team are of course critical elements, we know from our own experience that the President, the State and Defense Departments, and all other relevant agencies are continuously involved, intimately and completely, in the formulation of arms control policy and in the negotiating process.

We believe Mr. Warnke is an ideal choice to assume these important responsibilities, and we believe the President was wise in deciding to combine the tasks of arms negotiator and disarmament agency administrator in one man, for they are closely related if not interdependent. We urge his confirmation for both positions.

Sincerely,

ROBERT S. MCNAMARA.
CLARK M. CLIFFORD.

THE AMERICAN COMMITTEE ON
U.S.-SOVIET RELATIONS,
Washington, D.C., February 11, 1977.

Hon. JOHN SPARKMAN,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I write you as the Washington Representative of the American Committee on U.S.-Soviet Relations. After consultation with Members of our Executive Committtee, we want you and Members of your Committee as well as Members of the U.S. Senate to know of our support for Paul Warnke as Director of the Arms Control and Disarmament Agency as well as his nomination to the rank of Ambassador during his tenure of service as Director of that Agency.

As indicated in the attached statement which the American Committee adopted on December 8, 1976, our Committee is "filled with hope" because "the newly elected President has indicated a proper concern with the great issues of disarament, peace, and human rights."

The American Committee in stressing the importance of promoting "American security and world peace" by improving relations between the U.S. and the Soviet Union, "urges the new Administration to turn its back on past timidities and to restore both balance and initiative to American policy in this field of American-Soviet Relations."

We believe Paul Warnke, acting in accord with the frequently expressed views of President Carter and Secretary of State Vance, is an excellent choice to head the Arms Control Agency and to take principal responsibility in conducting SALT negotiations.

We believe the new Administration deserves a fair chance to see what it can do to conclude a SALT II agreement which will serve the national security interests of the United States. We believe President Carter deserves the chance to determine the direction of negotiations and select his negotiators. If the Senate does not like the results it can, in accordance with our constitutional procedures reject any treaties that may be negotiated. We recognize the important role of the Senate in the foreign relations of the U.S. We do not believe the Senate should, directly or indirectly, impose pre-conditions on the SALT negotiations.

Opponents of Mr. Warnke have expressed fears that he may be soft in his negotiating posture with the Soviet Union. There is nothing in the Warnke record to suggest such a stance. Furthermore, we are constrained to point out that the SALT negotiating team is made up of the Chairman, a representative of the Secretary of Defense, a representative of the Joint Chiefs of Staff, a representative of the Department of State, as well as a representative of the Arms Control Agency.

As the American Committee noted in its statement which is enclosed, we recognize "that there are realistic limits to the improvement of relations between Russia and the U.S. . . . Unilateral concessions are not a real issue. To our knowledge, no such concessions have been responsibly proposed, nor do we favor any."

We would appreciate it, Mr. Chairman, if this letter with its enclosures could be included in the record of the hearings of the Committee on Foreign Relations and, if you deem it appropriate, we would like to have this letter with its enclosures inserted in the Congressional Record.

Sincerely yours,

CARL MARCY.

STATEMENT OF THE AMERICAN COMMITTEE ON U.S.-SOVIET RELATIONS, WASHINGTON, D.C., DECEMBER 8, 1976

The United States is in a period of transition, and this Committee is filled with hope. The newly elected President has indicated a proper concern with the great issues of disarmament, peace, and human rights. We are encouraged by the selection of Cyrus Vance as Secretary of State.

For the past year or two American policy towards the Soviet Union has been in the main neglected, adrift, and devoid of initiative. During the recent electoral campaign, U.S.-Soviet relations suffered from much misinformation and misleading rhetoric.

The American Committee on U.S.-Soviet Relations, concerned only to promote American security and world peace through those relations, urges the new Administration to turn its back on past timidities and to restore both balance and initiative to American policy in this field.

The Committee recognizes that there are realistic limits to the improvement of relations between Russia and the U.S. We recognize that the Soviet leadership will have to make a contribution no smaller than our own. Unilateral concessions are not a real issue. To our knowledge, no such concessions have been responsibly proposed, nor do we favor any. We are under no illusions about the seriousness of the differences that divide the two governments, particularly in the field of policy toward third countries and regions.

The Committee believes that despite our disagreements, the relationship can be improved in important ways. We urge the incoming Administration to take advantage, wherever possible, of all openings for progress, including outstandingly in the SALT talks. First priorities should be given to halting the suicidal proliferation of nuclear and other weapons. The security of our country, as well as of our friends and allies, must always be a prime motivation in our relations with the Soviet Union. But security in today's world cannot be achieved by expanding armaments.

What is at stake here is the ultimate issue of international life today. We must make every effort to probe such possibilities as do exist. This will require not only discussion and negotiations, but a considerable measure of restraint, courage, and initiative on both sides. Indeed, the dangers of restraint are less than those of an all-out weapons race. We can better demand mutuality of the Soviet

Union if the United States is prepared to match whatever it may ask of others.

The many misstatements and exaggerations of the recent electoral campaign should be consigned to the past and their place taken by a sober scrutiny of the real situation in Soviet-American relations. It would be idle to underestimate the seriousness of the remaining problems. But it is simply not true that the United States in recent years has given everything and received nothing in return in its relations with Russia, or that the Soviet side has never lived up to its undertakings. A number of agreements arrived at in earlier years are working to the benefit of both parties. There is no reason to despair of reaching further agreements that would also reduce international tensions. What is needed, in the first instance, is a resolute abandonment of the stale slogans and reflexes of the Cold War; a recognition that this is a new era, with different problems and possibilities; and a determination not to be governed by the compulsions of military competition—compulsions which have seldom failed to lead to war in the past, and which in terms of the weaponry of this age are pregnant with the possibility of utter catastrophe.

Beyond these measures of restraint in the development of weaponry we should pursue constructive purposes such as mutually beneficial exchanges in trade, science, and culture; preservation of our common environment; raising living standards worldwide; and promoting the ideals of the Universal Declaration of Human Rights and the Helsinki Declaration.

The Committee will support and encourage the liberalization of emigration policies and the recognition of human freedoms, including the movement of individuals in all countries.

The American Committee on U.S.-Soviet Relations stands prepared to give the new Administration every possible help and support in any efforts it may make in the spirit of these considerations. In doing so, we are sure we will find ourselves in company with a great many other Americans.

The Committee believes that improving relations in these admittedly limited areas will gradually facilitate effective cooperation between the two superpowers in dealing with a wide range of universal life and death issues—issues that transcend ideology and are susceptible only to international solutions. Among these are environmental pollution, the population explosion, food production, developing new energy sources and controlling terrorism.

PROPOSED DIRECT EUROPEAN FLIGHT SERVICE FOR ATLANTA, GA.

Mr. TALMADGE. Mr. President, the Georgia house of representatives, now in session in Atlanta, has adopted a resolution which, for myself and my colleague, Senator NUNN, I bring to the attention of the Senate, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas, prior to leaving office, President Ford did not accept the Civil Aeronautics Board's recommendation of direct European flight service for Atlanta and directed that such Board give further study to the proposal; and

Whereas, the President of the United States may at any time request the recommendations of the Civil Aeronautics Board in order to take action on such recommendations; and

Whereas, the Civil Aeronautics Board may send its recommendations on this matter to the President at any time; and

Whereas, a person wishing to fly from Atlanta or other deep South locations to Europe must first fly to New York, and the same situation exists for return flights; and

Whereas, Atlanta has one of the busiest airports in the world; and it is patently unfair and discriminatory for Southerners and visitors to the South to be denied direct European flight service for Atlanta, which is the business and commercial center of the Southeast; and

Whereas, the lack of direct European flight service for Atlanta not only penalizes the traveling public, but all citizens of Georgia because it unfairly and unnecessarily impedes economic development in the State.

Now, therefore, be it resolved by the General Assembly of Georgia that the members of this Body do hereby urge the members of the Georgia delegation to the United States Congress to use their influence and persuasive powers to encourage the Civil Aeronautics Board to send its most recent recommendation of direct European flight service for Atlanta to the President of the United States for his immediate attention.

Be it further resolved that the Clerk of the House of Representatives is hereby authorized and directed to transmit appropriate copies of this Resolution to each member of the Georgia delegation to the United States Congress.

AMNER ZAVUROV VERSUS SOVIET UNION

Mr. RIBICOFF. Mr. President, I am deeply disturbed by a recent case involving a Soviet citizen who, after being granted permission to emigrate from the Soviet Union to Israel, has now had that permission withdrawn and been sentenced to 3 years in prison.

Amner Savurov was issued an emigration visa, but because of delays in the customs inspection of his personal belongings, his visa expired. Mr. Savurov had been assured by the Soviet customs officials that there would be no problem extending his visa. Nonetheless, an extension of his visa was refused. Since passports are taken by Soviet authorities at the time an exit visa is issued, Amner Zavurov was left with neither a valid exit visa nor his passport. For this offense, he was charged with not having a passport, tried without a lawyer, and sentenced to 3 years in prison.

Amner Zavurov is the victim of a Soviet "Catch-22." The charges brought against him were grossly unfair and his imprisonment is totally unjust. He is guilty of no crime except trying to obey the instructions given him by the Soviet authorities.

This is a clear example of the Soviet Union's insensitivity to the hardships imposed on individuals by the incomprehensible and unreasonable maze of rules and regulations concerning emigration. Soviet policies have made it virtually impossible to receive permission to emigrate and in this case, after Amner Savurov was granted that permission, the Soviet bureaucracy prevented him from actually emigrating.

It is crucial that the Congress continue to speak out clearly against the emigration policies of the Soviet Union and protest the unreasonable hardships facing individuals. The Soviet Union must understand that this issue will neither be forgotten nor allowed to fade away.

I have written a letter to General Secretary Brezhnev protesting the treatment of Mr. Savurov. Thirty-five other Senators joined with me in signing this letter. Mr. President, I ask unanimous consent that the text of our letter to General Secretary Brezhnev be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

February 15, 1977.

His Excellency LEONID BREZHNEV,
General Secretary, Central Committee of the Communist Party, Soviet Union, Moscow, U.S.S.R.

DEAR MR. GENERAL SECRETARY: We protest the unjust prison sentence just levied against Amner Zavurov for failing to have an internal passport that had been taken away from him by the Soviet authorities themselves.

Mr. Zavurov was tried without a defense lawyer, in violation of Soviet law. Mr. Zavurov had received permission to emigrate to Israel with his family, and had been issued an exit visa. The visa expired not through any fault of his, but because of delays in clearing his goods by customs officials who had advised him that his visa would be extended.

We appeal to you on humanitarian grounds to release Mr. Zavurov immediately and finally allow him to emigrate to Israel. It is unreasonable to prevent this man from emigrating after first granting him an exit visa. It is wrong to imprison him for attempting, in good faith, to obey the instructions given him by the authorities.

No constructive purpose can be served by a continued failure on the part of the Soviet Union to realize that this man has not committed any crime and is wrongly being punished. The world's regard for Soviet attitudes on human rights can only be hurt by the unjust imprisonment of Amner Zavurov. The insensitive attitude demonstrated in this case is another indication that the Soviet Union is ignoring its international obligations under the Helsinki Declaration of 1975. The actions taken against Mr. Zavurov will not help advance us toward our shared goal of reducing tensions between our nations. Instead, the continued imprisonment of Amner Zavurov will only cause new strain in Soviet relations with the rest of the world.

Sincerely,

Abe Ribicoff, Strom Thurmond, Robert Griffin, Daniel Patrick Moynihan, William D. Hathaway, Edward W. Brooke, John H. Heinz, Birch Bayh, Adlai Stevenson, Harrison Williams, Ernest Hollings, Henry M. Jackson, Bob Packwood, Herman E. Talmadge, Wendell R. Anderson, and Frank Church.

Pete V. Domenici, Patrick J. Leahy, George McGovern, Howard M. Metzenbaum, Donald W. Riegle, Jr., Richard Stone, Thomas F. Eagleton, Alan Cranston, John A. Durkin, Lloyd Bentsen, Dennis DeConcini, Charles McC. Mathias, Jr., John Melcher, Claiborne Pell, Paul S. Sarbanes, Robert Morgan, Edward Zorinsky, Gary Hart, Richard S. Schweiker, and William V. Roth.

"THE PRESIDENTS" AND "SIGNERS OF THE CONSTITUTION" AND "SIGNERS OF THE DECLARATION" ARE BOOKS OF UNIQUE EDUCATIONAL VALUE

Mr. RANDOLPH. Mr. President, American citizens should be increasingly aware of the National Historic Landmark book series of the National Park Service—a distinguished contribution to a better understanding of our Nation's historical heritage. Because of their superb caliber and unique educational value, these informative works belong in every school and public library in our country.

Especially notable are three recently published Bicentennial volumes: "The Presidents," "Signers of the Constitution," and "Signers of the Declaration." The biographical sketches in these books constitute a virtual pantheon of our national giants.

Earlier titles in the series include "Lewis and Clark"; "Soldier and Brave"; "Propector, Cowhand, and Sodbuster"; "Founders and Frontiersmen"; "Colonials and Patriots"; and "Explorers and Settlers."

These handsomely produced works are keyed to a popular audience and are sold by the Superintendent of Documents at a very modest price, are eminently readable and also reflect the latest scholarship. They should stir pride in our heritage, reinvigorate interest in State and local history, and bolster historic preservation on all levels.

Based mainly on the sites and buildings across the land at which major events occurred rather than historical documents, these books provide a new dimension in the presentation of history. These practical guidebooks and permanent reference works to these places, are often located in our own communities. They afford an opportunity to appreciate our national heritage in a way that can never be realized by the reading of historical narratives and formal study.

The series allows us to trod the paths of our forebears; share their trials, tribulations, and joys; understand their way of life; and visualize momentous events. This creates a vital sense of immediacy and historical reality in a proper perspective.

The projected 34-volume series is the

outgrowth of field investigations carried out by National Park Service historians and archeologists in all parts of the United States. Each book opens with a brief background narrative that highlights the main historical trends of the period or theme being treated. The second part of the volume, the site descriptions around which the work is focused, comprehensively describes National Historic Landmarks and National Park Services sites pertaining to the particular phase of history being discussed.

Profuse photographs and maps enrich the narratives. The bibliographies and comprehensive indexes offer maximum reference value.

Future books will treat all aspects of our history, including archeology, exploration and settlement, political and military affairs, economic and cultural growth, architecture, and conservation of natural resources.

These volumes reflect tremendous credit on the National Park Service. Under the leadership of Director Gary Everhardt, Associate Director for the Preservation of Historic Properties, Ernest Allen Connally, and Chief of Cultural Resources Management, Robert M. Utley, the Service is ably fulfilling its mission of furthering the historical heritage of the United States.

Deserving special commendation is the small, hard-working staff in the Historic Sites Survey Division, Office of Archeology and Historic Preservation, that produces these books. Series Editor Robert G. Ferris and Assistant Editor James H. Charleton, the only permanently assigned personnel, are temporarily assisted by Photographic Editor Dorothy Chatfield Buffmire, Writer-Editor Polly Ann Matherly, and Secretary Patricia Sylvester Brown.

I reemphasize our appreciation to Bob Ferris, the able editor of the series, and his fine staff for their devotion to the history of our Nation and for the exemplary work they have compiled.

ERNEST VANDIVER, FORMER GOVERNOR OF GEORGIA

Mr. TALMADGE. Mr. President, during confirmation hearings on Attorney General Griffin Bell, considerable controversy was generated about the role of former Georgia Gov. Ernest Vandiver during racially turbulent years in Georgia and the rest of the South.

Misleading and sometimes irresponsible accusations were made against former Governor Vandiver to which he did not have adequate opportunity to respond.

There appeared in the February 8 edition of the Atlanta Constitution an excellent column by editor Hal Gulliver which discusses the situation in Georgia during the early 1960's and which goes a long way toward putting the Vandiver-Bell controversy in its proper perspective.

I bring this editorial column to the attention of the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial column was ordered to be printed in the RECORD, as follows:

ABOUT ERNIE VANDIVER AND GRIFFIN BELL

(By Hal Gulliver)

There are levels of heroism, often complex, never really simple once you get beyond the classic storming of the castle under fire, or perhaps the giving of your life to save a friend.

One of my own heroes is a fellow named Ernest Vandiver, a man whose name has been kicked around pretty severely in recent days during the confirmation hearings on Griffin Bell, now attorney general of the United States.

Bell's most grievous sin, it sounded at times, was ever to have been associated with this terrible Vandiver fellow, Bell serving as chief of staff when Vandiver was governor of Georgia from 1959 to 1963. Bell was at least a closet racist, the argument went, just because he was associated with Ernie Vandiver. The brothers Mitchell, Clarence and Parren, smallbore spirits both, and good ole Joe Rauh beat that hollow drum as best they could, talking of Vandiver as if he had invented slavery somewhere back about 1958 and tried to sell it to the rest of the nation.

Well, that's not really the way it was.

The brothers Mitchell were no doubt playing to their constituencies at the Bell hearings, empty rhetorical posturing all, and the worst thing on this front that can be said about Vandiver was that he probably played more than he should to his Georgia constituents when he was elected governor, declaring "No, not one," meaning not one black youngster in an otherwise white classroom.

The ironic thing about that is that in the context of that campaign year Vandiver was considered the moderate candidate and his political enemies were trying to picture him as the flaming liberal on school desegregation issues (which is why he ended up using the unfortunate rhetoric in the first place).

But the thing is, Vandiver wasn't in the position of posturing about on an issue so important, playing with rhetoric, as were the Mitchells and Rauh. He was the governor of a Deep South state at a tough time, the time when Georgia and states across the South were facing up in one way or the other to ending segregated public schools. There were governors and senators who chose to tear the bloody shirt, preach defiance of the law, exploit the issue for short-range political advantage. Vandiver was not one of those.

He was rather a moderate man who struggled hard to do what was right. The Sibley Commission, headed by banker John Sibley, held public hearings over the state, something that simply could not have occurred without Vandiver's backing. "If it hadn't been for the Sibley Commission there would have been all kinds of trouble in Georgia," said Warren Cochrane at the Bell hearings, Cochrane at the time the executive director of the Atlanta Negro Voters League.

In the end, only one man could make the political decision to keep the Georgia public schools open, though it meant racially integrated classrooms, and Ernie Vandiver made that decision with considerable courage.

In a political way, Vandiver was later punished for his campaign rhetoric when he ran for a U.S. Senate seat; black voters simply voted against him. And maybe that's fair enough. But it is also fair to observe that Vandiver had guts when it took guts to have guts and came down in the end on the right side of the toughest issue that any Southern governor faced in the late 1950s and early 1960s.

SUCCESSFUL FARMING'S SURVEY ON THE 1977 FARM BILL

Mr. McGOVERN. Mr. President, the Senate Agriculture Committee's first hearing on the 1977 farm bill is scheduled for February 22, 1977. Hopefully the end result will be a farmer's bill. The distinguished monthly farm magazine Successful Farming has conducted somewhat of a comprehensive survey of farmer reactions and hopes for the new legislation. Though subscribers to the magazine are heavily concentrated in Central Corn Belt States, the results of the survey should be of interest to all members of the committee as well as others in this body with farm constituencies.

Mr. President, I ask unanimous consent that the attached poll from the February 1977 issue of Successful Farming be printed in the RECORD.

There being no objection, the poll was ordered to be printed in the RECORD, as follows:

FARMERS TO GOVERNMENT: "LEAVE US ALONE—BUT STAY CLOSE BY"

ABOUT THIS POLICY SURVEY

(This report was prepared for Successful Farming by Harold Guither, Extension economist in Public Policy at the University of Illinois. He has won professional honors for his work on regional Extension project, "Who will control U.S. Agriculture?" Results of this study are based on a mail questionnaire sent to 1,500 Illinois farmers. Nearly 500 responses were received. A similar survey in Indiana showed farmers there hold nearly identical views on farm policy.)

Farmers hold diverse and sometimes inconsistent opinions on the key farm and food issues in 1977. Most producers want government out of farm production and marketing. But they also feel farmers may need some government help to survive periods of low prices or bad weather, an Illinois survey shows.

One farmer wrote, "Farmers will have to have income at or near parity levels or eventually food production will be severely restricted. Farmers have been absorbing more losses than they should."

But the desire for freedom to make decisions and support for the free market system is strong in many farmers' minds.

Wrote one farmer, "Government meddling in farm product pricing, exports and imports only hurts a healthy producing farming community."

WHAT IS FAIR?

Price is not the only factor that controls income, but it's mighty important. The table below is an average of many views of what farmers think would be fair in 1977. It's an indication of how farmers appraise their costs and needed returns.

Target prices and loan rates were a key part of the 1973 Act and will be again this year. The average target price recommended for corn was $2.21 compared to $1.57 in 1976. For wheat, $3.06 was recommended compared to $2.29 in 1976. Farmers were divided on how target prices should be established. A majority favored starting with current target prices for production items, including labor and interest, then building a program from there.

GOVERNMENT'S ROLE IN FARMING

The market-oriented policy of the past few years was designed around market prices to guide farmers in their production decisions. About 86% of the farmers agreed market prices should be permitted to move up and down without government interference. However, 50 percent also felt the government should continue using tax revenues to keep prices from dropping low when supplies are large.

A key issue in 1977 is stockpiling grain. Only 27 percent of the farmers favored the government holding grain reserves to stabilize farm and food prices.

About 24% of the farmers favor eliminating all government price and income support programs.

HOW MUCH SHOULD GOVERNMENT BE INVOLVED IN FARM PRICES?

[In percent]

	Agree	Disagree	No opinion
Let market prices guide farmers' production decisions without direct Government interference	86	9	5
Government should help support prices and income when supplies are large	50	36	14
Government should hold reserves to stabilize farm and food prices—buy when prices are low and sell when they are high	27	66	7

What are your views on acreage set-aside programs?

[In percent]

	Acreage set-aside
Should be available if needed	45
Should not be used	32
Store grain on farms from specified acreage under government finance storage programs. Such grain could not be sold unless supplies were short and price rose to a certain point	19
Other	4

What should Congress do about future farm legislation?

[In percent]

Revise the 1973 Act by raising target and loan prices closer to the cost of production	55
Eliminate all government programs	24
Keep the present law as it is	8
Let the law expire, go back to earlier prices and income support laws	3
No opinion and other responses	10

FARM EXPORTS AND IMPORTS

Farmers support an aggressive export program. Expressing strong resentment over export limitations, one farmer wrote, "Make it constitutionally illegal to meddle with marketing of farm products."

WHAT ARE YOUR VIEWS ON EXPORTS AND IMPORTS?

[In percent]

	Agree	Disagree	No opinion
Government should not restrict exports under any circumstances	57	35	8
Government should not restrict imports under any circumstances	20	69	11
United States should not make any export agreements; let each country buy as they need commodities and as we have them available	65	29	6
United States should let Japan get all it wants	60	29	11
The Russian agreements to buy at least 6,000,000,000 tons of grain and allow them to buy more is in farmers' best interest	69	18	13
United States should set up export agreements with all major buyers to assure a steady market for our farmers and stable supply for our consumers	69	19	12

FOOD AID

WHAT ARE YOUR VIEWS ON FOOD AID?

[In percent]

	Agree	Disagree	No opinion
Discontinue all Public Law 480 export assistance	43	44	13
United States should provide food aid only to countries suffering from disaster such as droughts, floods and earthquakes	63	32	5
Government should use tax funds to help buy food for low-income people	56	32	12
Food stamps and other Government assistance programs help strengthen farmers' markets	43	40	17

FARMER PLEA: "FAIR PROFIT; NO EXCESS REGULATION"

There's the old saying, "You can't have your cake and eat it, too." But that's what it's going to take to satisfy all farmers who responded to our Planning Issue Questionnaire, November 1976, "Which Way With Farm Policy?"

We received over 1,000 letters along with 3,000 responses. It's pretty clear farmers, as everyone else, don't agree, either, on what the new farm bill to be drafted by Congress this year should contain.

These two proposals stand out:

1. "We must have some guarantee of production cost either through higher target prices or loan rates."

2. "We want greater stability but aren't willing to accept more government involvement to get it."

The two pleas are somewhat contradictory—government guaranteed cost of production, yet less government involvement.

To farmers' credit, the same people don't ask for both. They realize they can't have it both ways.

The point though: It seems there are farmers who want less government involvement than there are farmers who want price guarantees.

Both stability and higher loan rates are supported by Secretary of Agriculture Bob Bergland.

The specific questionnaire results are at right; highlights include:

67.6% feel prices fluctuate way too much.

34% feel 10 percent yearly fluctuation is about right; 31.8 percent feel a 20 percent price movement is acceptable.

56.3% feel they make more money with moderately stable prices, or the 10–20% range.

Even though most want more stability, 73% said they won't accept lower commodity prices to get it.

49.1% said a grain reserve would help stabilize prices, 37.1% said it wouldn't, 13.8% didn't know and 69.1% said such a reserve, if built, should be in the control of farmers who hold the grain.

41.8% would favor a government program to stabilize prices only if it doesn't lower prices, 60.6% do not favor a farm bill to create stability if it means more government involvement and 24.7% said they don't want any farm program at all.

The average *high* corn selling price received in 1976 among respondents was $2.65, the average *low* selling price was $2.31. The actual average U.S. farm corn price during 1976 was $2.50.

The high mid-month price was $2.82; the low $2.02; a range of 40% from the low price—twice what farmers called acceptable fluctuation.

The average high selling price in 1976 for soybeans among respondents was $6.34, the average low was $5.17. The average U.S. farm bean price during 1976 was $5.60.

The high mid-month farm price was $6.73, the low $4.46, a range of 51 percent.

The average high wheat selling price in 1976 among respondents was $3.35, the low was $2.82. The average U.S. farm wheat price last year was $3.15.

The high mid-month farm price was $3.66, the low $2.39, a range of 53 percent.

Average high hog price received during the year was $49.16, low was $32.65. Average high cattle price was $38.40, low was $33.62.

PRICE DOWNTURN

Letters accompanying the questionnaire reflected market downturns the last half of the year. Reactions varied from "we need immediate help from the government" to "if the government will leave things alone, supply and demand will eventually straighten out this market."

Others accused the government of virtual betrayal of the American farmer.

YOUR ANSWERS IN BRIEF

Here's a profile of those answered the questionnaire. The husband answered 87.4 percent of the forms, the wife 1.8 percent, both 5.3 percent.

3.4 percent were less than 25 years old; 20.7 percent between 25–34; 20 percent between 35–44; 24.8 percent between 45–54; 19.5 percent between 55–64 and 11.6 percent over 65.

Only 3 percent did not graduate from high school, 41.4 percent did graduate from high school, 26.5 percent had some college, 19.8 percent were college graduates and 9.1 percent had done some graduate work.

61 percent were over $40,000 in farm income.

76 percent sold some cash grain; 14.4 percent fed cattle; 19.7 percent had cow-calf; 20.9 percent had hogs; 10.6 percent were dairy.

Nearly every state was represented though most were from the Midwest. A private research firm tabulated the results.

The questions are about price stability.

Do you think farm commodity prices:

Fluctuate way too much: 67.6%. Don't fluctuate enough: 5.3%. Flucutuate just about right for me: 27.2%.

2. What is the maximum corn prices, for example, could vary in a year and still be called "stable" in your opinion?

$2.80 and $1.92, 35%: 7.6%.
$2.80 and $2.24, 20%: 31.8%.
$2.80 and $1.96, 30%: 5.5%.
$2.80 and $2.52, 10%: 34.0%.
2.80 and $2.10, 25%: 20.4%.
Other: 5%. None: 1%.

3. Do you think you make more money with:

Very stable prices: 23.8% Moderately stable prices: 56.3%. More widely fluctuating prices: 19.9%. Don't know: .1%.

4. Most experts say to achieve price stability would mean a reduction in price from today's grain price levels. Would you accept a lower price in exchange for more market stability?

Yes: 15.0%. No: 73.0%. Not sure: 11.9%. Don't know: .1%.

5. If yes, how much of a price decrease would you accept?

1–5%: 36.6%: 6–10%: 49.6%: 11–15%: 10.7%: 16–20%: 3.1%.

6. How would you describe your attitude toward wide price fluctuation?

OK with me because there's more profit opportunity: 14.7%. OK with me, markets are supposed to fluctuate: 18.2%. Worries me because you can't plan ahead for a selling price with any consistency: 32.1%. Makes me think someone's manipulating the markets: 46.4%. Makes me think I've lost money every time price drops: 4.1%. Don't think about it one way or the other: .6% Don't know: .1%.

7. Do you feel establishing a grain reserve would help stabilize commodity prices?

Yes: 49.1%. No: 37.1%. Don't know: 13.8%.

8. Who should control a grain reserve?

In farmers' hands and under their control: 69.1%. Controlled by commodity credit corporation: 2.3%. An international grain reserve pool of all countries: 6.2%. A combination of farmer-held and government-held: 23.0%. Other: .3%. None: .1%.

9. Do you think farm prices fluctuate more under:

Democratic administration 7.4%. Republican administration: 43.3%. About the same under both: 48.6%. Don't know: .7%.

10. What's the biggest cause of commodity price fluctuation?

Unpredictable foreign sales: 21.0%. Manipulation by big grain companies: 34.2%. Manipulation by Boards of Trade: 29.9%, Philosophy of "let supply and demand prevail" by USDA: 14.1%. Unpredictable crop and livestock supply: 24.4%. Other: 4.3%. Embargo: .4%. None: .1%. Don't know: .4%.

11. Would you favor a farm program which tended to put stability into the market?

Yes, definitely. 21.3%. Only if it doesn't mean lower prices: 41.8%. No: 12.2%. Don't want any farm program: 24.7%.

12. How would you feel about a new farm bill which created more market stability—but called for more government involvement in agriculture?

Favor it: 7.5%. Favor it if government involvement was too great: 31.8%. Would not favor it: 60.6%.

13. What was the highest price you sold each commodity for this year?

Corn: $2.65. Soybeans: $6.34. Wheat: $3.35. Grain sorghum: $3.83. Fed cattle: $38.40. Fed hogs: $49.16.

14. What was the lowest price you sold each commodity for this year?

Corn: $2.31. Soybeans: $5.17. Wheat: $2.82. Grain sorghum: $3.35. Fed cattle: $33.62. Fed hogs: $32.65.

15. What kind of effect do you feel government policy has on your selling prices?

Helps: 8.8 percent. Hurts: 75.8 percent. Little or no effect: $10.3 percent. Both helps and hurts: 5.0 percent. Don't know: .1 percent.

These questions are about foreign trade policy.

16. Should the 1977 Farm Act contain a provision prohibiting government imposed export embargoes?

Yes: 73.6 percent. No. 18.7 percent. Don't know: 7.5 percent. In emergency: .3 percent.

17. Would you, under any circumstances, favor export controls in U.S. to avoid food shortages here?

Yes: 45.7 percent. No: 45.2 percent. Don't know: 9.1 percent.

18. Would you favor withholding food shipments to the OPEC countries until a more favorable oil import price to the U.S. is negotiated?

Yes: 44.7 percent. No: 40.8 percent. Don't know: 14.4 percent.

19. Our Food for Peace PL 480 (easy-credit and giveaway) are a small percentage of total export shipments. Would you favor increasing PL 480 shipments?

Yes: 31.7 percent. No: 51.9 percent. Don't know: 16.3 percent. To some countries: .2 percent.

20. If there is a sudden drop in export shipments creating lower prices here, would you favor government subsidization of private grain companies to allow them to meet lower world market prices?

Yes: 19.8 percent. No: 66.0 percent. Don't know: 14.3 percent.

21. Should we continue to restrict imports of farm products, such as dairy products, canned hams and beef?

Yes: 75 percent. No: 15.8 percent. Don't know: 9.2 percent.

22. Who really sets agricultural policy?

White House: 35.8 percent. Secretary of Agriculture: House and Senate ag committees: 44.8 percent. Big agriculture companies: 19.0 percent. Farm organizations: 3.0 percent. Labor unions: 1.8 percent. Other: .6 percent. None: .4 percent. Don't know: .7 percent.

23. Do you belong to any of these major farm organizations?

Farm Bureau: 52.6 percent. National Farmers' Organization: 9.5 percent. National Grange: 3.8 percent. National Farmers' Union: 17.5 percent. Other: .9 percent. Belong to none: 25.2 percent.

24. Does your organization reflect your views regarding government farm policy?

Yes: 64.3 percent. No: 22.7 percent. Other: 3.2 percent. Don't know: 9.8 percent.

25. Is your organization effectively representing your viewpoint in Washington on laws affecting agriculture?

Yes: 59.4 percent. No: 24.4 percent. Other: 1.1 percent. Don't know: 15.1 percent.

26. What have you done to voice your opinion on farm policy?

Letter to Congressman: 47.6 percent. Letter to editor of magazine or newspaper: 13.4 percent. Active in my farm organization: 31.3 percent. Personal visit to Congressman or other policy maker: 15.0 percent. Nothing: 27.0 percent. Other: .6 percent. Don't know: .1 percent.

NATIONAL CHILD NUTRITION INFORMATION AND EDUCATION ACT

Mr. BAYH. Mr. President, on Friday, February 11, I joined my distinguished colleague from Minnesota (Mr. HUMPHREY) and six other Senators in sponsoring the National Child Nutrition Information Act, S. 720.

Every man, woman, and child in America is a consumer of food. The importance of a good diet to our health and well being cannot be ignored. This realization may do more to change our views on good health and how to attain it than any other medical information in our lifetimes and those of our children.

The legislation we introduced approaches good nutrition in a most logical manner by focusing on educating the youth of the Nation. This approach may enable us to raise a new generation with good eating habits.

The National Child Nutrition Information Act would establish a system of grants to State educational agencies to train food service and educational personnel on the principles of good nutrition. In addition, comprehensive nutrition education programs would be instituted by using the existing school lunch and child nutrition programs as a learning laboratory. Over 25 million children who participate in school lunch programs could be reached by the nutrition education grants provided by this legislation.

The logical starting point for good nutritional training is in the school where good eating habits can be taught in the classroom and then applied and practiced in the cafeteria. A variety of foods can be offered and made a permanent part of a child's regular diet. He or she can be introduced to fruits and vegetables never eaten before and at the same time learn of their importance to good health.

The benefits of improved nutrition are numerous. They include greater capacity for work, higher productivity, and increased motivation. When good eating habits are established, a person is less susceptible to disease and if illness does strike, the severity can be greatly reduced. It is estimated that poor children would have 10 to 30 percent higher mental achievement as a result of good nutrition. Pregnant women who practice good nutritional habits have less likelihood of experiencing fetal, infant, child, or maternal mortality.

As we realize how grave our battle is for good nutrition, the statistics show that we are losing. According to the Department of Agriculture's 1965 10-year good consumption survey, more, rather than fewer, people eat an unbalanced diet today compared to 10 years ago.

Our emphasis must change from dealing with health problems after the fact to increasing preventive care As we learn more about how we eat affects our health, the importance of this approach is becoming more evident.

In July of 1976, Senator MCGOVERN's Select Committee on Nutrition and Human Needs conducted hearings on diet and its relationship to diseases. The results were frightening to us all and contain a warning we can and must heed. Six of the 10 leading causes of death in the United States have been linked to our diet. For example, in the area of cancer several experts testified that 60 percent of cancer in women and 40 percent in men can be directly related to what they eat. As eating habits change, so do the incidents of various diseases. There is a direct correlation between the rate of obesity and cardiovascular problems. By learning how our diet affects disease, we can prevent many health problems from ever occurring.

The cost of our poor eating habits is staggering. Dr. George M. Briggs, professor of nutrition at the University of California at Berkeley told the Select Committee on Nutrition and Human Needs in 1972, that the cost of poor eating habits could be costing the United States one-third of the Nation's health costs. The elimination of obesity alone might be able to save the United States $24 billion currently spent on treatment on premature cardiovascular disease. It is ironic that people that overeat, as well as people who cannot get an adequate amount of food, are malnourished.

We need a comprehensive program to educate everyone in the country about the correct standards to follow in the area of food consumption.

The Senate Nutrition Committee issued a report entitled "Dietary Goals for the United States" in January of this year. This report discusses dietary changes over the last 50 years which are having harmful effects on our health. Too much of the wrong types of food is posing a very real threat to our society. The six dietary goals urge the following changes in our present food consumption:

Increase consumption of fruits and vegetables and whole grains.

Decrease consumption of meat and increase consumption of poultry and fish.

Decrease consumption of foods high in fat and partially substitute poly-unsaturated fat for saturated fat.

Substitute nonfat milk for whole milk.

Decrease consumption of butterfat, eggs, and other high cholesterol sources.

Decrease consumption of sugar and foods high in sugar content.

Decrease consumption of salt and foods high in salt content.

The advertisement of food on television, and how it affects all viewers, must be studied closely. Many times the advertisements are nutritionally misleading and even harmful to the public.

According to Leading National Advertising, Inc., about $1.15 billion was spent on food advertising, 28 percent of the total moneys spent on advertising.

Of this $1.15 billion, only one-fourth was devoted to nutritious groups of foods such as meat, fish, seafood, and dairy products. The vast majority of the advertising, 70 percent, was directed to promoting foods high in fat, saturated fat, cholesterol, sugar, and salt. This influx of these ads could be offset with sound nutritional training in the schools.

I am also concerned with the problem of nutritious meals for the elderly. Along with 24 of my colleagues I sponsored the National Meals on Wheels Program to deliver meals to the homes of the 3 to 4 million elderly Americans who are unable to obtain a balanced diet. Our elderly citizens face unique nutritional problems. As they grow older, their metabolism changes and a reduction in calories is needed. However, the same level of proteins, vitamins, and minerals is necessary. In many cases a limited income, lack of transportation, or little or no companionship, make it next to impossible for the elderly to feed themselves adequately, much less get a nutritiously balanced meal.

To sum up, Mr. President, it is imperative that the citizens of the United States recognize the importance of good nutrition. I hope Congress will take positive action on this legislation. It is a first step toward a positive health and nutrition policy for us all.

THE INAUGURATION OF PRESIDENT CARTER

Mr. TALMADGE. Mr. President, Atlanta magazine, which I believe is the finest Chamber of Commerce magazine in the United States, published a splendid special issue on the Inauguration of President Jimmy Carter.

The issue featured a profile of President Carter, an interview with Andrew Young, U.S. Ambassador to the United Nations, and an interview with former White House Press Secretary Bill Moyers by Atlanta editor, Norman Shavin.

I bring these articles to the attention of the Senate and ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

JIMMY WHO GOES TO WASHINGTON

(By Bruce Galphin)

Mr. Carter is going to Washington, but he's still Jimmy Who to three quarters of America—even among those who voted for him.
